

POTTERS MILLS

NEWS LETTER June 14, 1951

Dear Readers,

It's almost impossible to believe, but here it is the middle of June already. Three more weeks and we'll be celebrating July 4th; two more months and we'll be getting our luggage packed for Grange Fair; and then in September all the kids will be going back to—(let's not mention it.) I don't know what you might think about it, but the summer months are going too doggone fast for me. If you are planning on a trip this summer you had better soon scam, or the calendar will catch up with you.

Mr. and Mrs. Homer Neff and daughter Peggy, are making the most of this nice summer weather. They motored to Oklahoma City, Okla., to visit their daughter and sister, Agnes, who is a nurse at the hospital there. Mrs. Neff stated that they had a very nice trip as they traveled through the states of Ohio, Indiana, Illinois, Missouri, Oklahoma, Arkansas, Kentucky, Virginia, West Virginia and Texas. At times the weather was quite stormy and they were very close to a bad storm which raged through Oklahoma last week. We were pleased to hear that they had a safe journey as well as a nice one.

A daughter was born to Mr. and Mrs. Alvin Conner in the Dr. Black's Hospital of Lewistown last Friday. It was the proud parents' first child and has been named Catherine Lou. The infant weighed six pounds, three ounces at birth. You can keep your cigars, "Sambo," as we don't smoke, but we'll be looking forward to a carton of candy bars. Congratulations!

Misses Martha and Arlene Wyland spent a week's vacation at the home of their aunt and uncle, Mr. and Mrs. Clayton Hughes in Spruce Creek.

Mr. and Mrs. Lester McFadden motored to Harrisburg on a business trip last Monday morning. Don't forget the big festival which will be held at the Old Fort on June 23. It will be sponsored by the Potters Mills school hot lunch program. We certainly hope you will all attend as it will certainly be for a worthy cause.

We received a nice card from Jamesburg, N. J., last week, where Mr. and Mrs. Henry Barto and family and Mr. and Mrs. Pete Snare and family are now living. All of them are in the best of health and getting along fine.

Mr. Barto and Mr. Snare are employed at the farm, a gigantic dairy farm, a 1500 acre dairy, and is located midway between Philadelphia and New York City. 700 cows are kept on the farm and they are milked three times a day. Some of them give nearly 30 pounds of milk at a milking, which will make the average farmer in this vicinity envious of them. All of the cattle are scientifically fed and are given the best of care. The majority of the milk is sold, while the balance is made into ice cream. Some 6,000 chickens are kept on the farm which makes egg gathering a job in itself.

We had the pleasure to visit the Fongate farms recently and were amazed at the expansive area which they cover and the wonderful level land on which they are located.

We drove twelve miles outside of Jamesburg and saw the well where Molly Pitcher, Revolutionary War heroine, received water to give to the soldiers of that war. We also saw the battlegrounds where the Battle of Monmouth took place on June 28, 1778.

Mr. and Mrs. John Meeker and daughter Joan, visited Mr. and Mrs. F. F. Eckenroth of Northumberland, on Thursday evening. The Eckenroths accompanied the Meekers on their return trip as far as Millheim where they are going to spend several days with Mr. and Mrs. Robert Meeker.

Lewis Hackett, son of Mr. and Mrs. Abner Acker, is now stationed in Berlin, Germany. In case anyone desires to write to him his address is: Pvt. Lewis Hackett, R. A. 13343-111, Co. L, 3rd En. 6th Inf. Regt., APO 742, New York, N. Y.

Mr. and Mrs. I. W. Hennigh and family motored to Johnson City, N. Y., on June 4, to attend the commencement exercises of their daughter and sister, Ella, at the Baptist Bible Seminary. She returned home with them Tuesday and will be at home until June 16 when she goes to Camp Manahath for a week, and then she will teach daily vacation Bible school for six weeks near Williamsburg, Pa.

Oscar Reed and son Harry, of Reedsville, visited at the home of Mr. and Mrs. Albert Reed on Sunday.

Thomas Henney and daughter, Mrs. Anna Erb of Latrobe, called at the Kathryn Carson and H. E. Foust homes on Tuesday.

Miss Joan Meeker, daughter of Mr. and Mrs. John Meeker, participated in the annual spring recital at the Presbyterian church in Millroy on Thursday evening. She is a pupil of Mrs. David S. Nace of Millroy.

Mr. and Mrs. Blaine Workinger of Burnham, visited at the home of Mr. and Mrs. Homer Neff on Sunday.

Jonas Foust, son of Harry Foust, is now stationed in Texas. I do not have his address at this time but will report it in a later issue.

A few of us were discussing the American home the other day and how much it has changed in the last 25 or 30 years. I couldn't say too much about it 25 years ago as I had just made my appearance in the world at that time, but from what the others say it must have changed a great deal. Whereas children used to work at home all day to help their parents, they now work all day trying to get a quarter from them to go to the movies. Nowadays a person has trouble trying to keep them rounded up so that they will all be at home at meal time or in time to go to bed. Yes, as times change, so does our environment. The children now have many more places to go, better ways of getting there, and more things to do as far as amusements are concerned than they did a quarter of a century ago.

I often wonder which was the better life, the one we now have or the one years ago. I'll never forget the description of the present day home which Mrs. Bertha Henry, a teacher at Reedsville once told me. She said the present day American home is like a garage, we go there three times a day to get filled up and park there at night. Concerning a great many homes, truer words were never spoken.

Callers the past week at the H. E. Faust home were H. C. Gettig and Mrs. Wade Casey of Braddock, Thomas A. Smith of West Chester, Mr. and Mrs. Ellis Hennigh of Georges Valley, Mrs. L. J. Palmer and sons and Sammy Fleming of Huntingdon, and Ellwood Fohringer of Potters Mills.

Mr. and Mrs. Clair Richard of Lewistown, R. D., spent the past week at the home of Mr. and Mrs. Homer Neff.

Jonas Faust of Pottsville, spent the past week at the home of his aunt, Mrs. Laura Boal.

Just in case you were planning to listen and forget it, President Harry S. Truman will speak to the nation via radio tonight. No, I'm not rounding up votes for Truman, not at all, merely telling you about it in case you want to hear it.

Recent callers at the Laura Boal home were Mr. and Mrs. Charles Foust of Pottstown, James Foust of Centre Hall, and Mrs. Margaret Aukerman of Spring Mills.

Well, besides running out of pencil and paper, I've run out of news, so I'd better close for this time. I'll be seeing all of you again next week. Until then, take care of yourselves, don't work too hard, and save your news for the headlines.

Respectfully,
"Johnny" Wyland

Avoid Sore Feet In The Dairy Herd

The expression "no legs, no cow" applies particularly in the spring, reminds County Agent L. H. Bull. During the winter their feet grow out long. In fact, the expression could well be changed to "no feet, no cow". In any case, trimming feet that have grown out too long helps keep the cow longer in the herd. An animal that has sore feet can not very well get around the pasture and produces less milk. A dairy cow should stand up straight and strong on her feet and legs. Long feet may cause the cow to become weak in her pasterns and, worse, to be subject to hoof rot and other infections of the feet. Hoof nippers, rasp, chisel and hoof knife are the only equipment that is necessary to do a trimming job. The long points of the hoof should be trimmed back evenly and the inside edges of the underside of the hoof cut off. This will help the animal to stand squarely on her feet with the halves of the hoof spread apart and not close and overlapping. Throwing an animal down will enable a person to trim the underside of the feet more easily.

Tips For Cereal Insect Control Given

When you find a box of breakfast cereal with tiny brown beetles in it, throw away the infested food. Miss Helen S. Butler, home economics extension representative of Centre County, says this is your first step in getting rid of these insects. The next thing to do is heat the uninfested materials in shallow pans for a half hour in a 150 degree F oven, then put them in tightly closed containers. It is important that you sterilize all food containers. It would be wise to buy foods in small enough quantities so you can use them up quickly.

For walls and cupboard shelves, a 5 per cent DDT oil solution is a must. Apply the DDT with a paint brush, 1 to 2 inches wide. Be sure to get the DDT into cracks and crevices. If your cupboard has an enclosed space below the flour bin and other shelves, bore holes in the false bottom large enough so you can spray through and treat the space with DDT.

One precaution in using DDT: if any of the liquid comes in contact with your skin, wash it off at once with soap and water.

Avoid Farm Accidents During Haying Season

Haying operations mark the beginning of a season when farm accidents run high, reminds County Agent L. H. Bull. To assure safety and avoid lost time, check equipment carefully before haying starts.

Take special precautions to prevent falls from hay racks and hay stacks. Make sure that loft floors are in good repair and hay chutes guarded. Avoid making sudden, jolting starts and stops while loading, especially on rough ground. Never dismount from a tractor or mower while it is in operation.

For outside work carry a pitchfork over the shoulder and stick it securely in the ground when not in use. Don't lay it down and never throw a pitchfork. See that it is hung up or stored in a rack in the barn when not in use.

Most of the people we run across are baffled by their own ignorance.

Control Muskmelon, Cucumber Disease

Disease cause serious losses in many cucumber or melon fields every year. Assistant County Agent Clair D. DeLong says these losses can be prevented by planting treated seed in soil where these crops have not been grown for two years, and by following a spray or dust program.

Where treated seed can not be obtained, soak the seed in a 1-1000 corrosive sublimate solution for 5 minutes. After soaking, wash the seed at once for 15 minutes in running water. Dusting the dry seed with a seed protectant, such as Seesman, will prevent seed decay and damping-off. This seed treatment kills all seed borne diseases. A dust-spray schedule may be obtained from the County Agent.

Really Happy
"Remember what I told you last Monday, children—that you should all try to make someone happy during the week? Well how many of you did so?" asked the teacher. "I did," replied one boy brightly. "I went to see my aunt, and she is always happy when I go home."
