ACTIVE FISH AND OYSTER TRADE.

Staple Meats Fail to Drop With Decline of Live Stock.

FLOWERS RISE WITH THE MERCURY

OFFICE OF THE PITTSBURG DISPATCH, FRIDAY, February 8, 1888. About the only marked change in prices of market basket materials for the past week has been in poultry, butter and eggs. Poultry is reported as unusually scarce.

A dealer who has the best facilities for knowing said: "I have never known turkeys and chickens as well cleaned up through this and adjoining counties as now. I have been gathering up poultry, butter and eggs as far westward as 60 miles for Pittsburg markets these many years, and remember not the time when poultry was as scarce as now. On the other hand, potatoes and apples have not been as abundant and cheap for 25 years."

The upward turn of eggs a week ago gives no signs of reaction. Choice butter also continues

signs of reaction. Choice butter also continues to ascend. Retail markets are only affected so far as to bring growing firmness in prices. We so not change our quotations on butter and eggs, though jobbing rates have advanced since last week. Poultry commands better prices than a week ago.

At the Duamond Market butcher stalls prices are unchanged. As all live stock has been on the decline for the pass month, butchers ought to be happy over the situation, since retail prices remain unchanged. Beeves are close to \$1.00 per cwt. below prices of last month, but consumers pay the same. Butchers claim that with prices of a month or two ago they made with prices of a month or two ago they made little or nothing, and that now there is only a

little or nothing, and that now there is only a fair profit.
Florists have been disappointed over the results of the week. The cold snap, they think, has led to the postponement of prospective social events, and, as a result, has curtailed the demand for floral beauties. The same atmospheric influences that have upset plans for festal douges have raised the price of flowers, as will be seen by quotations below.

The demand for the product of sea and lake grows week by week. Trade in the line of select oysters and choice lake fish is reported good, especially in wholesale lines, for hotels, restaurants and neighboring towns. Fresh mackerel are scarce and high, more so than they have been for many years.

Much in the game line that was in full supply a week or two ago is now out, according to inexorable game laws. Venison has disappeared, but antelope comes to take its place.

There has not been a time since the war when fruits and vegetables could be procured at prices so low at this season of the year as now.

Following are latest retail prices of Saturday.

Wheat Opens Wild Under a Raid by the Shorts, but Reacts and Closes Comparatively Tame-Corn and Oats a Trifle Higher.

CHICAGO-Trading in wheat was active and a buoyant feeling was developed, though the extreme outside prices reached were not maintained. The opening was 234@234c higher than yesterday, and advanced very sharply, though notwithout intervening fluctuations, 234c more, then declined 2@234c, ruled firmer and closed about 24c higher than vesterday. Early in the day there was apparently very little wheat on sale and all offerings were snapped by the short interest, who covered very freely. Trading was general, and ou side orders very numerous, the covering being for outside as well as local traders. The short interest was well as local traders. The short interest was thoroughly frightened, and not until prices had scored a material advance was there any wheat of consequence offered. Near the top some large traders identified with the bull side sold fair quantities, one operator being reported as taking 1,000,000 of long wheat, and other large traders also sold considerable. This held the advance in check and a decline of 202% followed, after which the market was held in moderate range.

followed, after which the market was need in moderate range.

Corn was quiet most of the time though at times exhibited moderate activity. The feeling was comparatively steady and fluctuations did not vary much from yesterday. There was fair offerings early, which was absorbed largely by room traders, after which the market advanced 3c due partially to the strength in wheat, then eased off some and closed 1c higher than yesterday.

eased off some and closed %c higher than yesterday.
Oats were more active and firmer, advancing %c and closing steady at about outside prices.
Quite a good speculative trade was reported in mess pork. Opening sales were made at 5@ 7%c advance, and a further improvement of 1% 20%c easily followed. Later the market ruled weaker and prices receded somewhat irregularly 12% 20%c, but soon rallied again 15@ 17%c. Toward the close prices settled back 5@ 7%c, and the market closed quiet.
A fair trade was reported in lard, and the feeling was steadier. Prices ruled 2% 20%c higher, and the market closed steady at medium figures.

TWO MILLIONS IN ICE

No Danger of a Famine With the Arctic World to Draw From.

MAGNITUDE OF THE INDUSTRY.

Electric Makes Another Small Spurt and

Beats Its Previous Record. A WILD DAY AMONG OIL OPERATORS

Roughly estimated, Pittsburg consumes 200,000 tons of ice in the course of a year, beside supplying large quantities to the surrounding towns. The value of this trade, also roughly estimated, is \$2,000,000, divided between five large companies and a dozen or two of smaller concerns and individuals, some of whom run only one wagon, and whose sales amount to only \$200 or \$300 for the season. Nine-tenths of the business is done by the five companies in question, each of which has abundant capital and ample facilities for gathering, storing and distributing

the frozen luxury. THE DISPATCH representative visited the offices of two of these companies yesterday, his object being to find out if there had been any recent change for the better in the crop pro pect. The officials were in good spirits. The present cold snap, they said, has brightened the outlook to some extent, but they were not yet out of the woods. The weather was so uncerconclusion in regard to the probable supply. Generally the crop is harvested in February, but on several occasions this work has been de layed until March. This was the case in 1878 or 1879. It was too early to say what prices would be, but it was probable they would be slightly higher than last year. This was only a guess, however, and depended altogether upon the condition of the weather for the next month of

six weeks,
The gentlemanly clerk at the office of the Chautanqua Company said the season had been altogether too mild to suit his business, but he had known of worse ones. They were now cut-ting ice 12 inches thick on Lake Chautuqua. It was of the finest quality, being solid and clear was of the finest quality, being solid and clear as crystal. Ice harvesting was also in progress on many of the smaller lakes and streams in the northern part of the State, and in the frontier range of counties in New York. While the season was unusually late, he had no fears that the supply would fall short of the demand.

"There is no danger of an ice famine, then?"
"None at all," he replied. "An ice famine in this country is impossible. Should the supply fall in the United States there are always inexhaustible stores in Canada and Manitoba, where there has been no shortage for centuries But if the worst should come to the worst we could draw upon Alaska. We could get all the ice we wanted from those regions, but the cost of bringing it here would make the luxury come pretty high."

"Have you ever been compelled to draw supplies from Canada?"
"So far as I remember we have not. It is my impression that Canada ice has never been sold in Pittsburg. It is handled every year in New York and some other Eastern cities. Small quantities have been shipped here at different times from Rochester, Buffalo and Cleve-

Available supplies are somewhat less that usual at this season of the year, but they will be steadily increased from now on from one source and another until they are sufficient to meet any exigency that may arise from sickness or torridity next summer.

A Big Oil Deal. Standard Oil parties, a few days ago, bought out Munhall & Co., Brush Creek, consisting of leases covering several farms, with about seve producing wells and several drilling, at the rate of about \$180,000 for the whole. The deal shows the Brush Creek property is rapidly en-hancing in value as development progresses.

SOUTHSIDE SALES.

Property in Demand on That Side of the River.

There was a brisk inquiry at the real estate agencies yesterday for houses to rent, but sales reported, with an exception noted elsewhere in this department, were few and generally of

small properties.

Albert A. Alles, 134 Water street, placed a mortgage on a farm about four miles out the Perrysville road, of \$10,000, three years, at 6 per Perrysville road, of \$10,000, three years, at 6 per cent; also one on Brownsville avenue property, \$975, three years, at 6 per cent. He sold for William Richards lot 20x60 on Brownsville avenue, Southside, for \$80 cash; also for the Segnor heirs Nos. 44 and 46 Eleventh street, Southside, two frame dwellings, lot 40x80, for \$3,500 cash, J. S. Burkley, Esq., being the purchaser; also for Edwin Clapp to John Bradley small frame dwelling and two lots near Fifth avenue, Oakland, price, terms, etc., private; also lot No. 13 in Albert A. Alles' plan of lots, Brownsville road, Southside, size 40x50, consideration \$460.

Brownsville road, Southside, size 40x50, consideration \$400.
Black & Baird, No. 85 Fourth avenue, sold to William Trennier lot No. 33 in the Hay plan, on Rebecca street, above Penn avenue, East End, size 20x100 feet, for \$300, on easy payments. They report a wonderful inquiry for lots in this plan, and, on account of their close proximity to the cable road and Lawrenceville mills, expect a speedy sale and rapid enhancement in value.

pect a speedy sale and rapid enhancement in value.

James W. Drape & Co. sold a house and lot in Allegheny, near Taggart street. for \$3.000; they also placed a mortgage of \$6,000 on East End property at 5 per cent; also a mortgage of \$10.000 on a suburban residence at 5% per cent; also a mortgage on houses and lots in the Thirty-second ward, \$3.500, at 6 per cent.

Samuel W. Black & Co., No. 99 Fourth avenue, sold to G. Grims, for \$425, a lot 20x100 feet, on the north side of Brinton avenue, in the Denny plan, Thirteenth ward; also a lot 20x122 feet, on the north side of Forbes street, near Chestnut street, and adjoining the Turner Hall property, for \$3.100 cash.

ANOTHER BIG DEAL.

ANOTHER BIG DEAL. Sixty Thousand Dollars Invested in Ground for Residence Purposes.

The sale of a large block of unimproved property in the upper part of the city was closed a day or two ago by James W. Drape of Co., who were only yesterday at liberty to make the announcement, but were still under pledge not to make public the purchaser's name or identify the locality. The deal is bona fide, however, the papers having been signed, mioney paid and deed delivered. The consideration was \$60,000.

The purchaser contemplates the erection on the purchaser sentences of fine residences.

this property next spring of a row of fine resi-dences which will tend to improve as well as ornament that part of the city. The projected improvements will necessitate the outlay of \$200,000 or more.

SOMEWHAT MIXED.

Stock Dealings in Wall Street Dominated by Bear Influences-Grangers and Southwesterns the Weak Spots-Nearly Everything is Lower-

Bonds Ensier. NEW YORK, February 8.-The stock market was somewhat mixed to-flay, but the general drift of prices was in the direction of lower floures, and the majority of stocks are fractionally lower than last evening. There was a marked sentiment in favor of a reaction this morning, and the arbitrage dealers were con-spicuous sellers of stocks at the opening, which gave a weak tone to the list at the outset, and though the rest of the list seemed to be in-

gave a weak tone to the list at the outset, and though the rest of the list seemed to be inclined to follow the example of the London favbrites, a few conspicuously strong upward movements in the specialties, with which Richmond and West Point joined, prevented during the forenoon any positive declines.

The weak spots on the list were the grangers and the Southwesterrs, the disturbing inflence being in the shape of telegrams from Chicago that the Burlington had withdrawn its order to put in force the lowa tariff, though the other roads would conform to it, and reports that the Presidents were slow in signing the new agreement was also used against values. A heavy failure in Boston was made the occasion of renewed selling of the stocks in which that center is interested and Atchison, Burlington and New Engtand were sold off, the first two to a marked extent. The pressure on the Grangers became especially severe toward the close, and St. Paul preferred made the most marked decline of the day. The specialties were almost without exception strong and comparatively active, and the ease with which any of them may be advanced at present was exemplified by the rise in Nashville and Chattanooga this afternoon. It was put up from 85 1-12 to 87½ in about an hour's time. It was Pullman's weak day and it retired to 200½.

The opening was less active than yesterday and the losses from last evening's figures extended to ½ per cent in the general list and with the heavy tone prevailing the business done sagged off slowly during the entire forenoon, but when the real attacks were made upon the market there was more animation and quite a weak spot in the early trading, while Cleveland. Columbus, Cincinnati and Indianapolis and Big Four with Chicago and East Illinois preferred were the strong features of the forenoon. Richmond and West Point gave way in the afternoon, but Chattanooga became the leading strong stock, but in the last hour St. Paul preferred dropped suddenly while the whole list declined fractionally, and after a s

market closed heavy and active, with most of the list lower.

Railroad bonds were not very heavily traded in, the sales of all issues reaching only \$2,100.

900, and the beavy tone of the share list was seen in some directions, although most of the list was still strong. There were a small number of issues traded in, and no marked movements were made, though Richmond and Alleghany firsts certificate were specially active, as were also the Chesapeake and Ohio currency certificates, and they furnished \$243,000 and \$119,000 to the day's total respectively.

RUSSIAN PETROLEUM.

A Syndicate Formed That Will Comme Operations This Month.

It is stated that the Nobel firm bas entered into an agreement with other important petro-leum producers with a view to raising the price of this product, and that the syndicate will of this product, and that the syndicate will commence operations in the month of February. It appears that the Rothschild firm has already secured fully one-half of the Russian petroleum trade, and exports over 2,500,000 poods of mineral oil yearly by rail. The total consumption of Russian petroleum in the country now amounts to about 20,000,000 poods, and the value of the export trade is now estimated at 12,000,000 poods.

Custom House authorities tend to show that the little port of Milazzo is acquiring considerate. In 1887 the general trade amounted to upward of 8,000,000 lire, which showed an interesse of about 25 per cent in comparison with the previous year. The imports stood at alout 4,000,000 lire, mainly consisting of petroleum, colonial products, machinery, cement, coal and wheat. The export trade of the place is exclusively limited to wine, oranges and lemons. The imports from Germany comprise rice and machinery, while Great Britain's trade bears principally on coal, tissues and metals.

Brazil a Great No.

Brazil a Great Market for Flour. In consequence of the abundant harvest in Hungary, the exportation of flour from Fiume attained last year the unprecedented figure of nearly 1,750,000 double centner, as against 755,986 in 1887. The largest quantity—namely, 873,200 double centner—was shipped to Great Britain, double centner—was shipped to Great Britain, and showed an increase of 301,800 double centner in comparison with the previous year. The exportation to France also increased from 8,771 to 152,975 double centner, and the remainder was dispatched to Spain, Holland, Belgium, Portugal and Brazil. Of late years Brazil has become an important outlet for Hungarian flour, large quantities being also exported from Trieste.

How Things Are Done in Spain. There is a great field for improvement in agricultural implements in Spain. An English farmer says that it would make one smile to see the Valencian ride out to a field on his mule on the Valencian ride out to a neid on his mule, on which, also, is placed his double-mounted plow, a legacy from the Moors. It does not penetrate more than six inches, but it is quite sufficient for Spain. American manufacturers should look after this line. The consumption

of silk ribbons is steadily increasing. Philadelphia Stocks. Closing quotations of Philadelphia stocks, furnished by Whitney & Stephenson, brokers, No. 57 Fourth avenue. Members New York Stock Exchange.

CURED OF CATARRH AND DYSPEPSIA

By the physicians of the Catarrh and Dyspepsia Institute, 22 Ninth street. "For twenty-five years I have suffered from Catarrh, Dyspepsia, and a diseased condition of the liver, as few persons have. During this time I treated with and a diseased condition of the liver, as few persons have. During this time I treated with no less than thirty physicians not only with the most skilled physicians of this city, but also with the most eminent physicians of New York, Boston and Philadelphia, receiving no permanent benefit. My symotoms were as follows: Continuous headache, dizziness, catarrhal secretion in my head dropping into my throat and depositing its poison on my lungs; dry hacking cough and shortness of breath; had a terrible burning sensation in my stomach, belching of gas, also nauses and frequent vomiting. Had a weak, tired feeling all the time. My friends thought I could not live. I felt that life was a burden and death would be a relief. In this condition f began treatment with the specialists for these diseases, and as a result of their skill I became cured of the above conditions over one year ago, and the cure has remained permanent. Their consultation is free to all, and may result in good to you, as it has to me."

VEGETABLES AND APPLES GO SLOW

A Bull Movement in Wheat Inaugurated by Speculators.

FLOUR FAILS TO RESPOND TO BOOM OFFICE OF PITTSBURG DISPATCH, }
FRIDAY, February 8, 1889.

Country Produce, Jobbing Prices. To-day has not been a good Friday for trade in produce lines. All commission merchants continue to report, as for some weeks past, a quiet trade. The firm factors of markets are poultry, butter and eggs. The week closes up with a much better demand and firmer prices in all these lines than for several weeks past.

A case of country eggs that could be warranted would readily bring 17 to 18c, whereas a week ago the same would have been slow at 15c.

Poultry is unusally well cleaned up through the country, and is fast drifting toward prices beyoun the reach of the average consumer. For tutoes, onions, cabbage and apples are as slow as ever. A peddler who pays weekly visits to the city reports that the choicest apples can be bought in the Panhandle, within 10 miles of New Cumberland, for 10c a bushel. Said he: New Cumberland, for 10c a bushel. Said he:
"Apples and potatoes have not been as low for
25 years." The best country butter is jobbed
by peddlers to the groceries at 31c, which is 2c
above ruling rates of last week.

May wheat was quoted last week at 95% at Chicago. To-day at noon price there was \$1 03%. The difference between Chicago and Pittsburg is about 9c per bushel. Breadwinners are advised not to get scared over present boom. There will be bread enough and to spare in the land until the new crop comes in. There is little likelihood of flour going higher, whatever speculators may do. The export demand has been far below calculations. When the lambs have been shorn wheat will no doubt drift back from its present speculative boom to a position near the dollar line.

Our little girl when but three weeks old broke out with eczema. We tried the prescrip-tion from several good doctors, but without any special benefit. We tried S. S. S., and by the time a betti the time one bottle was gone, her head began to heal, and by the time she had taken six bot to heal, and by the time she had taken six botties she was completely cured. Now she has a
full and heavy head of hair—a robust, healthy
child. I feel it but my duty to make this statement. H. T. SHOBE, Rich Hill, Mo.
