FORTY-THIRD ANNUAL REPORT Of the Connecticut Mutual Life Insurance Company.

To the Members: Excepting a loss which was fully made known immediately on discovery, the year 1888 has been one of great prosperity. In every direction the company experiences a steady increase in size and strength, with a decreasing ratio of expenses; so that while it hecomes thereby increasingly attractive to new insurers, it is also increasingly valua-ble to its older members; its new business being secured on such terms as to make it an advantage and not an expense to them. OPERATIONS FOR 1888.

Total receipts...... \$7,423,475 96

Total paid policy

Commissions to printing, advertising, legal, real estate, and all other expenses of mana ement

Profit and loss .86,659,144,64 Total expenditure Leaving a balance of \$724,331 32 to be carried to increase net or ledger assets.

MORTALITY. The death losses for the year were som what above our average experience, but were so far inside the mortality to be expeeted by the table and provided for by our premiums as to leave a saving of about \$480,000. For two years the death rate has been above our average. But even at its highest it has been far below the mortality table, proving at once the careful selection of our business and the abundant safety of the table on which our operations are based. Our losses have been paid with equal regard to the prompt satisfaction of every just claim, and to the protection of the honest

members against every unjust claim. EXPENSES. We still follow the principle that when a company has reached any considerable size, not only is it better for both old and new members that new business should be taken only at such a price as does not reduce the dividends on the old, but that there should be a general tendency to a reduction in the expense ratio to offset the slowly-increasing difficulty of earning large dividends. Whata source of ultimate weakness and not of strength, whatever its magnitude. It is a great satisfaction to the management that the company has been able to increase its business at a reduced rate of expense. Its new business is, therefore, peculiarly valu-able. The expense ratio for 1888 was only 8.96 per cent, a ratio less than that of any other company.

INTEREST AND RENTS.

The income from investments during the year, while yielding a good margin for sur-plus, indicates the difficulty of finding quite as ready and satisfactory employment for money as in the previous year. PROFITS ON SALES.

In 1888 we sold for \$775,762 44 real estate which cost us \$689,670 29; a net profit of

\$86,092 15. This brings real estate sales to Jan. 1, 1888, up to a grand total of \$7,168,726 19 of property which cost us \$6,330,458 87, a net olit of \$838,267 32, Of the 28 parcels sold during the year 26

sold at a profit of \$88,175 20, and 2 sold at a loss of \$2,083 05-balance, \$86,092 15. On bonds sold and paid at maturity during the year, there was a net profit of \$45,-075; on sundry items there was a loss of \$2,246 74; giving a total income from profit and loss items of \$128,920 41.

For the first time in its history of 43 years company has to record a loss by the detault of one of its financial correspondents, a class of men through whom most of its loans are placed according to the general business stom in such investments, and who are selected with exceptional care for the character and ability requisite for the most important and confidential relations which they hold; men who, except in this instance, have served this company with rare fidelity and success in all these years; to whose wisdom and faithful service much of the success of this company has been due.

above stated, the balance charged to profit

The conditions whick, apart from our entire confidence in the man, made this loss and its concealment possible, were peculiar to the times in Indianapolis following the financial depression of the last decade, and the methods by which it was effected were skillfully framed-out of those conditions. No such condition exists elsewhere, nor has since that period. It is probably needless to say that whatever lessons as to methods there are in this matter will be properly ap-

BONDS.

During the year we have sold, in order to save the premiums, and have paid off bonds that had cost us \$442,287 50. We have purchased bonds costing \$1,492,040 25, making our holding at cost on January 1, 1889, \$9. 840,575 34. The excellent character of these bonds will appear from an inspection of the

REAL ESTATE LOANS. We have loaned during the year upon real estate security \$5,794,170 46, loans have been paid off to the amount of \$7,008,385 90, leaving the amount so invested \$31,630,that they are made with constantly increas-ing care in only those localities where values

are of the most permanent character.

STANDING OF THE COMPANY. The company had in force December 31, 1888, 63,660 policies, insuring \$151,361,913. Its assets on that day were \$57,460,649 20; its liabilities by the highest legal standard of solvency were \$51,895,569 61, leaving a clear surplus of \$5,565,079 59. Our own standard of reserve on business written since April, 1882, is higher than any legal standard or that of any other company, and requires us to carry an additional reserve of \$350,370. leaving the surplus by our own standard of \$5,214,709 59.

The premiums and reserves of the company are grounded upon the most conservative bases which have been approved by experience again and again; its contracts are of the simplest, most legitimate character, devoid of speculative features; its business is selected with great care; its economy of management is unrivaled; in actual cost of insurance turnished its record is believed to be at least unsurpassed; its growth is wholly healthful, being worth more than it costs to those already insured; its assets are not to be excelled for solidity and productiveness; its surplus is ample to provide for every adverse contingency.

In its 43 years of business this company

We submit this as no slight evidence of a financial management of which we need not be ashamed.

These remarkable results have been ac-omplished at an average expense ratio of 8.4 per cent of the income Upon these facts we stand, and to all who desire the protection of their families we offer experience, equity, simplicity, economy and strength.

Respectfully submitted,

JACOB L. GREENE, President.

RAISING BABIES IN A BOX.

Infantile Life Preserved by Mechanical

Menus-A Novel Incubator. PHILADELPHIA, February 22 — Raising babies of premature birth by the aid of a mechanical incubator is the latest freak of medical science at the Woman's Hospital, North College avenue and Twenty-second street. For the first time in this city this process was put to The amount chargeable to profit and loss from this cause proves to be \$483,448 01; Ryall, an 8-months' child, was wrapped in deducting the income from profit and loss swaddling clothes and placed in the incubator. The experiment has proved so satisfactory that

above stated, the balance charged to profit and loss is \$554,527 60. No credit is taken for the value of property restored to us, nor will there be until it is realized by sale.

During the time this money was being abstracted this correspondent handled correctly over \$17,000,000, and possessed not only our confidence, but that of the business men of his own city and State in very marked degree. His fitness was unqualifiedly indoned by the most competent men who knew him intimately.

To rightly appreciate the effect of this loss upon the standing of the company and the safety of its contracts it should be considered in its proportions and not simply in its aggregate. That is small to one concern which is large to another. A bank with \$1,000,000 of resources, of which \$100,000 without thought of injury to its credit. But less than what \$10,000 is to such a bank, \$484,000 is to a company with \$57,500,000 of resources, and with \$5,505,080 surplus remaining atter the loss. It will not affect the company's dividend.

The conditions whick, apart from our entire confidence in the man, made this loss.

Beneath the couch are four cubical shaped

of moisture.

Beneath the couch are four cubical shaped bottles containing boiling water, which heat the air passing in through the register. For an 8-months baby the temperature is kept at \$5°, while it is fixed at \$165° to \$115° for a 7-months baby, and still higher for more premature infants. The incubator contains two thermometers, one centricyade and the

premature infants. The incubator contains two thermometers, one centrigrade and the other Fahrenheit. The couch is a unique affair of walnut with a diminutive cotton mattress and biankets and a lilliputian pillow.

The length of time required to keep prematurely born bables in these incubators to insure complete safety to their lives varies from three to six weeks, and depends considerably on the constitution of the little one. Dr. Laura Chapin, a resident physician of the Woman's Hospital, stated yesterday that the incubator would meet a long existing the incubator would meet a long existing need and prove a life-giving machine to many prematurely born babies, who would die but for the happy and very ingenious invention.

Saturday Evening Free Lectures. Curry University, subject to-night, "Making Bessemer Steel," by Mr. M. J. Dowling. MANY GOVERNORS.

At Least Three Persons Will Claim the Seat in West Virginia-A Republican Might Have Been Elected Senator-Alderson's Congress-

ional Contest. ISPECIAL TELEGRAM TO THE DISPATCE A CHARLESTON, W. VA., February 22,-Judge Guthrie this afternoon rendered a decision in the case of Alderson versus the County Commissioners of Kanawha. His decision was to the effect that the County \$134,162,485 15 has been already returned to policy holders or their beneficiaries by payment of death claims, endowments, dividends and for lapsed and surrendered policies; \$55,852,859,857 is held as net assets to the matter was remanded back to the county the matter was remanded back to the county

court de novo.

It is said that Governor Wilson contemlates ignoring the certificate of the vote of Kanawha county and issuing the certificate of election to Alderson. McGinness has se-cured certified copies of the returns from the various counties and will claim his seat in Congress on them, notwithstanding Al

derson's certificate, if he gets it. In the Gubernatorial matter affairs have taken a new turn. Governor Wilson claims that under the Constitution has a right to hold the office until the Fleming-Goff contest is settled. Goff, and possibly Carr, will qualify on March 4, the former having made that statement to Governor Wilson. The Suprema Court will be salled upon to de-Supreme Court will be called upon to de-cide who is entitled to the sent pending the contest, and if the decision is in favor of either Goff or Carr, Governor Wilson will submit gracefully. There is an understand-ing between Goff and Wilson to this effect, and thus stories of bloodshed and anarchy on the 4th of March have ended in smoke. The regular session of the Legislature closed to-night and a number of the members have already returned home. The Republicans still feel very sore ever the election of Senator Kenna, particularly from the fact that a proposition was made to them the day previous by Harr, the Union Labor member, whose vote decided the contest, that if they would withdraw Goff and vote for Colonel McLean, of Putnam county, that he would vote with them. This they declined to do, and the result was Kenna's election on the following day.
