There is no longer excuse for dingy-looking houses in Pittsburg, where soot and smoke are comparatively unknown. It is no longer the Smoky City. Natural gas has effected a complete revolution in this respect. The city will soon be as renowned for its bright, cheery appearance as it formerly was for grime and dirt.
That the banking business in Pittsburg is profitable is shown in the fact that one of these institutions, organized ten months ago, has paid up to date a clear profit of 6 per cent. This comes from one of the directors of the bank in question. He added: "We are fully satisfied with the financial situation."
Temperanceville is beginning to wake up. Several fine business houses are in course of erection there, which will add materially to its appearance and business facilities. There is quite a rush for building lots in West End place, just back of Temperanceville, over 100 having been solid within a short time, and half a dozen houses built. The secret of all the trouble is too-much-ness of everything problem is the secret of all the trouble is too-much-ness of everything problem is the weaket. There was but one article which our commission man could discover in his Trumbull county trip that was not afflicted in the line of too-much-ness, and that was maple sweets. Of this, this season's crop is below the average, and prices are the same as a year ago. All else that farmers have to sell goes begging for customers.

HINTS FROM BRAZIL.

A Good Opening for Enterprising American Manufacturers-German Trade. In this Province, San Pedro de Rio Grande

do Sul, there were three railways in operation, and one or two other lines projected, for which preliminary surveys have been made. The lines in operation are Estenda de Pierre de Rio Grande a Bage, opened for traffic on De-cember 2, 1884, and two other lines. The locomotives are from the Baldwin Locomotive Works, in the United States, and burn Cardiff coal. The Germans have done much to extend their trade in Brazil during the past few years.

Commercial travelers cannot do much in Brazil unless a very large number of samples are carried, because the Brazilian merchant does not believe much in anything except ocular demonstration. Exporters and manufacturers should estab-Exporters and manufacturers should estab-lish an international bureau covering all the sources of supply, with a sharp man who knows his work, and who is not above teaching t-at work to agents of his own in the country. Manufacturers in the particular Province of Bio Grande do Sul, to which these remarks most especially apply, are not extensive, although flannels, cloths, cashmeres and blankets are made at a fairly reasonable rate.

Want of Coal in Russin.

Never before has the want of coal been felt more keenly, says a correspondent at St. Peters-burg, who declares that the coal crisis there Closing quotations in New York furnished burg, who declares that the coal crisis there this winter has assumed unexpected propor-tions. The fact is Bussians do not understand mining, the consequence being that the price of coal is high-at the present time higher than it was over before. It is mentioned as natur-ally an extraordinary incident that the Kursk-Azov Failway, which traverses Russia's richest coal districts, had this winter to purchase Eng-lish coal. Reported Rate Cutting by the Pennay Depresses the Conlers-Money a Factor in the Dealings-Heavy Close

-Bonds Active. NEW YORK, March 26.-The stock market

was fairly active to-day, with considerable feverishness and decided weakness in the leading shares, outside of which, however, there was almost no feature or movement of interest. The continued outpour of long stock in Atchison, Burlington and Rock Island was the 弱 5134 30% 30% 31 30% 23% 25% 1% 67% 63 62% 23% great feature of the dealings to-day, and the only moving force in the market, and while 30% 31 23 there were times when they all had a firm look. only Burlington succeeded in really recovering its loss. but its purchases were small and did not touch the leading shares at all. On the other hand the recent doleful utterances of some of the officials of the Burlington were used with effect upon the grangers and Southwesterns. The reported cut in rates to Southern points by the Pennsylvania had a depressing effect upon the coal stocks, and Reading was subjected to con-siderable pressure without, however, yielding to any appreciable extent. Money again came up as a factor in the course of prices, and the report that a large amount had been called in for a special pur-pose aided in running the rate on call up to 5 per cent, at which it closed for the day. The bears were not idle in getting the market down, but the amount of long stocks brought out is be-lieved to have been smaller to day than on either of the previous few days. Atchison, Burlington and Rock Island fairly monopo-light the attention of operators during the greater portion of the day. It was steadily forced down with insignificant reactions from 45% to 43, and it closed within ½ of the lowest figure. The other two were savagely attacked in the first hour, and both reached the lowest prices of the day, and atterward functuated violently at times, but succeeded in regaining the loss. ENTIRELY SATISFACTORY.

# The local monetary situation yesterday was in a better condition than usual at this time of the year, just the close of winter and at the beginning of the spring trade. The good weather with which this vicinity has been favored for nearly two weeks nas produced a better feeling in business circles, and there is more disposition among the people to be up and doing. Discounting was of moderate pro-portions, but checking and depositing were up to the average, while the Clearing House re-port showed a large volume of general trade, the exchanges amounting to \$1,904,567 92 and the balances to \$468,683 80. Drygoods Market. New YORK, March 28.—Trade in drygoods being made in all kinds of goods adapted to spring and summer trade, including a success-ful drive in fine wash novelties at 10% cents, the first sale this season in that class of goods. The demand for staple cottons at first hands was much improved, and there was a decidedly better feeling in the market. Cotton fiannels are selling more freely, though prices are not fixed. Some blankets are also selling for fall trade. There was a large auction sale of silks made by the Phoenix Manufacturing Company, at which low prices were realized, though sat-isfactory to owners, because it was a clearing up sale.
