

A TIMELY WARNING

To People Who Are Going for Gold to Santa Clara, New Mexico,

BY A MAN WHO KNOWS IT ALL

A Scheme of a Large Land Company to Enrich its Stockholders

AT THE EXPENSE OF THE CREDULOUS

Mr. Charles A. Ashburner, the eminent geologist, has returned from a trip to California and Mexico, where he has been for the last four weeks.

Speaking about these gold fields to a Dispatch reporter yesterday, Mr. Ashburner said: "I am of the opinion that the whole scheme has been gotten up by the English Land Company, for the purpose of speculation, and the only reason why it is so successful is that it has made a large amount of money."

"Like all mining enterprises, there are three possible foundations for them. One is that there is absolutely nothing of commercial value in the land, and the gold found may have been put there. Second, there is a possibility of a small amount of the precious metal being there, which can be profitably mined on a large scale."

"As to which of these three foundations has caused the excitement in this case, I am not able to say. We know that placer mining has been carried on by placer miners for over 30 years in that district in a very small way with very questionable profits."

"The fact that the native Mexicans have mined placer gold at Santa Clara, is no indication of quartz ledges being found in the immediate vicinity, which might pay to be worked with profit."

"As an instance which may serve as an illustration of this, I may cite that, in the vicinity of one place mine which produced \$60,000 of gold bullion during the last 20 years, money was expended by large mining companies in the hope of finding the quartz ledges, which contain gold, and every effort was made to locate them. This, however, is not an invariable rule, but it often takes place."

"Therefore, the mere fact that the native Mexicans have mined placer gold at Santa Clara, is no indication of quartz ledges being found in the immediate vicinity, which might pay to be worked with profit."

"When I was in Los Angeles, 8,000 people had come through there on their way to Santa Clara, and at present the camp near the diggings has 2,000 inhabitants. Mr. Anthony, of England, who by the way, has given a favorable report of the prospects of the gold district, is an employee of the English Land Company, and the word is, therefore, not to be relied upon."

NO RICHES IN IT

"It is my opinion that there is not enough gold to be found in Santa Clara for a poor man to get rich in it. It is a great deal of money, but it is not a fortune."

"A great reason why the gold in Santa Clara cannot be worked successfully by the every day prospector is that there is a great poverty of water in the entire district, and placer gold mining without water is almost an impossibility. Therefore, I must say again that the best advice there is, is to get the reports from the gold field the better it will be for the pocket of a fortune hunter, who labors under the delusion that he can go to Mexico and pick up a fortune from the sand."

THE GOLD MEDAL

Miss Lillian Lytle for an Essay on the Ticks of Life

The annual literary contest for the General Ekin gold medal by members of the senior class took place in Curry University hall last evening.

Mr. J. W. Davy, an inventor from Kingston, Canada, walked into this office yesterday and said he was prepared to make as many millions for this city and for himself as Mr. Westinghouse had done.

HOW HE FIGURES IT

Ex-Governor St. John Thinks That 125,000 Republicans Won't Flop

JUST TO KNOCK OUT PROHIBITION

An Interview With the Leader, on the Outlook Here and Elsewhere

HIS ALLEGED LECTURE LAST NIGHT

The Hon. John P. St. John, ex-Governor of Kansas and now foremost pillar of the Prohibition party in this country, arrived in the city yesterday morning and went immediately to his room in the Greenbush Hotel to get up his lecture for the evening to be given in Allegheny.

A DISPATCH representative called upon the honorable gentleman yesterday afternoon, and during a conversation regarding the question of prohibition, Mr. St. John remarked: "There is not much new in prohibition at present. The latest and most remarkable thing I have heard of is the fact that the Republicans of Rhode Island, at a convention which they held lately, declared themselves to be in favor of submitting the question of prohibition to the people of that State. My judgment is that this is done in order to fall in line with the future policy of the Republican party on the liquor question, which will probably be high license."

"I think the chances for the success of the amendment in this State are very good. In the first place, it is a Republican measure, submitted by a Republican Legislature. "The party has in the State about 50,000 majorities. In this district, the Republicans will ignore all party lines, and add their entire 25,000 prohibition votes to the Republican party's majority. To this may be safely added not less than 75,000 Democratic votes. It will therefore necessitate the vote of more than 125,000 Republicans against their own measure in order to defeat it. A lively canvass is already being made; but when such influential and stalwart Republicans as Governor Beaver, Senator Quay and other members of the legislature put their shoulders to the wheel in the fight for the home against the saloon, we may safely expect such a triumph as has never before witnessed in Pennsylvania."

"How was it that the Prohibition amendment was defeated in this State?" "Why?" "It was submitted there for that express purpose. I do not want to explain that any further. For the same reason (defeating it) was it submitted in Oregon, Michigan, Texas, Tennessee and West Virginia."

"What do you think of Judge White's procedure of handing the saloon keepers in our court here?" "I have noticed that very carefully, and I have followed the Judge's conduct very attentively. It seems to me that his conduct in connection with the matter should be a warning to all saloon keepers and all saloon keepers in this city and Allegheny county."

THE EVENING LECTURE

The Central Reformed Presbyterian Church in Allegheny was crowded with a large audience last night, listening to the lecture given by the Hon. John P. St. John in his lecture on the prohibition amendment. After some introductory remarks by the Rev. Mr. Spruell, the lecturer said, in substance: "People of Allegheny, I once heard a story of a man who didn't know whether to get on God's or the devil's side, and he was told that we will get on God's side, and leave the devil to his own devices. We have heard so many falsehoods before as we are being proscribed by the Prohibition party, that I am sure that Pennsylvania men are natural born fools when they get on the side of the saloon. I loved that prohibition lessens taxes. As if the thing of saloons was ever known to lessen taxes."

SUPT. KIRTLAND'S NICE BANQUET

Before He Left the Upper End of the West Penn for Allegheny

TOASTS AND SOME OF THE SPEECHES

Blairsville is noted for old-time hospitality, for its prominence in the early history of the Western part of the State, for its culture and scenery. The men who laid the foundations made them as solid in character as the everlasting hills surrounding the town. Their lives are still being lived. A large number of the worthy citizens of the town and a number from abroad assembled at the Central Hotel in Blairsville last night to give a banquet in honor of A. P. Kirtland, Superintendent of the Pennsylvania Railroad, who office is to be moved to Allegheny City on April 1. The large dining hall had a cheerful look, and the menu was quite tempting. Major T. D. Cunningham, of the First National Bank of the town, presided with dignity and good cheer. The Mayor is prominent on account of his capability, public spirit and benevolence of character, and stands very high in this community. His father was the first settler in Blairsville, and he has inherited much worth of character that his name stands prominent in history. During the beginning of the war when the Mayor and another son enlisted their father, Judge Cunningham, said: "You are doing right to go. It is the duty of all who can to go."

THE WEATHER

FOR WESTERN PENNSYLVANIA

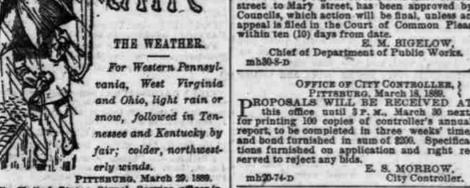

PRACTICE MAKES PERFECT.

The makers of the Ivory Soap have been engaged in the manufacture of Soaps for over fifty years, and the "Ivory" is the happy result of their long experience, and is unquestionably the soap to be used by all who value the advice (quoted below) of Ellen H. Richards, Instructor in Chemistry, Woman's Laboratory, Massachusetts Institute of Technology, who says, "In the purchase of soap, it is safest to choose the make of some well known and long established firm who have a reputation to lose if their product is not good."

A WORD OF WARNING

There are many white soaps, each represented to be "just as good as the Ivory," they ARE NOT, but like all counterfeits, lack the peculiar and remarkable qualities of the genuine. Ask for "Ivory" Soap and insist upon getting it.
