FUEL. PERHAPS.

Crude Oil to be Piped From Limn to Cleveland, Detroit, Toledo and Other Cities-A Statement Giving

Complete Details. In the current issue of the Journal of Oil and Gas, published at Fremont, O., is the following on the subject of utilizing Ohio oil for fuel purposes. It goes to show that the Standard Company are going to lay pipe lines from the Lima field to Cleveland, Detroit, Toledo and other cities. The fact that the pipe mills of this city are shipping car loads of eight-inch pipe to points on the route of the proposed oil line is conclusive evidence that the lines will be laid according to the following. The Journal Cleveland is to be furnished with netroleum

for fuel, to which the Journal adds the cities of Toledo and Detroit with the probability of including other large cities in the future. That Toledo, Detroit and Cleveland would be for-nished with crude oil pipe lines is certain, although the exact line to be followed is to some extent conjectured. It has been ascer-

some extent conjectured. It has been ascertained by the Journal that the merging of the two natural gas lines at Toledo, the Northwestern and the Toledo Natural Gas Company, will soon be accomplished if not already a fact. The absorption of the latter by the Northwestern Natural Gas Company (the Standard owning a controlling interest in both lines), would give them an opportunity of using the Toledo line for crude petroleum.

With this object attained it remains an easy task to continue the line to Detroit, an adaptable franchise having already bean secured for that city in the interest of the Standard. The order given a Pittsburg firm a few days ago for 190 miles of eight-inch pipe, indicating that perhaps a continuous line would be laid from Cynget through Toledo to Detroit, with one pumping station midway, might be nearer the case than the use of the line already built to Toledo, but it is the opinion of many conversant with the facts that the latter proposition will prevail.

The course to be taken by the Cleveland line

sant with the facts that the latter proposition will prevail.

The course to be taken by the Cleveland line is, no doubt, settled by the engineers of the company. Commencing at North Baltimore it will then occupy the Northwestern Natural Gas Company's right of way, in any event, to a point directly west of Beltsville, Seneca county, from whence it will either be continued to Fremont, or, what is more probable, diverge west of Beltsville, and leaving Fremont to the north, follow the line of the Nickle Plate Railway to Bellevue, from which point the massive iron pipes will run straight as the crow flies through Wakeman to Cleveland.

The Standard has purchased five acres of ground near Wakeman for a pumping station, and have ordered their wire to be cut and an office put in the village, and being about the proper distance from Cleveland for a pumping station (44 miles) there is no conjecture as to what other use may be made of the land. It is thought that but one pumping station will be needed between Cungar and Cleveland and the

thought that but one pumping station will be needed between Cynget and Cleveland, and the order for construction material to be delivered within 90 days indicates that before the coming

order for construction material to be delivered within 90 days indicates that before the coming fall the cities mentioned will be enjoying the benefits of the new fuel.

That the Cleveland line was contemplated 24 months previous is proven by the fact that the Vandergrifts, in the interest of the Standard, prospected the territory near Wakeman with a 3,000-foot well in 1887, pursuing the same course as at Warren, O., where is built the pumping station for the Pennsylvania product between Hilyard and Cleveland.

There seems to be no question but that the fuel of the future, outside of the natural gas cities, is to be petroleum, and that the Standard will cease its maledictions against the "savory" stuff, unless, as outlined by New York correspondents, the issuing of certificates will not be considered.

Ohio crude has before it a great future, and its use will extend to every branch of manufacture and do service in all industries ere half a dozen years pass by.

A PAGE OF THE UNWRITTEN PAST Disclosed by a Frenchman in Texas, While Digging a Well.

ISPECIAL TELEGRAM TO THE DISPATCH.1 GAINESVILLE, TEX., April 18.-A strange discovery, one that is causing the thoughtful to ponder over the unwritten past, was made yesterday by a French citizen in the northwestern district of this county. Having occasion to sink a well, Mr. Somms, the Frenchman in question, selected a spot in a valley near a ravine of great length, and which during heavy rains is transformed into a raging torrent, depositing in the valley limestone, gravel, mud and other debris. After reaching a depth of four feet, and while in a formation of limestone gravel that had continued almost unsuccessive series of the simple one indeed, and I see but one view to take of it. If these places where a commission business is done in the taking of bets to be placed at the lawfull tracks are to be shut up, the Legislature must make it an offense to enter into an agreement of the kind, and the entire business can be promptly stopped." interruptedly from the surface down, Mr. Somms came upon the vertebrae and ribs of an animal. The ribs were about the size of a small pig's, and rapidly tapered. Carefully uncarthing the bones toward the tapering end, Mr. Somms soon came to the rattles which, when counted, numbered 17,

the largest measuring six inches across.

Attracted by the strange find, the neighbors gathered in and the work of unearthing the monster was prosecuted with vigor. After laying bare 19 feet of the remains of the monster of other times, imagine their consternation at finding the entire skeleton of a man of a tremendous stature, in the stomach of the skeleton of the snake. The remains of the man and serpent, so far as the serpent has been exhumed, are as perfect as when first denuded of flesh, and were doubtless covered by lime and gravel soon after death. Near the bones of the man's right hand is a rude stone hatchet, which a local geologist of some repute states to be similar to the handiwork of paleolithic

Mysterious Disappearance of a Bag Contnining \$15,000 in Gold.

BRAINERD, MINN., April 18 .- A package containing \$15,000 in gold has mysteriously disappeared from the office of the Northern Pacific Express Company in this city. Louis Hohman, the night clerk in charge, received from the train arriving at 1:45 A. M. yesterday, four sacks of specie, two of which contained \$15,000 each in gold and two \$500 each in silver. The money was consigned to the First National Bank of this city, by the Northern Pacific

Bailroad Express Company, to be used in paying employes of the road. Hohman says he carried the specie with other express packages on his truck to the door of the express office. He is positive that he then carried all the specie into the vault and then turned the combination. Half an hour later, in checking up, he discovered that one of the bags of gold was missing. He at once notified his superior, but a close investigation failed to reveal a clew to the missing money. Hohman has been in the employ of the express company for several years, and is regarded as honest and faithful.

OCEAN POSTOFFICES.

A Proposal From Germany That Meets With American Favor - Plan to Avoid Many Mistakes of Postoffice Clerks.

WASHINGTON, April 18 .- Superintendent Bell, of the Foreign Mails Office, has received a communication from the postal authorities of Germany recommending the establishment of "sea postoffices" for the distribution of German-American mails on shipboard. The Secretary of the Imperial German postoffice, in his communication, says that owing to the constant increase of their American mails for Germany, their distribution presents very serious difficulties at the German exchange offices. Articles of mail matter are distributed erroneously, and there are frequent delays in consequence, giving rise to complaint. Even the Bremen office, he says, in spite of a large increase of its force, is frequently un-able to distribute heavy American mails, received via Bremen-Haven, in time for the next mail trains from Bremen, so that, in many cases, serious delays have been un-

"The Imperial German office," the letter says, "has for some time given serious attention to this matter, with a view to find some means of remedying the evil. It appears that the most feasible and effective plan would be to have the mails in question entirely distributed by postal employes on board the fast mail steamers plying between New York and Bremen, so that the German exchange offices could forward mails without any delay whatever. These sea postof-fices could also greatly facilitate the work of the American exchange offices by dis-tributing the mails from Germany for America during the trip from Germany to New York. * * * The Imperial office is will-ing to establish these offices, and desires to know whether the Postoffice Department is

inclined to bear one-half of the expense— from \$47,600 to \$71,400 per annum."

1. Superintendent Bell to-day said that he was of the opinion that the arrangement suggested by the German authorities would greatly facilitate the delivery of mails, both in this country and Germany, but authority must first be obtained from Congress before any steps in the direction indicated could be taken by the Department.

A POOLSELLING CASE.

Judge Glidersleeve Rules That Bets Can be Made Outside of Race Tracks.

PEPECIAL TELEGRAM TO THE DISPATCH, 1 NEW YORK, April 18.-The Legislature last year passed a bill introduced by Senator Ives that made it lawful to buy or sell pools on horse races run on incorporated race courses in this State, provided that the races were run on any of the 30 days selected by the Governors of the track from the period between May 1 and October 1 of each year. A suit has been brought where a city poolseller agreed to be the agent for placing money at the track. Judge Gildersleeve said:

"I will take the case from the jury. I wish to be understood as clearly and unequivocally as ruling upon the question in this case. I wish to have it understood and announced as my opinion that an agreement between A and

my opinion that an agreement between A and B, by which B shall place a bet made in this city in some other place where it is lawful to do so, is lawful."

"That is conceded," said Mr. Jerome, "but it is a question whether it is a lawful agreement or an intent to cover an illegal transaction with a trick and device. It is conceded that if the track had a right to race on certain days there a trick and device. It is conceded that if the track had a right to race on certain days there is no offense. It it is a mere trick—one so transparent and flimsy as this is, and so well-known to everyone in the community to be a trick—it should be submitted. I hold, to the jury as a question for their determination. If we are to take judicial notice of what is to be done at Brighton Beach I submit that we can take judicial notice of the fact that none of the policy shops in this city ever send a cent to Brighton Beach or anywhere else to be registered as a bet or wager."

MYSTERIOUSLY MURDERED.

A Woman Killed and Her Body Removed in a Carriage. KANSAS CITY, Mo., April 18 .- At 6:20 this morning a laborer found the dead body of Minnie Meyers lying among the rocks in the cut on Baltimore avenue, between Tenth and Eleventh streets, one block from the heart of the city. 'She had undoubtedly been murdered, as her shoes were not muddy, as they would have been had she

walked to the spot. Tracks of a carriage were found leading to to the place, where they turned around. Frank Webber, a bricklayer, has been arrested on suspicion.

NOT TOO LATE.

Mice Drayer, aged sixteen years, daughter of Mr. Vm. H. Drayer, a well known shoe dealer, had been afflicted with Club Foot fourteen years, causing great distress and annoyance to herself and family. There was such a contraction of the muscles that she could not straighten her limb, and although she wore the usual high heel shoe, it was impossible for her to bring her heel to the ground when walking. After suffering on in this condition for fourteen years, she consulted one of the surgeons of the Polypathic Surgical Institute, and was convinced that it was NOT TOO LATE to be cured. An operation was performed, and the deformity entirely removed, and although it is now three years since the operation, her cure has remained permanent. She walks perfectly, and has no further use for a high heel shoe.
