

HE HITS BACK.

The Campbell Alien Labor Investigation Waxes Warm.

STAR CHAMBER QUESTIONS

The Gentleman Under Fire Becomes Sarcastic Over the Affair.

JEALOUSY AT THE BOTTOM OF IT.

He Says He is Prosecuted Because He Stamped for Harrison

AND OPENLY FAVORS PROHIBITION

The Executive Committee of the Central Trades Council met last night in K. of L. Hall to open the investigation into the charges against President James Campbell, of the Window Glass Workers' Union, and others, for importing foreign glass workers.

Mr. J. C. Young acted as president of the meeting, and Wm. Brennan, Esq., had been called in to swear the witnesses and examine them. There were about 50 persons in the room.

There was some discussion soon after the meeting had come together as to the propriety of admitting reporters. President Smith, of the American Film Glass Workers, vigorously championed the press, stating that it was their privilege to be public in order to give the people opportunity to learn the aims and objects of the committee. He was overruled, as it was decided to leave the matter of giving the proceedings to the press in the charge of the Executive Committee.

A LONG SIEGE OF IT.

The testifying lasted from 8 o'clock until midnight, and only three witnesses were called—Messrs. Gesser, Phillips and Klein. Ema.

After each witness was duly sworn Mr. Brennan, who conducted the examination, asked the following question: "Do you know Mr. James Campbell, of the Window Glass Workers' Union?" Did he at any time lead you to infer that he knew something about these men being expected here? Do you believe that he knew that?"

When Mr. Brennan was through with the witness, Mr. Young asked him to state his opinion of the committee.

He was overruled, as it was decided that it was decided to leave the matter of giving the proceedings to the press in the charge of the Executive Committee.

CARE MENTIONED BUT ONCE.

It was but once that somebody asked this question: "Did Mr. G. Cake, the Secretary, or any other official of the Council of the Window Glass Workers, speak to you about the importation of foreign window glass blowers?"

After the adjournment, however, the committee was asked to do so, and they did.

The matter had been left in the hands of the stenographer and he would prepare it for publication on Sunday. The next morning he was seen by Mr. Campbell.

Mr. Campbell was seen by a DISPATCH reporter afterward, and when he was asked what he thought about the Southern negroes, he said: "The whole thing don't amount to anything at all; these people will find it out before long." The matter had been left in the hands of the stenographer and he would prepare it for publication on Sunday. The next morning he was seen by Mr. Campbell.

"They have said that they will get with me because I am a Southern country doctor," said FOR PRESIDENT HARRISON

during the campaign. They have said they will get even with me, because I have boldly come out now and spoken in favor of prohibition. They are prompted by merely jealous feelings, and have no right to do so. They do not know that my people, the working people, have great confidence in me. They are aware of the fact that I am a Southern country doctor, and it riles them. Let them go ahead. I am able to brave their hating."

"I am able to bring an investigation of this kind. It is a disgrace upon the name of the Central Trades Union that they will not let me speak. I am a master without calling in a lawyer to do the cross-examining of the witnesses for me."

RATHER SARCASTIC.

"It seems to me that there are not men of sufficient brains in the Central Trades Union to have the courage and self-confidence to get a lawyer to assist them, they had better shut up shop, disband and get reorganized to give competitors more chance to do work."

"If they had any evidence to stand on why don't they go and prosecute me? The country doctors are a farce from beginning to end, and you will see whether I have not told you the truth."

A LECTURE ON LABOR.

General Worthy Foreman Wheat Adresses a Small Audience.

General Worthy Foreman Morris L. Wheat, of the Knights of Labor, lectured last night at Lafayette Hall on law, money and transportation. Although this was the first public address delivered by the president of the great labor organization, there was a very small attendance. It was one of the most interesting lectures on the program, and the speaker was received with great applause.

"The speaker was frequently interrupted by the audience before he began, and when he began to talk, he was a master without calling in a lawyer to do the cross-examining of the witnesses for me."

A SMOKER BADLY BURNED.

The Result of a Curious Gas Explosion Last Friday—The Victim May Die From the Inhalation of the Flames.

A suit for damages may be brought to-day against the Allegheny Heating Company, as the result of a curious accident that occurred to a smoker on the upper portion of Allegheny Friday morning.

About 7 o'clock, upon the forenoon named, John Blittner, a teamster, was driving along Madison avenue, and stopped at the corner of Madison street, where the Allegheny Heating Company has its plant, a number of old buildings. Blittner sat down to eat with the man upon his clothes, and lit a match which ignited an explosion, occurred, and Blittner was badly injured. His face, neck, head and hands were burned, and the burns caused by being knocked down, were severe. He immediately jumped up and ran screaming to the water on his blistering flesh, but was prevented from doing so by the officers. They hurried him to the hospital, where he was attended. He was afterward removed to his home at No. 8 Elm street, where he now lies in a paralytic condition. Dr. George, the physician of the gas company, said the man's clothes for pulling through are very thin. Several days ago he was reported dead, but he had been living, and complained of pains in his breast. This shows he was burned intensely.

His family went to the heating company, whose gas pipes ran alongside of the building, and asked for an explanation of the matter. They blame it upon Mr. Hockenstein, who was carrying the heating unit away, when a wagon, bright, earnest, intelligent, lacking the educational blemish of Langston, and the sparkling surface brilliancy of Douglass, who is being educated.

This is what he said: "I take it that my appointment was made as the representative of the South, and when I was appointed to fill the position in a dignified manner as possible. If I have any patronage to distribute, I will do so, but I have none." In short, he held that the colored race must be recognized at the expense of efficiency. I am going to make no secret of the fact that I am a colored man, and have no right to be discriminated against, to whom I may have given some information on the land question. I am opposed to the colony idea, and have seen the evil effects that have resulted from the colored negroes in the West and Southwest.

I know nothing of the negroes, but I do not approve of them. I made a great mistake when I undertook to organize a colored wing of the Republican party to fight Mahone and other negroes, and I am sorry that I did so.

Little things are not the greatest, show the true man. Little things are done naturally; great things are premeditated.

The officers of the Department of Highways, under the direction of Captain Paisley, have been obstructing the drop, yesterday they began the construction of a roadway down to the hill side, and the dirt road leading down from Center and Clancy street, together with the constant leakage running down from the hill side, has caused a large amount of water to run down at midnight last night.

THE NEW LAND COMMISSIONER DEFENDS HIS RACE—HE WILL APPOINT COMPETENT PERSONS TO OFFICE.

J. M. Townsend, the Indiana colored man appointed Land Commissioner was a passenger on the colored express train evening bound for Washington. He is a colored man, bright, earnest, intelligent, lacking the educational blemish of Langston, and the sparkling surface brilliancy of Douglass, who is being educated.

This man went to the heating company, whose gas pipes ran alongside of the building, and asked for an explanation of the matter. They blame it upon Mr. Hockenstein, who was carrying the heating unit away, when a wagon, bright, earnest, intelligent, lacking the educational blemish of Langston, and the sparkling surface brilliancy of Douglass, who is being educated.
