

THEY ASSUME FORM.

The Spiritualists of This City Get a Charter for a Church.

THEIR AIMS, OBJECTS, ETC., GIVEN.

No Creed, but a Declaration of Quite Elastic Unitarianism.

AIM AND OBJECTS UNOBJECTIONABLE

In Common Pleas Court No. 1 yesterday a charter was granted to Messrs. H. McElroy, C. L. Stevens, John H. Johnson, J. A. Gordon, Melchior Varner and others for an incorporation to be called the "First Church of Spiritualists of Pittsburgh," for the support of public worship according to the faith, doctrines and usages of the Spiritualists, etc. The application was made by D. T. Watson, Esq.

As there are many people who have but a shadowy knowledge of Spiritualism, the definition of American Spiritualism by a Frenchman who investigated it may be in order. He says: "Properly speaking, spiritualism is the opposite of materialism. Whoever believes he has within him something distinguished from matter, is a spiritualist; but it may not follow that he believes in the existence of spirits, or in their communications with the visible world."

A very general impression prevails that the system is largely maintained by mediums and clairvoyants making purposes, but some of the skeptical would be astonished to find if they investigated that some of the most intellectual, honest and earnest people in the country are firm believers in it and its manifestations.

WHAT IS PROPOSED HERE.

A convention was held with Mr. C. L. Stevens of Sixth street, one of the incorporators. Mr. Stevens said the object of the incorporation was manifold. In the first place the members of his belief in this section had labored under adverse circumstances and conditions, and they had decided to organize so as to be in a position to challenge all assaults on their respectability and to be able to do business as a church which they could not do as isolated individuals; to be able to buy and hold property and do such other things as are usually done by corporations. He said the object of spiritualism is the establishing of the spiritual world, very quickly, none so remained for some time after he began investigating, but was finally furnished with irrefragable proofs, which he received from the mediums and the consequences of his conviction.

Said Mr. Stevens: "We believe in God, an all-wise Creator, and we believe in power as firmly as any people belonging to other denominations. Some Spiritualists believe in the divinity of Christ, and others do not; it is not obligatory to believe in His divinity, but all believe the teachings of Christ. We also believe that the spirits of our ancestors and our guardians are ever present, watching over and controlling our actions for good, if we heed them. In my own experience I have felt their restraining and salutary influence. Our religion is based on the teachings of Christ, and our teaching is the same as that of Jesus, and it makes no difference whether a man believes or disbelieves that Christ was divine, so long as he professes to believe in the guide of life and conduct. They are grand and beneficent beyond all other. We have no creed, and we have no dogma, and we declare of principles, and we judge men more by their deeds than their professions. We do not approve of people joining us through motives of curiosity."

Mr. Stevens further referred to the declaration of Christ that greater things than these are done in His name, and he said that Spiritualists believe there is still a greater, in fact, as much as at any time previous, for the scientific exhibitions of supernatural power, both in the churches and out of them, where stolidly stalks boldly. Spiritualists stand ready to do just what they can, and have lately proven it by their contributions to the relief of the Johnstown people.

The number of members of the church roll at present in this vicinity is about 200, but Mr. Stevens states that there are thousands of people who are with them in everything but in name, as it requires some courage to brave adverse public opinion, and Spiritualism has not yet become popular. The congregation will be held at 10 o'clock just when, as nothing definite could be done until after a charter was gotten.

AN POPULAR FANCY FAIRTS ITS.

It will be patent to thousands of people that this picture of Spiritualism is very different from that they have conceived, as the popular impression in most orthodox localities is that spiritualists are men who assist solely in the levitation of tables, and dowsing medium hump and half satyr arises from spiritism pool peeping and nutting like the witches and wizards that were the abomination of the Jewish sages of old.

Mr. Stevens says that he has often noted the astonishment of strangers who attended Spiritualist services for the first time. Instead of seeing ghosts stamping about and hearing the rattle of invisible chains fettering the limbs of unhappy damned spirits, they would hear the choir sing, perhaps, "Nearer my God to Thee," etc., and the song would be followed by an invocation that for purity, eloquence and nobility of sentiment, could not be excelled anywhere. Another thing that would strike some people forcibly in this connection is the growth of toleration in the last 41 years, not to say 300. If in 1848, when the Fox sisters, of Hydesville, Wayne county, N. Y., astonished the religious and scientific world by alleged "rappings" manifestations which no tests could withstand, anyone had proposed to found a church on the basis of those manifestations, the world would have been astonished; but in this age of heterogeneity and differentiation it passes as a matter of course.

KINDLY ALDERMAN CARLISLE.

He Suppresses Speak-Easy Men's Names to Let Them Reform.

Alderman Carlisle held a hearing at his office, No. 4714 Fifth avenue, at 9 o'clock yesterday morning, at which 12 or 15 law and order cases were disposed of. A. J. Kaercher, the druggist, was fined \$25 and costs for selling soda water on Sunday. The total is only \$31.50, however, and Kaercher says he will keep right on.

The other cases were for illegal liquor selling. Alderman Carlisle refused to say how many he had found guilty and fined. He also refused to give the names of the defendants in the cases.

The reasons he gave for withholding the names were that publication would render the people liable to a fine of \$50 and nine months' imprisonment under the Brooks law, and that they had promised him not to violate the law again.

DISSATISFIED MEN.

More Clerks Reorgan on the Pittsburgh and Western Road.

There seems to be considerable dissatisfaction among the employes of the Pittsburgh and Western road. Many are stepping down and out, and their places are filled by Western men. Mr. Gunnig, Chief Clerk to Master Mechanic J. H. Arner, resigned last week. The new position of Pittsburgh and Western road was created and given to a Mr. Arner, of the Big Four road. Another new man, Paul D'Idder, was appointed road master.

THAT G. A. R. RATE.

The B. & O. Proposed a Cent a Mile, but the Other Roads Object—The First Excursion to Atlantic City.

George Paenzer, Agent C. O. Scull, of the Baltimore and Ohio road, is in the city. Mr. Scull stated that as soon as the theatrical season opened he would introduce a resolution in the Trunk Line Association to restore what is known as the party rate. If the association decides to pass the resolution the Baltimore and Ohio will restore the rates on their lines. Mr. Scull is convinced that the rate is not a violation of the Interstate Commerce law, and is in every sense legal. He has decided, in any instance, to introduce such rates until he is stopped by law.

Speaking of the refusal of the railroads to accept a rate of 1 cent a mile to the G. A. R. encampment, Mr. Scull said: "Last May I introduced a resolution in the Trunk Line and Central Traffic Associations to make a rate of 1 cent a mile for the round trip, but this was only a pretext. The roads do issue rates even less than a cent per mile, and they have done it since the manager rule was made. The proceedings of that meeting were referred to the managers, and they have done it since the manager rule was made. The proceedings of that meeting were referred to the managers, and they have done it since the manager rule was made."

Mr. Scull said further that this had been so far an excellent year for excursions. The delegates will go to the encampment in places in enormous, and if the hot weather continues the Baltimore and Ohio will have all it can do to get the delegates to the city. Agent Smith has arranged for the first excursion of the season to Atlantic City next Thursday. The train will consist of at least ten cars, and the manager will be put on. Mr. Smith will accompany the excursionists to see that they are well cared for, and that the managers will be allowed to stop off at Washington on the return trip. Mr. Smith said yesterday that he was kept busy looking people, and the prospects for a big crowd were never better.

A PROMINENT GERMAN'S CAREER.

He Had Held High Positions in the Empire Prior to 1864.

The remains of J. L. Daub, who died Thursday from a paralytic stroke sustained immediately after leaving the German Lutheran church, West End, last Sunday, will be interred in the cemetery of the church this afternoon.

The deceased was born in Germany in 1822. He held various high positions in the German Empire until he came to this country in 1864. He then settled in the West End, where he resided until his death. Mr. Daub was prominent in business in this locality, and was a staunch Republican. He leaves a wife and six grown children. His remains were cared for by the William Tell Lodge of Odd Fellows, of which he was a member.

ROBBED ON THE BOAT.

The Fate of an Unfortunate Woman and Her Family En Route Home.

Yesterday afternoon a woman named Mrs. Fannie Rosenbaum appeared at the office of the Department of Charities with seven children, the oldest being 12 years of age. She asked for a ticket to New York for herself and children. She explained that her husband had deserted her at Memphis, Tenn., where they had some property, and she resolved to return to him.

At Cincinnati she took the boat to this city, and the vessel was some 10 miles out when she was robbed. She had a pocketbook containing \$30, all the money she had. She was directed to the department of charities, where she was given transportation for herself and children.

A Queer Case of Drowning.

The remains of John G. Gentry, a South-side glassblower, were brought home yesterday morning from Geneva, where he had been camping out. He had been in bathing and, while standing in the water, which is not much more than waist deep, said to his friends above, "Well, here I go," and disappeared under the water. He failed to reappear within a reasonable time, and a search resulted in his body being recovered and buried in the cemetery about 10 minutes after. The young man's death is considered entirely accidental.

SUMMER BARGAINS.

In Fine Pianos and Organs.

It is seldom one sees such a fine display of pianos and organs during the summer months as is now on exhibition at Mellor & Hoene's Palace of Music.

Such well-known makes as the Hardman, Krakauer, Harrington and Kimball pianos, and the Palace, Chase, Chicago Cottage and Kimball organs are represented by this house.

All of the above instruments are standard and will be furnished during the summer months at greatly reduced rates. Don't wait until fall to make your purchase, as the prices will be advanced by so doing. You cannot do so well elsewhere, we assure you, for our prices simply cannot be equaled.

A number of good second-hand pianos, both upright and square; also some fine second-hand organs at very low figures. The wonderful Edison records are sold at the Palace of Music. See these; you will be astonished.

An examination of the instruments at the Palace of Music, you will find that it will not be necessary to go elsewhere than to Mellor & Hoene, 77 Fifth avenue, Pittsburgh.

One Thousand Miles of Transportation and One Week's Board for \$12.00.

The Pittsburgh and Cincinnati packet line, Steamers leaving Pittsburgh as follows: Steamer Katie Stockdale, Thomas S. Calhoun, Master, leaves every Monday at 4 P. M.; Steamer Hudson, J. P. Ellison, Master, leaves every Wednesday at 4 P. M.; Steamer Scotia, G. W. Rowley, Master, leaves every Friday at 4 P. M. Tickets good until used.

For further information apply to James A. Henderson, Superintendent, 94 Water street.

Grand Hotel.

This pleasant hotel, located at Point Chartiers, N. Y., opposite Myrtle, has 400 rooms and every modern equipment for the comfort of its guests. Its beautiful croquet lawns, play grounds, tennis courts, are unequalled elsewhere. It has reading rooms, bowling alley, skating rink and good music. Tables set for dining. The kitchen is supplied with pure spring water. For terms address Horace Fox, who is well known as manager of Hotel Cooper, Dayton, O., at Grand Hotel, Point Chartiers, N. Y.

The Johnsons People Selected Wisely.

The Miss Dix Trust has arranged for a representative to supply sewing machines to the seamstresses at that place who suffered by the flood. The seamstresses had been in the difficulty of the different makes of machines on the market, and in every instance chose the late Improved Singer as being the best adapted for all classes of work. The order was accordingly given the Singer Manufacturing Company No. 8 Sixth street for the entire number required.

For a finely cut, neat-fitting suit leave your order with Walter Anderson, 700 Smithfield street, whose stock of English suitings and Scotch tweeds is the finest in the market; imported exclusively for his trade.

HOUSES OF THE DEAD.

A Project to Erect Large Public Mausoleums in the Cities.

THE BODIES TO BE DRIED BY AIR.

A Plan of Burying Them That Would Do Away With Cemeteries.

A STRIKING EXAMPLE IS EXPLORED

A number of doctors, undertakers, cemetery officials and others in the two cities are now considering the merits of a new plan of burial to supplant the use of cemeteries and furnish an acceptable medium between the burial in the ground and cremation. It is no less than a plan of erecting mammoth mausoleums to hold thousands of bodies, and, by a system of air draughts, dry the bodies of the Indians on the plains leave their dead on scaffolds to be dried and preserved by the wind, leaving the bones, muscles and fibers intact, with the skin over them, but the fatty substance underneath washed, and varnished off by the draught of a furnace, which will consume the odor.

The process is now in the hands of a rich company in the East, that proposes to introduce its plan of burial into every city in the country. The company has made a catalogue with plans and descriptions of its plans. The mausoleum will be built of stone or other durable material. Concrete is the preferable material, perhaps, for purposes of ornamentation, with vitrified brick, granite or other time-defying stones.

OF ANCIENT DESIGN.

The designs will be after Greek, Roman and other styles of architecture, and, from the concrete foundations, the thousands of sepulchers and of the arched walls and corridors will go up with the outer walls, forming an immense casting without seam or joint.

The interior plan will resemble that of a well-appointed library, with its main corridors and diversifying the leading to the different sections. The sepulchers, of solid concrete, four inches thick, without seam or joint, of the proper size to receive caskets, are arranged in tiers of six upon either side of the hallways.

The openings into each sepulchre is provided with two doors. The inner door of plain concrete, four inches thick, without seam or joint, will be hermetically sealed by means of a space is occupied. The outer door may be of high wrought gold, silver, bronze, or ornate stone, and may be decorated with sculptures or inscriptions, or adorned in other ways in accordance with the desires of surviving friends. A portion of the sepulchre will be set apart for family compartments.

The sepulchres will be numbered and a deed given the purchaser, and records of those interested, including data of their life, etc., will be kept on file.

For those who wish it, electrical apparatus will be provided, so arranged and adjusted to the body that the slightest movement in the casket will start an alarm and warn the purchaser. The sepulchres are constructed with conduits arranged so as to bring fresh dry air into them, and conduct it through the casket space by forced draughts to the furnace in the sub-cellar, remote from the spaces devoted to the dead. To that furnace the air, vaporized, is fed, and the heat is thus borne and there consumed, and the escape into the atmosphere of any noxious matter is prevented. The air current is sufficiently rapid to make an entire change in the contents of the casket space every second.

TO BE PERFECTLY VENTILATED.

The ends and upper portions of the caskets will be removed, the lower part of the casket so constructed, and the clothing as adjusted, as to permit the freest circulation of air about every portion of the remains. By this treatment it is claimed that the remains will become naturally desiccated, or dried up, the fluids which constitute three-fourths of the bulk of the human body are thus borne and there consumed, and the escape into the atmosphere of any noxious matter is prevented. The air current is sufficiently rapid to make an entire change in the contents of the casket space every second.

The ends and upper portions of the caskets will be removed, the lower part of the casket so constructed, and the clothing as adjusted, as to permit the freest circulation of air about every portion of the remains. By this treatment it is claimed that the remains will become naturally desiccated, or dried up, the fluids which constitute three-fourths of the bulk of the human body are thus borne and there consumed, and the escape into the atmosphere of any noxious matter is prevented. The air current is sufficiently rapid to make an entire change in the contents of the casket space every second.

Dr. Snively, ex-physician of the Board of Health of Pittsburgh, said in a "Dis-Patch" reporter, and said: "It is a good plan; yes, it is an excellent plan. We all know of the contamination of water in the propagation of disease germs, and the objections to the usual modes of burial in the ground; but no remedy has heretofore been offered. The people can never be educated to cremation. It covers up all the traces of foul play, is contrary to the religious views of the people, and can never become popular. The proposed method, perfectly natural; no chemicals or other foreign means are needed to dispose of the body. The fatty substance naturally wears away in a natural way, the only difference being that the decomposed gases and vapor are carried away and consumed, instead of being confined and at last bursting their bounds and permeating the soil and the air of our cities with the breath of hell."

A FROG IS QUITE NATURAL.

"The method cannot be offensive or revolting. There is nothing to make it so. The body goes through the changes by a natural method and the tissue is vaporized with the air, the breath of God. It is much less revolting, indeed, to think of the body lying in the grave rotting and often bursting with the decomposed gases."

The doctor here paused in the conversation, and going to a closet brought and handed to the reporter a human arm all shriveled up. "That," he said, "is the arm of a girl who died ten years ago. I was dissecting the body when I was at college, and had taken the arm and separated the veins and arteries, and then laid it aside on the table and turned to other work. It lay there for some time neglected. At last I happened to notice that no offensive odor came from it and that it was dried up. The girl had died of consumption, and was very much emaciated, and there was hardly any flesh on the arm; but what was left was dried up, leaving the bones, tendons, muscles, nails, arteries, etc., and if the skin had been left on, the arm would now have no appearance of death, except that the skin would be like parchment, and the shape would be perfectly preserved."

OTHER DOCTORS PRAISE IT.

Dr. McKelvey also thought the plan a good one. He said that the high prices paid for lots in cemeteries ought to pay the expense of burial in a mausoleum, and the large surpluses in the treasury of the Allegheny Cemetery company, and its large capitalization, proves such an undertaking to be feasible, though it would, of course, require immense capital.

Dr. McCann did not have time to give the reporter a chat, but said the plan was a good one. However, he is an advocate of cremation.

Dr. English had not studied the matter up, but thought that it was feasible in some cases, but not in others. He said that he had thought the scheme an excellent one and far better than cremation, but he would like to see it tried before he gave a final expression as to its merits.

FURNITURE MENDING, repairing and upholstering, send to Haugh & Keenan, 33 and 34 Water st. Phone 3105.

A WELL-BOUND BARGAIN.

OLD MONONGAHELA.

Points of Interest About a Product That Comes Down From George Washington's Day—Merk Has Its Own Reward.
