GREAT CARE EXERCISED IN FEEDING

A magnificent annex to the Dixmont Hospital has just been completed at a cost of \$30,000. Its general dimensions are 63x125 feet. The new building stands on the east side of the main structure at an elevation of 200 feet. The style of architecture is Rennaisance. The outside dressing is of red brick, the foundation and basement is of out limestone, which has been quarried from the hospital property. The new annex has been in process of erection since September, 1888. There has been considerable delay in building, owing to the cold weather intervening, otherwise the hospital would have been completed three months sgo.

There are three wards, two of which are designed for 50 patients each and one for 30. The main entrance on the west side leads into a fine ward 81x40 feet, flanked by an octagonal alcove at each end on one side of the ward, and on the opposite side a central pavilion 10x28 fect. Above this ward is one of similar proportions, with adjoining rooms for attendants and bath rooms for the patients. Opening off both wards in each story are large commodious balconies, which are inclosed in wire netting, so that it makes it impossible for the patient to get out or

The upper ward is a long, narrow room, with a wide alcove, and is designed to accommodate 30 patients. The windows are guarded with ornamental iron screens, the ceilings are made of corrugated uron, and supported in the center of pretty iron columns with bronze capitals and bases. The dining room is in the basement; the floor is laid in concrete and the ceiling is made of corrugated iron.

A NICE ARRANGEMENT.

There are pantries leading off from the dining room. The food will be received into the pantries from the main building by means of an iron bridge which will connect the two buildings. On the bridge, which is 12 feet above the walks, a track will be laid and a tramway run for carrying lood over to the new building. One-half of the dining room is a bowling alley and a place for holding entertainments. The floors in the wards are made of polished hard wood. The beds are oak with wire mattresses, and will be furnished with husk and hair mat-

tresses and the usual comforts. The lavatories are supplied with marble wash bowls, with hot and cold water. The towels are locked in a patent spring rack which prevents the suicidal patient from injuring himself or herself or their fellow patients. The windows of the rooms occu-pied by patients are supplied with iron sashes, which take the place of outside screens or bars, thus doing away with the prison like appearance, which are used in for an hour, to permit of ventilation and to allow the members of the family and visitby one cord so that the upper sash bal-ances the lower, and allows them to be raised 6 inches from the bottom and lowered 6 inches from the ton producing and lowered

EXECUTIVE CHAMBER, HABBISBURG, August 20.1889.) Mrs. Ellen M. Waison, Corresponding Secretary, 360 Smithfield street, Pittsburg: My DEAR MADA—Your letter of the 19th inst, with its accompanying petition, has been received. I have been greatly exercised by the reports which have come to me in regard to the effect of opening the saloous at Johnstown. The statements contained in the petition are undoubtedly well founded. As Executive of the Commonwealth I have no authority to direct the saloons to be closed. If the necessity existed for it and martial law were declared, there might possibly be such authority, but under present circumstances there could be no justification for the declaration of martial law, and when the civil authority is in force we must rely upon the law to carry out its own provisions. The only power, so far as I know, which can limit the in-fluence of the saloons by closing them, is the power which grants the licenses. This, as you know, is vested in the court of Cambria county. Judge Johnson, as it has been reported to me, was willing to revoke the licenses temporarily, or for the balance of the sterm, provided the burgesses of the several municipalities would unite in asking him to do so. Captain Hamit-ton, who is in charge of the State work in Johnstown, secured a meeting of the burgesses and requested them to make suct an appeal to PRODUCTION PALLING OFF. "Of course during the last two years the "Of course during the last two years the production fell off largely on account of the so called shut down movement against the drilling of wells, but still to this move-ment has been enormously attributed by persons, who have not taken the pains to study the subject in detail, the decrease in the total annual production, whereas the fall-ing off in the production and the consequent diminution of stocks is much more largely due to the rapid tailing off in the production of existing wells and the much greater pro-portion of dry holes obtained to the total number of wells drilled, and also to the smaller production of the new producing smaller production of the new producing wells obtained. I know not what I can do in the premises to secure favorable action upon this subject. I will lay your communication before our Flood Commission at its next meeting. We are in-terested, of course, in the money which has been given for charitable purposes going to the right place and for the right purposes. We are satisfied, however, that in the present state of things much of it fails of its legitimate purpose by reason of the opening of the saloons. The influence of the commission, however, would be purely that of moral sussion, and I have lit-tile hope of securing good results from such in-fluence. Very cordially yours. JAMES A. BEAVER. POSSIBLE HOMICIDE.

A Man Found on His Porch With a Wound in His Head-He is Supposed to Have Fallen Down a Batchway.

Frank Smith, a glassblower, is laying at his home in a critical condition, suffering with an injured head. Mr. Smith lives on Gazzam's Hill. Early on Sunday morning his wife tound him on the porch of his house, unconscious and bleeding from a wound in the side of his head. Dr. Mc-Kibben, of Soho, was sent for, and dressed the injury. There was a bad contusion but the skull was not fractured.

Smith was unconscious until Monday morning, and then only regained partial use of his faculties. Last night Dr. Me-Kibben said he was in a dangerous dition, but would probably recover if con-gestion of the brain did not ensue. It was thought at first that the injury was

accidental and that Smith had fallen down the hatchway of a building in the neighbor-Yesterday a report was current that he had been hurt by some men with whom he had been drinking. The case has been placed in the hauds of Lieutenan; Moplaced in the hands of Lieu Roberts who is investigating it.

WILL MAKE ANOTHER EFFORT.

Mr. Robison Will Present Another Petitie for the "Zoo" Garden.

At the first fall meeting of the Allegheny Park Committee, Hon, Charles W. Robison will present a second polition asking for the use of Monument Hill as a site for a zoological garden. The petition will be ac-companied by an opinion from City Solicitor Elphinstone, that the hill can be dedicated for such a purpose, and by a statement ex-plaining the intentions of the zoological garden company, and the savantages of such an institution.

Mr. Robison belives that such an establishment would be much more interesting than the flower conservatories, and is sauguine that the project will go through. He says that the zoological gardens of nearly all large eities of Europe and America are situated within the citics.

FOR EMBEZZLEMENT.

Traveling Salesman From Oblo Under Arrest in Allegheny.

Yesterday afternoon Charles McChesney connected with the firm of Thomas R. Herd & Co., cracker manufacturers on Beech street, Allegheny, visited Alderman McKelvey's office and had a warrant issued for the arrest of J. C. Stanton for embezzlement. Stanton is a traveling man whose home is in Steubenville. For some time he has been selling goods for Herd & Co. throughout Ohio. He is accused of embezzling \$400 of the company's money, which he collected in his work. Stanton's custom has been to ome to the city about once a fortnight, and

resterday was his day. Constable John Irvin went to the factory, where he found Stanton at about 6 o'clock The salesman was surprised, and greatly The salesman was surprised, and greatly worried by the arrest. 'Squire McKelvey replied that if he could secure bail for \$1,000 he would be released for a hearing at 10 A. M. next Wednesday; if he could not get bail he would be sent to jail. ''I have no friends here,'' Stanton said. ''Can't you let me go? If I could get out to Ohio I think I could raise this money.'' The Alderman could not let the prisoner go without bail. Stanton then asked 'Mr. Huines to sign his bond, but that centleman refused. Stanton was taken to the City Hall station and placed in a cell. If he does not secure bail this morning he will be sent to the county jail.
