Coffee options were easier in New York yesterday, but packages are unchanged. For a day or two past the jobbing coffee trade has been quiet for some unknown reason. Sugar, too, is quiet, with a lowering tendency. The Sugar Trust has evidently lost its grip, and the prospect is that our sugar will henceforth sell for what it is worth, and not bring the fictitious prices which have prevailed for a year past by

A FARMING OUTLOOK.

How an Allegheny County Yeoman Took Greeley's Advice.

NOW HE PROSPERS IN MINNESOTA.

The Crop Situation and Outlook in the Great Northwest

THE WEEK'S SIGNAL SERVICE REPORT

OFFICE OF PITTSBURG DISPATCH, TUESDAY, OCTOBER 8, 1880. George Y. McKee, County Commissioner, having recently returned from a six weeks' tour through Minnesota and Wisconsin, in an interview said: "A large portion of Minnesota, particularly the southern part, has been subject to drought for three years past, and this season has been the worst in this respect. In addition to drought, chinch bugs have been a sore pest to Minnesota farmers for a few seasons past. In the farming region southward from St. Paul, to the Lake Pepin region, where a few years ago immense crops of wheat and barley were raised, the farmers have only planted small quantities of these staples the past

season or two, owing to disasters from drought and chinch bugs.

Large in Proportion.

"The yield, however, from the small acreage sown has been beyond expectations this season and the quality of grain raised was never better. The failure of old staple crops for a few seasons has forced many enterprising farmers to stock raising and the dairy business. The latter business has had a phenomenal development in Minnesota and Wisconsin the past few years." An illustration of the changes of late years is furnished by Mr. McKee's account of a visit to Mack Johnston's farm on Lake Pepin, 60 miles south of St. Paul:

"Mr. Johnston, is a native of Jeffreystown, Montour Run, this county, and about the time of the Fremont campagn concluded to follow Horace Greeley's advice, "Go West and grow up with the country." On the hich table lands overlooking Lake Pepin, near Lake City, be planted his stake, and has been growing up with the country there now for an entire generation.

A Change of Products. Lurge in Proportion.

A Change of Products. "His broad acres for many years yielded magnificent crops of wheat and barley but of late years he has found the dairy business more

years he has found the darry business more profitable. The marsh grass which grows spontaneously on his lands furnishes food sufficient for his Jerseys, and the butter finds ready sale in St. Paul at 25 cents per pound."

Mack Johnston learned in boyhood days, on Montour Rue, the value of deep ploughing, and this knowledge has been dollars in his pocket during these late seasons of drought through Southern Minnesota. The black, sandy, gravelly soil on the highlands east of Lake Pepun, in the words of Mr. McKee, "when deeply plowed, gloose't dry out in times of drought such as that region has lately passed deeply plowed, doesn't dry out in times of drought such as that region has lately passed through or drown out in wet seasons, since that kind of soil naturally drains itself." With his 200 acres of land, his comfortable home, looking out on Lake Pepin, a good market for the product of 15 Jersey cows, the old Alle-gheny county boy on Lake Pepin

ing is culied: Weather during the past week in corn and wheat regions of central valleys, has been favorable for farm work and securing of fall crops. Winter wheat is in good condi-tion arcent in Michigan where rain is needed

ter of Interest.

Wheat Loses Its Grip and Prices Take Tumble-The October Pork Deal Agnin Becomes the Cen-

CHICAGO.-The wheat market was quiet to-day; in fact, a dull feeling prevailed throughout most of the session. Operators still feel disposed to trace cantiously. Traders generally have an aversion to selling; that is, any large lines, and at the same time there are no lines of long wheat on sale. On the other hand, operators do not feel inclined to take to the buying side heavily under the existing circumstances. The liberal receipts in the North w st acted as the principal bear feature, though the increase of 248,000 bushels in the quantity of wheat on passage, as reported by Beerbohm, where a decrease had been expected, also had a tendency to create an easier feeling. The market here held steadily most of the day, with ctuations confined within 14c range, closing lower for December and 14c lower for May

56: lower for December and 56c lower for May than yesterday. Very little interest was manifested in corn, which ruled quiet and inactive the greater part of the session. Fluctuations were narrow and of a light local character. The market was devoid of any new features, opened at about yester-day's final quotations, sold off 14c, closing 14@ 14c below yesterday. Cash property was in very good demand.

good demand.

For oats, market was pervaded by a dull, weak tone in all its branches early, and there was a heavy opening for both cash and futures. A continuation of yesterday's depression was all the more remarkable in view of the fact that receipts were 160 cars less than estimated. Trading was chiefly in May, and fluctuations were within an extreme range of 1/26%c. Just before the close there was some seiling for country account. These offers, together with considerable throwing off of long property by local operators, broke May to 22c. The slump was attended with considerable excitement.

pork. Procrastination is charged to be its ruling porpose, and that when the month is far advanced and packers find themselves unable to make the property to meet their contracts they will be open to a compromise. To-day October pork sold straight at \$9.95@10.50. It opened at \$10.50 and closed at \$10.05, a fall of 45c vesterday.

Is Better Off Thins
the Czar of Russia, who must needs steal his sleep surrounded by guards he fears to trust. In Central Wisconsin there is the same complaint of drought as in Southern Minnesota. In the region west of Madison for 50 miles or more croips are generally good, but dairy farming has been resorted to of late years on account of drought. Mr McKee reports that during his visit through that section he discovered instances where farmers were compelled to drive their live stock five and six miles in order to find water. With our too muchness of rains the past season it seems hard to realize that many sections of our country have suffered sorely from want of water.

Week's Weather Bulletin.

A. W. Greely, Chief Signal Officer, in his weekly bulletin concerning weather, presents many facts of interest, from which the following is culled: Weather during the past week in corn and wheat regions of central valleys, has been favorable for farm work and securing a contral valleys, has been favorable for farm work and securing a contral valleys, has been favorable for farm work and securing a contral valleys, has been favorable for farm work and securing a contral valleys, has been favorable for farm work and securing a contral valley and wheat regions of central valleys, has been favorable for farm work and securing a contral valley and wheat regions of central valleys, has been favorable for farm work and securing a contral valley and wheat regions of central valleys, has been favorable for farm work and securing a contral valley and the region of central valleys.

New York—Flour irregular in instances and contral valleys and water and nechanged to prove the farmers were compelled to drive their live stock five and six miles in order to find water.

New York—Flour irregular in instances and contral valleys in the past week in corn and wheat regions of central valleys.

New York—Flour irregular in instances and contral valleys.

New York-Flour irregular in instances and easier; active for export and home trade, Cornmeal steady. Wheat-Spot lower, with a of fall crops. Winter wheat is in good condition except in Michigan, where rain is needed.
Drought in this region has reduced the yield of corn and potatoes.

St. Louis-Wool-Receipts, 14,706 pounds; market steady but quiet. market steady but quiet.

NEW YORK—Wool steady and quiet; domestic fleece, 32639c; pulled, 23641c; Texas, 14629c.

Bostox—There has been a steady demand for wool, and sales to some extent are reported at prices that show very little change. In Ohio and Pennsylvania fleeces there have been sales of X and above at 32633c, and XX and above at 33635c. Michigan X wool is steady at 30c. No. 1 wools are selling at about 37638c. In fine delaine selections there is someting doing at 32634c for Michigan, and at 34635c for Ohio. Counting wools remain dull. Tetrilory, Texas, Oregon and California wools are selling, on a secured basis, at 55635c for medium, Pulled wools are steady and in fair demand at 25629c for extra, and at 32638c for super with Western grades selling principally. Foreign wools are quiet, but are held with considerable frumess owing to the strong tone of foreign markets.

New York, October 8.—The jobbing trade in drygoods was scarcely up to expectations, though sales stimulated by special offerings, were of fair total. A special cut was made in Mascurvile bleached cottons, causing them free distribution. The general market was unchanged, business being moderate for near wants, but very good in specialties for spring. Stocks of staple goods are exceptionally light, and prices are consequently very steady at first hands.

Outside Barbarians Still Whacking Away at Natural Gas.

COLD FACTS KNOCK THEM SILLY. The Question of Supply One of the Un-

fathemable Secrets of Nature. STATISTICS OF ALL THE WORLD'S FAIRS

Not long ago a Louisville publication, moved by envy, no doubt, made the prediction that the natural gas supply of Pittsburg would soon give out. Impelled by the same spirit that prompted this utterance, the Iron Trade Review, of Cleveland, in its 18sue of October 3, says: "It requires no close reading or investigation to convince one that the natural gas industry of Pennsylvania and Ohio is in a bad way. Its rise was sudden, its profits have been enormous, its effects upon manufactures have been note-worthy, and its end seems a matter of the not

very distant future."

This is important, if true, and coming from a source that is supposed to be entitled to credit for accuracy of statement, it should be backed up by fact, or argument, or something to give it weight. But it is not. It is merely an assertion of the writer's opinion, backed, presumably, upon other assertions of the same tenor. All of them are as far from the truth as it is possible for them to get. There is no evidence of any kind or quality, scientific, theoretical or practical, going to show that the supply of nat-ural gas in Western Pennsylvania is giving out, or will give out this year, next year, or "in the not very distant future." It may give out tomorrow, or next week, or next month, or some other time, but nobody is wise enough to fix the date positively or approximately. The dura-tion of the natural gas supply is one of the se-crets of nature which are beyond the power of man to penetrate. Men of limited knowledge and vast assurance essay the task for the sake of notoriety, but the true scientist rarely ven-tures an opinion on the subject, and then in such guarded language as to leave the impression that he is not altogether certain that he

The assertions that the natural gas supply of Pittsburg is "in a bad way," "is giving out," or "will soon give out," are not new. They are venerable chestnuts. They have been in constant use by misinformed or envious people ever since the first well was crilled, and are likely to be rehabilitated yearly, or even with greater frequency, for an indefinite period. Meanwhile the supply is not only maintained, but is increased by the development of new of established companies or in organizing new ones for the conveyance of gas from the sources of supply to consumers in the city. This one fact outweighs any number of theories, no matter by whom put forth. It shows conclusively that moneyed men of Pittsburg take no stock

knows what he is talking about.

believe the supply to be permanent. That there are occasional shortages no one will attempt to deny. But they possess no more significance than shortages in manufact-ured gas or electricity. They are more frequent at this season of the year than any other, and are caused by the adjustment of pipe lines to the winter demand, which grows greater every year. One of the local companies will supply between 2,000 and 3,000 more houses this winter than it did last. This requires considerable pipe-laying and plumbing, and while it is m progress a shortage in some part of the city for a few hours should be cheerfully submitted to, and not heralded abroad as evidence and a little selling here and there weakened mitted to, and not heralded abroad as evidence that the supply is giving out. Natural gas has done and is doing, too much for Pittsburg by developing her industries and attracting capital

to be treated disdainfully or flippantly. This should be left to outsiders. In view of the probability Fair in this country, the following statistics are of interest: The London Exhibition of 1851 covered 21 acres, attracted 17,000 exhibitors, cost \$1,463,970, was open for 144 days, received \$2,570,500 and admitted 6,039,195 visitors. The Paris Exposition of 1855 covered 2434 acres, attracted 21,779 exhibitors, cost \$5,000,000, was considered by the control of 1855 covered 2434 acres, attracted 21,779 exhibitors, cost \$5,000,000, was considered by the control of 1855 covered 2435 acres, attracted 21,779 exhibitors, cost \$5,000,000, was considered by the control of 1855 covered 2435 acres, attracted 21,779 exhibitors, cost \$5,000,000, was considered by the control of the sand and shows no improvement. Wade No, 9 looks like a small pumper. A. J. Clark's Lemoyne and Paul No. 2 will be fair pumpers.

The Canonsburg field has received a knock-down blow—Gladden No. 2 situated near Gladden No. 1, which was a gusher, is as dry as a bone. The Canonsburg field is very treacher out. College No. 3 and the Trinity wells will be in the control of the sand and shows no improvement. Wade No. 9 looks like a small pumper. A. J. Clark's Lemoyne and Paul No. 2 will be fair pumpers.

The Canonsburg field has received a knock-down blow—Gladden No. 2 situated near Gladden No. 1, which was a gusher, is as dry as a bone. The Canonsburg field is very treacher out. College No. 3 and the Trinity wells will be fair pumpers. open for 200 days, received \$640,495 and admitted 5,160,330 visitors. The London Exposition of 1882 covered 231/4 acres, attracted 28.653 exhibitors, cost \$2,800,000, was opened for 171 days, received \$2,042,650 and admitted 6,211,103 visitors. The Paris Exposition of 1867 covered 37 acres, attracted 50,226 exhibitors, cost \$4,000,000. was open for 217 days, received \$2,108,675 and admitted 10,000,200. The Vienna Exposition of 1873 covered 40 acres, attracted 42,584 exhibitors cost \$11,000,000, was open for 186 days, received \$1,032,850 and attracted 7,254,687 visitors. The Centennial, at Philadelphia, covered 60 acres,

attracted 60,000 exhibitors, -cost \$8,000,000, was open for 159 days, received \$3,813,720 and admitted 9,910,966 visitors. A New York authority reports the condition of the drygoods trade as follows: Cotton goods have sold well at first hands all the year, and there are no accumulations to vex the produc ers. In consequence of this favorable state of affairs values are, of course, well sustained Orders for brown cotton continue to keep the market well cleared up, and bleached goods are in almost as favorable a situation, while the request for cotton flannels continues excep-tionally heavy. Western orders for prints are n the main satisfactory. Prices have been cut to some extent by sharp local competition, but the general market soems not to have been dis-turbed. The export request contrasts rather unfavorably with the home demand, but of course more or less business is done in this line from day to day. Most of the important wool

nanufacturers have orders enough on hand to keep them busy for the present, and prices are The corn pack of Maine this year will not be over three-quarters as large as last year, and not over half as large as in 1887. To this correspondent adds: "Assuming the packs of the less important States to be equal to the 1888 pack (but they will fall far below that), there would be a falling off this year of 1,189,126 cases." A further estimate puts the total pack of the United States last year at 2,302,248 cases, against 3,491,474 m 1888, 2,311,424 in 1887 and 1,704,755 in 1886. The Maine packing in 1887 amounted to no less than 750,000 cases. The writer adds that though it is admitted that the quality of the Maine corn last year was very poor, on account of the cold and wet season, it

is believed that the output the present year will be in every way superior.

BRACING UP. Electric Recovering From the Blow Denit

by Justice Bradley. Flectric was a little stronger yesterday, 2 shares selling at 44%. There were no transac tions in it in the afternoon, but it was held at 47, with 44% bid. The evident determination of holders not to let it go at a sacrifice has turned the tide, and will soon bring about a full reaction. The scare is over, proof of which is found in the fact that there were more

buyers than sellers at the advance. Pittsburg Traction brought 47%, Central Traction 81%, and Switch and Signal 22. Philadelphia Gas was fractionally stronger, but the others were weak. Bank and insurance shares were strong. The total sales were 181 shares. Bids, offers and sales were:

eaders, while the trusts were comparatively quiet and occupied a much less conspicuous position in the market than for the past two

THEY KNOW IT ALL. 16 18 115 214

monetary situation was the most important factor in this improvement, and to-day most of the business done was at 607 per cent, though loans were made as high as 8 in the forenoon and as low as 4 toward the close. The strength of the trusts was the feature of early trading. of the trusts was the feature of early trading, and later there was a heavy drive at the Grangers, which for a time gave the bears the complete control of the market. After this was over, however, the whole face of the market underwent a marked change for the better, and sharp rallies were in order all over the list, the covering of shorts being on a large scale and the buying for the long account was stimulated to a considerable extent. The London market was all higher for Americans this morning, but the opening here was very irregular, and while Northern Pacific was up 1/2 Jersey Central was down I per cent.

The trusts early showed considerable strength, but there was yet a severe pressure upon Atchison and the grangers, in which the coal stocks sympathized, and Jersey Central made a material decline in the early dealings. The full force was brought to bear upon the Grangers after II o'clock, and Burlington and Peoria especially felt the attack severely. The attack upon this stock had the appearance of a drive to buy upon, and while considerable long stock came out on the decline there is reason to believe that the heavy lots aimed at, which have been accumulated upon the late issue, were not forthcoming.

The talk of the issue of a large amount of income to come ahead of the stock helped to keep the flow of long stock going. When the pressure was removed the rebound was sharp, and before noon a portion of the loss had been regained. The demand from the shorts made an active and strong market for the time being, and operators, for a rise, who have held aloof for some time back, were again encouraged to again take hold, though their purchases were made with caution. Chicago turned up as a buyer of stocks, and this was accepted as evidence that the speculative clique at the center had, changed its position upon the market. In the upward movement there were some very sharp advances made among the specialities, and San Francisco preferred, which had sold down to 53 from 59% last evening, recovered to 58. Manitob and later there was a heavy drive at the Grangers, which for a time gave the bears the

PLENTY OF MONEY.

But it Continues to Stick Wonderfully Close to the Banks. There was a fair movement in the local noney market yesterday, but no change in conditions. There was plenty of the stuff which borrowers could have had at 6@7 per cent, or

borrowers could have had at 697 per cent, or thereabouts, but they didn't want much of it at any price. The fact is, Pittsburg manufacturers and merchants have been doing such a rushing business lately, largely for cash, that they have about all the money they need without applying to the hanks for it. Still, considerable money is being loaned, one way and another, a good deal of it for investment in real estate and morigages. The exchanges were heavy, being \$2,464,963 87 and the balances \$384,228 47.

John M. Oakley & Co.'s New York correspondent wired yesterday evening: The money market to-day was relatively easy, as loans were almost universally made at 6 per cent, and brokers with proper collateral had no difficulty securing all the money they needed at that rate. Time loans on stocks are difficult to make, except for six months, for which period some loans are made at 6 per cent.

Money on call at New York yesterday was easier, ranging from 4 to 8, last loan 4; closed offered at 4 per cent. Prime mercantile paper, 5162716. Sterling exchange quiet and heavy at \$4 82 for 60-day bills, and \$4 86% for demand.

Closing Bond Quotations.

but is increased by the development of new territory and the bringing in of new wells. So thoroughly are capitalists convinced of the permanency of the supply, that they are investing millions of dollars in extending the operations of established convents of established ances, \$2,023,424.
