

AN ALDERMANIC NINE-PIN. How Prisoner Chapman Bowled Over the L. & O. Champion—A. Washart Boke One Score—Fun at the Jail.

Marquis Will Contest Lieut. Gov. Lamson's Election. THE PLURALITY IS ONLY 22.

Why Allen O. Myers is Sweating Under the Democratic Collar.

SOME SENATORIAL CANDIDATES. Al Carlisle, the widely-known politician of Ohio, came into the city last evening from Columbus, where he has been since the election.

Mr. Carlisle was seen last evening by a representative of THE DISPATCH, and in answer to a question as to the cause of Mr. Campbell's success, said:

The Democratic State Convention at Dayton had much to do with it. The sharp contest for the nomination produced a full attendance. It was the largest convention ever held by the Ohio Democracy, and out of the struggle came the best platform ever adopted in Ohio.

It united all elements of the party in its support. Mr. Campbell represented in himself the party's platform, and conducted a most brilliant campaign, aided by the gentlemen who were his rivals in the nomination.

The Democratic campaign was perfection itself. No mistakes were made from start to finish. The Democracy was led by its own people, and the Government was the result.

Mr. Campbell's success was due to the fact that he was a man of the people, and the people were with him. He was a man of the people, and the people were with him.

Mr. Campbell's success was due to the fact that he was a man of the people, and the people were with him. He was a man of the people, and the people were with him.

A PERIODICAL SCARE. The Beck's Run Schindery Polluting the Monongahela Water.

SOUTHSIDES WANT IT REMOVED. Dr. Munderf Discusses Possible Methods for Future Relief.

APPEALING TO THE HEALTH OFFICERS. There is a deal of condemnation being heaped upon the Beck's run schindery again.

There is a deal of condemnation being heaped upon the Beck's run schindery again. Southside people claim that the water is so badly polluted with organic matter that the health of the community is not only endangered, but the people are given a supply of water that is wholly unfit for use.

Beck's run, on which is located the schindery, empties into the Monongahela river, and the water is so polluted with organic matter that the health of the community is not only endangered, but the people are given a supply of water that is wholly unfit for use.

The scientific argument being that all streams in this region are polluted with organic matter, and that the water is so polluted with organic matter that the health of the community is not only endangered, but the people are given a supply of water that is wholly unfit for use.

The scientific argument being that all streams in this region are polluted with organic matter, and that the water is so polluted with organic matter that the health of the community is not only endangered, but the people are given a supply of water that is wholly unfit for use.

THE ARMSTRONG DEMONSTRATION. Will be Attended by an Unusually Large Turnout—Some of Those Invited.

Matters are progressing favorably for a very large turnout at the dedicatory exercises of the monument on Thanksgiving Day.

The monument is erected and has been accepted from A. E. Windsor & Co. by the Executive Committee, a sub-committee of whom viewed it in Allegheny Park on last Thursday and expressed themselves as highly pleased with the work.

Reports from the different organizations indicate that no time or expense is being spared to make the demonstration a success. Some of them have expended \$400 in preparation for the event. It promises to be the grandest spontaneous demonstration that was ever held.

In addition to nearly 500 members of the committee, who will be largely represented by the Union Veteran Legion at a recent meeting arranged to turn out 600 men; also Post 123 G. A. R., of which Mr. Armstrong was a member, will be present.

Command of A. P. Barcliff, who represents the G. A. R. on the Monumental Exercises, will be largely represented by the Union Veteran Legion at a recent meeting arranged to turn out 600 men; also Post 123 G. A. R., of which Mr. Armstrong was a member, will be present.

Command of A. P. Barcliff, who represents the G. A. R. on the Monumental Exercises, will be largely represented by the Union Veteran Legion at a recent meeting arranged to turn out 600 men; also Post 123 G. A. R., of which Mr. Armstrong was a member, will be present.

CHATS WITH PEOPLE. A Belgian Glass Manufacturer Discourses About Furnaces, AND DECLARES IN FAVOR OF TANKS.

Dr. Evans Strikes Anarchists a Sledge Hammer Blow in the Neck.

HOW MCKINLEY'S SHOES WERE SHINED. Mont. Georges Duprez is a Belgian gentleman who lives in the Duquesne Hotel.

Mont. Georges Duprez is a Belgian gentleman who lives in the Duquesne Hotel. He is general secretary of the Val Saint Lambert, Belgium, one of the most extensive in the country, and is here to improve his knowledge of the States as well as to attend to his business interests.

The Val Saint Lambert Company manufactures cut glass in pressed glassware, and has a good connection in New York and Chicago for their wares. In this city its trade is small. The company prosecutes its business here in face of a 45 per cent duty on imported glassware.

Investment in Belgium is not so good as it is in the United States. The largest markets in China, India and Turkey. Skilled glassworkers in Belgium receive only \$30 per month, but the average rate here is \$40 per month.

The factories are in operation all the year round; work, in brick times, is done in winter. The hours of work are from 6 to 6 with two intervals of one hour each for meals. Fuel is an expensive item, the average yield of best quality from the tanks is 2000 lbs. per ton.

Regarding the relative merits of pot and tank furnaces, Mons. Duprez said: "The use of pot furnaces for the manufacture of window glass is almost out of date in Belgium. The pot furnaces are held to their use are not making any profit from them. I may say that the entire output of window glass in Belgium is the product of tanks."

The Little Culler Whom Mrs. Todd Found on Her Doorstep. Shortly after 10 o'clock Friday night Mrs. Todd, of No. 15 Broadway, Allegheny, was summoned to the door by a ring of the bell, and when she opened the door she found a basket on the step.

She carried the basket inside and removed the lid, when she was surprised to find a pretty baby boy sound asleep. In the basket was a note asking her to adopt and raise the child, which was about 3 years old, but as the lady does not care to have the trouble, she sent the infant to the City Home yesterday.

LONG BALLOTTING. A Protracted Siege in the Election of an Allegheny School Teacher. It took 85 ballots to decide upon a teacher for the first ward of Allegheny at the directors' meeting Friday night. There were three candidates, but Miss Emfield, who lately came from Indiana, Pa., was finally elected.

Miss Emfield had a letter of recommendation from Judge Harry Lantz, and another from a Judge of the Supreme Court. She succeeds Miss Alice Turner, who left to take a position as teacher in a kindergarten. Philip Smith was elected janitor to fill the place vacated by the death of Thomas Christian.

NO OBJECTIONS TO THE DAM. A. & J. Groetzinger, Tanners, Did Not Oppose the Herr's Island Scheme. Mr. A. Groetzinger, of A. & J. Groetzinger, tanners, knows nothing of any objections to have been made against the Herr's Island dam, which is near the proposed site. In talking to the reporter he said:

"I have not given the matter much thought, but I do not think that the tanners' objections were what caused the dam to be abandoned. The dam is necessary for the power of the Allegheny River, and I do not know that our firm has objected."

THE HEALTH OFFICERS have for some time been laboring with the question of the Monongahela water, but have not as yet reached any conclusion, except to condemn the existence of schinderies and other sources of pollution within a range of the influent pipes, which in any flowing water is supposed to clear itself. The state of the water supply, and so far as I can see, the only possible method in the future will be a wholesale purification of the water after it is pumped into the reservoir, and before it is distributed to consumers.

NOT MUCH DONE. The Trades Council Finds That German Paper is Not Anarchistic.

The Trades Council of Western Pennsylvania met last night with Vice President Hugh D. McGraw in the chair. The attendance was large and creditable.

The committee on the horse shoers reported that the difficulties between the Brotherhood and the K. of L. men had been amicably arranged. The committee on the Arbitration League presented the following:

Resolved, That a committee having executive powers be appointed to visit this city, find out the anarchistic in this city, and recommend to the support of the workingmen.

The resolution was adopted. A motion was offered that the expulsion of John Phillips and Homer J. McGraw from the K. of L. of Labor be referred to the Executive Committee for investigation. There was considerable discussion, and pending action on the motion the Council adjourned.

CROSS SUITS BROUGHT. A Carson Street Racket in a Merchant's Establishment. William Johnston, a storekeeper at South Twenty-seventh and Carson streets, was charged with assault and battery before Alderman Carlisle last night by Thomas Murray. The prosecutor claims that in the evening while making some purchases in Johnston's store he was called upon to pay for some goods which he had not bought, and when he declined to do so he was assaulted and thrown out of the store.

The constable had not been gone many minutes with the warrant for Johnston's arrest, when a man came into Alderman's office and made an information against Murray, charging assault and battery. His name is Harry Beer, a partner in the business with Johnston. Beer, who was taken and held in the store and when he was quiet or leave the place attacked and beat the prosecutor. Warrants issued in both cases.

GRATITUDE NEATLY EXPRESSED. The Milwaukee Calumet Club to Receive a New Testimonial. When G. A. R. Post 123 was at the National Encampment at Milwaukee, Wis., the members were royally entertained by the Calumet Club, one of the swell organizations of that place. In gratitude for the fine treatment accorded them, the members of the post have caused to be prepared a set of engraved resolutions conveying their thanks to the Calumet Club.

The work was executed by Robert H. Longmore, of Allegheny, in an entirely different character from any heretofore done in this neighborhood. The design is a mixture
