the Brotherhood.

Mickey Welch Signs With the Old New York Club.

THE SPORTING NEWS OF THE DAY

Fred Carroll arrived in the city and declared that he will play with the local Brotherhood ball team. Welch signs with the New York club. There are many interesting facts recorded about sporting.

Fred Carroll, the big hitting ball player and the extremely good judge of modern novels arrived in Pittsburg last evening. It is needless to say that Frederick was met by his old "pals." They showed up in force, and they were "Brotherhood" to a The burly catcher never looked heartier in his life. He has been bigger, but "la grippe" has even discovered Fred Carout in 'Frisco. Therefore Carroll, though looking light, wasn't in good trim.

Talking about baseball affairs, the few words that Carroll had to say go very straight against his old employers. Whatever may have been the conjectures about Carroll's intentions he is and always will be a Brotherhood man, although it may come to a question of being toll-man on the forthcoming free bridge.

CARROLL ALL RIGHT. Undoubtedly Carroll looked in condition, and stated definitely that he was a Brotherhood man. This ought to be a pointer to the old League people here to never expect Carroll. During a conversation with the writer he said: "Why I sent you many pointers from 'Frisco, and I want to say that THE DISPATCH all over the West is the great authority on puglism, We all have found that to be true, and everybody out there waits until they hear what THE

DISPATCH has to say about it. "Well, now," said Carroll, "I have not much to may about baseball. I have received an offer of \$3,500 per year to captain and manage the Pittsburg League club. Mr. Nimick has made me that offer, and I will see him and the other old club officials to-morrow. I feel certain that I will sign a Brotherhood contract. I have signed no contract yet, but I think I'll be on the safe side by signing a contract with the new club of this city. Of course I will wait on the officials of the old club to-morrow, but I am a Brotherhood man."

Carroll is really an all-round sport. He has seen many fistic encounters among the West-ern people, who are a little enthusiastic about Second race, six furlongs-Austr the glove contests at 'Frisco. Mr. Carroll in-sists that Jackson is a great man, and that Siavin is a very poor one comparatively. Mr. Carroll has seen them both perform. He also has a great opinion of McCartby, the featherweight. But Mr. Carroll in leaving baseball affairs even talks about the good boxing or fighting qualities of men like Frank Glover,

Pat Killen, etc.

Coming back to the safer paths of baseball he said: "The public opinion in Frisco and California is in favor of the players. They want to see them do well and everybody believes it to be a strungle to free the ball player from people who have him as a slave."

Manner Hanlon signed Quinn yesterday to play with the local team, and Ad Gumbert said: "No, I don't sign now, but my contract will be given to you, Mr. Hanlon, signed by me to norrow. Mr. Gumbert stated positively that he will be with the local Brotherhood club, and ubtedly Mr. Gumbert as a pitcher is a good

THE INDICTMENTS DEFECTIVE.

tradition of Denevan Et Al. ALBANY, January 18.—Civil Justice Peter Mitchell, of New York City, as counsel for Prof. Mike Donovan, William Harding, Charles Johnson and James Wakeley, who are wanted by Governor Lowry, of Mississippi, charged with aiding and abetting the Sullivan-Kirain fight at Richburg, Miss., appeared before Governor Bill: this afternoon and requested him not to allow the prisoners to be taken out of the State. He claimed the indictments against these men are defective, inasmuch as, while charging his clients with aiding and abetting the fight, the papers do not show in what manner they so aided or abetted.

He said these feur men went to the scene of the fight in the cancilty of spectators, and by no act, officially or unofficially, were they connected with the contest in any way. Mr. Mitchell will submit authorities to the Governor touching similar cases. All of the men were present at the hearing, with the exception of Harding. Johnson and James Wakeley, who are wante

Mr. Brown said this aftermoon that he had no knowledge of Lamb and never heard of him until notified of the forged notes. Up to this evening he had received no information further on the subject.

The property, valued at £5,000, came to her in the same way through her sister, who, she alleges, was the first wife of Mr. Richard Brown, of the iron firm of Cleveland & Brown, Cleveland. Washington, Pa., January 18.—The Steven-on-Schmitz-Darrah well complication seems to be at last settled. It will be remembered that a number of persons had purchased lots from ex-Judge Acheson. Later he was interested in wells put down in the immediate neighborhood. The other lot owners took exceptions to this, claiming that the former owner had agreed with them that no oil well should be drilled by either party, and in order to defend themselves. Mesers. Stevenson, Schmitz and Darrah leased their loss to George Davis and others, who drilled a well that has been producing for several weeks.

MRS. ROBERT TYLER'S CAREER. Her Debut More Than Half a Century Ago-

Ber Marriage. An actress died the other day who had half a century ago enchanted all New York. The daughter of a great actor, the daughterin-law of a President of the United States, a whilom lady of the White House, and an accomplished, charming woman, she passed accomplished, charming woman, she passed away so peacefully and so quietly that even lynx-eved newspapers have forgotten to tell of her sweet and yet eventful life. It has been said simply that "Mrs. Robert Tyler, wife of the son of President Tyler," expired at her Southern home. Firty-five years ago Priscilla Elizabeth Cooper was a New York belle. She was the daughter of the then famous Thomas Apthorpe Cooper, a tragedian who in his prime had a handsome face, noble person, a fine mellow voice, Sunusual dignity of manner and grace of action, and a declamation most forcible and eloquent. He was

tion most forcible and eloquent. He was for 30 years a paramount favorite of the New York public, and he thrived and grew rich. In 1812 he took for his second wife beautiful and brilliant Mary Fairlie, the Sophy Sparkle of Irving's "Salamagund," the daughter of the celebrated wit, Major the Bright and the granddaughter of

old Irish gentleman, became allied to two of the most eminent families in the State, and his society, while he was in the prime of his wealth and his art, was eagerly courted by aff who made pretension to taste or fashion. Priscilla Cooper, a daughter of this notable union, was born on June 14, 1816. She was carefully and wisely educated, and reared with all the surroundings of wealth and refinement by loving parents. A stage career had never been contemplated for her, and indeed a prospect of it was repugnant to her disposition. Yet she did not hesitate to sacrifice her prejudice when the time came. In 20 years the tragedian had exhausted a fortune in extravagant living, and, though aided by has said that he does not intend to put his

For three years she played in her father's company, and in the South and West she became an in the South and West she became an especial favorite. The stage, indeed, was her fate. An auditor who could not resist her charms met her, wooed her and won her. Thus Priscilla Cooper, in 1840, became Mrs. Robert Tyler, wife of the son of John Tyler, elected Vice President of the United States and successor to the President. LEAN MEAT AND WATER.

Recent Experiences of Physicians Short They Are All-Sufficient.

outsville Courier-Journal. Can life and health be sustained indefinitely upon a diet of lean meat and water without any farinaceous food at all? Physiologists tell us that it cannot; experience seems to negative that assertion. It is highly desirable that this question should be cleared up and finally set at rest, both from a practical and from a purely scientific point of view. A diet of lean meat is now being advocated for several purposes in practical medicine, and it is of the highest importance that we should know for cer-tain for what period it can be carried on without injury to the patient. In this country it is being used chiefly for the reduction of obesity, but in New York several physicians are making an extensive use of a diet consisting entirely of lean meat and water, not only for that purpose, but also in the treatment of dyspepsia, phthisis, ectasia of the stomach, and in the absorption of new growths; in the latter case it being claimed that by increasing the metabolism of the ody recently formed tumors can be ab-

On a consideration of this subject two conclusions inevitably present themselves: Either the generally received opinions on the subject of, diet as contained in works on physiology are unreliable and should be revised; or that it is possible so to alter the metabolic mechanism of the body, be headilized in finence as to scale. The body by hereditary influence as to enable the in-dividual to exist in defiance of all the or-dinary physiological laws of nature.

HARRISBURG, January 13 .- It has been printed in some of the newspapers that of the 25 delegates already elected to the next Republican State Convention, 21 are for Delamater, three for Hastings, and one for Stone. An accurate statement of the situation would be that four, possibly five, are for Hastings, one for Stone, and the others for Senator Quay to dispose of as he may see fit when the time comes.

Senator Quay is well-known to have expressed his annoyance that this contest should have been made against Hastings in his own Congressional district. CANNOT MOVE LILLY.

In Juniata county, when the friends of Delamater found it impossible to deteat General John K. Robison for delegate, they endeavored to have him instructed. The purpose failed. General Bobison is a per-sonal friend of Hastings, and a member of the Governor's staff. No influence can take him away from the support of the Adjutant

The regularly elected delegate from Carbon county is for Hastings. The factional fight that was planned in the headquarters of the Republican State Committee last fall, in order to take the control of the county out of the hands of General Lilly, proved a failure. General Lilly's faction won, and elected the delegate, who is not for Delamater. This was another instance in which Senator Quay had to do some scolding. He regarded it as rather indecent that new-comers like Chairman Andrews and Frank Willing Leach should set up a fight against General Lilly, who is a veteran, and, next to Sena-

tor Cameron, the largest contributor to the Republican campaign fund. The contest in Berks county had nothing fight in Schuylkill, where there is an odd the most eminent families in the State, and delegate or two that neither Hastings nor his society, while he was in the prime of Delamater is likely to get; but the remain-

years the tragedian had exhausted a fortune in extravagant living, and, though aided by generous benefits, he was compelled to return to a stage which he had quitted, he once thought, forever. When he went before the isotlights at the Old Bowery, one night in 1834 he had for a Virginia to his Virginius his young and lovely daughter.

Cameron is equally apprehensive of this, and far more solicitous about it.

Quay thinks that by the time he recovers his health and a few fish down in Florida he will know more about this. If the ma-chine is set to work it can nominate Dela-mater with a little grinding, but there are plenty of good Republicans who feel certain Senator Quay has received a number of let-ters expressive of this fear.

INCREDULITY.

How potent is this trait of the human mind. The Bible refers to it and says: "Were an anregi to come down from heaven, ye would not believe." It is the cause of much injury. We are disposed to doubt the sincerity of our friends, and it often leads to misanthropy.

This is particularly applicable to the virtues of many valuable remedies, however strong they may be indorsed.

CHANCES OF COLD WEATHER

There is Plenty of Time Yet for a General Freezing Up.

Philadelphia Ledger. 1 Captain Henry E. Mellville, who has just entered upon his eighteerth consecutive year of service as superintendent of the city iceboats, has furnished a Ledger reporte with the following dates at which the Delaware river was aufficiently obstructed by ice to warrant the city iceboats being placed in service since 1872:

Winter of 1872-73, December 1; winter of 1873-74, January 15; winter of 1874-75, December 30; winter of 1875-76, December 19; winter of 1876-77, December 19; winter of 1877-78, January 3; winter of 1878-79, December 23; winter of 1879-80, December 31; winter of 1880-81, December 11; winter of 1881-82, January 4; winter of 1882-83, De-cember 20; winter of 1883-84, December 25; winter of 1884-85, December 20; winter of 1885-86, January 10; winter of 1886-87, December 6; winter of 1887-88, December 29. In the winter of 1888-89 the boats were kept in readiness with half crews, but they were not called into service dur-ing the entire winter. The first ice appeared last winter December 23, and disappeared December 30; appeared again appeared December 30; appeared again February 13, and disappeared February 20; again appeared February 24, and finally disappeared for the season four days later, the ice at no time being over two inches thick. By the above record it will be seen that the chances of considerable cold weather before the winter is over are very good. In four winters of the 18 reported the river did not freeze sufficiently to require the services of the iceboats until after January 3. of the iceboats until after January 3.

Let the population of the world increase as it may, and the uses of the various metals be doubled or quadrupled, the Andes and the Cordilleras will alone supply almost every de-mand. For not only do they contain the stores of gold and silver from which the Incas and other ancient rulers drew so fabulous amounts of those metals, but coal copper and lead are known to be present in them in "great abundance. Nor are the mineral deposits of Northern Bolivia and Eastern Peru rendered worthless by being situated in a country unfit for habita tion. The whole population of Europe, says the Spectator, could invade the great valley of the Amason and yet make scarcely a noticeable impression on its vast solitudes

A CARLOAD OF POSTALS GONE.

The Cargo of One-Centers Embraces 4,000, 000 of the Billets.

Philadelphia Becord.] Postmaster Field was informed yesterday that another carload of postal cards had started for this city from Birmingham, Conn., to take the place of the missing car, and that it would be here to-morrow. In the meantime the postoffice has received a supply of 150,000 from Baltimore. The missing car, which contains 4,000,000 cards, left Birmingham for this city on December 31, and since then the postal authorities

have been vainly searching for it. A Great Difference. A cable dispatch informs us that "the Nihilists are still at work in Russia." We have tween a Nibilist and an Anarchist. That's the ence; the Nihilist works.
