Higher Prices and Active Demand for Barbed Wire, Nails

AND ALL VARIETIES OF HARDWARE

Plumbers' Supplies Join in the Upward Movement of Trade.

ENLARGEMENT OF WOMAN'S KINGDOM

OFFICE OF PITTSBURG DISPATCH, TUESDAY, January 14, 1890. The outlook for the produce trade was line that has been known for many a year. Steel unils have advanced 15 cents per keg since the 1st of January, and are now selling in carload lots at \$2 50 per keg. Through last summer and up to September the price was \$1.65, and at that figure trade was very slow.

We do not have the facilities for the manufacture of steel ralls, and could not lave them without large additional expenses, which we do not see ourselves clear to shoulder. The old-fashioned unil mill of ten years ago would cut a sorry figure in any effort to compete with trade in its present status. The methods of ten years ago in nail manufacturing would furnish very poor pickings at this day. In recognition of this fact our factory has accepted the situation and permitted its nail machines to lie idle, and our attention is turned to other lines where there is some hope of profit. The only nail mills of this city that are now doing any good are those which have the facilities for manufacturing steel."

A Burbed Wire Advance.

lift prices above actual values are in the end hurtful to legitimate trade. I have no desire for a boom in our line of trade. A fair profit for our labor and capital invested is much better than a boom, as it will not be followed by reactions and depressed markets.

Pricesof lead last April were down to \$3.60 per hundred. In Juty, which is busy time for plumbers' trade, prices had advanced to \$4 per hundred. This advance was not maintained, and prices drifted back toward the old level. With the rise in iron and steel there has recently oome an advance in pig lead, and rates now are \$3.85 per hundred, an advance of 25c per hundred on the lowest price touched last spring and summer.

In the past four months there has been an dvance of 3c per pound in copper. The lowest price reached last summer was Mc per pound. Prices are now firm at 13c per pound. A leading dealer in plumbers' supplies said intil March, but the outlook was never better antil March, but the outlook was never better at this time of the year. Our customers, so far as we can learn, have been carrying very light, stocks of late, and a general replenishing will be a necessity at an early day. With the pres-ent great activity and firmness of iron and steel there is little doubt that our industry will come in for its share of the prosperity. I feel entirely confident of a large trade for the year 1890."

A Fair Movement in Wheat, But Prices Lach Staying Qualities - Hog Products Quiet and About Stendy All Around.

CHICAGO-The volume of trading in wheat was a little larger to-day at a lower range of prices. A prominent local trader was credited with being a liberal seller early and a moderate buyer later. The weakness in the market early in the session brought out some long wheat. There was no special reason given for the decline, other than the supporting power was lacking.

Coru-Another quiet day was witnessed in this market, trading being in the main local and fluctuations confined within 1/2 range. The feeling prevailing was firm early, but later an easier tone was manifested, the market closing

Now it is very brisk at the advanced rates. The bring and the price was the price of the past. The trade now calls for nothing but the steel cut and wire nail, a representative of one of our leading manufacturing firms, which a few years ago made a specialty of iron nails, recently said:

There has been in the past few years

An Entire Revolution in the nail business. Steel cut nails have supplanted iron, and now the wire nail has come in to compete with the steel cut nail. As a result of these changes our firm has withdrawn from the nail trade altogether, and is now engaged in the manufacture of bar iron. Woman's Kingdom.

The following, chipped from a recent number of the Congregationalist, of Boston, suggests a line of employment for women which, it is hoped, may open up avenues of profitable usefulness for some enterprising spirits in this neck of the woods:

Anything any woman can make, and make well, from the holder an invalid can fashion in bed to the most artistic needle and brush work, is accepted by the Woman's Exchange in New York. So says Harper's Buzur, and undoubtedly the statement is true of similar exchanges in Boston and other large elties. But the writer emphasizes the importance of doing one's best. No slovenity, half-done or poorty finished work is accepted, because the prices paid demand the best workmanship. Wilkinsburg Talking About Three School

There have been not a few misstatements which have found currency of late concerning the efforts of the Best Brewing Company statements alluded to relate to the prices asked for the property which the company has in view. That holders have demanded anything like the prices attributed to them is said on good authority to be pure fiction.

One of the property-holders who has received an offer from the Best Company was seen

There are two sides to every question. The proposed change of moving day is no exception. It has its advocates and its opponents. In regard to this matter a member of the firm of W. A. Herron & Sons said: "One great objection we have found has been made by the business men to the idea of moving in the midst of the spring trade. They are averse to a change at that time, which is one of the busy seasons of the year. This has always been the subject of grave consideration on the part of our business men. As it is now, many are subjected to great inconvenience, while some incur loss by being forced to move as late as the lat of April.

to intention of permitting any movement, and casting around for a vulnerable spot, Atchison was hit upon, as there was some selling for Boston account.

Rumors in regard to the voting trust were circulated, but, owing to the Reading episode, voting trusts are not in favor at present in Wall street, and both the success and probable failure of the plan were made excuses for selling the stock down. At its extreme decline, 2 per cent, it was really the most active one on the list, which was something of a sensation after a long period of stagnation to which it has been subjected.

The success in Atchison encouraged further pressure upon the coal stocks, and considerable liquidation was induced among the smaller bulls who are tired of waiting for an advance. The oninion of Chairman Walker in regard to the Union Pacific-Northwestern alliance became known toward the close and resulted in selling Union Pacific down a fraction, and had some effect on the remainder of the list. The liquidation in Wisconsin Central made further progress, and that stock was moderately weak throughout the day.

came known toward the close and resulted in selling Union Pacific down a fraction, and had some effect on the remainder of the list. The liquidation in Wisconsin Central made further progress, and that stock was moderately weak throughout the day.

The market was devoid of other features and was subject to alternate periods of weakness and stagnation, the general drift of prices being almost steadily in the downward direction after the first raily. The unlisted department was as bare of feature as the regular list, though sugar was moderately active and Illinois coal and coke continued to creep up and passed 28. The final changes are declines in all but a few cases, Atchison shows a loss of 1% and Lackawanna I per cent, but the others are fractional amounts only.

Railroad bonds were quiet, and the Reading issues sank back into a secondary position in the market, while the Kansas and Texas issues came to the front, and after a material decline, raillied bandsomely in the 6s and 7s, while the 5s vs.-sed at the lowest price of the day. Out of the pulay of 200,000 the 8c optimized \$100.

Country Produce-Jobbing Prices. OFFICE OF PITTSBURG DISPATCH, TUESDAY, January 14, 1890. Choice potatoes and fancy apples are a shade firmer, and prospects for higher prices are good. Eggs are moving more freely, but there are no signs of an advance. Markets are better supplied with poultry than at any time since the holidays. There have been heavy receipts from Iowa and Illinois the past few days. Notwithstanding heavy receipts prices are fully maintained, and demand is sufficient for all good stock that comes. Cabbage is in better supply and markets are quiet. Onions are scarce and higher, Turnips are very dull. Sweet potatoes are moving upward. Lemons have advanced sharply within a few days. Fancy Florida oranges are very firm at a shade higher prices. The first fruits of the new crop of Messina oranges begin to show up. The new pine apple is coming in in splendid shape, and all advices point to a prolific new crop.

PITTSBURG IS SAPE.

The Building Inspectors Point With Pride to Monday's Test. Building Inspector Hoffman and his assistant, Captain J. A. A. Brown, are highly pleased over the fact that although the winds have committed havoc all over the country, and even as close as Allegheny, Pittsburg escaped with only a few dis-

mantled chimneys.

This evidence that the building inspectors are attending to their duties is an assurance that no more Willey disasters will occur in the city, and the officials claim Pittsburg to be the best protected city from building acly put to the test on Monday.

A Bank and a Horse Importing Company Forced to the Wall. SPECIAL TELEGRAM TO THE DISPATCH.1 SIOUX FALLS, S. D., January 14 .- A telegram from Madison, S. D., announces the failure of the Bank of South Dakota and the Labelle Horse Importing Company,

of that place.

The books are in bad shape, and neither assets nor habilities are definitely known,

but the liabilities will exceed \$300,000. A one-legged man who gave his name at the Central Police Station as Edward Dempsev, walked into the store of Anthony Meyer of 1134 Penn avenue, vesterday. Seeing nobody around he took Mr. Meyer's coat off the rack and was walking out when Mrs. Meyer caught him and held him until she obtained assistance. Officer Mulvehill ar-rested the man, and he is now behind the bars awaiting a chance to explain his conduct to Magistrate Gripp.

Eight years ago cancer came on my lower lip. It took off my under lip from one side to the other, and down to my chin. I had it treated by burning, and got so weak that I did not think that I could stand it mech longer Atter much suffering I discarded all other treatment, and began taking Swift's Specific, and the cancer soon began to head, and in a short time it was completely healed and I was entirely well. It is now over three years since I got well, and there has been no sign of any return of the disease. I know it was cancer, and I know it was curred alone by S. S. S.
