Such an array of pretty gowns as it has been the pleasure of the writer to see this week has made it, almost, necessary to devote the whole of the fashion article to the description thereof. In a Fifth avenue dress and suit emporium was seen one of the handsomest and most ethereal bailroom dresses that imagination could conjure up. The back of the bodice, which was extremely decollete, and the long train were embroidered with crepe du chene, while the front was mousseline de soie embroidered in deli-cate colors. A full infant waist of the embroidered mousseline de soit was simulated in front, and there was just a suggestion of a bleeve. The dress will adorn a l'itsburg belle who is going to Chicago to spend a few weeks

who is going to Chicago to spend a few weeks of the season. Anadosme visiting costume for an elderly of heavy black mourning silk. The skirt was formed with wide panels ornamented with very he passementerie and deep fringe. A slight drapery took away the soverely plain effect and he bolice basque was lovely. It was plain in the back and composed of folds of the silk and pas-sementerie crossed in surplice style. A Medici collar and very high sleeves close at the wrist, completed is and gave a very sivilish effect he Medici collar, by the way is avery popu-ir way of finishing a dress for middle-aged or elderly ladies.

An exquisite afternoon costume that is to be worn by a young widow of this city who is go-

ing to Washington, D. C., was investigated next. An exquisite creation, made of black and white striped armure opened over a petti-coat of black lace in front and a simulated petticoat of white faille in the back. The pettheoat of white faille in the back. The whole was corpeously trimmed with white and silver passementerie. The right side of the bodice basque was composed of a revere of the white faille and a rull edge of the black lace, and meeting with the loft size, laid in plants of black and white armure so that only the black was visible, the slight V effect of the neck was carried out and formed a pointed bodice. Arm-lets of the white and silver passementerie and cuffs of the same trimmed the close-fitting sleeve, which had a very high shoulder puff of the white faille. the white faille.

The most distractingly pretty little street suit seen this winter is to be donned soon by a charming petite maiden, who will assume it with just a dash of coquetry. It is fashioned of plain blue broadcloth, opened over a peticoat of bissuit colored cloth, and edged with black strakhan. The waist has a tiny vest of the biscuit doct set in and is minus a collar, except that made by a band of the binck astrakhan, which goes around the neck and outlines the bins cloth coat effect over the vest of bisouit. PICTURES AND PAINTERS.

THE death of the well-known artist, Joseph Coomans, is reported by cable.

THE collection of fine art works at presen on exhibition at the Gillespie gallery is of such exceptional merit, at least in regard to many of the pictures shown, that no one who is in-

can use products shown, that no one who is in-terested in art and matters pertaining therato can well afford to miss seeing it. Among the exhibitors are George Inness, H. Bolton Jones, and J. G. Brown in the United States, and Schreyer, Cassanova and Lerolle on the other side.

A PAN of apples could scarcely be painted better than those represented in the picture which Mr. A. F. King shows this week at the

Gillespie gallery; at least this is true so far as the fruit is concerned, the pure metallic qual-ity of the bright tin seeming to baffle the artist and set at definance his best efforts to render truthtully the effect of its glistening surface. The work has evidently been executed carefully and conscientiously, and in the coloring and modeling of the applesit is very strong indeed.

"THE OLD STORY" has been treated in about

every possible way by both authors and paint ers, until it seems to be as old in regard to its being a subject for art and literature as it is in being a subject for art and literature as it is in fact. In the etching by G. Poynot, after the painting by Debat Ponson, in which this same old subject is presented, there appears little that is new in the manner of treatment; but, so far as execution is concerned, it is one of the strongest works that has been shown for some time. An excellent copy of this etching may be seen at Gillespie's.

General Orders No. 12.

MR. GEORGE HETZEL shows a large landscape at Boyd's. The scene is one in the early

scape at Boyd's. The scene is one in the early fall and the picture is very bright and rich in color. The landscape is glowing with the splen-did colors of the first few days of autumn and it has been painted with the effect seen under a sky screnely blue and perfectly cloudless, save for the presence of a few faint streaks of feathery mist that appear near the horizon. The high tone of color in which this picture is keyed is quite a departure from Mr. Hetsel's neual style.

Richard Marston, the great scenic artais, writes an admirable paper on the subject in this week's Dramatic Mirror. He acknowl-edges and laments the decadence and accounts for it mainly on the grounds of the existence of so many factories that turn out scenery at the abortest possible notice for little more than the price of the canvas upon which the paint is slapped on. He describes the factory method as follows: "I have alluded to the drop-curtain work in the factories. A drop-curtain ought to be the principal decoration of a theater and is properly considered the crucial test of an artist's abilities. The time necessary for such work could not be afforded in the factories. It occupied me nearly four months of hard work to paint the curtain that was destroyed at the burning of the Union Square Theater, but a factory must turn out a curtain in two or three days at most to make it pay. The practice is to keep, say a couple of landscapes to go in them. If an order for a curtain comes in, a drapery is selected from one portfolio and a landscape, inc. Miss Harris has studied with me for several months past. She has shown much power and constant progress. There are few, if any, public readers possessed of a better voice and vocal delivery. Her technical knowl-edge and skill for reading asd teaching elocu-tion are exceptionally advanced. In short, she is well professed in her art and deserving of large success.

But there was none handy. In despair, Burgess himself determined to make the attempt. Hastly and nervoualy dressing himself in the quaint attire of the con-ventional old maid, he rushed on the stage, at-tempting as best he could to conceal the fact that the dress would not quite meet in front and was far too short. Not until he was before the footlights did it occur to him that he didn't remember a line of the text. In the spasmodic cudgeling of his brain to recall something of the part he pressed his cheek with the tips of his fingers, simpered a little-he couldn't help his fingers, simpered a little-he couldn't hel t-and thus unconsciously struck a pose that it and thus unconsciously struck a pose that, in its suggestion of the elderly virgin's demon-strative timidity, greatly tickled his audience.
