#### COVERING THE FIELD.

Pittsburg Elevators and Fire Escapes Have a Wide Market.

A BIG TRADE IN THE FAR WEST.

The Future Prospects Are of the Brightest

Description. CONDITION OF THE CATTLE MARKET

Through receipts of cattle were 4,660 head against 4,550 last week and 4,420 for the pre-vious week. Local receipts were 2,000 head against 1,920 last week and 1,980 for the pre-

Of the local receipts this week there were 25 carloads or 550 head sent on eastward in first hands. Receipts of hors for the week were 32,125 head against 25,875 last week and 33,735 for the previous week.

The run of sheep this week was 14,630 head against 15.840 last week and 15,480 for the previ-

1,444 head; last week, 1,918; previous week, 1,906. Local sales of hear 10.18 1,444 head; last week, LMN, previous week, 1,906. Local sales of bogs 19,128; last week, 15,875; previous week, 2,0811. Local sales of sheep for this week, 9,161 head; last week, 8,136 head; previous week, 8,682 head. The outside price for hogs this morning was \$4.05, and heavy buyers found holders willing to concede 5c on these rates. At Chicago the outside price was \$3.90 according to cago the outside price was \$3 90 according to dvices received by one of our leading packers this morning.

In general the cattle market is little changed

Common and low grade stock are a shade lower. Sheep and lambs are steady at last week's prices. Hogs are a shade lower. Elevators and Fire Escapes.

Pittsburg elevators and fire escapes are finding ready sales, of late, in the far West. One of our manufacturers reports that his firm has now ready for shipment, to be forwarded within a day or two, fire escapes for the grand new Masonic Temple, of Denver, a building which will eclipse anything of this kind in the West. The same firm will ship next week, ele-vators for a magnificent new hotel at Colorado

facturer of fire escapes and elevators the fact was developed that the cost of castings at Denver was fully double the price in Pittsburg. The best castings here are worth 2½c per pound and at Denver 5½c. The freight from pere to the Colorado metropolis is about 2c per bound. Said this manufacturer: "Our firm has pound. Said this manufacturer: "Our firm has within the past few months developed a very extensive trade with the far West, and expects to do much larger things with that section in the near future.

A Most Prosperous City.

"You may put down my opinion that Pittsburg to-day is the most prosperous city in the country. In our line of business prospects were never as bright as they are at this time. Orders now in insure a very large spring trade, and,

now in Insure a very large spring trade, and, for the iron and steel interests, we have undoubtedly entered upon one of the best years in the history of the city.

"As these are our great interests, there is no doubt in my mind that Pittsburg's trade for 1890, will break all former records. Our firm is to close communication with all sections of the United States, and I have no hesitation in saying that our city at this time enjoys as great, if not greater, substantial prosperity than any city in the land.

Favorite. CHICAGO-Trading in wheat to-day was moractive at lower prices. The feeling was weak at the start, first sales showing a decline of 1/40 %c and later declined %c more, ruled steady and closed about 36@lc lower than yesterday The offerings were quite large to-day, and considerable wheat bought yesterday and the day before was sold out, parties not having the courage to hold on under the present condition. Some of the large floor traders were the heaviest sellers. There was some covering of shorts but confidence seemed wanting, and there was apparently little buying for more than temporary reaction. The weakness was partially attributed to the dosing of a bank or two in

New York. and the feeling was easier. The temper of the local crowd was bearish and the selting was every car was crowded. I waited for two or rather more pronounced than for several days three before finding one in which I could past. The talk was that it was about time for a

THE time for subscribing to the new stock of the La Noria Mining Company expires to-day. It is thought the amount will be taken and re-organization effected. Among the measures which have been intro-

duced in the Fifty-first Congress thus far, one of the most remarkable is a bill introduced by Mr. Butterworth, of Ohio, which is directed against dealings in "futures" and "options." THE Mississippi Valley Lumberman publishes a comprehensive review of the lumber business of the Northwest for the year 1889.

The total product of the year was 3,467,426,523 feet, or a falling off of 756,401,775 feet from the product of 1888. Low water and the general duliness of trade are given as the chief reasons

for the reduction in production. REUBEN MILLER, JR., was at the point of death yesterday evening at his residence in Allegheny City. There was no hope of his recovery. Mr. Miller has long been prominent in business in Pittsburg. He was the first Presi-dent of the Mechanics' Bank, now the Me-chanics' National, and is still a stockholder there, and for a number of years was President of the Western Insurance Company. CONCERNING the bank troubles in New

York, John M. Oakley & Co.'s Wall street correspondent wired yesterday evening: The Sixth National Bank is closed. The Lenox Hill and Equitable are open, and their officers say they will stay open. The latest report of the Sixth National is that assets have disappeared. Later: The two little city banks finally closed doors, and are likely to create some feverishness and a decline on the market.

The change of motive power of the Pleasant Valley Railway is bearing good fruit. A gentleman who lives in the lower part of A moderate business was transacted in corn Allegheny, and is a patron of the read, said break and then corn would be a good purchase.
Considerable changing was reported again to day from February to May at the ruling premium for the latter month.

There was a good business transacted in oats, and a steady feeling prevailed with a fair range of prices, but no advance over the outside figures of yesterday was secured. One operator bought freely and took most of the offerings in May, and prices fluctuated \( \frac{1}{2} \). February received only moderate attention.

Rather more activity was exhibited in the market for hog products, but the feeling was unsettled, and prices were weak during the greater portion of the day. May contracts attracted the most attention, though the near deliveries met with a little more favor.

The leading futures ranged as follows:

President Barbour, of the National Association of Stove Manufacturers of the United States, has issued a letter to members of the association, In it he points out that the advance in iron, causing a large increase in the cost of production, should be taken into conget a seat. We met several on the way. All

cost of production, should be taken into consideration before the annual meeting of the association in February. It is a fact well-known to the trade, he remarks, that there was but little profit in manufacturing stoves previous to the advance, and, with it added, that little profit has become much less. It is inevitable, therefore, that an advance must soon be made in the price of stoves if manufacturers expect to continue in business,

An old freight tariff sheet of the Chicago and Alton Railroad, dated April 20, 1863, has been unearthed by an officer of that company, and the difference in rates between East St. Louis and New York then and at the present time shows a decrease of from 75 to 87% per cent since the former date. Freight on flour, per barrel, was then \$1 90, and now 59c; pig lead, then, 85c, and now 29c; cotton, then \$2 50, and now 30c; dressed beef, then, \$2 50, and now 55c, and so on. This shows the value of railroad competition.

George H. Watson brought an action against a street-car company in St. Paul for injuries received while a passenger upon one of their cable cars. He alleged that through the deendant's negligence in employing unskilled servants, and in not providing proper machinery and appliances, defendant's cable train pecame unmanageable while descending a steep hill, and ran with great speed to the foot of the grade, where the car in which plaintiff was rid ing was thrown from the track, causing the in-juries complained of. Judgment for plaintiff and appeal by defendant. The Supreme Court affirmed the decree of the lower court, saying: "The law does not require that such additional precautions as it is apparent after the accident might have prevented the same, should have been previously adopted, but only such as would be dictated by the care and prudence of a cautious and careful person before the acci dent, and without knowledge that it was about to occur."

Statistics of the wool supply in the United States at the close of 1889 show a heavy in crease over 1888. The detailed and classified reports from the markets and growers show a reports from the markets and growers show a total supply in dealers' hands of 70,000,000 pounds domestic and 15,000,000 pounds foreign, against 50,000,000 domestic and 17,000,000 foreign in the year last named. The New York and Philadelphia stocks are less than in 1888, but Boston shows an increase of 11,000,000 pounds of Gomestic wool, and most of the smaller mar-kets follow the lead of the chief wool markets of the country. The imports of clothing wool coming from abroad show a decline of nearly

There is danger that the progress of street railway building will be seriously interrupted by the impossibility of getting cars. A promineut car builder expresses the belief that at least twice the number of cars will be ordered by street railway companies this year, than is possible for the car builders to turn out. This conviction is also confirmed by the fact that the two principal electric railway machinery manufacturers have orders on their books which will keep them fully up to their capacity until July or August, and that, within a month, they expect to have orders for at least three times what is possible for them to turn out dur-

What is the world coming to? A New York scientist says that within the next ten years some of the grandest pieces of engineering commenced which, if talked of now, would be regarded as chimerical. A SURPLUS LOOMING UP.

Money Obtainable on Easy Terms on Good

Collateral-Bond Purchases. The local money market is working toward plus of unemployed funds. Still there is a good business demand for discounts, which, with the heavy depositing, show that there is no fingging of general trade. The accumulation of funds at this season of the year is not a misfortune. It will put the banks in a good posi-

tion to meet the requirements of the spring tion to meet the requirements of the spring trade, which ought to open in six weeks or two months. Rates may be fairly quoted at 5½66 per cent. Yesterday's clearances were \$2,181,-272 93 and the balances \$428,291 06.

Since August 3, 1887, to date, the Treasury has purchased \$115,988,450 of 4 per cent bonds and \$131,988,700 of 4½ per centa, a total of \$247,-907,150 at a total cost of \$290,447,251. These bonds would have cost at maturity \$350,719,303, and a saving has therefore been effected of \$90,-272,053.

TOOK A TUMBLE. Persistent Selling Causes Quite a Break in

the Oll Market. The oil market was weak but quite lively by spells yesterday. The opening was barely steady, but a general selling movement soon

set in and the price was hammered down dangerously near the dollar line. Just before the close some of the shorts seeing a good oppor-tunity to cover went in for a few thousand barrels causing a rally to within & of the highest reis, causing a rally to within % of the highest point. The principal elements of weakness were reports that several small banks in New York were in trouble. The range was: Opening and highest 105, lowest 103%, closing 104%.

Lima oil has been advanced from 15 to 22 cents. The rise is said to be fully justified by the demand. This should strengthen the Pennsylvania product. There was no change in refined abroad. Wednesday's clearances were 378.000 barrels.

THE BANK SCANDAL

Used by the Bears to Depress the Share Market, but Without Success-The " Trouble Entirely Local

and Temporary. NEW YORK, January 30 .- The stock market was less active to-day, but remained feverish and irregular throughout the day, though prices as a rule advanced in the forenoon and declined later in the day. The bank scandal was the principal topic of conversation upon the street to-day, and the Bears made all the use of it possible, and while some sales of long stock was induced by the stories, the greater part of the selling was for the short account. The opinion soon gained ground that the affair was entirely local, and little long stock came

The bulls made a vigorous resistance to the

was entirely local, and little long stock came out.

The bulls made a vigorous resistance to the attack, and were loud in the declarations that the check to the upward movement is but temporary and that its resumption cannot long be delayed. The arbitrage houses were sellers of Louisville and Nasbville, especially in the forenoon, but this is fully accounted for by the difference in money rates at the 2 cent.

One of the most prominent features of the day was the buying of New England, which was principally upon orders from Bosten and the inside interests which have been builling the stock for some time. Pacific Mail was also a strong point in the list, and the purchases seemed to come from parties connected with its former management.

The crowd in Richmond and West Point were less active then yesterday, and failed to get its price above that of last evening, but they allege a determination to boom their stock. The Grangers were more prominent, and acted stiffer than for the past few days, but Burlington and Rock Island sagged away, both being lower this evening. Sugar was again the feature of the audis'ed department, and it was supported at the decline by the parties who have been active in it for the past few days, and it rallied to above 64, retaining almost all of the improvement at the close.

The afternoon's trading was dull, and prices again sagged away, though little progress was made, and while the close was quiet and rather heavy, the changes from last evening's figures are in all, but a few cases, for fractions only. There was not a single important decline, while Sugar rose 2 Delaware and Huuson 1½, and Pacific Mail 1 per cent.

Railroad bonds were still less active to-day and the tone of the market quite irregular, though at the close advances are rather the more numerous. Texas Pacific seconds furnished \$118,000 out of the total for the day of \$1,519,000. The advances include Keckuk and Des Moines firsts, 2½ to 109; Long Dock 6s, 2½ to 122½: Cleveland, Painesville and Ashtanula firsts, 2½ to 1000 to have taken.

It is impossible at present to approximate the extent of the defalcations, but they are supposed to run into the thousands.
