DISCUSSING THE SAMOAN TREATY.

Emperor William and the Iron Chancel-

cerning a question of Government policy.

The Socialists are conducting an aggressive

campaign and will gain largely in the ap-

proaching election. German newspapers

think that there should be no objection in

America to the Samoan treaty.

The objectionable part was the reference to labor troubles, and that Von Berlepsch has been appointed to a place in the Minhas been appointed to a place in the Min-istry, giving him control of those things, the right of existence in any well ordered practically in place of Bismarck, seems to imply that the Emperor intends that those things shall be put in the hands of one in sympathy with the ideas set torth in the speech.

has received successively all the leaders of the different groups included in the Capital minations, and the Prince has been asked to scize the first occasion to make such a state-ment as would give to the candidates a key-

lead in the Lower House of the Prussian Diet. He returned to this request an indefinite response, which left the impression that he would make a declaration upon the eve of adjournment at a con crence of the Cartelists. In the Landtag to-day it was an-nounced that the Chancellor did not intend to address the House.

All this adds to the conviction that there is a difference of opinion in high places on the internal policy, and suggests, moreover, that the difference is of a serious nature. In consequ nce of this statement it was de-cided to adjourn the Diet on the 11th inst. until the 23d, when the elections will be over and in the meantime to make another effort to induce the Chancellor to give a clear vote that should serve as a rallying

The National Zeitung does not give any ansight into the intentions of the Government. It only continues to proclaim the solidity of the Cartel combination and to predict that there will ultimately be a full National Liberals on the expulsion of the

German alliance excites the greatest inter-est. The Kolnische Zeitung says the idea that Germany would buy peace from France by a cession of the imperial provinces of Alsace and Lorraine is the merest chimera; that no generation of Ger-mans will ever dare cede an inch of German soil soaked with the blood of its fathers. The only advantage the Stoffel argument has is the fact that now, while his country-men in France are wild with Russomania, state in the councils of Europe.

The Boisen Courier and the National Zeitung consider this point and concur that Stoffel's warning to France against an alli-ance with Czardom will fall on deat ears now, as did his warning in 1870 against the precipitation of France, unprepared, into a great war. Emperor William will visit the Danish

Court at Fredensbourg and remain there several days in June. The Empress and her sister Marguerite will accompany him. The miners of Eschweile having threatened to strike, the Nothberg miners took the initiative and struck yesterday. The master miners therefore decided that if the strike extended they would close the mines. The leaders of the men at once stopped the movement, and the Nothbergers resumed and will not strike again until after the elections.

NO USE FOR SOCIALISTS.

Ex-Minister Von Puttkamer is a candidate for Stolp, in Pomerania. In address-ing a meeting of voters there he said, he approved of the Conservatives voting against the Socialist bill as it finally came before Bismarck and the Emperor, or those having the Reichstag, because that law, without the expulsion clause, was like a knife with-

Irish National League: To Hon. John Fitagerald, President Irish Na-tional League of America:

Pursuant to request, the undersigned met at the Russell House in the city of Detroit on Wednesday, January 20, 1890, for the purpose of auditing the accounts of Rev. Dr. Charles C. Reilly, Treasurer of the Irish National League of America. We at once completed our organization for work by electing Hon. Richard C. Cushing, Mayor of Omaha, as our Chairman, and Philip McCabill, an expert ac-countant of St. Louis, as our Secretary. The committee then requested from your-self and the reverend Treasurer a statement of

the causes which induced you to call for this auditing, and we learned from such statement that the last National Convention was held in Chicago in August, 1886, and that it has been your desire and also the desire of the Rev. Dr. Reilly to have a national convention called in 1887, 1888 and 1889, but that such convention had been postponed in obddience to the wisses had been postponed in chadlence to the winnes of Hon. Charles Stewart Parnell and his asso-ciates concurred in by the Irish leaders in America.

NO CONVENTION YET.

We learned that the parliamentary party in Ireland still refuse to call a national conven-

tion in America for reasons which to them apof office to-day. Lieutenant Colonel Roberts has been stapear entirely satisfactory, the wisdom of which He is said to be one of the ablest officers in the army, though modest and retiring. Speaking to-day of the appointment Secre-

pear entirely satisfactory, the wisdom of which your committee does not question. Our sessions were held with open doors, free to the public, and the representatives of the press. Your committee then proceeded to the work in hand. We found a model system of books kept by the treasurer, consisting of a cash book in which the Gaily receipts of moneys were en-tered, giving the name of the party remitting, the name of the organization (if any) raising the money and the date and name of the place from which the remittance came. The cash book was also ruled with columns showing various funds into which remittances

The cash book was also fuled with columns showing various funds into which remittances were divided, with cross references to the ledger when each fund was posted in detail. These various columns were footed up and carefully tested without finding any inac-curacy. The credit side of the cash book shows all disburgements and remittances and for all disbursements and remittances and for

what purposes ordered. Your committee also found a ledger arranged I our committee also found a ledger arranged alphabetically in the order of States and coun-tries, with complete "indexes" for convenient reference. In this ledger the treasurer had grouped all receipts so that the sums received from all sources could be seen, tested and examined in any method suggested by the co mittee.

A CAREFUL EXAMINATION.

We examined each account with care, comparing the same with letters of remittance and other sources of information in order to test its accuracy. We also compared, in detail, those accounts with the credit side of the cash book and the original vouchers of expenses, and we report that in each instance we found the corlearn something about parliamentary rules. A RECEIVER TO COME.

The Controller of the Currency said at Washington to-day that Examiner Hepburn, in a letter sent on Friday, had pro-nounced the bank insolvent, and had ad-vised the appointment of a receiver. A re-ceiver would be appointed early next week, after the Controller had received Mr. Hepburn's report, which will hardly reach him before Monday. This was probably said, however, before to-day's news had reached the Controller, and it may be that the expenses of a receivership will be avoided. It is not yet definitely known how the minority stockholders will come out. Mr.

recommended to the President, throngn me, oy General Casey, the Chief of Engineers, along with a couple of others of secondary choice. We studied the matter very carefully, and have just come to the conclusion that Colonel Roberts is the man we want. Major Raymond took occasion to tell me, some months ago, that he was quite willing to be relieved from the duty, and so I suppose that this will not sur-prise him very much. Colonel Roberts is a very able man, and has the reputation of being one of the best engineers in the army. He is, perhaps you know, the author of the well known little book, "Roberts' Rules of Order," which has been adopted as a text book on par-liamentary law almost everywhere. It may be interesting to you to know how he came to write that little book? Yes? Well, then, Roberts, you know, is a stanneh, strong Baptist, and he once attended a general con-vention of the church, where the delegates, be-ing men unlearned in the intricacles of par-liamentary manevering, yot into such a nud-dle over rules and such like, that scarcely any business was done. Roberts had never paid any attention to the subject, but this experience in-duced him to declare to himself that he would hearn something about parliamentary rules. So Leland and his friends say that everything possible will be done for the stockholders after the depositors have been taken care of. F. D. Tappen, President of the Gallatin Bank, who says he has worn out a set of eeth talking about this case, is authority for the statement that Mr. Leland's check for \$500,000 is only preliminary, and that more will be forthcoming from him, if it is necessary.

SOMETHING SOOTHING

Early in the day there were indications at the Sixth National that something inter-esting and soothing was to happen. The Bank Examiner had passed half the night locked up in the bank with his assistants, and had completed his investigation and uced him to declare to himself that he would and has completed in investigation and sent his report to Washington. With him at the bank, to-day, were Mr. Tappen and Mr. Wetmore, the latter counsel for Mr. Leland, At 11:30 this notice was put up: dr. A RELIGIOUS PLAN.

Prince Bismarck's letter to Herr von Schloezer, the German Embassador to the Vatican, is published, obviously to influence the opinions of Catholic voters. It declares that the Government sees with pleasure the establishment of Catholic missious in German colonies, promises that all religious orders shall be admitted, including the Jesuits, and that all may rest assured of the protection of Germany. Cardinal Ram-polla has responded, expressing the extreme atisfaction of the Pope at this step, and making his congratulations upon this further advance towards complete concord.

The appointment of Von Berlensch to b Minister of Commerce and Mines, is regarded by many as an electoral ruse in tended to catch for Government candidates the votes of miners, pleased with the fancy that the Government is ready to do great things for them-to make a law that will reduce the hours of labor, increase wages and generally protect the workingmen. This attempt at conciliation costs the Govvernment but little, and indicates mainly an endeavor to modify the Catholic opposition and draw workingmen with hopes away from the magnetic agitators of the Socialists. THE ELECTION PROSPECTS ..

Forecasts of the results of the elections are generally to the effect that the German Conservatives, the Reichspartie and the Center party will remain nearly intact; that the German Liberals will lose several seats, which will go to the Socielists. The National Liberals are in the greatest danger.

as it is thought they will lose 25 seats. The Socialists hope to increase their strength from 11 in the last Reichstag to 42 in the next, gaining 6 from the German Liberals and 25 from the National Liberals. Overtures were made by Herr Eugene Richter and other leaders of the German Liberals to the Socialists upon the proposition to act in concert and agree that the National Liberals should support a Socialist where the combination might then defeat a Government candidate, and that the Socialists should support a National Liberal in some other place where the scheme would apply.

This sound political theory was not favored by the Socialists, who preferred to work by themselves everywhere without relation to doubtful allies.

A SOCIALIST PHALANX. The new Reichstag is convoked for the middle of Murch. It is likely to present a formidable phalanx of Socialists, who, combining with the Center party and the German Liberals, will easily outvote the Government groups.

The Foreign Office regards the agreement in Bohemia as a triumph for the diplomacy Prince Bismarck and the personal influence of Emperor William. Incessant efforts have been made by Prince Bismarck, through the Prince de Reuss, the German Ambassador at Vienna, to induce Emperor Francis Joseph to adopt a policy to recover for the Germans the greater share in the government of the Austrian Empire. The i-official declaration of the facts put policy of the Empire weighed with the Emperor as a main consideration in the case; that it was necessary to end race quarrels to enable Austria to stand on an equality with her allies in the triple alliance and be respected by Russia as a soundly constituted great power. In consequence of the German triumph in

Bohemia there is a project at Breslau. Em-peror Francis Joseph promises to be present at the army maneuvers around Liegoitz, when Emperor William has his headquarters at Breslau.
