THE POLICE ARRANGEMENTS. No Accidents, but the Doors Had to be Closed-Crooks Ordered Out and One Arrested-The Art Gallery Will be Open for Two Weeks.

The police arrangements were superb and could not have been better. Chief Kirschler was on hand at the beginning with 25 men and distributed them throughout the building. Detectives Glenn, Murphy, Mc-Clure, Johnston and Wilson were present all day and evening and put out of the building half a dozen or more suspiciouslooking individuals. The police officers in uniform were under the charge of Lieutenants Clark, McNinery, Thornton, Wilson, Livingston, Shields and Scott. The officers

deserve mention for the admirable manner in which they handled the crowds. Several of the officers were stationed on the stairway leading to the art gallery, and were the means of saving many people from getting hurt. About 8:45 o'clock there was such a rush of people up and down the stairs that some of them were almost pushed over the balustrades, in the music hall the crowd was kept moving by Lieutenant Clark and Officer Jacob Snyder. The former played washer and did it in a manurer becoming to him. Officer Jacob Sayder. The former played usher, and did it in a manner becoming to himself and highly creditably to his position.

Among the suspicious individuals run out of the building was a young man named Heller, who was at work as a mechanic. Chief Kirschler didn't like him, and had him placed in the locken. Upon the promise that he would leave the city, Heller was given his coat and hat and allowed to depart. Up in the art gallery betective Murphy saw several people who he knew had no business there, and thinking they were trying to get their hands into pockets other than their own, he forced them to leave.

For fully ten minutes the crowd surged backward and forward in the lobby, and many ladies almost fainted. The police seemed to be powerless, and had it not been for the coolness of James B. Scott a serious accident might have occurred. Mr. Scott ordered the police to clear the crowd away from the steps and then had them close the doors. As the police to clear the crowd away from the steps and then had them close the doors. As soon as this was done and the people stopped, the crowd was flually squeezed out. As soon as they got moving again, they were not allowed to block up the lobby. The people came in on one side and passed out on the other.

Mr. Scott was kept busy all evening receiving the congratulations of the people on the success of the work. Everybody was lavish in their praise of the building, and the commission was very modest about receiving the congratulations. To a DISPATCH representative Mr. Scott said:

THE SINGLE TAX QUESTION. It Was Fully Discussed in the British

Circle No. 1 of the British-American Association met last night at Moorhead's Hall and had a very large attendance. J. E. Heppinstal presided and upon invitation a number of the representatives of the Single Tax League were present and addressed the meeting. Edward Yardley led and was followed by Thomas Grundy, who both spoke to the following subjects and were loudly applauded:

American Association.

Both speakers urged the fact that all men are entitled to the enjoyment of life, liberty and entitled to the enjoyment of life, liberty and the pursuit of happiness: that this system of private ownership in land is incompatible with a Christian civilization; to secure the rights of citizens in the soil upon which they live is the object of the Single Tax League, which advo-cates a tax levied upon ground rent alone, all other taxation to be abolished. The reasons given for such a movement were cogently urged by the speakers, and warmly indorsed by the meeting.

WASHINGTON MONUMENT.

What Will Be Pinced in the Corner-Stone on the Twenty-Second. There was a meeting in Select Council Cham ber, Allegheny, last night of the committee having in charge the matter of laying the corner-stone of the Washington monument by the Jt. O. U. A. M. In the absence of an important sub-committee the session was short. It was sup-committee the session was short. It was decided, however, to place in the box in the atone, an account of the death of Washington, printed at the time, a biographical sketch of the late James Crow, a picture of the new Carnegie Library and a manual of the city of Allegheny. Another meeting will be held on next Wednesday, when the committee on final arrangements is expected to report.

Officer Trapp, of the Fort Wayne depot in Allegheny, was attacked last night by a man who alleged that the officer had caused his arrest some time ago. A fight took place in the station, where the man had followed Trapp from the street, calling him names. The patrol wagon was called, and the belligerent individ-ual was taken to the lockup, where he gave his name as John Snyder.

An Uncleaned Sidewalk. John Dibbold, while on his way home from work at 6 o'clock last night, fell on an my side-walk at the corner of Fulton street and Center avenue. He suffered a severe injury to his spine, and had to be removed to his home, corner of Webster avenue and Fremont street, in a wagon.

J. A. Romer, of No. 562 Fifth avenue, was ar-rested last night by Detective Sol Coulson on a warrant issued by Magistrate McKenna, charging him with selling liquor without a license. The prisoner was placed in the Eleventh ward

School Falling Off Through Sickness. The old Central Board of Education met last night, settled up its business and adourned sine die, after which the new board met and organized. When the meeting came to order Superintendent Lucky reported that there were 612 teachers employed during January. The total enrollment of pupils was 26,374, and the average attendance 22,-335. This is an increase of 212 over the enrollment of December, but ewing to the

amount of sickness in the city the attendance was 539 less than in that month. The Finance Committee reported that on January 14 it had \$53,486 19 on hand. By action of the Councils Finance Committee this was reduced by \$11,829. The expenses for January were \$41,159 59, the outstanding bills are \$460 18, leaving a balance of \$2,842 in the appropriation at the close of the fiscal year. The bills were

The remedy Mrs. Jones prescribes as "the thought of indi-vidual responsibility." Miss McConnell read an extended account of Miss McConneil read an extended account of the financial status of the union which shows it to be in fair condition in that respect.

Mrs. Jones read a letter from the State President, or rather extracts from it, as it was a private one. Some people were referred to as a "trio of seceders who may endeavor to spread treason in the camps of the union." Mrs. Jones said the union was neither partisan nor political, and that the secessionists had forfeited all their rights in the W. C. T. U.

Mrs. Foster, of Johnstown, spoke at considerable length. She held that the union was founded on Christian principles, and she did not wish to see repudiated any political party whose aim was the same as that of the union, and the Cambria County Union was of her opinion. Mrs. Foster hoped that dissenting sisters would be treated gently.

The new organ of the union, called the Pennsylvania W. C. T. U. Bulletin was presented and indorsed. It takes the place of the White Ribbom.

BRYCE FORCED THE ISSUE.

BRYCE FORCED THE ISSUE. About this time Mr. Andrew Bryce took the sisters by the back hair (they did not, as a rule, wear bangs), and flung them into a discussion of the license question and the action they proosed to take this season. The answer so far as heard was practically univocal. Mrs. President Spencer stated that she had asked for-giveness of God for assisting to disseminate some literature, before reading it, culogistic of the Brooks law. As she read in the Bible, no drunkard can enter the kingdom of God, and she hoped every lady present would do all they could toward the suppression of places they could toward the suppression of places where drunkards are made. A general expression was that as prohibition was not a factor in the license contests, the union should take no part in an organized capacity. The expression was that the ladies should work individually to prevent, if possible, the extension of the liquor traffic, and the following, offered by Miss McConnell, was adopted without dissent:

Resolved. That we, as a county organization take no action with reference to the granting of licenses this year.

Incenses this year.

Mrs. Tassy, of McKeesport, said they would have no lawyer for the union there. She stated, however, that as individuals they had gathered data bearing on the value of repression of the traffic in McKeesport and some information respecting some licensed saloons and speakeasies, and would submit it for the consideration of the Judges.

Mrs. Sands, President of the Wallace Union, and Miss Leech, President of the Fourth U. P. Y.'s, of Allegheny, formally presented the official resignations of their respective bodies, which occurred some weeks ago, and a motion to "accept them with regrets" prevailed.

The exercises concluded with prayer by Mrs. Graham, of McDonald station. She prayed for the abolition of the accurred liquor trade and for mercy for those who "license the damnable or mercy for those who "license the damnabl

COMES BACK AT GOMPERS. W. S. Sharon Replies to the Statements Regarding the Eight-Hour Law - It

Would Injure Labor Organizations-Mechanics Would Go Into the Country-Opposed to the Present System. W. S. Sharon, editor of the Journal of Building, has addressed a letter to Samuel Gompers, President of the Federation of Labor, in which Mr. Sharon takes exceptions to the statements in Mr. Gompers' recent circular regarding the building trades. He says that, in the event of the interior towns and cities adopting the eight-

hour law, there would be an influx of mechanics to the country towns, and the cities would suffer in consequence. In his letter Mr. Sharon says: This assumption is the strongest factor of fucidation, and the declarations are mere nonsense when we take into consideration that the question of shorter hours for a day's work for the advancement of the social positions of the workingman or woman is not the question in-volved, nor that the laborer will have to pay an increased figure for the products he consumes. These factors are solely dependent first upon the desire of the workingman or woman to elevate their positions in society, and not the question of shorter hours of work to give them

cievate their positions in society, and not the question of shorter hours of work to give them more time for that elevation; secondly, it is not the question of cost of an article of consumption, but the ability to buy the article to be consumed. That ability is not regulated by longer or shorter hours, but by the purchasing power that labor receives for the functions performed. The great bulwark that impedes the shorter hourday is our internal competition. By internal competition I mean the lack of universal organization in the interior towns and villages that come in competition with the narrow drawn lines of perfect organizations in the cities. The building trades are perhaps the greatest sufferers of this competition, and in the event of the prevailment of the eight-hour day at this time, or until such time as the whole country can be educated up to the theory, the loss will be always to the detriment of organized labor. It may seem a very beautiful theory to bask in, plausible in the extreme to first crowd shorter hours on the cities and the country will fall in line, but this is a very barren ideality. If you can change this theory so that the interior towns and villages will advocate and adopt the eight-hour day, the tide of immigration will be to the country, not as it now is to the cities. The country can stand the influx, the city will starve under it.

The writer has within the past fortuight had interviews with representative men of a constituency of fully one-half a million of artisans in the building trades respecting this subject, and I must say that not in a single instance did he find a representative who felt himself or could call to mind a single case where shorter hours were begrudged merely out of antipathy to the laboring mechanics, because that labor harbored the idea that under the present conditions it was "Live to work," instead of "Work to live," The answer to my interrogation was onanimous, and as the National Association of Buildiers, at St. Paul, agreed that, in view of the fact th
