Contracts Aggregating \$7,000,-000 Let for Charleroi.

A SCHEME OF GREAT SCOPE.

Largest Plate Glass Works in the

DETAILS OF THE MAMMOTH WORK

World to be Built.

Charleroi, the new industrial city at Mc-Kean station, on the P., V. & C. R. R., above Lock No. 4, has been staked out and will be invaded by an army of workmen

next Monday. It is expected that by the first of next August 10,000 inhabitants will be occupants of the town site. A DISPATCH representative finished yesterday a two days' inspection of the place and learned much of interest in connection with the plans by which \$7,000,000 will be invested in this location and contingent enterprises within less than a year. Drexel, Morgan & Co., the great banking

firm is represented in its immense investment by M. J. Alexander, the gentleman who built Jeannette for Chambers & Mc-Kee. J. W. Moore, the ex-coke king, of Greensburg, Pa., is a very heavy investor. So also is Dr. Bullit, a Philadelphia banker, and Mr. W. D. Hartupee, the Pittsburg engineer. Mr. James B. Haines, Jr., of Pittsburg, is also in the big plate glass company. Messrs. Alexander, Moore, Bullit. Hartupes and Haines form the directorate of the Charleroi Plate Glass Company and the Charleroi Land Company.

A SERIES OF COMPANIES.

Dr. Chandler, late the manager of the Butler Plate Glass Works, will be the general manager of the Charleroi Plate Glass Works, capitalized at \$1,000,000. Mr. Alexander will be superintendent and general manager of the Charleroi Land Company, capitalized at \$250,000. Messrs. Chaudler, Alexander, Hartupee, Bullit and Moore are the directorate of the Charleroi Construction Company, which has the contract of building

There is also a sand company with the same parties interested, and the McKean Sand and Stone Company, with a capital of \$100,000, of which Postmaster James S. Mc-Kean is President and has a controlling interest. There is also a brick company, with a capital of \$50,000. A capitalist of Canton, O., is heavily interested, and several leading financiers of Philadelphia and New York are owners of large blocks of stock in

With a river frontage of nearly two miles, the Pittsburg, Virginia and Charleston Railroad threading the site, 20 feet of water close suit. It is understood that a majority of the houses will be of brick and very subvernon natural gas ante-clinal and every possible mineral advantage close at hand, the site of Charleroi is highly favored. ON A NATURAL PLATEAU.

The land secured by the purchase of the McKean and other farms forms a natural plateau bounded by bluffs at the back, sweeping gradually around a curve and abutting upon the river at either side of the town site. The Monongahela river is nearly straight and the P., V. & C. Railroad runs streets are laid out between the railroad and the Fallowfield township line now indicated by the township road. From the summit of the hills overlooking Charleroi the view is unobstructed for miles up and down the river. This handsome little spot is destined to become a great industrial center.

Traversing the town site from West Bellevernon down to Lock No. 4 the present plans can be rendered intelligent by a detailed description of the various holdings and the contemplated improvements. Between West Bellevernon and Maple Creek the first tract going down the river is 30 seres owned by the Charleroi Plate Glass Company, upon which is found a superior quality of grinding sand for plate glass

It may be said at this point that the huge factory will use 100 tons of sand a day, largest factory in the world uses 60 tons, and the difference in amount illustrates clearly the levisthan size of the proposed plant. Next comes 30 acres owned by James McKean and his associates. There is a fine quality of building sand and a limestone quarry upon this tract. The foundations of the plate glass factory will make use of \$100,000 worth of stone alone.

The 67 acres reserved by Robert McKean.

Sr., is crossed and at Maple Creek the Charleroi town site commences. Running just 11/2 miles downstream and perfectly straight are the four avenues forming the principal thoroughtares. The names are as follows in order: "McKean," "Fallowfield," "Washington" and "Lincoln." Cross streets, numbered from one to nine consecutively, bisect the avenues. The old between McKean avenue and the railroad and Second and Third streets. Between Fourth and Fifth streets the Pittsburg. Virginia and Charleston Company has secured an entire block whereon will be immediately erected the finest passenger A system of double tracks will be put in, with switches at regular intervals for the use of manufacturers. Freight loaded upon cars inside of such works as locate on the river front will go all over the country by the proposed system. Below the railroad and opposite the present station a huge derrick looms up. It is for the Charleroi well

Wednesday.

THE MAIN STREET. Fifth avenue will be the street of the town. At the upper end, upon the brow of the hill, the water works will be erected at a cost of \$50,000. The pumping engines will be placed on the river bank, below a trestle, which will form an approach to the fourspan Pratt truss bridge, which will cross the nongahela river, and which will \$125,000, with approaches, wagon and foot-ways and railroad track. The latter will connect the Pittsburg, Virginia and Charleston and the McKeesport and Bellevernon Railroads. The McKeesport and Bellevernon Railroad skirts the bank of the river from Look No. 4 to Bellevernon. Slightly above the proposed bridge are the Daly wells Nos. 1 and 2, both 700-pounders. Within 1,000 vards stands the big Gibsonton distillery, for which two weeks ago a British syndicate offered \$3,000,000 in cold cash. In view of a four-story stone warehouse, with a capacity of 12,000 barrels, at a cost of \$125,000. The

and other improvements The four corners of McKean avenue and Fifth street will be occupied by the new P., V. & C. depot, a \$100,000 hotel, the Charleroi National Bank, with a capital of \$150 .-000, for which a charter will be asked later on, and the permanent offices of the various This will be an ornate structure costing \$60,000.

PLANS FOR THE PLANT. Below the railroad and commencing at

Charleroi Plate Glass Company, the plans for which were given to the Charleroi Con-struction Company day before yesterday by the architects, who have been aided in their work by Dr. Chandler, General Manager. The two main buildings will be parallel and will be 450x250 each. There will be an enormous engine-room at each end, besides several supplemental buildings for the fine polishing processes, packing rooms, etc. The contracts entered into within a week between the plate glass company and the construction company indicate that the buildings will cost \$750, 000. The foundations will cost \$250,000 of that amount. Ten million brick will be used, and the brick company, which will locate its plant at a clay bank below the railroad, near Ninth street, will commence

operations within two weeks, should the weather prove open.

The machinery of the plate glass manufactory will be very elaborate. Mr. W. D. Hartupee closed the contract for the equipment in St. Louis yesterday. The contract calls for \$300,000 expense for the machinery alone. It is understood that Mr. Hartupee imposed the condition upon the St. Louis concern of having the entire equipment on the ground by October 1 of the current year, about which time the building will be ready to receive it. It is not announced from what source the 1,800 skilled plate glass workmen, who are to operate this enormous plant, will be secured, but ar-rangements have been made covering this

AN IDEA OF ITS SIZE. New processes of both American and European invention have been secured and although no estimate of output is given out, it is stated that the factory will be at least a third larger than the Ford City Glass Works, at this time the largest in the world. It is stated to be a fact that the American plate glass factories are from six months to one year behind their orders, with prices ruling firm. The contract for the en-gines has already been placed. The lifting machinery of the sand house will be very ponderous, and the storage capacity will be at least 10,000 tons to guard against contin-gencies. Although no further itemized statement of investments could be secured beyond that given above, a gentleman who is a heavy stockholder in all the above con-

that the total investment now in sight was somewhat in excess of \$7,000,000. The north branch of Maple creek forms the boundary line of what is known as the "Red Farm," purchased from the McKean family by the Charleroi Land Company. A grove of about 500 trees forms the upper portion of this property. Below these will be built a huge summer hotel at a cost not yet determined. The remainder of the tract is being held for summer residences, several of which are projected by the Eastern stockolders in the various companies.

erns assured a DISPATCH representative

WILL BE SOME FINE HOMES. Between the line of the Red farm and Fifth avenue is a large tract of land reserved by Mr. Robert McKean. Between the water works and Lincoln avenue Mr. J. W. Moore will build a \$40,000 residence, which he will make his permanent home. Among other features now under discussion are a handsome library, some small parks and various public buildings. Several handsome business blocks will be erected also. For these and the 2,000 residences for workmen, Mr. M. J. Alexander is now having plans prepared by New York architects whom he journeyed from Pittsburg last Thursday night to constantial in character. There are scores other features which space is too limited to

The manufacturing sites are being snapped up with avidity. At the end of the bridge a large site has been purchased by a Philadelphia steel company, which will expend \$250,000 upon the plant and bring 300 workmen from the city of Brotherly Love.

MANY OTHERS EXPECTED.

The Pittsburg managers of the land com-pany bagged a big local firm for another site from the tract devoted to building and manufacturing sites fronting upon the river. The ground rolls slightly toward the bluffs at the rear, and is so nearly level that no grading will be required. The avenues and streets are laid out between the railroad and streets \$200,000 to erect and gives the operators yesterday. Notices of the meeting were received by the operators yesterday. Notices of the operators yesterday. Streets and they would send a representative prime with enough data to make the railroad and streets are laid out between the railroad and streets are laid out between the railroad and streets and streets and streets are laid out between the railroad and streets are laid out between the ra vesterday. The name is withheld, but the plant will cost \$200,000 to erect and gives eventually by local and Eastern manufact-

As contracts are now all placed for the erection of the city proper and the big plate glass works operations will commence just as soon as the weather permits. The hum of industry will very soon pervade the town site of the great plate glass city of the world,

CAUGHT BY UNCLE SAM.

Two Tennessee Prisoners Held Over in the

Central Station. John E. Rodgers and Frank Hope were placed in the Central station last night for safe keeping. They are United States prisoners, and on their way from Chattanooga, Tenn., to Washington, D. C., in charge of W. S. Tipton, United States Marshal of the Eastern District of Tennessee.

Hope is charged with counterfeiting and the other with stealing \$13 from a postoffice. They will be sent East on an early train to-

FIVE IN THE FIELD.

Window Glass Workers Nominate

Candidates for the Presidency. CAKE LOOKED ON AS THE WINNER.

Pittsburg Manufacturers Get Large Contracts for Boilers.

THE HAPPENINGS IN LABOR CIRCLES

The Window Glass Workers' Association held an important meeting last night. Five candidates were placed in nomination for the office of president, to succeed Granville Morenus, resigned. They were Secretary George L. Cake, Treasurer Al. Hammett, Patrick McClarey, Louis Haney and Joseph Anderson. Ex-President James Campbell's name was also suggested, but that gentleman firmly and positively declined. The nominations will be left open another week to give the preceptories an opportunity to send in nominations, but it is not likely that there will be any more candidates.

The contest promises to be a lengthy one. There, of course, cannot be an election on the first ballot, and there will likely be three or four ballots before a President is

HAD ENOUGH OF IT.

When ex-President James Campbell was asked why he refused to be a candidate again, he simply said that he had had enough of the office and did not care to be bothered with it. His action, however, is regarded by some as rather significant, and possibly in favor of Secretary Cake.
"If Mr. Campbell has declined the office in tayor of Cake," said a member of the as-

sociation, "it is useless for any one else to stay in the field. Treasurer Hammett is a good man-thoroughly competent to fill the position creditably, and he has many friends in Pittsburg, but Mr. Cake's connection with the office gives him an advantage over the other candidates by being constantly kept before the members all over the country. This, coupled with the support of Mr. Campbell, who undoubtedly has the largest tollowing of any man in the associatio will almost insure Mr. Cake's election." A FLAT DENIAL.

Mr. Campbell, however, denied that he

was supporting any of the candidates, and Mr. Cake said he was a candidate on his own merits. Mr. Clarey, who was defeated in the former election by Mr. Morenus, was not at the meeting last night. He is working at Monongahela City at present. It is understood he will do some pretty tall hustling, and he may prove a very dangerous opponent for the other candidates.

The tally sheets for the first ballot will be sent out February 25, and it is expected that the result will be known by March 5. In the meantime ex-President James Campbell will continue to act temporarily and look after the affairs of the association. If Mr Cake succeeds in winning the contest another election for a secretary will be made

IN THE CHAMBER OF COMMERCE.

About 50 People Will be Present at the

Joint Coal Meeting. The meeting of coal operators and rail road managers to discuss the 40-mile radius. will be held in the Chamber of Commerce on Tuesday instead of the Baltimore and Ohio Railroad directors' rooms. The reason of the change is on account of the large number of persons expected at the meeting. It is supposed that there will be about 50 present and they will be considerable fun for those

TROUBLE AT SHOENBERGER'S.

One of the Men Suspended for Interfering With the Bosses.

It was reported about the various labo headquarters yesterday that a strike was imminent at Shoenberger's mill, on account of the discharge of one of the members of the Amalgamated Association of Iron and Steel Workers. Vice President Florence Sullivan, of the association, was seen, and in regard to the matter said:

"Murray was only suspended pending an investigation into his conduct. This trouble was caused by Murray going beyond his province and interfering with the bosses. He is a valuable and experienced man, and t is not every one who can do his work. I think it will be settled all right before long, however, and there'll be no further trouble.

TO ASTONISH THE JAPS.

The Westinghouse Company Will Erect Plant lu Japan.

After throwing a little light upon Chinese civilization, Pittsburg now jumps the high stone wall surrounding the Empire, and will make the first break toward lighting Japan. The Westinghouse Electric Company yesterday closed a contract with representatives of the Takata Company of Tokio for a plant of 5,000 incandescent lamps for the town of Shidznoka. This is the first order the company has received from the land of the "Japs," and is the first of a number of orders they expect to get. F. W. Darlington, an expert electric en-

gineer, will accompany the plant to Japan and superintend its construction. PLASTERERS THREATEN TO STRIKE. Will Put on the Wire and Meta

Lathing Themselves. Journeymen Plasterers' Association, No. 31, of this city, has issued an order to its members that they must not put plaster on

wire or expanded metal lathing, unless the same was put in the walls by union journeymen plasterers. The firms manufacturing this kind of lathing have been doing the work hereto-fore. If they persist in doing it the plaster-

ers will strike against it. Molders' Special Meeting.

Local Union No. 14, stove plate molders held a special meeting last night to transact special business pertaining to the trade, but of no importance to the public. The President stated that nothing had been done yet regarding the eight-hour law. The union is connected with the Federation of Labor and will act with that organization when the time comes:

The Count Did Not Come.

Count Theodore de Rochoko, of Bogota, South America, who was expected to arrive in the city yesterday to inspect several steamboats, which the Porter Foundry and Machine Company are building tor South American waters, did not come owing to illness. He telegraphed Mr. A. T. Douthett that he was ill and would have to postpone his trip.

An Open Meeting. The meeting of coal operators and railroad men at the Chamber of Commerce on Tuesday is intended to be an open one, and a full discussion of the question of reducing the 40-mile limit is invited. Every coal man is expected to have something to say.

Another Green House Started. L. A. 6111, Knights of Labor, green bottle blowers, met last night and received reports from the strike in the East. A letter from Hawley, Pa., stated that Atkinson & Son, of that place, had signed the union scale and

started up. This makes 41 factories in the trade now working under union rules, and 23 are still out. Eight of the latter number

have always been non-union. PUTTING IN BOILERS.

Big Work Being Done Here by the Hazelton Tripod Boller Company, of Chicago-Rece & Co. Furnish the Material-Plans of the Union Storage Company. Captain Charles Hallett, of the Hazelton Tripod Boiler Company, of Chicago, has been in Pittsburg for the past two months

carrying into effect some heavy contracts. The company which the Captain represents is putting into use a boiler that entirely consumes the smoke, and in which slack coal is burned. The Captain claims that the time is fast coming when natural gas will be considered a luxury tor indi-viduals, and the manufacturers will have to abandon it as a fuel for coal. With the new boilers he is putting in, he claims he can produce the same effect at one-third the cost of the gas needed. The system adopted is something on the style of the argand burner, and almost perfect combustion is

The boilers are made in Pittsburg and Chicago. Rees & Co. are filling all the con-tracts in this territory, so that Pittsburg has received the benefit of the business. At present Captain Hallett is placing a 500-horse power plant for the Linden Steel Company in their works; 1,000-horse power boilers have been put in for the Pleasant Valley Electric Road; and other contracts secured are 150-horse power for John Robinson Sons and 800-horse power for the Union Storage Company to run their new artificial ice plant. The Pleasant Valley line has two boilers, one of which is kept in reserve, and to look at either, one can scarcely tell which is in operation. The new boilers of the Allegheny Light Company are working well.

The company has secured contracts to sup-ply 1,000-horse power for the New Castle Steel Company, and other big jobs in Cleve-land, as follows: Prospect Rolling Company, 400-horse power; Cleveland Forge Company, 300-horse power; Union Rolling Company, 150, and Rockafeller & Britain Iron Company, 700-horse power. All these boilers will be made in Pittsburg by Rees & Co., and will give employment to a large number of men.
Captain Hallett states that the boilers are

being used extensively in the West by the electric light companies. In this connection it may be said that the Union Storage Company is laying its plans to manufacture ice on an extensive scale. They are figuring on producing the congealed stuff for 60 cents per ton. Work has already been commenced on the well, and the company expects to begin on the plant proper in

CONSIDERED CHIMERICAL

The River Freight Route to Omaha is Not Credited Here.

From Kansas City comes a story that the Merchants' River Line Navigating Company, backed by the Inman Line, is about to establish a freight route by way of the rivers from Pittsburg to Omaha. Their plan, as reported, is to build 60 light-draught steamboats and 300 barges to carry grain to the seaboard. When Captain James A. Henderson, of

the Pittsburg and Cincinnati Packet Line, was asked what he knew about the scheme, he replied that he had heard of it, but to his mind the plan is too impracticable. "In the first place," he said, "they wouldn't have work enough for 60 steamers between Omaha and Pittsburg. The business done does not begin to require that many boats to handle it. Carrying grain to the seabord is one thing, but the man who wrote the story forgets that Pittsburg is an inland town and it will cost as much to transport the grain by rail to the ocean as it would to send it direct from the West."

On the whole, Captain Henderson is not inclined to believe that there is much in the scheme. He is a good riverman, doing a thriving business, and has already demon-strated to the railroads that the rivers are dangerous competitors and need to be looked

FROM A THIRD STORY WINDOW.

A Woman's Mind Affected and She Tries to Kill Herself.

Annie Venderberg was caught in the act of trying to jump from a third story window at No. 632 Smithfield street, yesterday afternoon, by Officer McNeill. The officer was passing the building, and hearing screams upstairs ran up to investigate. He burst into a room on the third floor just in time to catch the desperate woman around the waist and prevent her attempt at selfdestruction, though he required the assistance of Detective Fitzgerald to drag the woman back into the room

Mrs. Venderberg is a Swede. She has the second and third floors of the building and lets out rooms to lodgers. A few days ago she was taken ill and her mind became affected. Yesterday morning her lodgers nearly all left, and at the time she made the attempt on her life there was no one in the house with her.

AN AFFLICTED PAMILY.

Two Years After the Son is Drowned the Father is Killed.

George P. Bender, formerly an officer on the police force, but lately employed in Jones & Laughlins' American Iron Works, on the Southside, was instantly killed about 2 P. M. yesterday by the bursting of an emery wheel. One of the pieces struck him in the head, almost tearing it from his shoulders.

Bender was 24 years of age, married, and will be remembered as baving lost a boy by drowning who fell with a cart over a dump on the Southside some two years ago. The remains of Mr. Bender were taken to his home on Market alley, in the Twenty-fourth

The deceased had an unfortunate experience on South Nineteenth street shout four years ago, the night before Ed Coffee shot Officer Edmunds. He was attempting to arrest a man named Little. The latter was shot in a fight which followed. Officer Binder was acquitted when tried for the killing of Little.

Fell From a Railway Trestle. John Wurtenberg, a little boy living on Church Hill, Thirty-sixth ward, fell from the treatle of the Little Saw Mill Bun Bailroad yesterday morning. His left leg was broken, and he suffered slight internal in-

WYMAN THE WINNER Of the Republican Mayoralty Nomination in Allegheny City.

CRUIKSHANK COULDN'T STOP HIM.

And Bader Failed to Carry a Single Ward in the Entire City.

WYMAN'S PLURALITY IS OVER 2,000

Ex-Mayor James G. Wyman was yesterday nominated by the Republicans for a second term as Mayor of Allegheny. This is the only contest for a city office which has this year occurred in any party primary struggle. There were three candidates: James G. Wyman, of the Second ward; Common Councilman William A. Cruikshank, of the Second ward, and Common Councilman William Bader, of the Fourth The polls were open from 4 to 7 o'clock.

N otwithstanding the rain, there was great interest in the contest, and the polls were surrounded by men carrying umbrellas. The struggle in many of the wards was more intense than often occurs between the Republican and Democratic parties. Good order, however, was the rule. The few personal encounters which took place were settled by the bystanders without police interference. Such encounters occurred in the Second, Third and Tweltth wards, but no call for the patrol wagon was made. In nearly every instance the city officials and city employes were found to be working for Wyman. Every member of the

was William Eichenlaub, who labored hard in the Second ward for Councilman Cruik-MUCH AGAINST THEM. The Cruikshank men complained that the election boards, as a rule, were for Wyman, and that was not denied by Wyman's friends. They only said that it was an in-

dication that the citizens who take an inter

est in public affairs were for Mr. Wyman

because of their knowledge of his adminis trative capabilities. Mr. Cruikshank's friends had another interpretation. In several election districts the Cruikshank men demanded the admission, into the polling place, of an inspector expressly interested in their candi date. They were refused in every instance, the point being made that the party rules

provided for only one inspector, duly chosen at each spring election. Little drunkenness was seen at the polls, with a few exceptions in the four centra wards. Returns were received at the Mayor's office. The first floor of the City Hall was overcrowded with young men who were evidently prepared to shout for Mr. Wyman. The place was suffocatingly warm and the jam intense. The noise of gabble, between ward workers who elbowed one another for the front line, and the chance to attract the most attention from the "ins," was so great that Clerk Hunnshagen and Detective Glenn could scarcely be heard when they read the district returns. returns by wards are as follows:

THE FIGURES FOR IT. Wyman, Crniksbank, 1,270

Third precinct of the Fifth ward, the third, fifth, sixth, seventh precincts of the Fourth ward and the second precinct of the Third ward are missing. AN EASY WALKOVER.

According to this showing, Mr. Wyman's vote, as compared with that of Mr. Cruikshank, was about two to one, and in the entire city will be about 900 majority over both competitors. Mr. Griffith was not heard of in either the poll contests or the returns. The reading of the votes at the Mayor's office elicited great cheering, especially when it became apparent, by 8:30, that Mr. Wyman was nominated. It was about 9:30 when Mr. Wyman appeared in person. He was escorted by Detective John Murphy. He hobbled in at a rear door by the aid of two crutches. His face bore, in its fuliness and color, the appearances of health, but it was evident that he was suffering great pain. His feet were wrapped in bandages, and it was with difficulty that he could compose his countenance. The figures, which his triends in the private office showed to him, temporarily obscured his realization of suffering. The moment he appeared he was recognized by the crowd in the hall, and shouts for a speech rent the hot air. After looking over the tables of returns, Mr. Wyman removed his hat and said:

Gentlemen, I must go home. I am not feeling well. I want to thank you for what you have done for me. This result, after 40 days of sickness, shows that I have friends. Next Tuesday I will land you all, with the Republican party, on the shore of victory. Good night.

It was a short speech, but evidently all that Mr. Wyman could stand. He at once left the hall and was conveyed to his home.

WHO THE CANDIDATE IS. Mr. Wyman is only 39 years old, and is a contractor by profession. He has served in both branches of Councils, being elected to Common Council in 1882 and to Select Council the year following. He was not permitted to serve out his term in either branch. In 1884 he was elected Mayor of Allegheny for the term of three years. Under the revised law his coming term is for four years. THE DISPATCH what his policy would be,

he responded: "If I am elected I will try to serve the people right, as I think I did in the past." There were sharp contests for Alderman in several wards. In the first the struggle was between the incumbent, Alderman Thomas M. Tatem and E. L. Braun. Mr. Braun won by 97 majority out of a total of

The Returning Board will meet to-night in Council Chamber to go over the returns

ITS SECOND RECEPTION. The County Democracy Had a Gay Time at Its Annual Dance.

The second annual reception of the County Democracy was held last night in Imperial Hall. About 250 couples were present. The grand march was led by the President, William J. Brennen, Esq., with his accomplished lady. The music was furnished by the Leader Italian Orchestra, and the dancing was continued until an early hour this morning.

There was no attempt made at speechmaking except by various candidates to small crowds of old voters who occupied the corners of the large building. The younger element mixed with the gay and giddy throng on the dancing floor, and had no time to discuss the outlook on Tuesday. The majority of the prominent members of the association were so busy with campaign work that they did not put in an appearance

Political Notes.

THE fight for School Director in the Fitteenth ward has narrowed down until Samuel F. Kerr appears to have the lead in the race. THE Fourteenth ward Democrats held a sug-gestion meeting last night at Soho school, with

James Kain as Chairman and Jerry Doughty Secretary. W. J. Brennen, Michael McMorris and Christ Duna were appointed a committee to place Council candidates in the field. The other nominations were Alderman F. Hawley, Constable J. F. Berry. The candidates for the district offices were also left for the committee to select.

CAPTAIN SCHOYER BURIED. Grand Army Mon and Friends Perform the

Burned by a Spinsh of Metal. John McPherson, an employe at Singer, Nimick & Co.'s mill. West End. was severely burned about the face and arms yesterday by a splash of metal. He was taken to his home on Market street, Alle-

earthly tribute.

[Communicated.] STATE OF PENNSYLVANIA, COUNTY OF ALLEGHENY, CITY OF PITTSBURG. Personally before me a Notary Public in

and for the city, county and State aforesaid came Daniel McWilliams, who being duly sworn doth depose and say, That he had learned that J. O. Brown, Chief of the Department of Public Safety, had said that he had furnished the Commissioners of Allegheny county with a list of the list of the persons engaged in the un-lawful sale of liquor in Pittsburg; that after police force was a Wyman man, and the city detectives, with one exception, did valusuch publication deponent inquired from his colleagues if any such list was furnished, able work for the ex-Mayor. The exception and was informed that none such was ever furnished the Commissioners of Allegheny county by J. O. Brown or any other person, and that no such list is on file in the Com missioners' office.

DANIEL MCWILLIAMS, Commissioner of Allegheny county. Sworn and subscribed before me this 14th day of February, A. D. 1890. W. J. BRENNEN. Notary Public.

Of yourself. Come early it you want one, to Aufrecht's Elite Gallery, 516 Market street, Pittsburg. Bring baby. [Communicated.] Assignee Builey Greasly Negligent. And your exceptants further charge that said assignee (John H. Bailey), at and be-fore the time he disposed of said assets to the combination, as aforesaid, knew or could have easily ascertained the fair value of said properties, and that it greatly ex-

ceeded the sum of \$50,000, and that in so disposing of them for the due bill of said combination, probably never to be paid in any manner, he was guilty of gross negligence, to the great damage of these exceptants and all other creditors so situated; and in obtaining the order of court for said sale he deceived and misled the Court, concealing and suppress ing all facts material to any proper judicial action in the premises. - From the record.

[Communicated.] Assignee Bailey's Incompetency. Was there sufficient, in your judgment, of the properties of Graff, Bennett & Co. to have paid the debts of Graff, Bennett & Co., refully looked after and administered I have no doubt of it: had none at the

We offer a superb line of men's suits and overcoats in new early spring styles at \$9. The overcoats consist of meltons and kerseys, silk faced, and have satin sleeve lining. The suits include cassimeres, worsteds and cheviots. Nine dollars buys one to-day.

French, Kendrick & Co. 516 Smithfield Street HE RESISTED ARREST.

But He Reached the Jail Under Two Commitments Just the Same,

About 10:15 P. M. yesterday Constable D. Doughty brought Samuel Young, colored, to the jail on two commitments for assault and battery on oath of Mrs. Elizabeth Vincent before Alderman Doughty. It appears that Young boarded in the house of Mrs. Vincent on Mulberry alley, between Twenty-seventh and Twenty-eighth streets, and had been drinking for some few days He is said to have assaulted Mrs. Vincent and to have thrown her youngest child out

When the officers went to arrest Young last night at his boarding house he resisted, and had his clothes torn badly in his attempts to escape. The officers still bear marks of his objection to going to jail.
