THE AMERICAN MECHANICS

Will Lay a Monument Cornerstone in Allegheny Parks,

PARADE OVER THE SOUTHSIDE.

And Otherwise Reverence the Memory of the First President.

PROGRAMME OF THE DAY'S EXERCISES

Washington's birthday will not be overlooked in Pittsburg and Allegheny. The American Mechanics, Senior and Junior, will parade to-day to the number of several thousands, and lay a monument cornerstone in Allegheny Parks. There will also be other observances of the day.

"Whose judgment and indomitable courage marked him as the guiding star of our colonies." That is the sentiment which the Junior Order of American Mechanics make use of in their resolutions which initiated the movement which will have its fruition a provisional promise to assist at the dedito-day in the corner-stone laying of the monument which is to perpetuate in lasting grauite the name and fame of George Wash-

W. R. Strob. National Counciles ington, first President of the United States. The sentiment will be echoed all over a great nation which delights to honor the

"Father of His Country."

On his natal day the erection of the monument is formally begun. One year from today the finished work will appear in its sculptured beauty in Allegheny Parks. It will be a grand addition to the local tributes to pariotism, and a community's thanks must be accorded to those who have made possible the erection of a monument which, almough not us imposing as the famous structure in Mt. Vernon square, Baltimore, will be nevertheless unique and beautiful in every respect.

ORIGIN OF THE MOVEMENT.

The movement had its inception in Allegheny Council, No. 112, Jr. O. U. A. M., on the night of June 23, 1886, when formal resolutions were passed, and sent to the seven other councils of the order by Mr. H. P. Staving, Secretary, requesting united action in the securing of a monument to be placed in the parks. Since that time, 15 other councils have been created in Allegheny, the members of the order in Pitts-

The space alloted in the parks is opposite the junction of Sherman and Montgomery avenues. A stand has been placed at the eastern side of the foundation and a large crane is in readiness to hoist the stone into place. Workmen were busy yesterday scooping out the space which will be filled with official documents, relies, coins and sundry newspapers. The growth of the order on the Southside has been phenomenal, and the parade this year marks an important epoch in the history of the order. Smoky City Council 119 is the parent from which have sprung all the other councils on the Southside and many of those south of the two rivers.

THE FIRST COUNCIL.

The history of the order on the Southside dates back to May 24, 1875, when Deputy State Councilor D. C. Evans called a meeting to order for the purpose of instituting Smoky City Council. P. C. Carter and J. Pifler, of the old Pittsburg Council, were the first two members, handing in cards from the lutter council, which is the oldest council in Pittsburg, or west of the Alleghenies, and Smoky City the second on the list. Smoky City started with 20 members. The first meeting place was in Jones & Laughlins' store. The first officers were Thomas Carter, Councilor; J. Connors, Vice Councilor; C. Siebert, Recording Secretary; August Moon-shiner, Assistant Recording Secretary; J.M. Shearring, Financial Secretary; J. Pifler, Treasurer; William Patton, Warden; Inside Guard, J. Geyer, Outside Guard, G. C. Sheppard; Junior Past Councilor, D. J. Da-

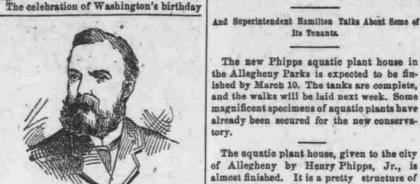

vis. Smoky City at one time had 500 members, but that number has been reduced by deaths, removals, etc., to 443 at the present Iron City Council 171, is the second oldest council on the Southside. It was insti-tuted May 5, 1877, with 19 members. The list aggregates 265 to-day. From 1877 to 1883 the order was a little inactive as far as instituting councils was concerned. On December 19, 1883, William Penn Councember 15, 1885, william Penn Council 64, joined the ranks with 28 members. To-day 192 members are on the rolls. Hill Top Council 88, was instituted April 8, 1886, after another lapse of three years. It commenced with 42 members and now has 193. It meets on Arlington street, Thirty-first ward.

The year of 1886 was an active year in the order. October 19 Southside Council 133, was instituted with 25 members. Its membership to date is 201. Just eight days after, October 27, 1886, Welcome Council 134, was instituted in the West End with 41 members, and to-day has 287.

LARGEST CHARTERED COUNCIL. March 27, 1888, Acme Council 219, was block of granite presented by the Virginia State Council. It will rest upon a substructure of rough stone, now in place, and council has done some good work and now has 147 on the list. FINE WATER PLANTS

In conjunction with the parade of to-day here is a national convention of the Funeral Benefit Association of the Jr. O. U. A. M., to be convened at 9 o'clock this morning in Lafayette Hall. It is believed that on account of the parade and cornerstone laying the convention will immedistely adjourn until this evening.

Delegates are present from 23 States in which the order has representation, one delegate from the new State of Washington being in attendance. The Funeral Benefit Association is, as its name implies, a beneficial branch of the order. The various councils enter it by vote of the membership.

The Thirtieth Ward School Building to be Decorated To-Day.

Vine Cliff Council 107, Jr. O. U. A. M., has presented the Thirtieth ward public school with a handsome new flag, to replace the one which has been waving over that school for the last two years, and which was badly the worse for wear from its long and continuous service.

The flag was presented by a committee from the council, and was very graciously received by Mr. Martin Hinkle, chairman of the School Board, who promised to have the flag flying over the school to gladden the hearts of the marching Mechanics as they pass on their Washington Birthday

Coraopolis Council 164, was organized about three years ago by Heber McDowell. It is the parent of Clinton, Imperial, Western Star and several others. It has been the same with "the other councils, each organizing new councils until to follow the different ramifications of the growth of the order would be like blocking out a "family tree." From the above it will be seen that the growth has been phenomenal. Yesterday Superintendent Hamilton received two packages of seeds of rare water
plants, sent to him from Egypt by Mr.
Phipps, Jr. The large tank in the central
building will be occupied by a Viotoria
regia, or royal water lily. Superintendent
Hamilton said of this magnificent specimen
of the vegetable kingdom: A WONDERFUL PLANT. "The leaves of the Victoria regia attain a diameter of six feet. They are circular, with a raised rim, like the rim of a shallow tin pan. The largest flowers are 23 inches

across. They are white, with a yellow center, and exhale a wonderful pertume. The stems and leaves stretch out 20 feet from the plant. A board has been placed on one of the floating leaves, and a child 6 years of age has been sustained upon the The house will be adorned by several

specimens of the Egyptian lotus, Nelumbium speciosum. Of this historic and gorgeous aquatic flower, Superintendent Hamilton "It is the sacred flower of Egypt, China, Japan and India. Until lately it was sup-

J., I have seen it growing where the ice would form a foot thick over the plants. I do not think that a specimen of this plant has ever bloomed in these crties. WHY LOTUS EATERS.

"The seeds, when eaten or dried, were called by the old Greek and Latin writers Egyptian beans, because they were consumed in such vast quantities in the Nile Valley. According to the Father of History, the seeds had a sweet and agreeable taste. Herodotus compares the seeds of the nymphæas to those of the poppy. They, too, were eaten, being pounded in a mortar and made into a kind of bread. From that romantic writers and poets received their idea for 'the lotus eaters.' Tennyson has written a strange poem with that title.
"In Assyrian and Persian sculpture the

lotus is very conspicuous, alternating with the pine cone as an accompaniment of the most solemn rites. In India, again, we find the same thing. Constantly the lotus occurs, The present death benefit is \$300, on a 3-cent assessment basis. The house will contain not less than 100

species of water plants, and there will be at least 50 varieties of water lilies. Water plants, as a rule, have splendid flowers. The crimson, lilac and blue water hyacinthe will be among the most gorgeous of the flowers.

In addition to the Victoria regia plant which Superintendent Hamilton will receive from the East, he has already received from Para, Brazil, a number of seeds of that species. They were enclosed in a glass bottle filled with water, which was packed in cotton. The living plant, to come in about two weeks, will be packed while en route in damp clay.
