PITTSBURG'S NEED OF WAREHOUSES

OFFICE OF PITTSBURG DISPATCH, TUESDAY, February 25, 1890.

The Government report of winter wheat seeded, gives an increase of 2 per cent in acreage in Kansas, Tennessee, Texas and Missouri. According to this report the winter wheat through the Middle States is at this stage in generally fair condition. In Virginia and Maryland the uplands are in good shape, but low lands and valleys;do not promise so well on account of excessive rains. Farther south the outlook for winter wheat is

In West Virginia the autumn growth was slow, but plants are fairly well developed at this stage, and unless unexpected difficulties arise the prospect is good for an average crop. In Ohio and Michigan there were unusual de-lays in seeding, owing to drought in the latter part of last summer. Up to December growth was very slow in the latter States, but mild weather and warm rains since December have greatly improved prospects. On the Pacific creatly improved prospects. On the rather coast all signs point to another good crop. Rains in that section have been general and m some sections very heavy. The latest Govern-ment report places the condition of the winter wheat crop at \$5.5 per cent as compared with the average at this time of the year.

As to Carriage Hardwarr.

The carriage hardware trade so far this year shows an improvement over last year. In the line of springs and axles our Pittsburg manufacturers find it difficult to keep up with orders. There are four establishments in this city and Allegheny turning out this line of goods and all are reported as working up to their full camacity. The firms are Singer, Numick & Co., Smith Brothers & Co., Ligett & Co. and Ahl-born & Neckerman. The latter firm is confined to the manufacture of axles alone. In this department of hardware Pittsburg is the head ter in the United States. Prices have been ced a numl er of times the past year owr to the advance in steel, and there has been a total advance within the year of about 20 per

Manufacturers of this line of goods are all working up to their full capacity, and some report they are away behind in orders. Pittaburg is looked to in all parts of the country as the main source of supply. Concinnati, which is a leading cen-ter, for buggy and wagon manufacture, gets from this city a large portion of its springs and axies. Our city and Joinstown have also be-come of late years one of the chief sources of supply for steel tires. The iron tire, like the iron nail, has become a thing of the past. > A "Business Man" writes: "Your suggestin that 'all buildings, parks and other institutions for the benefit of the people should be constructed with a view to the expansion of the city in an easterly direction,' is a good one. The primary object of Mr. Carnegie in donating money for a library was to benefit the masses, and to do that it must occupy a central posi-tion. What is a central position? Just now Grant street would be central enough, but how would it be 20, 30 or 50 years hence, with a popu would it be 20, 30 or 60 years hence, with a popu-lation of perhaps a million? Grant street will then be in the extreme western limit of the city. Of course a site further down town would be still more objectionable for the same reason. I have no site in view which 1 desire recommend. My only object in writing this is to call attention to the fact that in selecting a location for the library regard should be had to the future even more than the present. Fifty years from now the city will include Wilkinsburg, Edgewood, Swissvale, and per-

haps Braddock. The latter place is ten miles from Union station. A library at the extreme western end of this long line would be of little use to those living at the other end."

A bill has been introduced in the United States Senate providing for the appointment by the President of a board of seven agricul tural commissioners, of whom four shall be practical farmers, whose duty it shall be to in-vestigate the causes of the present depressed condition of American agriculture, including the laws relating to the inspection of grain, the regulations governing warehouses used for the storage of farm products, and the feasibility of providing for inter-State inspection of cereals; also the relation of railway and transportation rates to the prices of the product, the influence of the tariff on the prices of necessaries of life, its effect on agricultural interests, and generally such consideration of the subject matter of this inquiry as in the judgment of the commission shall best secure its object, ...

A gentleman who resides on Neville Island said yesterday that the much talked of deal by which it was to pass into the possession of a syndicate would probably fall through, as the syndicate wanted everything. The question s still being agitated to some extent, but nothing definite has been done to bring the negotiations to an issue. The people want a railroad, but, in the language of the informant, "they are not willing to give up everything for it." Decisive action, one way or another, will be taken in a short time.

Pittsburg has a material interest in the location of the World's Fair at Chicago. A Wood street merchant in conversation yesterday put it this way: "By taking foreign exhibitors and visitors to Chicago they will have an opportunity to see considerable of the country. Many of them will stop over in Pittsburg going and coming to see our great industrial enterprises, and particularly natural gas in operation, about which the world has heard so much. This will make business, spread the fame of

INFRINGEMENT CLAIMED.

Prior Use for Two Years Alleged on a Steam Engine Device-Rusiness Good in the Divorce Mill-A Day Nursery Charter

Wanted. An argument was heard before Judge Acheson, in the United States Circuit Court, yesterday, in the case of Harwood, Gibbs & Co. sgainst Struthers, Wells & Co. The suit is to restrain the alleged infringement on a patent for an improvement in reversing gear for steam engines. The plaintiffs' side of the case was presented by W. Bakewell & Sons, and the defendants by D. T. Patterson, Esq. The invention in question was pat-ented by Frank L. Bliss in 1881, and assigned by him to the plaintiffs. They assert that Struthers, Wells & Co. have been infringing this

The defense claims that the device patented was in use for two years prior to the date of the patent, with the consent and allowance of the patentee. Also, that there was nothing new in the combination claimed and described

the patent. The Court took the papers and reserved its

Bank. The bank became insolvent in 1878, with total liabilities something more than \$58,000. R. C. Christy was made re-ceiver and Magnus Pflaum auditor. To outsiders was due \$24,000, and the rest was due to stockholders in the bank. The lat-ter had paid some debts of the bank, mearly \$40,000 of which was to the city of Pitsburg. Mr. Pflaum held that, being partners, they could not recover. George W. Guthrie, on be-half of some of these, appealed, as also did Mr. Bindley. He was a stockholder who held judgment given him by Joseph Clemens and Joseph Knoff for \$1,000. He took assignments and then claimed to recover from the general fund.

physician, has decided to leave Pittsburg. He has taken up his permanent residence at the beautiful city of Indianapolis, Ind. During his four months' residence here he made many converts to the mild and gentle natural herbal remedies of the Flowery Kingdom and efforted some marvelous curse. Thousands of people who had long doubted the wisdom of our "reg-ulars, and their powerful mineral drugs and poisons, believe that an outrage has been com-mitted on an inoffensive foreigner, whose sole aim was to do good. The less bigotted medical fraternity of Indiana have made Gan Wa wel-come among them. Gan Wa does not practice modicine—he has perfected himself and does not need to "practice"—but he has a line of propared herb remedies which positively curo dypepsia, rheumatism, neuralgia, fomsie weak-sess, tumors, plies, consumption, costiveness, sait rheum, cutarrh, scrötula, tapsworm, im-larin, nervous disesses, and all diseases of a provate nature. Young, old or middle-aged fund. The effect of the decisions is to give outside sait rhaum, catarrh, scrotula, tapeworm, ma-laria, norvous diseases, and all diseases of a private nature. houses and places for storing goods in the business part of the city is more pressing than over. I have been on the search to find a place for storage this week or two past and have searched in vain. In my opinion capitalists ould make no better investment at this time could make no better investment at this time than by putting up warehonses along Duquesne way, where property is comparatively low, or along the alleys in the old part of the city, where wholesale merchants who are cramped for room could keep in stock the goods which are needed for their trade. A new block of warehouses, which was recently completed on Seventh arenue, went off like hot cakes. for foreign accounts. The western operators bought the grangers freely in the forenoon, though their bullish enthusiasm did not last the day out, and toward the close Rock Island. Burlington and Missouri Pacific were depressed by sales for western account. The early domand, however, was sufficient to cause advances in the opening prices of from ½ to 3 per cont generally, while Louisville and Nashville and Chucago Gas were exceptional, with gains of ½ and ½ per cont respectively. As the buping ceased, dullness became the ruling feature of the trading and continued to be so for the remainder of the day. Prices naturally sagged away from the best figures except in a few cases, Louisville and Nashville bong most comspicuous under the foreign buy-ing. Samuel Hutchinson was committed in default of \$1,000 bail for court yesterday by Alderman Gripp on a charge of larceny preferred by Inspector McAleese.
