STEEL AND TARIFF.

Braddock Able to Compete With England in Selling Steel Rails,

ACCORDING TO AN IRON EXPERT.

Products of Homestead Works Largely Bought by the Government,

WIRE NAILS AND BARBED WIRE DULL

OFFICE OF PITTSBURG DISPATCH. TUESDAY, March 4, 1890. The question of reducing tariff on steel rails is regarded by some as of no practical importance in the present condition of trade. as prices are fully as high in England as in the United States. It is somewhat difficult to get at the actual cost of making steel rails at the Edgar Thomson Works, but when the market price was \$26 per ton, as it was last summer, there was certainly a fair profit to the manufacturer. The advance in the past six months has been close to \$10 per ton and the increased cost of making in that period has been about \$3 per ton. The increased cost

has been in coke, ores and tonnage labor. An expert in steel making recently expressed the opinion that, even at the increased cost of materials and labor, steel rails could be produced at Braddock under \$20 per ton. The highest estimate of the cost is \$23, leaving a net profit to the manufacturer of \$12 to \$13 per ton-When it is remembered that the output of the Edgar Thomson is about 1,200 tons of finished steel rails every 24 hours, it is plain that money

s being made.

The assertion is made by the expert quoted. without tear of contradiction, that steel rail can be laid down in Liverpool from Braddoci and sold there at market prices at a profit of \$10 per ton—a condition of things unprece-dented in this industry. The advance on steel rails in Great Britain the past six months has been fully 50 per cent greater than it has been in the United States. We are fully able to hold our own in the world's markets against all competitors in the manufacture of steel rails.

Steel Products at Homestead. Interviews with some of the employes of the omestead Steel Works have developed a few facts which are here jotted down. The Homestead works, unlike those of Braddock, are turning out a great variety of steel products, such as boiler plate, beams, channels, angles, and in fact everything in the line of structural and in fact everything in the line of structural steel. Three thousand tons were furnished from these works for the great Chicago Auditorium. The works are at this time filling a large contract for the new St. Paul Opera House, in process of construction. Beside this supplies of every description, in the shape of angles and channels, are being furnished for the new Government cruisers in process of construction at Philadelphia and San Francisco. The output of plates for the past few months has been about 5,000 tons per month.

In the month of January 4,000 tons of the finest boiler plate were produced at Homestead. The very highest tests on boiler iron are those demanded by the Baltimore and Ohio Railroad, and the Homestead plate was equal to this test, as it called out some heavy orders from that

as it called out some heavy orders from that company. The margin of profit on boiler plate is narrow. On structural steel there is a good erofit. The price of the latter is quoted at \$55 A pleasant feature of the situation at Home-

stead to the workmen is that on the acceptance of the recent scale it was agreed that the works would be ron for three years. From present outlook there will be demand sufficient for all that can be produced for a year or two ahead. Small Profit on Barbed Wire. While there is a comfortable margin on rails and structural steel profits of late have been obliterated in some lines of steel and iron products by the increased cost of materials.

Barbed wire and wire nails are among the artirow margin of profit. Said a representative of one of our largest rolling mills recently: "We are selling some lines of products at a loss, but find it necessary to do this in order to hold the trade in other lines where there is profit. And, in addition to this, it would be more expensive to stop than to go on. We work on in the hope of a better day. If we can hold on long enough the better

day. If we can hold on long the day is sure to come.

The manufacturer of barbed wire, bar iron.

The manufacturer nails, who is not well heeled "The manufacturer of barbed wire, har iron, cut nails and wire nails, who is not well heeled and prepared to work without profit if need be for a year or two, is likely to encounter snags. In these departments of our iron and steel industries we are likely to have some practical demonstrations of the Darwinian doctrine of the survival of the fittest in the near future."

COMPLETE STORY OF A BIG DEAL.

No Danger to This Generation of a Famine

As an illustration of the activity in real estate, it may be stated that the College place plan was put in the market last fall, and since December 1 W. A. Herron & Sons report the sale of the entire front on Fifth avenue, being in all 4371/2 feet. The lots were all sold in large pieces through to Arabella street, and the purchasers intend building fine residences thereon in the near future

At least 75 per cent of the sales are made to working men. This is the best feature of the market. As to supply, it is inractically limitless, it will not be exhausted by this generation, nor the next. There are thousands upon thousands of unoccupied acres on all sides of the city.

The \$165,000 real estate deal, about which so much has been said, and so many guesses made, was closed up yesterday by Black & Baird, all the papers being passed in the following man-ner: The Caldwell property, 45 by 85, on Fourth avenue, was sold by them through W. A. Herron & Sons for \$90,000. The property in the rear, on Third avenue, owned by John Hill, 20 by 85, was sold by Black & Baird for \$24,500. Considerable Doing in Oil, but Quotations

Continue to Recede. Weakness and activity were the features of the oil market yesterday. Opening at 94c, it C soon broke to 93%c. It then sold up to 95c, from which it weakened gradually on Bradford selling, until just before the close, when it scored 91%. A quick rally ensued on Pittsburg Some persons have expressed fear lest all the land in and around Pittsburg shall be bought and Oil City buying to 93%. This was followed up by capitalists and held at such prices as to by a slump to 9256c bid and 92c offered, which

No. 1 of the Hundred-foot Oil Company, on the Jacob Damback farm on Big Creek, struck the sand and started flowing at 25 barrels an hour. It is located about 400 feet east of the big Lockwood gusher, that has increased its output to 759 barrels a day. There are now eight rigs going up on the Dambach farm. Wood & Young's well, close to the Dambach well, is expected in at any time. Pittsburg men have leased 59 acres of the James Hayes farm, close to the Dambach, and a mile north of the Cable well, and will start at once to put down a well. Guckert & Co.'s No. 1 on the Knauff farm is making 50 barrels a day.

In the Washington field, Wesley Webber's Desmond No. 1 is drilling in the stray and stands full of oil from the Gantz sand. The Washington Oil Company's No. 2, on the Crossland farm, is showing for a 40 barrel well in the Gordon. Hart Bros.' Bellevue No. 3 is completed in the Gordon and is a 50 barrel well.

New Territory Tapped. SPECIAL TELEGRAM TO THE DISPATCH. BULGER, PA., March 4.—It is rumored to-day hat a well on the Connors farm, north of Hickory, is doing at the rate of 15 barrels per Hickory, is doing at the rate of 10 barrels per hour, the champion driller of the State. J. Troutman, who has just come from the well, reports this as a fact. This well opens up a large scope of territory. Mr. Troutman is a reliable man, and speaking of the championship, he has made 145 feet in the 8-inch hole, making the best run in the oil regions.

RAILROAD EARNINGS

Continue to Show a Large Increase Withou Helping Shares-An Off Day With Few Changes in Values. New York, March 4.- The stock market was

again very dull to-day, especially for the regular list, though the Trusts showed a little more animation at advancing prices. The news of the day was not of an especially important nature, but the reports of railroad carnings continue to show a large increase, both in gross and net, As a whole, the railroad business exhibits greater prosperity than ever before enjoyed. The foreigners were doing very little to-day, buying some Louisville and Nashville and selling a little Union Pacific and St. Paul. The bears initiated the dealings by a drive at values which resulted in small fractional declines, but although Union Pacific, St. Paul and others were made the special objects of the attack, buying orders appeared in them, and the bears gave it up and went into cover. duliness became the ruling feature and stagna-

duliness became the ruling feature and stagna-tion settled over the entire market relieved only at times by special movement in a few shares. Western Union and Missouri Pacific showed considerable weakness, while Wabash was strong. The attack upon Western Union was strong. The attack upon Western Union was continued.

One of the strongest points in the list was Wheeling and Lake Erie preferred, which made a marked advance. The movement, although originating in London, was helped by the report that its new connection with the Baltimore and Ohio would soon be completed. The Trusts were all more active and strong, but Sugar failed to hold its improvement. Lead rose on a rumor which pointed to the success of the reorganization plan. The market finally closed dull and stagnant at insignificant changes from last night's prices, though most of the list is higher. Wheeling and Lake Erie preferred rose 24 Manhattan 2 and Pullman, which was bought upon the decisions in the West faverable to the company, 2 per cent. Railroad bonds were quiet to dull, and while the market exhibited larger character, the general list being stagnant as usual of late, there was more movement among the bonds dealt in and some material changes for the day were scored. The sales reached only 355,000, with no special activity. The advances included Syracuse, Binghamton and New York firsts 4½ to 1 55½; New York and Northern seconds 2 to 54, and Shenandoah Valley firsts, certificates, 2 to 118. Fair Tuesday's Trade in General Pro-

54, and Shenandoah Valley firsts, certificates, 2 to 118.

The Post says: The favorable report of the St. Paul in showing an increase of 14 per cent in net earnings for January over the same month of 1889, and an increase of nearly 7 per cent in the gross earnings for February, undoubtedly helped to strengthen that stock, and in connection with the increase of 8 per cent in the February gross earnings in the Northwestern and the great increase of 81 per cent in the January net earnings of the Burlington, puts a very much better complexion on the granger situation than is reflected in the flood of rumors about cuts and rate wars that are continually received from Chicago.

The easier condition of the money market is, however, another important factor in the stronger tone of the stock market. Money is lower now in London than it has been for a month or two past, and while the high rates continue here, there was some heavy seiling of bankers bills to get money which caused two reductions in the rates of exchange last week and one yesterday. But now that the apprehensions about the money market here have and one yesterday. But now that the appre-hensions about the money market here have been relieved by that means even though no
