INCLINED TO BOAST,

Brotherhood Leaders Describe the Prospect as Rosy.

DETROIT ISN'T WANTED.

Why Ward is Absent From the Meeting at Cleveland.

THE SPORTING NEWS OF THE DAY

The Brotherhood meeting at Cleveland opened yesterday. No important work was done, but the leading spirits talked very interestingly. Brunell says the Brotherhood is bound to win.

CLEVELAND, March 10 .- At 10 o'clock this morning John Stricker and Frank Brunell were the only Brotherhood base ball delegates who were visible in the Weddell House lobby, and there having been no regular session of the meeting called for everything was very quiet. Fred Pfeffer and John Addison, of Chicago, and J. Farl Wagner, of Philadelphia, arrived this morning, but all kept close to their rooms. and even Al Johnson, when he made his appearance shortly after 10 o'clock, had suddenly

pearance shortly after 10 o'clock, had suddenly become a man of few words.

The Brotherhood Schedule committee met in Parlor B at the Weddell House in the afternoon and made a few changes in the table of dates, after which an adjournment until Tuesday was taken. Speaking of the work done by the committee Secretary Brunell said:

NO IMPORTANT CHANGES. We made no material changes. After forming the schedule at Pittsburg, I sent letters out to all the different clubs, asking if they were satisfied, and if not, what ob. | 36 ayes to 4 noes. ections they had to offer. Some fault was found with the committee's work, and to-day we took up the complaints in alphabetical order and did what we could to satisfy everybody. We fixed it so that Chicago will have nother Saturday or two in Boston and New York, but aside from this, no important changes were made. The schedule, as a whole, remains practically the same as it was."
"What do you think of Detroit's proposition

That was a mere bluff at the League. We could not think for a moment of taking in De-troit. Why, that man Stearns has been known or the past five years as the greatest living parterer in baseball flesh and blood, and we barterer in tosebain bash and nood, and we would be going right back on our principles if we were to think for a minute of having anything to do with him. Beside all this, Detroit is no ball towh. They won the International League championship up there last season and lost \$12,000 in suite of it. We don't want any such towns in the Brotherhood." such towns in the Brotherhood."

John Ward is not likely to attend the present neeting. Bruneil, when questioned concerning the Brotherhood President's absence, said:

"Ward is with his club in the South and I don't think it will be possible for him to attend. You see, he has a lot of players there who have never belonged to the same club, and it is necessary for him to get them molded into sort of uniformity, or he'll not stand any show at ill in the race. We expect to get our schedule all ready to-day, so that the regular meeting can adopt it to morrow without any discussion.
Everything will go off smoothly here and the
convention will not last more than a day or
two at most. How is the Brotherhood? Why, can't you see? Way up. Seven stories with a mansard roof. The people are with us, and we're bound to win."

The resolution was opposed by Messrs. Ammon, Dahlinger and Stayton, on the grounds that it conflicted with the ordinance passed, providing that a uniform price should be charged to all parties. The motion to pass the resolution was lost, and it was referred to the City Property Committee.

Several ordinances were passed finally. The one creating the office of Building Inspector was amended so as to require ten years' experience as a practical mechanic for the position instead of five, and it was sent back to the committee. An ordinance was passed authorinstead of five, and it was sent back to the committee. An ordinance was passed authorizing the purchase of property for the approach to the Spruce street viaduct.

The ordinance granting the Union Passenger Railway Company the right to lay tracks on certain streets, which had been passed by Common Council and referred back by Select Council, was called up. The Common Branch adhered to its former action.

FUNDS FOR FARMERS.

Uncle Sam Asked to Lend Money on Mortgages at 1 or 2 Per Cent.

Loans Limited to One-Half or One-Quarter of the As-

whereby, he thinks, the agricultural depression may be relieved. His plan is for the Government to lend money at a very low rate of interest to the impecunious far-

avaricious money-lenders, and at the same

and be able to call in a percentage of the loans from time to time at its discretion. Senator Stanford, in presenting his reso-

on Finance, said: From the earliest civilization there has existed in all countries a need of some commodity that will stand as a representative of values which can be made without the commodities themselves being passed from hand to hand. In

dustry and facilitates the exchange of the products of man's labor. Property itself is valuable according to the uses to which it is applied. Thus, supposing a man's wages were \$1 a day, \$100 would employ 100 men one day; but could the product of the labor of those 100 men be immediately utilized, the \$100 might give employment to 100 men every work day in the year.

The Government bond is valuable to the holder on account of the interest it earns. As an energetic factor in the transactions of men, it only amounts to the percentage which it draws, but when the bondholder, by depositing it with the Government, receives back 90 per cent in Government bills, 90 per cent of its value becomes energized into an active commodity, giving employment to the energies of the country. In like manner, if the farmer were able to borrow from the Government without interest a certain amount of its bills, giving his farm as security therefor, to that extent his land would become an active force and he would be enabled, while giving employment to the extent of the money loaned him, to improve his farm and increase its value to the full amount of the loan. Thus the Government loan would be doing double duty.

oan would be doing double duty. A CONTINUING FORCE. Now, the activities of this money do not terminate with its expenditures by the farmer; those who have received it, in their turn, will make use of it as an energizing factor in the forces of life to an indefinite period. As money employs labor it brings to life a continu-ing force—labor begetting labor as certainly as its fruits are valuable. Another way by which we can appreciate what money actively used may perform in the settlement of bal-ances is to be found in the value of commodi-

ties produced and exchanged compared with
the amount of money in circulation.
How far the boundless resources of our
country shall be put into activity depends not
only upon the active industry of our people,
but upon the power necessary to induce that
industry; and it should be the care of the Government to see that such industry receives
every encouragement.

An abundant supply of money means to individuals of capacity a field for the use of their
abilities in prosecuting their various callings
of life, and will be particularly valuable to
associations of individuals by affording them
facilities for obtaining capital for the transactions of every kind of business. An abundance
of money means universal activity, bringing in
its train all the blessings that belong to a constantly employed, industrious, intelligent people. ties produced and exchanged compared with

NO SERIOUS OBSTACLE. If these proposed loans could be made by the Government without risk, I do not think that there would be any serious obstacle in the way of the accomplishment of the object of the resolution. In my opinion ample protection would be afforded the Government if it limited its loan to one-half or one-quarter the assessed value of the property given as security and upon the appraisement of Government officers especially selected for that duty.

especially selected for that duty.

It seems to me that the great thought of humanity should be how to advantage the great multitude of toilers, increase their power of production and elevate their condition. We know that a great improvement is within the provisions of Providence, and in the prosperity of the masses of the people the prosperity of all is assured. Man is the rightful heir to peace and properly and years much decends. all is assured. Man is the rightful heir to peace and prosperity, and very much depends upon the intelligence of Governments to represent the associated capacities and interests of the whole. To me, one of the most effective means of placing at man's disposal the force inherent in the value of property, is thoroughly furnishing a bountful supply of money based upon unquestioned and secure values.

Now that its manufacturers are drawing the attention of the American public to this first and, ever since its invention, the best of all cocoas, it will soon be appreciated here as well as elsewhere all over the world. All that the manufacturers request is simply one trial, or, still better, a comparative test with whatever other cocoa it may be; then VAN HOUTEN'S COCOA itself will convince every one of its great superiority. It is because of this superiority that the English paper Health, says: "Once tried, always used." To avoid the evil effects of Tea and Coffee, use constantly VAN HOUTEN'S COCOA, which is a STRENGTHENER of the NERVES and a refreshing and nourishing beverage. [52]

BREAKFAST.

"By a therough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—Civil Service Gazette. Made simply with boiling water or milk.
