BUCK EWING'S CASE.

Some Interesting Arguments Before Judge Wallace.

EWING'S RESPECT FOR DAY.

President Nimick Denies That Pittsburg is a Brotherhood City.

THE SPORTING NEWS OF THE DAY

club, was argued before Judge Wallace in the United States Court in New York yesthe Brotherhood.

PRECIAL TELEGRAM TO THE DISPATOR. NEW YORK, March 14 .- "This is the ase," said President Day to a small coterie of friends previous to the legal contest of the Metropolitan Exhibition Company against William Ewing in the United States Court to-day. The popular National League magnate seemed to be more deeply interested in the suit against his old catcher than in the recent case against Ward, and it is claimed that he places the most implicit confidence in the arrangement and presentation of the case against Ewing, and that his favorite player will be compelled to play with the New York League club or no other. If the decision should be the reverse, President Day will undoubtedly be a greatly disappointed man. It is a fact, however, that the relations between the New York club's President and his former Captain are apparently as friendly as ever, and when the two met to-day in the corridor opposite the court room their greetings were ex-

EWING'S REMINDER, "How funny it is," said Buck, "that two such

old friends should now be engaged in a scrap ping match." It was close to I o'clock when the case was called for argument and although Joseph Choate, who was to make the closing address for the complainant, was absent, George F. Buysters, of counsel for the New York club, stated he would proceed with his side of the case. Mr. Duysters at the outset described the the business of baseball and compared it to theatrical companies who depended on success through the skill of the players. The only material difference, he claimed, was that one could do business alone and flourish. Baseball players were the same as actors to their managers, and if a skilled player like Ewing were to drop out, the Metropolitan Exhibition Company would suffer greatly.

PRINCIPALS IN THE CASE. This action is not between the Metropolitan Exhibition Company and the defendant, but between the New York club and the defendant. his is the name in general use. Mr. Duysters hen reviewed the different clauses in the contract, taking almost the same ground he did in the Ward case, Judge Wallace inquired whether there was anything in the contract requiring a notice to be sent to the player that he was to be retained. The reply was there was not. Mr. Duysters closed his argument by citing a number of decisions in support of his motion for a preliminary injunction. Judge Bacon, in behalf of the defendant, prefaced the technical part of his argument in a denial of the complainant's statement that Ewing did not give notice that he intended to leave the National Lesque until the 17th of February. "The fact is," Mr. Bacon said, "Ewing told the agent of the New York club last October that he did not intend to play with them: and, furthermore, in November the Brotherhood had a meeting and publicly anrounced a breaknot. Mr. Duysters closed his argument by had a meeting and publicly announced a break-away from the National League."

JUDGE BACON'S CONTENTION. Judge Bacon contended that Ewing was a resident of New York when he signed a contract and was a resident of the same city when he was sued. The defendant was not aware that the name of the Metropolitan Exhibition Company and New York club was the same thing. It has only the power to make a con-tract under the name which is given in the cer-tificate. Judge Bacon dwelt considerably upon the reserve clause and also upon Ewing's affidavit, in which the latter says the co calls for not more than \$2,000 for his services, yet he was actually paid \$4,000. This was in direct violation of the constitution, Judge Bacon quoted the Pittsburg case in 83, also the Ward case, and asked that an injunction be deviced.

Mr. Choate, in his reply to Judge Bacon, said that the facts in this case were substantially the same as those in the Ward case. He contended that there were certain points, however, that were not fully discussed in the Supreme Court, but Judge O'Brien decided that his only reason for denying a preliminary injunction was that the case could be fully heard before the playing season opened.

ME. CHOATE'S POINT.

"It is claimed," said he, "that we were denied the right to pay more than the contract
called for, \$2,000. But Ewing and Ward were
paid more, it is true, but not as a gratuity, but
upon certain conditions made with Mr. Day
and it was made simultaneously with the signing of their contracts."

Judge Bacon—Where are your affidavits to
that effect? Mr. Choate said that his side did
not have any, but Judge Bacon replied that he
had and handed them up to the Court. Mr.
Choate continued and said that the fact that
they had a right to pay the extra salary couldn't

they had a right to pay the extra salary couldn't be disputed.
Judge Bacon—I don't know about that.
Mr. Choate then spoke about the hardships and mutuality of the contracts going over the same grounds as in the Ward case. he claimed that renewals in contracts were very common, particularly in real estate cases. Judge Bacon closed the argument of the case in a few remarks and the papers were handed up to Judge Wallace, who reserved his decision.

NIMICK'S HOPEPUL TALK.

He Argues That Pittsburg is Not a Brother bood City.

During a conversation on local baseball affairs yesterday President Nimick, of the local League club, emphatically disputed the statement that this city is a Brotherhood city. Mr. Nimick said:

"Recently I have seen statements in the newspapers day after day to the effect that Pit sburg is an out-and-out Brotherhood city. Now, what I want to say is that those people who persist in making these statements know little or nothing about the public feeling. Let me tell you that this alleged public feeling. Let me tell you that this alleged public feeling in favor of the Brotherhood has been manufactured by a particular few who are all directly interested in the matter. There are hundreds of baseball patrons who probably were in favor of the so-called Brotherhood when it first commenced, but since then it has been discovered that the movement is no Brotherhood movement at all, but has been promoted and is being supported by capitalists who think they can make money out of the players. The latter will be contracted and paid just as usual. I really cannot see why any true patron of the game in Pittsburg should refuse to patronize the old club. Good heavens, have we not for years paid our thousands of dollars to these very players who have left us, and have not many of them obtained large sums of money from us dishonestic? This is a fact. I want the public to know this and I hope you will publish my statement, seeing that statements of the opposite kind are being published every day. I am of opinion that among those people who have in the past patronized baseball games there are 5 to 1 in favor of the old League. Why shouldn't they be? Our money has been spent in the business to entertain them. We will continue to have a club here and depend upon it we mean no such thing as me tell you that this alleged public feeling in them. We will continue to have a club here and depend upon it we mean no such thing as

BRUSH'S MISSION.

His Hoosier Friends Make a Gress Regarding His Pittsburg Trip.

PEPECIAL TELEGRAM TO THE DISPATCH. INDIANAPOLIS, March 14.-President Brush visited Robinson, of Cleveland, and Nimick, of Pittsburg, while away. Mr. Brush came home over the Pan Handle direct from Pittsburg. It is believed and it is known that he started toward Cleveland when he took his departure last Sunday morning. A gentleman who speaks semi-officially makes this statement in regard

"When Brush got home from the Claveland meeting he feared that the presidents might take a vote by telegraph any day on dropping out a couple of clubs. He knew that if he could get a couple of presidents pledged to Cash Register Company by false and fraud-ulent statements and conduct.

stand by him be would be safe, so he quietly stipped away to see Robinson and Nimick. They have both always been good friends of his and he doubtless got a pledge from them. If they will stand by Indianapolis and Washington as they should do, the League will be one vote short-should it attempt to vote out Indianapolis and Washington. For reasons which are apparent Brush would not want anyone to know that he was visiting Robinson and Nimick seeking pledges. I think when the truth comes out you will find Brush, in his usual fashion, has stolen a march on Mr. Day and the would-be Indianapolis wreckers."

Captain Glassocok will take his players to Martinsville for a week's practice and mineral pathing.

Mr. Edwark Park, of Park Brothers, also invited the bank offi-cials to do likewise if they needed funds. When a call was made at the bank about closing time everything was quiet. Large stacks of bills were in plain view, with which Cashier Schauer said he was ready and willing to meet anyone anxious to

Mr. Schauer stated that after the first few anxious depositors had been assured that there was no danger of the bank being unable to meet all demands the accustom serenity soon settled about the place, and since that time they had received more money than they had paid out.

Talks with various depositors in the neighborhood developed the fact that their confidence was but little shaken in the institution; that they were in the main not afraid of it going under. Aside from the fact that they expected that within a few weeks the deposits might not be as large or as numerous as usual, within a very short time everything would come all right again. Messrs. Woelfel & Linke, of Allegheny, yesterday entered suit against the William Baeder Glue Company for \$624 87 for merchandise sold and delivered. Messrs. Wettach & Co. filed a suit against the same company for \$480 84, \$225 of which was for goods sold, and the balance on a promissory note. MacKenzie, Davis & Co. sued the glue company for \$126 or stationery.

ISPECIAL TELEGRAM TO THE DISPATOR. NEW YORK, March 14.-The state of

trade, as reported in special telegrams to Bradstreet's shows that the week has been marked by a noticeable check in the movement of general merchandise throughout the Lower Mississippi Valley, owing to floods and fears of further overflows. This is conspicuous in Louisiana. Unfavorable weather and high water have had an effect also throughout the Ohio river valley. Trade at San Francisco continues depressed by the "all winter's storm," but the outlook is for an improvement. Wheat is moving rapidly in California and is going abroad in large consignments weekly.

An improved merchandise movement is reported from Boston, Pittsburg, Kansas City, Chicago and Omaha, stimulated in part by mild weather, and most conspicuous in groceries, clothing, boots and shoes, drugs and hardware. Hogs and cattle are in better demand and prices tend upward. BULLS BECOMING BRAVER.

The tone of speculation in Wall street low bank reserves and the Western railway rate war. Liberal purchases of bonds by the Treasury, the reduction to 4 per cent of the Bank of England discount rate, lower foreign exchange, the purchase by the Chi-cago, Burlington and Quincy Railroad Company of the rate-disturbing Chicago, Burlington and Northern Railway, and continued improvement in railway earnings generally have combined to favor an advance in share prices. Railway bonds are more active and higher. The February gross earnings of 136 railroad companies re ported to Bradstreet's aggregate \$28,984,530, with a total mileage of 77,385, against \$25,-837,195 and a mileage of 75,584 in February last year, a gain in earnings of 12.1 per cent and in mileage of 2.4 per cent. For two months the total earnings aggregates \$60,-020,679, a gain over last year of 13.2 per

HEAVY WHEAT EXPORTS. Reports to Bradstreet's of available stocks of grain east of the Rocky Mountains, United States and Canada show uniform decreases last week. The decrease of only 817,359 bushels of wheat was surprisingly small. Increased stocks at Minneapolis, Duluth, Manitoha and Northwestern On-

tario points explain why the decrease was not 1,500,000 bushels, Exports of wheat (and flour as wheat) this week, both coasts, the largest for months, equal 3,067,030 bushels, against 2,481,869 bushels last week and 1,259,850 July 1 last the first week of March, 1889. Since July 1 last the total exports of wheat and flour have equaled 75,422,233 bushels, as compared with 64,920,456 bushels in a like portion of 1888-89. Wheat prices, after de-clining on the Government report of 156,-000,000 bushels in farmers' hands March I, dvanced on foreign takings and reported damage to winter-sown wheat, closing 1@ 11/2 cent up on the week. Drygoods are lairly active as and Boston, but at the former the demand has not equaled expectations except from the South. Agents report reassorting demand moderate. Prices are generally well held except for colored cottons, which rule in buyers' favor. Foreign goods are slow of sale at New York and the wholesale clothing trade is quiet. Raw wool is in better demand at Boston. Territory and Australian grades are active. Cotton is 1-16@1/c higher in all markets on generally good de-mand, small stocks and light crop move-

ment. SENT ACROSS THE SEA.

Petroleum exports (official report), eight months, were 461,059,433 gallons, valued at \$35,435,086, against 409,434,749 gallons, valued at \$33,441,979, in a like period of 1888-9. Exports of cotton for six months of the crop year aggregate 4,077,266 bales, valued at \$203,060,502, a gain of 16 per cent in quantity and 18.5 per cent in value over last year. Breadstuffs exports for eight months aggregate \$94,847,578, an increase over last

year of 15 per cent.

Business failures reported to Bradstreet's number 209 in the United States this week against 215 last week and 195 this week last year. Canada had 41 this week against 48 last week. The total number of failures in the United States since January 1 is 2,967

against 3,143 in 1889. BUSINESS BRIGHTENING. R. G. Dun & Co.'s weekly review says: The money market has been relieved by Treasury disburs ments, by another reduction in rate by the Bank o: England, and by a fall of three-quarters of a cent in the rate of sterling exchange. The volume of business continues extraordinarily large, at New York clearings exceeding last year's by 5 per cent, at Boston by 6 per cent, at Philadelphia by 16 per cent, at Chicago by 17 per cent, and at all other points by 15 per cent. The increase in railroad earnings for February was about 121/2 per cent.

The weekly output of iron turnaces in blast March 1 was 180,991 tons, against 174,038 January 1, and 149,775 a year ago. To many, this further increase of over 4 per cent for the month will seem surprising, but it was announced a month ago that several large furnaces were about to go into blast. IRON DROPS A LITTLE. With a production exceeding that of a

year ago more than 20 per cent, and already at the rate of 9,400,000 tons in early, the tone of the market has been weaker and prices have again declined. A reduction of \$1 50 in the price of Birmingham iron, so that it is now offered in Eastern markets 50 cents below similar iron from Pennsylvania, compels sellers to make concessions, and causes a nervous and disappointed feeling.
Rails are quoted 50 cents lower, and one lot
is said to be for sale at \$34. The demand
for bar iron is better, but on the whole there is as yet a lack of evidence that the country can consume at the rate it is now producing pig iron, and lower prices are apprehended.

There is no setback as yet in the cotton manufacture, although raw cotton has advanced a sixteenth, exports being almost up to last year's for the week, and for six months ending with February, 2,010,000, 000. More sales are noted of rubber goods, and the demand for building materials of all sorts continues large with prices tending

VOLUME OF TRADE INCREASING. Reports from other cities indicate some mprovement in the volume of trade where change is noticed. At Chicago receipts of grain equal, and of meats and provisions

wool appears of late. Drygoods sales are below last year, but collections are average, and the clothing trade fair. At St. Louis, trade in winter goods has been improved by the weather, but southern distribution is impeded by the floods below. At Mil-waukee and Cleveland trade is improved Business Generally Improving, Exsomewhat, at Omaha it is larger than last year, and at other Western points fair, though at Denver and some other points un-

settled freight rates wake some difficulty.

At Pittsburg the general business is good but weakness is lelt in iron, and flint glass works are restricting output because of dullworks are restricting output because of duli-ness. At all points reporting any change in collections they are more satisfactory, and the Western money markets are fairly sup-plied, though the demand is strong at Den-ver, while money is tight at Philadelphia, but easier at Boston.

MONEY MARKET STEADY.

The weekly reports from Bradstreet and Dun are encouraging on the whole. The recent heavy storms have had a bad effect on business in some parts of the country, but trade generally is good, and slightly above the average.

No change of consequence in rates has occurred in the New York money market, though the treasury has paid out \$1,000,000 more than it has taken in. Exports of cotton, breadstuffs and oil for February were in value \$39,217,868, against \$33,610,396 last year, a gain of 17 per cent., largely due to doubled exports of wheat and flour. But for two weeks of March the exports from New York have fallen below last year's nearly 2 per cent., while imports increase. Railroad stocks are about 75 cents per share higher than a week ago, but trust stocks are weaker and Tennessee Coal and Iron 10%

cents lower.
The speculative market for products have been a little stronger, excepting for oil, which has dropped 3 cents. Wheat and corn are 1/2 cent higher, coffee 1/2 cent higher and pork products a little stronger. But speculation is not rampant, and is likely to be restrained for a month by fear of the tight

The treasurer of each municipality and corporation was expected to keep out of the interest of bondholders a tax of S mills, and turn the money over to the State. Prospective Cut of 15 Per Cent in the Western Iron Rates. It is generally predicted that the railroad freight agents, now meeting in Chicago, will reduce the western rate on iron within George W. Hoblitzell, of Meyersdale, are at the territory of the Central Traffic Association. Iron is now classified in the fourth and fifth classes. The object is to restore the old special classification, and put it back into the fifth and sixth classes. This will amount to a cut of 15 per cent in the rates between Pittsburg and Chicago. It is
