The property was 375,890 51 the previous day. Balances were \$387,599 75. There was a good demand for purchased in 1875 for a marine hospital, which was never erected. It has lain idle, and an act of Congress was passed directing its sale.

The Secretary of the Treasury gave instructions to the Marshal to that effect, and specified that no bid less than \$30,000 was to be entertained. At the sale yesterday no one seemed inclined to approach that figure, and the sale was adjourned to March 31 at

\$887,589 75. There was a good demand for money, which was readily supplied at 6@7 per cent. Everything points to continued ease. No change in conditions is looked for until after the April settlements.
There have been lively discussions on the Paris Bourse over a pamphlet, issued by M. Siegfried, an ex-director of the Comptoir d'Escompte, and M. Levy, the banker, showing that Paris is sinking below Berlin as a finance market. It is stated in this publication that the shares issues of Eugland for 1889 amounted to 500,000 france, while those of France amounted to 520,000,000 frances, while those of Germany reached a total of 500,000,000 frances, not counting the shares issued by industrial companies.

and west of Pittsburg. A farmer from the neighborhood of Clinton, who was in the clty lo-day, reports that the oil speculators are mak-ing him daily visits with a view to leasing ter-ritory at prices which would have been consid-ered fabulous a year or two ago. Said he: "On the Ferguson farm, which starts about a mile and a half north of Clinton, there are now 40 flowing oil wells, and only one well on the en-tire tract is dry. All wells north and west or this tract have so far proved to be dusters or dry wells. "The McMichael well, one-half mile from The agricultural interest in some parts of the West is in a deplorable condition. A single law firm in one city in Southern Kansas has the contract for the foreclosure of 1,800 farm mortgages. This means 1,800 homesteads transferred from the hands of so many industrious families to the bands of capitalists, either donestic or foreign. The trouble is due to two principal causes-farmers undertaking to cultivate too much land and crop failures, entire or partial. The lot of the Pennsylvania farmer

this tract have so far proved to be dusters or dry wells. "The McMichael well, one-half mile from Clinton, around which great expectations gath-ered, proved within a few days to be a duster, and blasted many a bright expectation. Up to the very last day the signs were most promis-ing, but all signs failed. The Albert Ferguson oil well furnishes a story of success which has bad no equal in our section. A little more than a year ago John Ferguson, one of the pioneers of our score years. He was a hard-working tanner and farmer, and though he accumulated a competency in his long life time, his only son Albert has gathered more spoils in the one year which has intervened since his father's death than the latter did in his long and laborious career. Not more than 500 feet from the old tannery is an oil well which is now viciding 500 to 600 barrels of oll every day. The profits of the present proprietor of this tract since October last have been \$55,000, and he has lately refused \$225,000 for his oil in-terests. The Forguson lands are rough and un-productive as a rule, and \$40 an acre would have been considered a good price a year or two ago.
