for all that was offered. Prospects were at an early hour that everything would be cleaned up at about last week's prices.

The offerings of cattle were larger than for several weeks past, with quality well up to average. Prices were reported unchanged.

Carn—A moderate business was reported, trading being rather spaxmodic within 160% crange. The feeling prevailing, considering the influences brought to bear on the market, was relatively firm. The market opened at about Saturday's closing prices, was easy for a time, ruled steadier, and closed about the same as Saturday. No sales were returned above \$5 50. Following is the range: Prime heavy Chicagos, weighing 1,500 to 1,600 hs., \$5 25 to \$5 50; medium weights, 1,350 to 1,450 hs., \$5 00 to \$5 15; do., 1,300 to 1,400 lbs., \$4 75 to \$4 95; prime light weights, 900 to 1,100 hs., \$4.25 to \$4.65; common to fair, thin and rough steers, \$3.50 o \$4 00; bulls, stags and dry cows, \$3 00 to \$3 75.

TOO GOOD TO SELI

The County Should Hold On to the Old University Building.

COMMISSIONER M'KEE'S VIEWS But It May Pass Into the Hands of a Syndicate and Become a Theater.

CONSERVATIVE REAL ESTATE MARKET

Commissioner McKee, in speaking of the University building, owned by the county, vesterday, said there had been no satisfactory offer for it, but that there was some talk on the part of several gentlemen of purchasing it for a theater, but they had not yet reached a conclusion. He added: "My view of the matter is that it would be best for the county to lease the building for a term of years, say 20, at a figure that would yield a return of 4 per cent on the investment. At the expiration of the lease the county would probably need the property, but if not it would sell for a great deal more than could be obtained for it now."

There is no immediate danger of a material apse of interest in Pittsburg real estate. The city is growing so fast that a reaction, either in business or prices, is impossible without a radical change in conditions, of which there is neither sign nor symptom. As in other departments of business, occasional lulls are to be ex-pected; investors draw off to compare notes and perfect their plans, and owners become less aggressive while they try to figure out reasons for an advance. These points settled one way or another, activity breaks out again and the

market moves along swimmingly.

It is a matter of surprise as well as congratulation that the management of this great inyears ago, has been of so conservative character as to nip inflation in the bud whenever it peeped above the soil. This has resulted in a firm, steady market, based on solid values, giving confidence to both buyer and to the former that he assumed no great risk in the purchase, and to the latter that he obtained about the top price for his property. This feeling of satisfaction could not exist with an unsettled market and prices on a fictitious basis. The buyer would be afraid of a reaction and the seller of losing the advantage of a

possible boom. Stable values and legitimate enhancement, such as follows increase of population and exreal estate to the front as a popular and desiraproprietors who, under less satisfactory condions, would still be renters.

Very few people understand how gold and silver are brought to a degree of usefulness at the United States Assay Office in New York. The process is as follows, as explained by Dr. Eaton: The gold and silver is weighed, and then is passed to the melter, who reduces it to a malleable state, after which it is tagged and laid away in the general stock for refining. All gold contains more or less silver as taken from the mines, so that in refining we must determine the amount of silver in a bar of metal by adding gold to it so as to have two parts of silver and one of gold. The amount of silver or alloy is determined in the weighing out. The metal is placed in a furnace and melted in a cupel, where the base metals are separated from the precious metals, the base metals dropping into a cup provided for the purpose. Then the gold and silver is beaten up and formed into bars and laid away in the vaults. The process of refining gold is complicated and thorough. The silver, in order to refine it thoroughly, is placed in a vat of sulphuric acid, where, if there is any copper in it, the acid having a greater affinity for copper than for silver, takes up the copper and drops the silver. The latter metal drops to the bottom, the acid is run off, and then it is washed in water until it is sweet -that is, until the acid is out of it. Then it is made into bars, stamped with the refining number, the number of ounces, the value, and the American eagle on top, and removed to the vault.

THE BOOM EXPLODED.

Pleasant Valley Takes a Downward Course

-Gas and Tractions Weaker. The demand for Pleasant Valley seemed to have been satisfied yesterday, and the boom in it collapsed. It declined from 27% at the opening to 27 at the close, a net loss of 75 cents a share. Whether the depression will be permanent or is only preparatory to another deal must be left to time to determine. There are those who think that the rapid advance was not justified by the earnings, and that the slump is a natural reaction.

Central Traction also submitted to a sharp

oncession, while the others barely held their own. Philadelphia Gas lost ground, declining from 31% at the opening to 31% bid at the close. Monongatela National Bank was bid up to 119, without offers. The par value of the stock is

Gives Way.

There was considerable activity in the oil market yesterday, especially about 11 o'clock, when it was hammered down to 84% the lowest point of the day. A few good-sized orders were filled but the bulk of the radius of the control of the day. filled, but the bulk of the trading was professional. The break was due to Pittsburg and Oil City selling; later Pittsburg was a light buyer, causing a rally, on which the market closed about steady. The net less for the day was 1½ cents. They Look for a Buoyant Feeling in the Share Market-Sugar and the Grangers the Only Conspicuons Features.

NEW YORK, March 24.-The stock market to day was still dull, with small fluctuations, but the firm to strong tone which marked the deal. ings during the latter portion of last week was still prominent, and the operations of the day resulted in a general appreciation of values, with a few material advances among the spe aged small demonstrations here and there by quently the market during the forenoon showed little if any improvement over Saturday's prices, and the duliness was still the most prominent characteristic of the speculation. The fact that the bank statement of Saturday was favorable beyond expectation and the prospect that early and favorable action on the Windom silver bill is likely to make a buoyant

Windom silver bill is likely to make a buoyant feeling in the street.

The opening figures, under the pressure to sell for the short account, were generally from ½ ta ½ per cent lower than last Saturday's closing, but the decline, except in such specialties as Tennessee Coal and its kindred stocks, went little further. The market exhibited, even in the duliness, a stubborn strength, which soon compelled the bears to withdraw, and in the afternoon covering of shorts, with some little buying for the long account, led to a more active business, with steadily advancing prices, The grangers were most conspicuous in the upward movement, and St. Paul, Rock Island, Atchison and Missouri Pacific attracted attention, while the bijuminous coal stocks, which were the leafers on the early decline, recovered almost all their losse. feeling in the street.

tion, while the bituminous coal stocks, which were the lealers on the early decline, recovered almost all their losse.

Among the specialties the most marked movement was in Chicago and East Illinois preferred, which, upon the news of the declaration of a dividend upon the stock, moved from 77½ to 81. Other gains of moment were in New York and Northern preferred from 24 to 25, in Wisconsin Central and Wheeling and Lake Erie preferred. The trusts were quiet, but sugar, while showing considerable animation, was traded in within comparatively narrow limits for that stock.

The new stocks of the American Cotton Oil were traded in to-day, the common selling at 18 and the preferred at 75. The market showed no change after the upward movement, but closed strong at the best prices of the day. The list is almost invariably higher to-night. Chicago and East Illinois preferred rose 3½; Wisconsin, Central, 1½, and Northern Pacific preferred and Peoria, Decatur and Evansville, 1 per cent each.

> The petitioners claim that the bulk of the imported oranges and lemons are sold to the working classes and in the tenement districts, and a quantity is sent to points west, where none of the Florida fruit is sold on account of its high price. They assert that no injury will be done to the domestic trade by keeping the duty at its present standard, and that an increase of duty will only tend to drive out of the business without doing the home fruit growers any good.

OFFICE OF PITTSBURG DISPATCH, MONDAY, March 24, 1890. Country Produce-Jobbing Prices. The week is too young for any fresh develop ments, but with the skies brighter than for nany Mondays trade starts out with signs of improvement. The chief trouble lies in the scarcity of stuff. Potatoes are still scarce and firm. Apples are in light supply, but move slowly on account of high price. Oranges are good stock at quotations. Cabbage is quiet. Onions are steady. Dairy products move along in the old ruts, with a steady demand for high grade stock. Eggs are quiet but unchanged Poultry is scarce and very firm.

burning fever he

could scarcely get any quiet sleep, for his sleep was so disturbed with frightful hideous dreams. The weakness and pain across the small of his back, high colored urine, and which contained a sediment, the frequent desire to void if, accompanied with great pain, told him but too plainly that his disease was fast advancing. The inflammation that followed produced a stricture. As he grew weaker his food failed to digest, he had belching of gas after eating, bad taste in his mouth, and coated tongue. He felt a severe pain in his right side, and sharp pains would seize him in his arms and legs. Day by day our patient sufferer continued to grow worse, until his blood became so poisoned, that an eruption of pimples and red blotches covered his whole body. Having been unable to find any relief, he had about given up in despair, when reading in the paper a testimonial of a patient who had been cured of conditions similar to his by the physicians of the Polypathic Institute, 420 Penn avenue, he called upon them, and after using their medicine—which was made to suit his case—for one month he became cured. He says: "I desire to state for the benefit of the public that the above statement of my case is correct in every particular. I had been suffering for over two years, and had given up all hope of ever being cured, but Dr. Shafer, of the Polypathic Medical Institute, has cured me. I have not feit a well as I now do for years.
