OFFICIALLY OFFERED TO ARGENTINE It has transpired that in the debate on the report of the Pan-American Committee on Customs Union at Washington to-day,

the United States delegates, upon the authority of Secretary Blaine, offered full reciprocity with the Argentine Republic, Dr. Seanz-Pena, a delegate from that country, having advocated free trade in a minority report and in a speech in support of it before the conference.

No offer of reciprocity was made to any other of the South American republies.

possibility of getting great benefit from the Pan-American Congress has come to a focus. An intimation was received a few days ago by Mr. Charles Flint, the representative of this country from New York, from the representatives of the South American countries that their countries might be willing to give complete reciprocity in everything, prowided this country would do the same,

IT HAS BLAINE'S APPROVAL.

"Mr. Flint was in consultation with Secretary Blaine upon the matter, and upon the expression of his (Flint's) desire that Mr. T. Jefferson Coolidge, of Massachusetts, might be joined with him in the negotiations, those two representatives of the United States in the congress were made a sub-committee to conduct the negotiations to put the matter in shape for further representation to the congress.

"The whole situation was talked over with Mr. Blaine, and the outcome of it was that the representatives of this country were authorized in the name of the Secretary of State, and with his approval of the scheme. to make a proposition of absolute reciprocity between the United States and the Southern American countries. The reciprocity proposed is without extension, and the adoption of the plan would bring about absolute free trade in every article of commerce between the United States and the South American countries.

AN IMMENSE SCHEME.

There is also involved in the plan, as an essential part of it, the adoption of articles of agreement for arbitration in cases of international disputes. The agreement would apply to the South American countries in their relations with each other as well as in their relations with the United States.

The scheme in its two parts is regarded as of immense consequence to all the countries concerned. It was on Saturday, March 22. the proposition was submitted by Messrs. Flint and Coolidge to the South American representatives.
