## ISPECIAL TELEGRAM TO THE DISPATCH.1

LIMA, March 30 .- S. P. Boyer drilled in a gusher last evening on the Parker farm, five miles east of this city. It is flowing naturally at the rate of 1,400 barrels per day. The well is one mile east of the fa-mous Tunget well, which was drilled in 1886, and is still going, having produced 700,000 barrels since that time. This Parker well is a great surprise, as it

is located right in the midst of a lot of dusters.

Better. NEW YORK, March 29.-The stock market

continues to show a diminishing volume of business, and the transactions to-day were in all probability the smallest on record, while the fluctuations in prices and the interest taken in hem were strictly upon the same plane. The features of the market were confined to the

selling of Erie in the early dealings. The bank statement was, if anything, more favorable than expected, as some money was known to have gone out of the banks. The efforts of the bears gave the market, which had been utterly stagnant, a rather heavy tone toward the end of the session, and the close was heavy, though the final changes are in all cases insignificant. Railroad bonds were equally dull and feature-less and displayed a drooping tendency, though no movement of importance took place. The sales of bonds for the week aggregated \$5,967,-000.
