TOO EAGER TO SELL.

That is the Real Trouble With the Iron Market at Present.

WHEN THE BOTTOM IS REACHED

A Great Increase in Business is Very Confi-

dently Expected.

THE TRADE AT THE OTHER CENTERS

The drift of iron and steel is still downward, and we have to record lower prices than prevailed a week ago, when it was generally thought that bottom had been reached. Transactions have been very light, the policy of consumers being the hand to mouth policy in the present weak condition of the markets. There is more inquiry for iron and steel products this week than last, but strange to say this has had the effect of weakening markets, as it brings those anxious

to unload into close competition.

There are more people anxious to sell than to buy, and the first appearance of a buyer in the buy, and the first appearance of a buyer in the market brings competitors for trade to the front, who are ready to make concessions in order to sell. Once it is certain that bottom is reached, buying will be more free. Prices are now lower than before last fall's advance, when cost of material is considered. The cost of producing iron from lake cres is now from \$3 to \$3.50 more per ton than it was last summer. Furnaces cannot now produce iron at a profit if they have to pay present prices for stock.

Following are the latest quotations:

PRESSURE TO SELL LESSENED.

The Easter Feeling to the Money Market an

Important Factor. ISPECIAL TELEGRAM TO THE DISPATCH. PHILADELPHIA, April 6.-A factor of great importance in the iron market is the easier feeling in the money market. Some of the smaller iron manufacturers were obliged to make forced sales of iron during the latter part of the first quarter because banks refused to neutral position, or are in a waiting mood with renew loans. On the first of this months the apparent advantage on the side of the enormous disbursements for interest and holders, whose confidence is seen in their redividends were made, creating an fusal to make concessions. Occasional frac-easier tendency in the money market. so stiff. Consequently holders of fron are more independent in their views, and the pressure to sell is lessened. Furnaces generally are in full blast. Ten furnaces of the Thomas Iron Company are in blast, and one is idle for repairs. Southern furnacemen who threatened to design the strength of the st pany are in blast, and one is idle for repairs. Southern furnacemen who threatened to demoralize the market have found their products in such good demand, chiefly in the West, that they have advanced prices from 50 to 75c per ton. The industry in the South is making another strike which will tend to prevent extensive shipments of pig iron from the South into the Eastern markets by affording the Southern furnacemen a home market. Rolling mills which will consume the product of the furnaces and small factories which, in turn, will utilize the output of the mills, are springing up in the South. A plate rolling mill to cost \$100,000, and with a capacity of 20 tons per day is projected for Roanoke, Va. Creditors of the insolvent Robbins Iron Works, whose mills in this city were sold some time ago, have account of the contraction of the contra this city were sold some time ago, have accepted and been paid 25 cents on the dollar as settlement in full for their claims. There is more activity noted in the general market, and new orders are being placed on about the same basis that business was ac-cepted before January 1. While some compa-

cepted before January 1. at tide water shipping points, others are accepting business at \$1 under these figures. Bessemer iron rules quiet at \$20@20 50 per ton at the furnace, holders not being auxious to seil. Steel rails are in good demand in the West, the prospective advance in freight rates to take effect May 1 stimulating inquiries from a distance. The price is firm at \$34 50 at the works. Billets are held at \$31 per ton delivered. Blooms are worth \$52@53 for hot blast charcoal, \$54@55 for cold blast, delivered, and \$44@55 for run out authracite. Activity is expected in bar iron at 1.9@1.95c per pound. Muck bars are weak and lower at \$29@23 50 per too at the mill. Skelp is moving in small lots at 1.55@1.90c delivered for grooved, 26@2.15c for sheared. Plates are in moderate request at the following prices for iron and sited respectively: Tank, 2.76@2.25c and 2.50@2.50c; bridge plates, 2.55@2.30c; shell, 2.40@2.50c and 2.80@3.0c; fine box, 3.75c and 3.75@4.25c.

THE RAPID DECLINE

Has Some Features Which Promise Good Things for the Future.

PECIAL TELEGRAM TO THE DISPATCH.1 CINCINNATI, April 4.-Rogers, Brown & Co. say: The rapidity with which prices of Southern iron have gone down to hard pan has never are many who think this is better for the trade through many months. The situation differs materially from what it was in previous years materially from what it was in previous years when equally low figures have ruled. Consumption is now very much heavier and foreign importations have stopped. General business is promising, the railroads are prosperous, iron is finding its way into many new uses, and there is no prospect of foreign iron coming this way in any quantity for a long time to come. The low prices will slowly curtail production by blowing out furnaces, and will delay or kill off most of the new furnace projects.

favorable to an early reaction. A good many large buyers are taking this view of it and are now testing the market. Inquiries in the ag-gregate are heavier than any time since Nogregate are heavier than any time since November last. There is some hesitation by
consumers in closing up large coaltracts, but
large orders are nevertheless being placed. The
very minute the trade is convinced that the
bottom has been reached there will be the
largest buying movement that has yet
been witnessed. It is remembered,
however, that the fortunate buyers
who get in at the very bottom
are about as rare as the wise sellers, who sell at
the top. The rank and file of western buyers
generally adhere to the theory of further decline until they see an advance in the market.
The exceptional pri: v of a week or two ago are now general, Southern No. 2 selling at \$15, No. 3 loundry at \$14 50 and gray forge at \$14, at Cincinnatiand in some large deals these figures are shaded slightly. There is but little change in charcoal irons and softeners. There cannot be much without causing many furnaces to

FIGURES TOO CLOSE.

Lots of Business at St. Louis, With Any Amount of Inquiries.

SPECIAL TELEGRAM TO THE DISPATCH. St. Louis, April 4.-Rogers, Brown & Meacham say: Business during the week has been more active, and a fair amount of sales have been effected at close figures. Some inquiries for round lots were met by very low a circuit of other theaters that bear his prices on certain grades, but they also slicited the fact that there is but little accumulation of stocks in the South and no disposition to sell far ahead on basis of present values. Several Southern furnaces advise that for the present they are out of the market. Ohio softeners are firm, while in charcoal irons the week's operations have been too limited to reveal any change. We quote for cash, f. o, b.

Connellsville foundry coke: East St. Louis

CHICAGO, April 4.—Rogers, Brown & Co. ground for all the iron districts in the country

at a time of low prices. The present situation seems to justify the theory. The quantity of iron offered is not large, but certain prices that have been juoted on Southern irons are only have been juoted on Southern irons are only explained on the theory of necessity to realize. Southern No. 2 foundry has been offered at \$16 in large deals and other grades in proportion. Such figures have tempted large buyers to anticipate the time of their regular buying, and heavy inquiries are now out for iron. Some leading sellers are nirmer than they were, and do not care to compete for the lowest priced business. Lake Superior charcoal iron is obtainable at \$21 50 cash, Chicago. The best Ohio softeners are firmly held, but silvery irons are off \$16 per ton compared with January prices.

THEY FOUND A SITE.

Eastern Capitalists to Erect an Ice Plant is Allegheny City-A Hundred Thousand Involved-Rent Estate Get-

ting Second Wind. Various rumors have been in circulation the past few days in regard to the erection of a large artificial ice plant in Allegheny City. The first definite information bearing on this enterprise was obtained yesterday. The promotors are Eastern men, A short time ago they placed an order with Samuel W. Black & Co. for a site for the plant, A member of that firm stated yesterday that they had sold a lot to the Eastern men for \$20,000. It is located on the corner of South avenue and Sturgeon street, and has a frontage of 100 feet by 200. The company will at once proceed with the erection of suitable buildings, and expect to be in operation in time to assist in mitigating the anticipated ice famine. The completed plant will cost very nearly or quite \$100,000.

Talk among the stock brokers yesterday was rather bullish. They held that money being plentiful, and no apprehensions of a squeeze, business must necessarily improve, and this will insure better prices. The disposition to speculate is as pronounced as ever, but more caution is observed on the part of investors— particularly those in Pittsburg. They want to know all about a property before taking hold of it. Pittsburg securities have been subjected to this severe test, and no flaw found in

There were a few office sales of one or two of the favorites, in some cases at slightly higher figures than those ruling on 'Change, Philadelphia Gas was in most request, and there was quite a still hunt for it to fill orders. This stock has been admirably managed-always put on the market at the right time and in the right quantity to afford it reasonable support, and its fluctuations, though narrow, have been frequent enough to make it an object to spec-ulators. A stock that never varies may be good enough, but there is no money in it for the broker.

Pleasant Valley and Pittsburg, Allegheny and Manchester Railways being in a state of transition as regards consolidation and motive power of the latter, do not show at their best, although both of them are among the strong features of the market. No one doubts that when their affairs are adjusted, and all friction removed, they will show big earnings and is more plentiful and rates are not Consequently holders of iron are more affect the market standing of the stock.

The tractions are under a cloud from which it seems very difficult to rescue them. Still the stock is well supported and manages to hold its own. Earnings are large, but expenses are beavy, leaving very little, or nothing for dividends. The principal trouble seems to be fear of excessive competition, which will force improvement should be expected until this doubt is settled. The population of the city is increasing so rapidly that there will soon be business enough for all.

April changes having been about completed, and the prospect for a continuance of good weather being favorable, increased activity in the real estate market is among the probabilities of the near future. All signs are pointing that way. It should not be inferred from this that the market has been dull or sluggish, for the reverse of this is the fact. The activity in this great local interest during the winter was remarkable, and the number and importance of sis for No. 2 and \$18 for gray forge, delivered at tide water shapping points officers are accepting business at \$1 under those figures. city. But a large amount of business was deferred on account of bad roads and other causes, and this will now be taken up and car-

Several new districts will be opened up this starch, 42/27c.

FOREIGN FRUITS—Layer raisins, \$2 65; London layers, spring, and a large number of cheap lots put on the market. This will induce the working people to invest and build. From data at hand, a prominent builder estimates that at least 5,000 houses will be put up between now and next December. This will be a handsome gain over

Money kings, so called, are the most envied of men. It is the popular belief that they ac-quired their wealth by accident or "luck," and pass their time like butterflies, going from pleasure to pleasure as one palls and another attracts. So far as Pittsburg money kings are concerned this estimate is as far from the truth as possible. One of them while getting a check cashed at a Fourth avenue bank the other day remarked: "I have all the money I need, and about as much as I want, but I earned it all. When I started out for myself I had nothing but my brains and muscle to depend on. I had hard sledding at first. I lived in two rooms and ate the coarsest food. Sometimes it was as much as I could do to make both ends meet. than it would have been had the decline lasted I have passed many a sleepless night studying how to get money to pay rent and satisfy the grocer. But I stuck to it, and finally worked

"But even now I am not free from anxiety. Investments are liable to go wrong. A cyclone or a conflagration might ruin me. Besides, I feel that a great responsibility is resting on me as to the disposition I am making and will make of my money. I want to do good with it, but don't know just how to go about it. Money is a good thing to have, but it seldom brings happiness with it. My experience leads me to conclude that a man in comfortable circumstances, with enough to live on and something

to spare, is the only real king in this world." It's an ill wind that blows nobody good. The open winter, the lack of snow and the short log crop in Pennsylvania and the northwest have increased the demand for Southern lumber to a point never before attained. Mr. George Thomas, of Raleigh, N. C., who is largely interested in the lumber business in that State. was in Pittsburg yesterday. He said the threatened scarcity of the Northern product had already resulted in the placing of a large number of orders for Southern pine and poplar from Northern markets never before open

to the South. He thought this trade would be permanent, as the quality of Southern lumber was such competition with any other. A large quantity of it will be used by Pittsburg builders thi

A THEATRICAL PARTNERSHIP. Manager Harris Takes a Couple of Gentle

men Into the Firm. BALTIMORE, April 4 .- Mr. P. Harris, the proprietor of the Academy of Music, and name, has taken Mr. Richard L. Britton and Mr. Tunis F. Dean into his business, and formed a co-partnership for the management of his theatrical enterprises at Baltimore, Washington, Pittsburg, Cincinnati, Louisville, Minneapolis and St. Paul, which will be hereafter known as the firm of Har-

s, Britton & Dean.

An American Merchant Navy. Boston, April 4 .- It is reported on good authority that a syndicate is being organized ere for the purpose of building 20 iron teamships to engage in a general coastwise

tonnage bill is passed by Congress.

He Took a Partner.

W. E. Hamnett, the enterprising real estate agent of 494 Smithfield street, and Wilkinsburg, has associated with him in business Mr. M. W. Meredith, of Tarentum, and the firm will hereaster do business as Hamnett & Meredith, 102 Fourth avenue.

They have special facilities for havenue. They have special facilities for handling real estate in the East End. All persons having business in their line will find it to their interest to consult the new firm. WTHS

THE MYSTERIES OF MASONRY. Curlous Case Reported in a History of

The mysteries of Masonry have always been carefully guarded. Cassell's "History of the United States" contains the following: In 1826, William Morgan, living at Batavia, Genessee county, N. Y., conceived a dislike for the Masonic organization, and knowing something about the organization, announced his intention of publishing book which should disclose what he called the secrets of Freemasonry. On Monday, September 11, this man was taken from his home, under pretense of a criminal process, gagged, bound, and forced into a carriage, which was rapidly driven off. In this way he was conveyed a hundred miles without interruption, and, as relays of horses were prepared along the whole line of road, it was evident that his abduction was the result of an organized scheme.

the United States.

It came out in subsequent inquiries that Morgan was carried toward the Canadian frontier, where he was lodged within the walls of an unoccupied fort. What ultimately became of him has never been clearly known. It is supposed that he was taken in a boat at night to the Niagara, and there drowned. A body, thought to be that of lorgan, was subsequently found below Fort Niagara; but it was impossible to identify it, and, notwithstanding that the Legislature of New York passed an act ordering a strict investigation of the subject, and that Freemasons were charged with murder, a conviction could not be obtained.

OIL TANKS FOR PERU.

A Pittsburg Order Gained by the Pan-Ame

caus' Visit Here. The firm of Riter & Conley has secured an order from Peru in direct consequence of the recent visit of the Pan-Americans to Pittsburg. The work was done and the goods shipped to Peru yesterday, via New York City. There are in the order two 20,-000 barrel tanks, each 77 feet in diameter, two 10,000 barrel tanks and two 5,000 barrel

The tonnage was between 250 and 300 tons, and the fact that Peru has oil interests o such magnitude as to demand 70,000 barrels storage capacity is considered of great in

EVEN CHICORY ADULTERATED. The Stuff That Spoils Our Coffee is Two

Thirds Beet Root. Any person talking of food adulteration will mention chicory as being added to coffee, and, without knowing anything about chicory, denounce it as something cheap and nasty. But few people know chicory in itself has been much adulterated in Germany. An investigation led to the discovery that the larger bulk of the chicory oming from Germany is made from bee root, dried and burnt or roasted. The mixture generally contains one-third genu ine chicory to two-thirds beet root.

Wool Markets.

NOTICE-THERE HAS BEEN NO IN-TERRUPTION in our Chicago quota-TERRUPTION in our Chicago quota-REA BROS, & CO.,

Absolute Proof of Success

Is the fact that the hundreds of testimonial of cures made by the specialists of the Catarrh and Dyspepsia Institute at No. 323 Penn ave nue, and which have been published in this paper, have not only contained the residence but the full name AS SIGNED BY THE PA-

TIENT, thus proving their genuineness. To say that a physician can cure a disease is one thing, and to prove that he has cured it is another. If they have the means to cure the diseases of their specialty and thus prove this fact by referring you to hundreds whom they have cured in your own city and at your own door, what better evidence can they give? The physicians of this institution are specialists in the true sense of the term, as no patients are received for treatment except those suffering from catavrh, dyspepsia or diseases of women

MORE SHARPSBURG TESTIMONY The above is a portrait of Miss Mary F. Hartan, of Sharpsburg, and a sister of Mr. John Hartman, whose portrait and testimonial recently appeared in these columns. Miss Hart, man has also suffered from catarrh, and the symptoms were a dropping of mucus from her head into her throat, where it became very tenacious and hard to raise. She coughed, and often felt dizzy. Her stomach became very weak, so that she felt sick after eating, and would often vomit up her food. She was con

would often vomit up her food. She was continually tired and fully realized that she was gradually getting weaker. After taking a course of treatment from these specialists she says: "It gives me pleasure to state that I have been cured of catarrh.

Please bear in mind that THEY HAVE BUT ONE OFFICE, and which is PERMANENTLY LOCATED at 323 Penn avenue.

A Brief Resume of the Wonderful Work Accomplished by Drs. Copeland & Blair.

MR. CHRISTMAN'S STATEMENT.

During the past year readers of THE DIS-PATCH have doubtless noticed the statements of different persons who have been cured of their catarrhal troubles by Drs. Copeland & Blar. A new one appears each week, and the interviews are given as stated by the patients themselves, accompa nied by a cut of the party and his or her address, so that they can be readily verified. So marked has been their success that other parties have unsuccessfully attempted to imitate, not only their method of practice, but also their mode of advertising.

No higher compliment could be paid Drs. No higher compliment could be paid Drs. Coneland & Blair than this miniature mimicry. That the public has long since ascertained that they are the people to successfully treat catarrh and all its numerous complications, can be easily proven by a visit to their handsome offices, 66 sixth avenue, where during office hours the reception rooms are always full of persons waiting to consult Dr. Copeland, who is personally in charge of his extensive practice.

MR. CHRISTMAN'S STATEMENT. The individual statement to which the atten-tion of the public is called this week, is that of Mr. Louis Christman. His home is in Steubenville, O., but he is at present residing in the section of this city known as Lawrenceville, on the corner of Thirty-sixth and Charlotte streets. To the writer Mr. Christman said:

Mr. Louis Christman, Thirty-sixth st., Lau

"My trouble dates back to last October, when I fell and broke two ribs. I never fully recovered from my fall, and during the illness attending it I contracted a catarrhal trouble in addition to my other injury. My head and nose stopped up. My eyes were weak and watery. There were roaring and buzzing noises in my ears. I had a dull, heavy pain in my forehead, could feel the mucus dropping back into my throat. I coughed and raised constantly. Sharp pains would shoot through my chest. Palpitation of the heart set in, followed by slow, irregular breathing, and a feeling of faintness. I would arise in the morning more tired than when I went to bed. I had no appetite. There was a nauseating sensation in my stomach after eating. I became weaker and weaker, until the slightest exertion tired me.

I tried various physicians and different remedies, but obtained no relief. After reading of the wonderful success of Drs. Copeland & Blair with similar cases, I called on them. Finding their charges lower even than patent medicines, I began treatment. I soon began to feel an improvement, and now all the symptoms have disappeared. I am satisfied that I am once more in perfect health."

Mr. Louis Christman can be seen at either of the above mentioned places, and this interview readily verified.

HOME TREATMENT.

Jacob Altmeyer, of Risher, opposite McKees. trouble dates back to last October, when

Jacob Altmeyer, of Risher, opposite McKeesport, Pa., states: "I commenced treatment for my catarrhal trouble with Drs. Copeland & Blair on June 29, 1889. I now feel like a differ-ent man and shall be pleased to state my case and recommend their treatment to anyone admend their treatment to anyone ad-

ressing me."
Mr. William Barnes, of Hickman, Pa., was Mr. William Barnes, of Hickman, Pa., was afflicted with catarrh, and had lost all sense of taste and smell. He was under the care of Drs. Copeland & Blair, and now states: "I am perfectly well, and owe my recovery to their treatment."

Mr. Harry Phillips, of Hulton, Pa., has this to ave of his successful treatment for catarrh. to say of his successful treatment for catarrh with Drs. Copeland & Blair: "I was in very bad shape, but now feel like a different being, and as well as I ever did in my life,"
