EVERY DAY SCIENCE

California Courts to the Rescue of

Street Car Passengers. COMPANIES MUST MAKE CHANGE.

A Cheap Fuel Made of Coal Dust Mixed With Pitch and Pressed.

SOUND PRODUCED BY RAYS OF LIGHT

I WRITTEN FOR THE DISPATCH 1

The demand for change on the part of passengers on street cars who happen to find themselves without the exact fare has often led to difficulties, and the broad principle has been laid down in one or two resultant law suits that the passenger is supposed to know what the fare is and to be prepared with it, and that there is no actual obligation upon the street car company to furnish any change at all, although by the accepted laws of business courtesy they always do to a reasonable extent when called upon.

But it appears that a different view of the question has been recently taken by a California court. A passenger, it seems, offered the conductor a \$5 gold piece, which was the smallest piece of money he had. The conductor would not change it and informed the passenger that unless he paid his fare of 5 cents he would have to leave the car. The passenger refusing to get off, the conductor stopped the car, called the driver to his assistance and put him out against his protest and struggles, in a much damaged condition. The passenger sued the company, and against their claim that every passenger was legally bound to tender the exact fare or forfeit his right to ride, obtained a judgment for \$500.

This decision was sustained by the Su-preme Court, which held that a passenger cannot be required to tender the exact sum, but only a reasonable amount, and that

but only a reasonable amount, and that "the carrier must accept such tender and furnish change." Five dollars in the opinion of the court was not an unreasonable amount for the passenger to offer.

The order recently passed by the Board of Aldermen in Boston limiting the speed of electric cars in the suburban districts to 12 miles an hour, and in the more crowded streets to 7 miles per hour, has given great disastisfaction in that city. It is argued that if the speeds mentioned were the average speeds including stons, there would be nothing to complain of. For the suburban districts 12 miles per hour is altogether too low a limit, and does not permit of rapid transit in any sense of the word. With an average of 10 or 12 stops per mile, the average speed cannot exceed 6 or 8 miles an hour—about the speed of an ordinary horse car.

Sound of Light.

A wonderful discovery has been attracting the attention of scientists. A beam of sunlight is made to pass through a prism, so as to produce the solar spectrum or rainbow. A disk having slits or openings cut in it is made to revolve, and the colored light of the rainbow is made to break through it and fall on silk, wool or other material contained in a glass vessel. As the colored lights fall upon it sounds will be given by the different parts of the spectrum, and there will be silence in other parts. If the vessel contains red worsted, and the green light flushes upon it, loud sounds will be given. Only feeble sounds will be heard when the red and blue parts of the rainbow fall upon the vessel, and other colors make no sound at all. Green silk gives sound best in red light. Every kind of material gives more or less sound in different colors and utters no sound in others. The discovery is a strange one, and some remarkable results are expected from it. is made to break through it and fall on silk,

Compressing Con! Dust.

One-seventh of the coal mined is lost from being broken up too finely to be burned with profit. A prominent railroad company is now mixing the dust with pitch, and compressing it into blocks that burn like hard coal, with the into blocks that burn like hard coal, with the advantage that they are entirely consumed to ashes and leave no clinkers. Two presses are employed which turn out many tons of brickets every 24 hours. As the brickets take up 25 per cent less space than ordinary coal, an engine can be loaded to go one-fourth farther with them. The Reading railway is to use this fuel exclusively, and it is claimed that a saving of \$35,000 to \$40,000 per year will be effected.

Asphalt-Coated Giasa Water Pipes.

A new form of pipe for water service has en put upon the market by a Dresden firm. The pipes are made of glass, about 0.2 inch purpose of the aspiralt coating is to prevent the fracture of the pipes. They are designed to supplant wooden earthenware or cement gipes, and also lead and iron service pipes, the advantages claimed for them being thorough resistance to the moisture in the ground and to the action of active and alkalies. It is claimed also action of acids and alkalies. It is claimed also that they are impervious to gases and not liable to the formation of incrustations.

Improvement in Traction.

A novel contrivance which is claimed to give improved tractive power is reported from Chicago. The machine, which is about 50 feet long and nearly 15 tons in weight runs on a track which it lays for itself, and which con-sists of a belt of steel plates or laths four and a half feet long, inclosing four large cog wheels, which play into the sockets of the plates and urge the machine forward. It is available for agricultural and other purposes, and its in-ventor declares that with it be can plough 100 acres per day in ground too soft for a horse to walk, and at a nominal cost. In addition to this it can be used in threshing, railroad construction and many other purposes

A Miller's Cure for Rats. Let the miller take a large barrel and fill it cover the same with a thick layer of maize meal at this place, will be commenced on Monor some other equally toothsome cereal. On the first morning he will find the bait three parts consumed, which will be a sign that confidence has been established. Let him continue to furnish the "free lunch" for a few nights, and then suddenly take out the chaff and replace it by water, on the top of which the bait will form a seductive but fatal Roating island. The rats will return "once again but never more." will return "once again but never more."

sta d 600 or 800 pounds in projecting dynamite and other shells. In France they are making whetstones of gelatine plus its own weight of water, plus 1½ per cent of bichromate of potash dissolved in a little water, plus nine times the weight of the

gelatine of fine emery. GLASS tubes are now cut by electricity. The tube is surrounded by fine wires. When the current is passed through the wire the latter

the glass at that point. River, Mass., which is 340 feet in height, will fac-simile of the signature: be far surpassed by one now under construc-tion at the Imperial Foundry of Halsbrucke, near Freiburg in Saxony, which is intended to carry the noxious gases from the furnaces to carry the hoxlous gases from the furnaces to such a height as to prevent any inconvenience to the surrounding country. It will be 453 feet high, with an interior diameter of 15% feet, The chimney is built entirely of brick, and will cost about \$50,000, and the conducting flues and other work as much more.

Nothing Like It Seen Before. Yesterday was indeed a phenomenal day for trade in the great Gusky's establish-ment, but it was particularly so in the hat department, where really they seemed to be turnishing Easter headgear to half the city. Among the leaders in the men's stiff hats was a very stylish shape, with silk band and binding, at 89c., which seemed to be an ir resistible temptation and went by the hundreds. The demand for boys' and children's fancy hats and caps left little question where the popular styles and best values were found. The new style jockey caps, from 34c up, the fascinating "Newport" and the square crown jockey each met with a remarkately active demand, while the "Mable," a lovely style of cap, from 69c to 84c, seemed to please everyone. These four designs are the latest out. Those who were not for-tunate enough to be present yesterday should certainly avail themselves to-morrow of

these extraordinary values. AT 25c a yard genuine French sateens, Koechlin's make; beautiful new-designs and colorings; real value 35c a yard. HUGUS & HACKE.

COMPULSORY EDUCATION.

investigations of Professor Bane in Regard to Proposed Legislation. Prof. Bane, of the St, Clair School, who is preparing a bill for compulsory education for the next State Legislature, has been interviewing the members of the Central Board as to the need of such a bill. They unanimously are of the opinion that a compulsory educa-tion law is necessary. Mr. Bane's idea is to have the law operate in towns and cities of have the law operate in towns and cities of over 800 inhabitants. In his bill private and parochial schools are recognized. He has been corresponding with educators in the States that have compulsory education laws, inquiring as to the result of such.

The members of the Society for the Improvement of Poor Children throughout the States as they are in sympathy with such a movement. Likely the Jr. O. U. A. M. will also be asked to give their assistance for the passage of the bill, which Mr. Bane will have completed in about two months.

pleted in about two months. Gossip of the Schools. MISS MONTGOMERY has been elected to a position in the Mt. Washington school. THE many friends of Miss Emma Hulme, of

the Soho School, condole with her in the loss of her father, who died last Wednesday. MISS JULIA MYERS, a well-known teacher of MISS JULIA MYEES, a well-known teacher of the Liberty School, and Mr. Will S. Power, of MCALLISTER & SHEIBLER, 5th av. & Atwood st. the writing staff of the Press, will be married at an early date.

at an early date.

THE lower portion of the city is so rapidly being filled up with business houses and other encroachments of industry that very soon there will be no population to attend the down-town

THE third class of the Public Cooking School for the year will be graduated April 19. Secretary Reisfar, of the Central Board of Education, donates the prize to the maiden who has the best loaf of bread. THE successful aspirant far the vacant cadet-ship at West Point will not be known till some-

time next week. Superintendent Luckey has yet to examine two or three applicants who could not complete the examination owing to to the school principals'acquainting them with the work for the school exhibit at the Exposi-

tion next fall. The matter will be prepared by the schools during the month of May, not June as was expected, which is the one always taken up by final examinations. THE race for the position of assistant drawing teacher at the High School promises to be warm one. There are five who desire the posi-tion-Miss Jennie Bostwick, of the Park School;

Miss Rayburn, a teacher in the O'Hara School; Mr. Boyce, of Boston; Mr. Wassel, a graduate of West Point, and Miss Emmons, of the Four-teenth ward. The Central Board will fill the wacancy on Tuesday night. FATHER SHEEDY'S parochial school opens to-morrow. The directors of the Duquesne School decided not to elect a successor to Prof. Sullivan till they see if they have any need of a

principal. Last month the average attendance at this school was 119. Now it is expected that the most of this number will attend the parochial school, and there will be no need of a public school in the First ward. On last Thursday evening, the school chil-ON last Thursday evening, the school chil-dren, over 400 in number, of the Milivale Bor-ough Public schools, presented Mr. Christ Horrocks, one of the School Directors, on his retiring from the board, their autographs in a book bound in blue silk cloth embossed, and with the words in gold: "From the Pupils of the Milivale Borough Public Schools," The board adopted suitable resolutions.

A FEW changes have occurred in the placin of the Forbes teachers. Miss Maria Moffat who had charge of room 12, has been elected floating teacher, instead of Miss Jean Meyers,

who has been assigned to room 2. Miss Mc-Cutcheon succeeds Miss Erwin, who will be married on Tuesday to Prof. Pritchard, and will take charge of room 3. The others, up to room 12, have been promoted in regular order. The changes contemplated at the High School will improve the building very ma-terially. The first floor occupied by the janitor's family will be reconstructed so as to make two large school rooms, a dynamo room, boiler room and several wardrobe rooms, and the library will be transferred from the second floor to the first. The large stone entrance will be removed to give way to an entrance on the first floor.

WHILE the Judges of the License Court were wrestling with their list Friday night, the Committee on Text Books of the Central Board adopted the primary book on physiology, which treats of the effects of alcohol and narcotics on the human system more fully than the one now in use. Both books, however, are to be used. The adoption of this book is but a partial victory for the W. C. T. U. ladies who wanted both the primary and the intermediate books intro-duced. The W. C. T. U. ladies must have been after the committee, for they passed a resolu-tion requesting the City Superintendent to see that the teaching of physiology be carried out in accordance with the requirements of the law. MISS CARRIE PAISLEY, of Liberty School, Twentieth ward, a daughter of Mr. Samuel T. thick, and have an asplialt coating about 0.4 Paisley, formerly superintendent of the fire inch thick, with fine gravel on the outside. The partment, received the highest number of votes in the Times voting contest for the most popu-lar school teacher in Pittsburg, Miss Josephine Welch, of West Elizabeth, received the high-Weich, of West Elizabeth, received the high-est vote for the most popular teacher outside of Pittsburg and Allegheny in Western Penn-sylvania and Eastern Ohio, Misa Sadio Mc-Elroy, of the Perrysville avenue school, Second ward, Allegheny, received the highest vote for the most popular teacher in Allegheny City, Misa Paisley receives a round-trip ticket to Errore and Sillo in gold as the money disc Europe and \$100 in gold as pin money. Also Welch also gets a trip to Europe. Miss Mc Elroy's prize is a gold watch.

A GOOD GAS FIELD. West Newton Territory Proves to be

Productive of Natural Fuel. MPECIAL TELEGRAN TO THE DISPATCH WEST NEWTON, PA., April 5.-The West Newton Oil and Gas Company, composed of McKeesport and West Newton stockholders, has secured sufficient capital to put down three wells, with a view of developing the West Newton territory. The Let the miller take a large barrel and fill it drilling of the first well, which will be three parts, or rather more, full of chaff, and located in the great cut on the Steimer larm,

The National Transportation Company, of McKeesport, has six of the best flowing wells in the Pennsylvania gas district, all of them being located at Grapeville. The company has stopped drilling at this place, as four of the wells furnish all the gas needed. The Versailles Gas Company has three wells, and it will quit drilling there also in two weeks, when the fourth well of this com-pany will be brought in. The wells are all FRENCH engineers are promising success in pany will be brought in. The wells are all using seeam direct from boilers constructed to fine producers, and the pressure seems to increase right along.

A REMARKABLE SIGNATURE.

It is Attached to the Will of Nelson Chase, Which is in Contest.

The will of Nelson Chase is to be con tested by the widow in the courts of New Jersey. Mr. Chase died March 18 at Ridgecomes red hot, heating the glass beneath it, da single drop of water deposited on the sated plate will cause a clean breakage of signed it during his last illness, and the signature is an undecipherable scrawl, but THE great chimney recently built at Fall | this is not the ground of contest. Here is a

NEW ADVERTISEMENTS.

CHOICE PROPERTIES -FOR SALE BY-

Charles Somers & Co.

\$3:9—is the total taxation on a property yielding \$2,004 per annum in rentals. \$20,000 will buy this property. It consists of ten (10) two-story brick houses, on lots almost 100 feet deep, on which an equal number of additional houses may be erected, from which the income may be proportionately increased. A small amount in cash and long time on deferred payments will be accepted. accepted.

(4) brick houses which we offer for 19,500. The buildings are new, in prime order, and well lecated near the business center of the city; a property that will quickly pay for itself and steadily appreciate in value.

pay for itself and steadily appreciate in value.

A glance into the very near future reveals to us the consolidated cities of Pittsburg and Allegheny, out in twain by a broad avenue extending from the Northside Parks over a stone aqueduct eastward, skirting the world-famous Schenley Park and on to the cities' extremity, now known as Braddock. Right on the line of this future great avenue we can offer, on the basis of values of to-day and without regard to future possibilities, a graceful four-story business house, substantial enough to endure for generations, and possessing features of beauty that will retain to it a place among the architecturally perfect buildings. It covers a large corner lot, earns 6 per cent on the amount required to purchase, can be made to yield an additional 2 per cent, and is certainly salable, when again offered, at an advance of 25 to 50 per cent over the price which will secure it now -50,000.

We can offer in Allecheny for

We can offer in Allegheny for We can offer in Allegheny for \$5,000

North avenue, elegant three-story brick of 12 rooms; all modern conveniences.

20,000.

Church avenue, handsome large house containing 13 rooms; finely finished throughout; all conveniences; beautiful grounds, lawn and shade, extending from street to street.

The question of price is a prime consideration with the buyer, and the cost, in conjunction with the possibilities of profit or loss, ordinarily determines his conclusions. But in choosing a home considerations not altogether mercenary have some sway, and a sentiment not always circumscribed by figures exerts an excusable influence. Overlooking Allepheny, Pittsburg and the two river valleys, we offer at the above price a modern house, situated in the state of traces of creek frees which whade a

Pittsburg and the two river valleys, we offer at the above price a modern house, situated in the midst of grand forest trees, which shade a beautiful lawn extending from street to street, a place in its conveniences and surroundings possessing every attraction and appreciating surely and rapidly enough in value to make it a choice investment as well as a desirable home.
