## SUGAR TO BE FREE.

Continued from First Page. duties without detriment to existing industries, and the committee has not felt justified in interfering with the further development of our iron one resources now so promising in the Southern States. With regard to pig iron it may be said that it is no sense a raw material. It is a product of the highest skill requiring for its manufacture large and expensive plants, the expiral invested in which in our country to day more than equals that which is invested in any other leanth of our iron and steel industries.

A GROWING INDUSTEY.

A GEOWING INDUSTRY. Pig iron is made in 25 States of the Union. Its manufacture is increasing rapidly in many

States, largely as the result of the protective

Its manufacture is increasing rapidly in many States, largely as the result of the protective duty which has long given encouragement to its production. It has had a marvelously rapid growth in the Southern and Western States in the last ten years, and it is to-day the leading manufacturing industry south of the Potomac and Ohio rivers. It has been the most potent of all influences in the industrial rehabilitation of the So th.

Of sugar the report says: "The committee recommend that sugar up to and including No. 16, Dutch standard of color, and molasses, be placed on the free list, with a duty of four-tenths of I cent per pound on refined sugar above No. 16, and that a bounty of 2 cents per pound be paid from the Treasury for a period of 16 years for all sugar polarizing at least So per cent made in this country from came, beets or sorghum produced in the United States. In 1888 the consumption of sugar in the United States, and 1,280,183 tons, or seven-cighths of our consumption, were imported. So large a proportion of our sugar is imported that the home production of sugar does not materially affect the price, and the duty is therefore a tax which is added to the price not only of the imported, but of the domestic product, which is not true of duties imposed on articles produced or made here substantially to the extent of our wants.

SOME SUGAR STATISTICS. In 1889 the duties collected on imported sugar

and molasses amounted to \$55,975,610. Add to this the increase of price of domestic sugar arising from the duty, and it is clear that the duty on sugar and molasses made the cost of sugar and molasses consumed by the people of sugar and molasses consumed by the people of this country at least \$64,000,000, or about \$1 for each man, woman and child in the United States, more than it would have been if no such duties had been levind, and the domestic product had remained the same. Even on the such duties had been levied, and the domestic product had remained the same. Even on the assumption that with proper encouragement we shall eventually be able to produce all or nearly all the sugar required for the consequation of our people—an assumption which your committee believe to be sustained by many facts, notwithstanding the slow progress thus far made in sugar culture in this country—this encouragement can be given much more economically and effectually by a bounty of 2 cents per pound, involving the expenditure of but a little more than \$7,000,000 per annum with the present production of sugar in this country than by the imposition of a duty involving the collection of \$55,975,630 in duties in the last fiscal year, not to mention the amount indirectly involved.

When it is considered that this increase in cost due to the duty falls on an article of prime necessity as lood, your committee are persuaded that justice as well as good policy requires that such an unnecessary burden in the way of a direct tax should be removed from sugar, and that the encouragement required to induce the production of sugar in the United States should be given through a bounty rather than by an import duty.

In providing that not only raw sugar, but also sugar up to and including No. 16, shall be admitted free of duty, an opportunity is given for the free introduction of yellow sugars saited for family use—an arrangement which will secure to our people sugar at the lowest price existing in the markets of the world, while even imported white refined sugar will be subject to a duty of only four-tenths of one cent per pound.

A BOUNTY ON SILES, TOO. With a view to increasing the number of gain pations open to the farmer, the committee has recommended a bounty to the growers of silk. Reference is made in the report to ets of silk. Reference is made in the report to the Beartinghot of Agriculture, which, it is said, fully warrant the beli it that the industry is entirely practicable in many of the States. As a duty of \$1 a pound would be required to protect the American silk recler, the committee has decided that so high a duty would embarrass the silk weaving interests without sufficient reason, and, to secure the industry as speedily as joessible, offers the necessary differential of a homety of \$1 per pound, or about 20 per cent protection on recled silk.

The minority report is signed by all the Democratic members of the committee. It says: "The minority restends for the principle of just and equal taxation about all according to their ability to bear the burden, while the majority bas, in this bill, thoroughly committed

jerity has, in this bill, thoroughly committed itself to the policy of onjas; and unequal taxation of the many for the benefit of the few. We are as auxious as the majority can possibly be to promote and encourage. American industries and advance the interests of American laborers, and those who lampute to us any other purpose or design either misunderstand or misrepresent our position. But we believe that both these objects can be accomplished by reducing the burdens of taxation and not by increasing them, and that the benefits thus secured will be far afore permanent and far more satisfactory to those directly concerned than any supposed advantage that can result from a different policy.

CERTICISING THE MAJORITY. "The majority, after mouths of nationt and laborious investigation, has been able to satisfy a part only of the demands made upon it. The only remedy is to remove, as far as possible, artificial burdens and restrictions and give to all our industries an equal chance in the field of competition at home and abroad. According competition at home and abroad. According to the statements made before the committee the protected industries of the country have hever been, at any time in our instery, in such a depressed and discouraging condition as they are now. After hearly 30 years of continuous protection, by government taxation for their support, a great many of them are reported to be on the very verge of bankruptey and rain, while very few of them, according to the testimony, are yielding a fair profit upon the capital invested.

mon, are victuring a fair proint upon the capital invested.

"A great many of the parties engaged in the source of our investigation, that the slightest reduction in the rates of duty now imposed mon competing foreign products would compet them to close their works and discharge their employes, and others have even g me so far as to assert that they will be forced to go out of business if the rates of taxation are not increased. At the same time the laborers in those incustries are complaining of insufficient wages, repeated suspensions of work and a reneral condition of uncertainty and insecurity in their relations to those who give them employment.

ONE OF THE POINTS MADE.

ONE OF THE POINTS MADE. These laborers, fully realizing the facts that this system has wholly failed to increase their earnings or improve their condition in any way. earnings or improve their condition in any way, have been compelled to organize trades unions and resort to other methods of combination and co-operation for self-protection, and these various organizations new afford the only efficient means at their command for the preservation even of the existing rates of wages. When capital and labor unite in declaring that our protected industries are not prosperous under that system, although it was designed and has been maintained for their special benefit, the conclusion is inevitable that there is a vice in it somewhere that ought to be removed, for there is no reason to doubt that in a country for there is no reason to doubt that in a country like this every productive industry would be reasonably prosperous if a wise and just rev enue and financial policy prevails.

"The majority bill is framed upon the assump

"The majority bill is framed upon the assumption that as our industries grow older they grow weaker and more dependent upon the bounty of the Government. It devolves upon those advocates now to explain, if they can, why it is that after a low tariff policy has been abandoned for more than a quarter of a century and a high tariff policy substituted, the manufacturing and mechanical industries of the country are less able to maintain hemselves than they were when the change was made; and when this is done, it still will remain for them to show upon what principle of justice or sound public policy consumers can be periodically subjected to additional taxation, not for the benefit of the Government, which does not want the revenue, but for the exclusive benefit of private business enterprises which are not able to sustain themselves."

WOOL, SILK AND TOBACCO.

WOOL, SILK AND TOBACCO.

The silk bounty is severely criticised in the report. Continuing, the report says: "The bill will increase the taxes on wool and woolens \$15,500,-600 per annum, according to last year's impor tations, but really to a much greater sum, while taxes on tohacco to the amount of \$8.800,000 are abolished. The mmority cannot agree to do this at the price of an increase on necessaries. The only substantial reason urged for the repeal of the tobacco tax is the re- of from Government and control of the tobacco tax is the reernmental supervision, but a mere reduction of the tax from 8 cents to 4 cents does not dis-pense with this supervision or reduce the cost of collection.

"For the further purpose of inducing the far-mers of the country to believe that they can and will derive some benefit from the protective policy, this bill imposes various rates of duty upon certain important agricultural products, which it is well known could not be imported to any material extent with or without duty."

The report criticises the sugar bomnly and protests against the gross favoritism and lujus-tice of such a policy. It says that the bounty on last year's production would have been \$7. on last year's production would have been \$7.520,000, but as it is expected to encourage the producers to supply the entire domestic demand, the ultimate results, even if the consumption remained at last year's figures—2,700.

[Soft H. Wiper.\*]

421,802 pounds—would be an annual payment of \$61,528,426 in bountie. AN EARNEST PROTEST.

In conclusion the report says: "While we would gradly co-operate with the majority in the passage of any measure which would re-lieve the people from unnecessary taxation, promote the prosperity of our various industries and secure ample wages and steady employment to the laborers engaged in them, we feel constrained to make an earnest protest against this bill, because, in our opinion, it will not accomplish any of these desirable results."

Mr. McKenna, of California, dissents from the sugar schedule of the Republican bill. The bill in its sugar schedule, he says, makes an arbitrary and invidious distinction between the sugar industry and other industries—a distinction inconsistent with the principle upon which the bill is framed, and upon which it can alone be justified. Protection, as understood politically, is the clear right of all industries or of none. A tariff may be a tax, a bounty certainly is. comote the prosperity of our various indus-

A tariff tax lessens with the production it encourages while a bounty increases with the production. A bounty abandons the home market to the foreign product; a tariff secures the home market to the home product. A bounty, therefore, is as useless as it is burdensome, and as colins as it is useless. It has no justification in either the practice, the principles, or the professions of the Republican party. If a bounty is useful for sugar, why not or other things? In all the range of articles with which the bill deals are none fit for a bounty but sugar.

HE WILL STICK IT OUT,

Dr. Benle is Defeated at Presbytery, but He Refuses to Leave. The First Presbyterian Church of Johnstown,

with its division, occupied the attention of the Blairsville Presbytery, now in session at Turtle Creek, yesterday morning.

After the meeting was called to order by

Moderator Moorhead, the majority and m pority reports of the committees appointed to look into the affairs of the Johnstown church were

into the affairs of the Johnstown church were heard. The minority report sustained Rev. Dr. Beale, the pastor of the church, and the majority sustained the John Fulton faction. Long discussions by both sides were then in order, the strongest speeches being made by the Rev. Drs. Ewing, Beale and Seanor.

Secretary Townsend read a petition signed by 160 members of Dr. Beale's church asking for his resignation, and if he refused to resign that the Pressiyetry dismiss him. Dr. Beale then arose and said he had a similar list and indulged in some personalities that were speedly objected to by the Moderator. Dr. Beale declared that many of the names on that list were put there by coercion. He stated that as there were 504 members in his church and galy less than 160 were against him, he would stay there against the wishes of the dissenters. He said it would be unmanly for him to give up.

The next meeting of the Bairsville Presbytery will be held at Beulah. Delegates for the General Assembly were balloted for and the result was: Dr. Townsend, with J. P. Kennedy alternate, and David Carruthers, with M. N. Clark alternate.

TO BANISH MOISTURE.

The Grand Division of the Sons of Temper nuce to Hold a Meeting in Pittsburg. Mr. Jonah Boughton, the agent of the Sons of Temperance, arrived in this city yesterday, and is making arrangements for the meeting of the Grand Division of the State, which will be held

in Curry University next Wednesday afternoon and night.

Delegates and Grand Division officers to the number of 40 will come from Philadelphia, among them General Louis Wagner, Colonel Beath, John Bardsley, the City Treasurer; Wm. McCoach, John Wear and John Massey. A reception will be given them by Golden Circle Division while here. and night.

LIES IN THE

SOLUTION OF THE PROBLEM

JUDICIOUS :: BUYING!

The desirability of saving money is pretty widely appreciated, but where and how to save may not be quite so well and widely understood. There is but one store in the city where LOWEST prices for RELIABLE goods rule, and this is, as the majority of people know, at

Where best figures are always found, and right now, for the present week, they are lower than ever before. It is not by favor, but merit alone, that we maintain our reputation and so actively increase our trade. We have the liveliest store in the town, a fact patent to everyone who visits us, and we demonstrate hourly, in our every department, that we undersell all self-

styled com-

You have an opportunity to secure such bargains in any part of our bouse as were never before submitted in this city. Whether in CLOTHING, HATS and CAPS, GENTS' FURNISHINGS or FOOTWEAR, you'll find the limits of the most slenderly lined pocketbook considered to a surprising degree. Our new and mag-

:: nificent display of ::

Is as fresh as roses with the dew still clinging to them, and never fail to elicit the astonishment and admiration of every beholder. Were we to charter this entire number of the DISPATCH, space would even then fail us to enumerate the countless and exceptional Bargains on offer in our

Excellent Suits or Overcoats \$10, or better ones \$12. Splendid Suits or Overcoats \$15, select ones \$18. Elegant Suits or Overcoats \$20, superb ones \$24.

Good Business Pants \$3, fine ones \$4. Handsome Dress Pants \$5, elegant ones \$7. Coat and Vest \$10 75, AND A BSOLUTELY THOUSANDS TO SELECT FROM.

Profitable Hints for Parents to Read:

n the purchase of Juvenile Apparel nothing is of greater importance than to secure the strongest workmanship, and this is precisely where our Clothing excels that of all other stores, while

our prices are invariably lower. During

:: this week we are offering ::

Children's Plaited Suits from 98c to \$10. Boys' Long-Pant Suits from \$2 50 to \$15. Stylish Kilt Suits \$1 50 to \$8. Elegant Jersey Suits \$2 50 to \$7.

Sailor Suits 49c to \$5. In these goods you will secure the best value you ever obtained, and

will find a choice without limit. Our Special Bargains in MEN'S, YOUTHS AND CHILDREN'S HATS AND

Have already excited the whole city, and the constant and steady drain upon them show that we have exactly met the tastes and pecuniary resources of all classes.

Is beyond description, and comprises everything for all ages and both sexes, after the very latest society styles.
