# LIVE STOCK REVIEW

Weekly Survey of the Situation at the East Liberty Yards.

CHOICE CATTLE HOLD THEIR OWN.

But Medium and Low Grade Stock Are a Shade Lower in Price.

SHEEP AND SWINE BARELY STEADY

OFFICE OF PITTSBURG DISPATCH | WEDNESDAY, April 23, 1890. The run of cattle at East Liberty for the week has been about 72 loads, against the same number last week. On Monday morning markets opened slow at last week's prices, and, although buyers were on hand, they were disposed to bear markets and few sales were made in the early part of the day. Along toward noon the force of buyers was increased by new arrivals from surrounding towns, and news came from Herr's Island that offerings there were all promptly taken at an advance. At noon Monday markets were strong at prices of a week for all good butcher stock. Common and low grade stock failed to respond to the upward movement, and for this class of cattle markets may be quoted 5 to 10c lower than last week. The outside price for beeves so far as could be traced was \$4.75. Primes would have brought better prices, but none were in the hands of commission men. Markets were stronger on Tuesday than Monday, and stock was well cleaned up. Last week a load of common cattle was held over and these with last week's supplies were well cleaned up to-day. There were very few stockers and feeders

on the market, not enough to meet the demand. A Greene county buyer managed to gather up a car load at \$3 50@3 65 but supply fell far below demand. The run of cows was light and high grade stock were conspicuously absent from the market. The run of calves was the largest of the season. There were not less

prices were alwanced \$67c, but the market developed a weak feeling, closing easy at inside figures.

The leading futures ranged as follows:

side price was \$6 10.

There were not more than 3 decks of hogs on the market this morning, but no eagerness was shown by buyers, notwithstanding light supply. The top price was \$4 50 per cwt. The pork season is practically over and demand from butchers is steadily on the wane.

# MARKETS BY WIRE

A Break in Wheat Followed by an Advance Due to Active Buying-Nervous Feeling in Pork, Which Closes Strong.

CHICAGO-Trading in wheat was active to day, but the feeling was somewhat unsettled. The market was irregular, and fluctuations were quite frequent within a comparatively moderate range of prices. All sorts of in fluences were brought to bear upon the market. The opening was weak and 14@34c lower than yesterday's close, but good buying turned the market and prices advanced 3/611/4c, ruled weak, and declined 1611/4c, finally closing 1/4c lower for May, %c lower for June and %c lower for July than the closing yesterday. The early weakness was attributed to rather

free offerings, and influenced some by the reported rains pretty much over Minnesota and Dakota. The advance which followed the break was attributed partly to active buying, prominent local trader purchasing freely.

There was a light business in corn, most of the trading being local, and fluctuations were limited to a 3 c range. The undertone was rather easier, though no decline of consequence was recorded. The market opened a shade lower than the closing price of yesterday, was easy for a time, then advanced %c, reacted %c, ruled steady, closing 1/6/4c lower than yesterday.

day.

Oats were active and stronger, and prices ranged higher, but outside figures were not maintained until the close. The most interest centered in May and June. Offerings were not large and the demand was brisk, especially from shorts, and prices advanced %@%c, June selling ½c over July. The appreciation brought out a liberal increase in offerings and prices

out a liberal increase in offerings and prices yielded a little.

A very nervous feeling prevailed in pork. Opening sales were made at 10@15c decline, but prices quickly rallied 30@35c, with rather light trading. Toward the close the feeling was easier and prices receded 10@12½c, but the market developed considerable strength at the extreme close and prices ralled higher.

developed considerable strength at the extreme close and prices ruled higher.

Trading in lard was fairly sctive, but prices ruled irregular and averaged lower. Prices receded 5@75c. At this reduction the inquiry was a little more active and prices rallied again 5@75c, but finally settled back again to inside figures and closed quiet.

Considerable interest was manifested in short ribs, but the feeling was unsettled. Offerings were free early, while the demand was fair, and prices declined 7%@10c. At the reduction there was some inquiry from local shorts and prices were advanced 5@7c, but the market developed a weak feeling, closing easy at inside figures.

A Tunnel Under Mt. Washington to Develop a Large Scope of

BEAUTIFUL VACANT TERRITORY. Suggestion of a Business Man for the Ben-

efit of Local Capitalists. NEW DISTRICTS COMING INTO MARKET

The rapid absorption of choice properties for residence purposes in the East End and other districts lying immediately around the city has necessarily resulted in enhancing values to such an extent as to put them beyoud the reach of a large number of people. The prosperity of the citizens of Pittsburg is undoubted, but there are those among them who cannot well afford a residence on Neglev or other fashionable avenues.

The direct effect of this is to divert attention and interest to other localities where land is more plentiful and values less elevated. Among the places which are being benefited by this movement may be mentioned Hazelwood and Glenwood up the river, Ingram, Crafton and Idlewild on the outhside, and several bustling towns, notably Emsworth, down the Fort Wayne Railroad. There is a great deal of unoccupied land in and around each of these places, some of which has been laid out in lots, but the greater part

of it remains in the original tracts; and prices are much lower than in other and more thickly settled localities.

These districts have been kept in the background by the difficulty of reaching them; but this objection will soon be removed, as all of them are included in some of the rapid transit schemes which have lately been set on foot. In a year or two they will be as accessible as the most favored parts of the East End or Northside. Then, of course, property will be rated

higher. The present is, therefore, the time for people of moderate means to buy. In speaking of the development of the South-side, a prominent business man remarked yesterday: "There is a great deal of splendid land over there that can be bought from \$100 an acre up. It will be the center of a large population some time. Of all the plans I have thought of to hasten its development the most feasible, it appears to me, is a tunnel under Mt. Washington, and the construction of an electric or cable road from Union station to Banksville or beond. This would at once open up a large and beautiful scope of country, and induce rapid settlement. There would be no great difficulty in carrying out this suggestion, and the benefits would far outweigh the cost. I think the idea is worthy of careful consideration by capitalists That it would pay I have not the least doubt."

## LOCAL SECURITIES.

Fractional Losses Counterbalanced by Important Gains-A Mixed Feeling.

Speculative trading in local securities was very light yesterday, and the feeling was coniderably mixed. The losses, however, were in the majority, but were for small fractions, while the gains were important. Sales were 57 hares—all at the first call, A month or so ago Bridgewater Gas went a-begging at 39, but yesterday everybody was hungry for it. It opened at 41% bid and closed at 43-a handsome gain. The condition of the

company is said to be excellent. Chartiers was weaker and Wheeling steady. Airbrake was another strong feature. It was old up to 114. This stock had been going very cheap for some time, and the advance noted was no more than a natural reaction, and was completely justified by the large and growing business of the corporation.

In regard to the tractions there was very little change in the situation. Central was a trifle higher, Citizens a shade lower and Pittsburg about held its own. Pleasant Valley advanced sharply, being bid up to 28, and closing strong at that figure.

Switch and Signal seemed to have no friends. The best bid for it was 18. It was the general remark that it was acraping bottom. Reports from the company warrant a better price for this stock.

Luster was a fraction stronger at the opening, but weakened off, and closed the same as on the previous day. The other mining shares were featureless. cheap for some time, and the advance notes

FEATURES AT THE BANKS. Heavy Checking and Depositing, With Liberal Volume of Discounts. Heavy checking and depositing were the features of the local money market yesterday, as they have been for some time past. Exchanges continue to show a large volume of business—the largest in the history of the city. They were \$2,984.445 14 and the balances \$540. 717 98. Money was in good supply and moderately active and steady at the regular rates— 6@7 per cent. Some of the banks were again complaining of a scarcity of small bills. Money on call at New York vesterday was easy, ranging from 25@3 per cent, last loan 3, closed offered at 3 per cent. Prime mercantille paper, 5@7. Attempt of the Bears to Depress Values Changes-A Good Close nt Top Figures.

NEW YORK, April 22.-The stock market was not so strong to-day nor so active, especially in the unlisted department, with a more feverish tone in the dealings during the early portion of the day. The bears attempted to carry yesterday afternoon's decline farther, and some slight depression was brought about in the first few minutes of business, but the resistance to the downward movement was so strong the pressure was soon removed, and the market rallied but became dull, though the same steady, slow hardening of values continued

until the close.

There were rumors in circulation of a prospect of an early settlement of the difficulties between Rock Island and Missouri Pacific, but not only could no foundation for such state-ment be found, but there is every reason to be-lieve the fight will be long and bitter, because the feeling in railroad circles is that Rock Island, which has prolonged the contest so long, will fight much longer. The other side certainly shows no disposition toward a com-promise. The sudden change from the early

certainly shows no disposition toward a compromise. The sudden change from the early depression to the strength of the remainder of the day was in a great measure owing to the quick advance in the Coalers, and Delaware and Hudson rose 3 per cent on the execution of small orders. Lackswamna was the feature of the day, though less than during the previous rise. The rest of the list was quiet and dull all the way out.

Sugar was traded in over a range of only 1 per cent. The impression that this stock has reached top for awhile gains ground, and a small, quiet business is to be expected for some days. Among the specialties Hocking Coal, Flint and Pere Marquette and Denver, Texas and Ft. Worth were prominent for strength, but only in the last was any material progress made. The activity in the last hour gave an upward tendency to prices, but the close was quiet and steady at or near the best prices of the day. The final changes show a majority of gains, but the only changes of importance are advances of illy in Lackawanna and 1 per cent in Denver, Texas and Ft. Worth.

There was the usual business in railroad bonds, but the fluctuations were smaller than during the past few days, while the firm tone was not so pronounced.

The following table shows the prices of active stocks on the New York Stock Exchange yesterday. Corrected daily for The Disparch by Whitnery & Strethenson, oldest Pitisburg members of New York Stock Exchange, 37 Fourth avenue:

Central Location in View by the Library Committee for a Southside Branch-The Crystal Glass Company's Property

Inspected and Commented Upon. Southside residents were considerably excited yesterday over a report that the Carnegie Library Site Committee was negotiating for the Crystal Glass Company property, bounded by Sixteenth, Seventeenth and Sarah streets. The report grew out of a number of mysterious movements of a party of gentlemen who visited the property Friday, and, after looking it all over, held a whispered and, after looking it all over, held a whispered conversation. They visited the same place Saturday, and the workmen say they talked about the Carnegie Library site and discussed the merits of the plot as a central location for the Southside branch library. They drove away as mysteriously as they came, and left those present none the wiser concerning the result of their deliberations.

their deliberations.

The property formerly belonged to the now defunet Crystal Glass Company. It was sold last March at auction to Messrs, C. E. Succop and John Siebert. It fronts 140 feet on Seventuenth street, 120 feet on Sixteenth street and 152 feet on Sarah street, Magistrate Succop said last night that he knew nothing about the visit of the committee except what the workvisit of the committee, except what the work-men had told him; he had not been ap-proached in regard to selling it for a library

site.

Workmen are now employed tearing down the old glass works. Messrs. Succept and Siebert intend building six houses on Sixteenth street, and selling the other lots for building ourposes.

It was learned further from a member of the Library Commission that the Library Site Committee as such was not ready yet to take such a move, but may have visited the place in question as individuals. In this regard Magistrate Succepsaid if they had such a move in contemplation they would naturally make their wants known soon, as otherwise it might be difficult to chance plans aircard formulated. change plans aiready formulated.

The people on the Southside have been watching closely every move and comment regarding the library site, and are very sensitive on this point. The site in question is central and has been spoken of often as a good one.

### LESS THAN A BARREL PER DAY. This is the Average for 20.000 Wells in the

Bradford Field. A. H. Logan, the oil man, returned from Smethportyesterday where the famous suit of Logan, Emory & Weaver against the Pennsylrates, was to have been tried. It was again postponed, but this time the plaintiffs asked for it. The defendants have had the trial staved off three times.

staved off three times.

Mr. Logan was surprised to see what a thriving city Bradford continues to be. He said: There are more than 20 000 oil wells in the field, each one producing on an average less than a barrel per day. The wells are all pumped, and the production per diem is about 20,000 barrels. The people seem to be making money, but Mr. Logan, who is used to the old-time gushers, thinks this is rather a flow way of making money.

## PROTECTION FOR CRAFTON.

A Citizens' Committee Appointed to Negotiate for a Fire Engine. rough of Crafton is all stirred up

disastrous fires have served to show the citizens that they are practically at the mercy of the flames when once started. Several chemical companies have tried to assure them that all that was needed was a few bottles of their fire that was needed was a few bottles of their firedestroyer, but the citizens are thoroughly
aroused, and nothing short of a full-fledged fire
engine will appease them.

At a public meeting a committee was appointed to investigate the different makes of
fire engines that would somewhere near strike
the popular chord in price and utility. The
committee consists of Messrs, James Munnel,
Dr. Foster, John McEnulty, Rev. Mr. Bragdon
and C. C. Craft.

THEY HAVEN'T COMBINED. Thomson-Houston People Deny That an Electric Road Trust Exists.

P. D. Nicols, the local agent of the Thomson Houston Company, denies that his company and the Edison people have combined in the street railway business. He says if such a thing has occurred he doesn't know anything about it. For the month of February the Thomson-Touston company took orders amounting to \$2,900,000.

The Second Avenue Electric road recently ordered five more cars from the company. The road is using only one motor on the cars, but they intend to double them in the near future. Mr. Nicois said the road is running nicely for the limited power used.

PROMISING OUTLOOK FOR LUMBER

OFFICE OF PITTSBURG DISPATCH, | WEDNESDAY, April 23, 1890.

Country Produce-Jobbing Prices. April showers interfered somewhat with rade, so that volume was hardly up to general ip to last week at this stage. Potatoes of good quality are in good supply and demand. Low grade stock is too plenty and goes slow. Sweet potatoes are scarce and firm. Choice dairy products are steady, with prices unchanged. Eggs are firm at quotations. Spring chickens are coming to markets more freely, but a pair of such as are generally offered would make but slight impression on the ordinary appetite and a large impression on the pocketbook.

There is a great scarcity of dry hemlock lum ber. Some dealers decline to accept orders except from regular customers. This trouble will, no doubt, soon be cured, as weather of late is favorable to the drying out of lumber. The outlook for a big volume of trade in lumber was never better. In spite of the labor comwas never better. In spite of the labor com-plications, there is a strong undertone of confi-dence in the future of trade. Business is bet-ter than at this time a year ago, and this in face of the fact that trade held up well all winter. A leading jobber said to-day: "The best month I had last year was December, a thing unpre-cedented in our line, and still trade holds up to its average and beyond, notwithstanding large winter business."
