Why the Americus Club Didn't Indorse Montooth.

TOO MANY FAVORITE SONS,

And the Members Will Shout Only for the Nominee.

SOME OTHER POLITICAL GOSSIP

There was a political sensation sprung at the meeting of the Americus Republican Club, Saturday night, which has been discussed with bated breath by the members ever since. It was not down on the regular programme, but it occupied startled attention for nearly half an hour, and the political leaders of the club had an object lesson in the position of being between the Prince of Darkness and the Deep Sea.

During the evening Corresponding Secretary W. W. Colville offered a motion that the club attend the Harrisburg Convention in a body. The idea seemed favorably received and was about to be put to a vote, when a call was made for remarks. An ex-President of the club arose and said that if will be held next Saturday. Sheriff Crawthe club went in an simless fashion to the State Committee the famous query of Flanagan, of Texas, would be very properly heard: "What are we here for?" and what would be the answer?

Continuing, the speaker cited the fact that there was bardly a community in the State that was not enthusing on the "favorite-son, resident-citizen" basis, and from no section of the State could such enthusiasm be more legitimately expected than the banner Republican county. "I therefore move you, Mr. Chairman," said the speaker, "that the Americus Republican Club pro-ceed to Harrisburg in the interest of Allegheny county's Gubernatorial candidate, Major E. A. Montooth, a member of this AN AWKWARD SILENCE.

If silence were salable in large lumps somebody could have made a fortune. Everybody stared at each other in blank amazement and then all eyes turned toward the corner in which was visible the debonnaire form of Major Montooth himself. There never was a more awkward biatus, was like a certain religious creedperdition either way.

Three avowed Gubernstorial candidates

are active members of the club: Major E. A. Montooth, Adjutant General Hastings and State Senator Delamater. A clear majority of the membership is for Delamater. Hast-ings has some friends, however, and the strong following of Major Montooth among the Americus Club is a portion of the history of the last Gubernatorial Convention. The essence of the awfully awkward pre-

dicament was something as follows: If anybody opposed the formal indorsement o Major Montooth, local pride would have been thereby smacked right between the eyes. In the club's situation either horn of the dilemma was distasteful. If Major dilemma was distasteful. If Majo Montooth were indorsed it would bind the club to his canvass, which would have been a grave situation for men pledged already to

Delamater or Hastings.

To vote by formal ballot against Major Montooth's indorsement would have been a contingency almost too dreadful for con-It would never have done to take such a step.
On the other hand, the friends of Delama-

ter and Hastines were afraid to breathe. To vote to indorse Montooth was against their inclination toward other candidates, and to vote the resolution down would give away their position. So the membership held their breath and waited for the Guberna. torial canvass to be settled, so far as the

NEVER SUCH A CRISIS.

Major Montooth evidently felt the strained condition of affairs, and looked as been Paradise compared with present sur-roundings. There never had been such a crisis in the history of the club. Then the speaker went on to explain the

reasons why the club should go to Harris-burg and "holler" for a local man. A member caught his breath long enough to say that it would be proper enough to "holr" for the nom nee.
"We don't have to go to Harrisburg to do

that. We want to go down there to make a candidate the nominee. Major Montooth received solemn promises at the last Gubernatorial Convention, and we want to go down there and see them redeemed. The Americus Club was for him four years ago, and he is a stronger candidate now than then. Why should we change front? We don't want to wander around the capital with our fingers in our mouths, to shut off cheers for the nominee until some candidate has won his fight—" etc., etc.

The embarrassment was growing. Finally a member from Allegheny got upon his feet and proceeded to issue remarks carefully chosen for their inexpressiveness. He cautiously platitudinized, and wound up by deprecating any action which would bind the whole club by the membership present, less than a sixth; hoped no issue would be made at this early stage of the campaign; said many men had many minds, and that nction on such an important matter should be the subject of grave deliberation, etc. WITHDREW HIS MOTION.

The gentleman who fired the bombshell arose and said that he would ask unanimous consent to withdraw his amendment to Mr. Colville's motion; whereupon a simultaneous and heartfelt sigh burst from the members and permeated the ambient air. Then the motion to go in a body to Harrisburg passed burriedly, there being conclusive evidence that no more dynamitic "ridera" were desired.

So the Americus Republican Club will go to Harrisburg pledged to "holler" for no one in particular, but it was freely, though quietly, remarked that the club must, by reason of the occurrence, stand right square upon the obvious fact that an inde of the local candidate, Major E. A. Montooth, was an avoided and dreaded contin-

He finds the population a mixed one, but they are very intelligent people. Most of them are educated in Europe, and those in charge of the Government are bright.

Mr. Thome says that even if a line of American steamers was subsidized, and run to South America, it would accomplish nothing unless the tariff was removed. The people of the two countries would find they couldn't barter with each other. Continuing. Mr. Thorne said:

Among other things, if Delamater is nominated for Governor, Chairman Andrews expects to step into his shoes in the Senate. You have failed to take advantage of the opportunities that have been offered for securing a demanding trade in the River Platte. The treaties with the Republic were expressly intended to promote and encourage commercial relations between the two countries, but American apathy to the progress of other nations has prevented the United States from getting its share of the trade of the Argentine Republic.

"The two principal industries of the country are cattle raising and agriculture. Cattle raising, however, is in a state of decadence, having grown only 3½ fold since 1854, while agriculture has inceased 12 fold. To re-establish grazing the Government offered bounties on exportations of cattle, either on the hoof or as beef. The result has yesterday asked, who, in his opinion, would been that the value of cattle has risen, in 33 years, from \$91,000.000 to \$331,000.000. The bounty law has had the effect to encourage the cattle men, and various methods have been suggested for the conservation of beef, while many societies have been formed for the purpose of exporting cattle on the hoof. In 1887 this industry for wool, hides, dairy products, meat and tallow amounted to

COMPABATIVE FIGURES. "At present we have 1,500,000 cuadras under cultivation, producing a crop value of over £14,000,000, or 6,500,000 scres and \$69,500,000. The proportion is nearly two acres per inhabitant, while in the United States it is only three acres. The province of Santa Fe is the richest in agriculture and in agricultural colonies, containing more than one-third of all the tillage in the Republic. Up to this time the cheapness of the imported articles has impeded the establishment of industries to work up the raw materials, but the time is soon coming when such plants will

be started. "The form of government is almost like that of the United States. Each province has complete control of its own affairs, electing its own Legislature and Governor. The Federal Government has its budget each of the provinces makes up its stat ment and can raise loans at will. During the first five years the Government has ex-pended £14,000,000 in internal improve-ments, and the effect is visible in the activity that has been produced.

IMPORTANCE OF RAILBOADS. "During the same time the loans for railpanies, etc., amounted to £6,915,380. The President realizing that railroads have been responsible for the country's rapid de-velopment, recommended in his inaugural, in 1887, that a network of tracks be run t all parts of the Republic, and that it be done by public and private capital. The banking system of the country continues to he enormous, but it is not too large in proportion to the activity and trade. About 200,000 immigrants come in annually, They are principally Italians and people from the southern countries of Europe. They come in well to break up new soil and work on the railroads.

MR. HENRY'S PLANS ARE OPPOSED The Central Trades Council Wants Better

Labor Laws. JOURNEYMEN PLUMBERS MAY STRIKE

The employes of the Pleasant Valley lines seem to be getting is to the Knights of Labor, despite the threats of President Henry to discharge every man who joined the union. The meeting early yesterday morning, a brief mention of which was made exclusively in yesterday's DISPATCH, was held under difficulties. It was to have been held at 68 Ohio street, but when the members of the assembly began to gather, they discovered two of the company's spotters on the ground, attempting to collect the names of those who attended the meeting. Some of the men were in the hall before the spotters arrived, and the others were prevented from getting too close to the building. The spotters lingered around the hall for

hour, and would have remained longer, but some of the employes complained a policeman that they were suspicious characters, and the officers ordered them to move on." The men in the hall succeed n getting out, and all went to a place on Ohio street, near Madison avenue, where the meeting was held. The charter for the Asembly, No. 2,213, was received. About 25 of the original 30 members of the assembly were present, and 45 new members were

ADVISED TO STAND TOGETHER. District Master Workman Evans was present, and delivered an address to the men, telling them to remain firm and stand together. He said if none of his present plans are divulged he will shortly have all the employes of the road in the union. After all are organized no attempts will be made to keep the fact from the managers of the road

the managers of the road. It was reported among the men yesterday that Mr. Henry's plan of action was disapproved by the directors of the company, and that the President had been asked not to discharge any more men until after the next meeting of the board, which will be held May 13, and at which the matter is ex-pected to be brought up for consideration. A DISPATCH reporter started out last night to interview the members of the board, for the purpose of giving their per-sonal views on the matter, but he was extremely unlucky. Mr. R. H. King, of 75 Liberty street, Allgheny, had received a paralytic stroke during the day. and could not be seen. Secretary William H. Graham and Colonel W. A. Stone are up the Cheat river fishing. He said that Mr. Henry was running the road, and he supposed there would be no change in the anagement for the present.

WHAT HUNTER WOULD DO. A call was made at the residence of James Hunter, President of Allegheny Common Council, and a heavy stockholder in the company. Mr. Hunter said: "The only information I have about the trouble I have received through THE DISPATCH. I have received through THE DISPATCH. I have hoped all along that Mr. Henry would name some other reason for the discharge of the men than the simple fact that they joined a labor organization. I think it is possible for any corporation or company to get along very well with organized labor, and I believe that all difficulties about the distributed has distributed by the control of the control o part of the city, and was observed to be ex- wish to be placed on record as criticising his action. I am only a stockholder, and he is President of the company. If I were a servations were taken, of course, from the exterior. The Judges have given notice more positive position."

Several attempts were made to see Mr. Henry last night. When the reporter called, early in the evening, he was told that Mr. Henry was out for dinner, and was expected home in a short time. Subsequen

til after midnight.

District Master Workman Evans said yesterday that there would be no attempts made to tie up the road. In fact, there is no occasion to do that. He is simply or-ganizing the men, and proposes to include all the employes in the assembly. He says there are a large number of new men on the road, and the company is employing everybody who applies for a position, so as to be prepared in case a tie-up should be ordered. He will not seek any further contrivial money matter, which so enraged

ferences with President Henry.

Some of the men who joined the union Saturday night expressed their belief that the entire membership—75 men—will be discharged to-day, but others said this was not probable, as it would be hard for the company to get their names.

HERO OF A RURAL ROMANCE.

An Italian in a Pittsburg Hospital, His Bride in Ose at Baltimore-A Love Story With a Sad Sequel-Anton Thereso's Story.

Anton Therese, a Neapolitan, applied resterday at the Central station for assistance. He was suffering from lung trouble and a tumor on the neck. Therese, who is a young man, is the hero of a rural romance. His parents own a vineyard near Naples, and are aristocrats in a small way. Among the peasant girls hired to harvest ANOTHER OF HER VICTIMS APPEAR the grapes and carry them to the winepress was Fiametta Campani, who was the belle of the neighborhood, although her dowry consisted of nothing but a few brightcolored petticoats and a necklace of small silver coins.

Anton superintended the pressing of the grapes and learned to watch for the brighteyed and coquettish Fiametta as she brought her "purple burden" to the press. The young people learned to love each other, but to the disgust of Anton's parents, who had in view for him a bride who would bring in a suisable dowry, both in land and money.
Opposition added fuel to the flame that

burned in the hearts of the young lovers, and they finally determined to seek refuge in the land of the free. A hasty visit was paid to a priest, the lovers were united, and they took passage for this country, arriving in Baltimore three months ago.

Therese got work for a time as a common laborer. His wife, however, began to pine for her native, vine-clad hills, became sick, and was taken to a hospital. Therese got out of work and went to Wheeling, where he was employed as a street washer. This was not very remunerative and he started for Pittsburg, arriving here sick and penniless. He was sent to the Home Laying in a Sunday Supply.

Jerry Sullivan and William Williams were arrested late on Saturday night by Officer Young near the entrance to Jones & Laughlins':mill. They were somewhat un-der the influence of drink, and were lugging along on their shoulders a keg of beer. They were locked up in the Twenty-eighth ward station until the ownership of the keg can be ascertained.
