NEVILLE ISLANDERS PROTEST.

What They Want and What They Don't Want Set Forth. THE NEWS AND GOSSIP OF THE CITY.

One of the big deals in real estate which have been frequently alluded to of late as hanging fire on account of differences in regard to values, was extricated from the tangle and closed up yesterday, if report be true, and it came from a source leaving little doubt of its correctness. The transaction consisted of the sale of 11 acres fronting on Stanton avenue and forming part of the

### Neville Islanders Protest.

Concerning the proposed improvement of Neville Island, about which there has been considerable talk within the past few months, there seems to be two sides which are decidedly antagonistic to each other. About all the light that has so far been turned on the subject has come from the syndicate represented by B. C. Christy and J. M. Miller, whose scheme is to purchase land and lay it out in lots. To ascer-tain the opinious of the other side and get at bottom of the matter. THE DISPATCH representative yesterday called on Mr. John M. Chaplin, manager of the Pittsburg Clearing House, who expressed the views of the dis-

sentients. He said:
"I regard the scheme as proposed by Messrs. Christy and Miller as detrimental to the best in-terests of the island. It is opposed by more than four-lifths of the property holders, mainly om the fact that they have agreed among themselves to open an avenue in the center of the island 90 feet wide, in the middle of which will be an electric road with drives on each side, which would afford all the transportation necessary for the products of the island and give adequate transit to the inhabitants to the heart of the city as quickly as could be done by steam cars. One of the strongest objections to the proposed steam railroad, which is a part of the Christy-Miller plan, is the demand for 40 feet in addition to the 90 feet already given for the avenue, as the island is entirely too narrow to stand the loss of so much land, upon which nearly all the inhabitants depend for a living. Out of this grows the apprehension that the railroad, once getting a foothold, would make further encroachments until it would absorb the entire island, or if not quite so avaricious that it would establish cattle yards, switches, etc., and thus destroy the value of the place for residence purposes and turn it completely over to Mammon. The electric road is all we want. It would not only be ornamental, quiet and clean, but it would appreciate the value of property at least three fold. The talk of opening streets and alleys and laying out a large number of small lots on so diminutive a bit of ground, is perfectly ab mrd What we want are large lots and handpeople to settle on the island and take pride in the adornment of the place, thus maintaining its beauty. I am confident the syndicate will that it meets the almost unanimous opposition

The above statement was submitted to Mr. Pittock and several other prominent citizens of the island, and it was approved by them as exactly expressing their views.

### A ROOM SMASHED.

Stocks Less Active, With Weak Spots Largely in the Majority. The only event of interest that transpired a either of the three stock calls yesterday was a break in Switch and Signal from 17 at the close on Monday to 15%, with 16 bid. There was no apparent reason for the concession, except t

make a record.

The natural gassers were nominally unchanged, except Pipeage, which was a triffe weaker. Central and Citizens' Traction dropped a fraction each. Pleasant Valley also falled to maintain its advanced position, in which it had the company of Westinghouse Electric. La Noria improved a cent.

Trading was fair, sales amounting to 385 shares, against 662 the previous day. The weakness was due entirely to a lack of supporting orders, there being no change in any of the companies to move values either way. | FIRST | SECOND | THIRD

## UP THEY GO.

A Bulge in Railroad Shares in Spite of Western Demoralization - Chicago and London Lock Horne as

Buyer and Seller. New York May 13 .- The reactionary condi tion of the market yesterday was not duplicated to-day, but instead of the weakness there was decided strength in all portions of the list, and late in the day even buoyancy marked the dealing. There was no lack of the disquieting news from the West this moraing, and while there seemed to be a disposition to regard the whole thing as grossly exaggerated by the dis-patches, a feeling of hesitancy was shown which did not entirely wear away until late in

the day, when the activity became equal to anything yet seen on the present rise.

The Chicago people supported their advices of rate-cutting and railroad demoralization in general with orders to sell the granger stocks. but London was a buyer, and commission houses were liberally supplied with orders to buy, which made the sales fall at the very outset, and while the opening itself was very hesitating and irregular prices were soon on the upward tack and a strong tone marked the

dealing from that time out.

The flurry in money was not repeated, though the rates were run up to as high as 8 per cent in the middle of the day. They could not be kept there, however, and last loans were made at 3 per cent, with that rate offered at the close, The most important influence in creating the buoyant tone to the market was the persistent bulling of the industrial stocks, and Sugar was bought heavily, scoring a rise of over 4 per cent at its best figure. Mr. Keene is believed to be the most active manipulator of the certificates, and while the roomtraders followed him rather and while the roomtraders followed him rather timidly, the buying was of such a pronounced character that nothing could respect the strength of the upward movement. The only strong feature of the forencen was the Coal stocks, which again made material advances, though the two active stocks, Reading and Lackawanna, were not so pronounced in their movements as the inactive ones, Jersey Central and Delaware and Hudson. The Vanderbilts were strong, but not prominent in the dealings, and their movements were in all cases measured by small fractions. London bought most of its favorites; there was some selling of Union Pacific and the Grangers for foreign account, especially in the forencon, but this was reversed in the afternoon. The buying became general in the last hour, and the rush to cover shorts sent everything on the list up rapidly.

reversed in the afternoon. The buying became general in the last hour, and the rush to cover chorts sent everything on the last up rapidly. Richmond and West Point becoming one of the most prominent strong feature of the market at the time.

The close was very active and strong at about the best figures of the day in April cases. A decline of 1 per cent in Manhattan was the only important loss, while Sugar rose 4%, Delaware and Hudson and Tennessee Coal 2% cach, Pacific Mail 1½, Richmond and West Point 1½, the preferred 1½, Lackede Gas 1½, Chicago Gas 1½, Rock Island 1½, Lackeda Gas 1½, Chicago Gas 1½, Rock Island 1½, Lackeda Island Islan

OFFICE OF PITTSBURG DISPATCH, LESDAY, May 13, 1890.

Country Produce-Jobbing Prices. Heavy rains all over the country have kept back stuff, and trade is quiet. Strawberries are in very short supply, but the remedy is traveling this way as fast as steam power will bring it, and full supplies are expected by tomorrow. Cabbage from the South is coming in freely and prices are weakening. Postage of freely and prices are weakening. Potatoes of choice quality are firm. Markets have been glutted with poor stock for a few weeks past, but this is now well cleaned up. Eastern mar-kets are firmer, and there is a strong undertone of confidence in the future of the trade here ery butter is not so firm as it has been for the week past. Choice nearby eggs are very active at outside quotations. A Liberty street jobber said to-day: "I sold out all my stock at 121/2 per dozen, and could have sold as much more if I had had it to sell. ## MARKETS BY WIRE.

Chicago Speculations Falling Into the Rut -Nearly Everything Lacks Vim-Pork Continues Its Downward Movement -Fenrs of a Boomerang.

CHICAGO-There was only moderate trading in wheat to-day. Most of it was local. Opera-tors were rather inclined to the selling side, but were reluctant about going short for fear the market might advance, the conditions peing such that the market is easily controlled A prominent trader was reported as being a rather free seller, and the bull interest sold moderately, realizing on their holdings. At the same time there was fair buying on the various breaks, and the market was held within

various breaks, and the market was held a moderate range.

The opening was easier at about yesterday's closing for July, declined, with only slight fluctuations 2c, then advanced 3c, again eased off, fluctuated some and closed about 19,01% lower than yesterday. May was very quiet and closed about 136 lower, and June 136 lower. There was nothing special in outside news to affect the course of the market.

There was a large business transacted in form within narrow limits, and the feeling was little unsettled though generally steady. There was nothing new of consequence de-veloped, and prices were governed mainly by local influences, chiefly by the operations of a prominent local trader. There was a good deprominent local trader. There was a good demand for cash, and May and the premium of July over this month was reduced at the time to 1/6/2/c. The market opened excited and higher, first sales varying considerably in different parts of the pit, but afterward sold %c, ruled steadier and closed a shade lower than vesterday.

ruled steadier and closed a shade lower than yesterday.

Oats were traded in fairly early, but the latter part of the session was marked by quietness. A firmer feeling prevailed, especially on the near futures, May advanced %c, June %c and this was partly maintained. Most of the trading was in July, and prices fluctuated frequently within a range of %c, and at one time sold at %c above the closing figures of yesterday, but closed with %@%c gain.

Only a few trades, were made in pork. The feeling was easy with prices 10@15c lower, the market closing tame at inside figures.

Lard attracted very little attention. There were no price changes. were no price changes.

Only a fair trade was reported on short ribs,

and the changes were very slight.

Drygoods.

New York, May 13.—There was a fair demand for drygoods in the regular way, with a firm market, but the attention of buyers was chiefly taken up with the trade sale of flannels, which began to-day by order of Faulkner, Page & Co., and which was largely attended by buyers from all sections. The sale was looked to with special interest, because the goods have heretofore been the leaders in maring prices for the season. The results are not very different on the average from the sale of last Friday, but prices were more irregular. Some goods as plain white selling close to last year's figures, while plain scarlets and sackings soid very low in some instances. Twills varied 5 to 10 per cent decline. The results were not very satisfactory to sellers, but probably a fair expression of the condition of things was reached by the trade, confidence in the most desirable goods being affirmed. The following Western houses were represented in the sale: Marshall Field & Co., J. V. Farwell & Co., Carson, Pierie. Scott & Co., James H. Walker, Stein & Hill, Chicago: Rice, Stix & Co., Samuel C. Davis & Co., Eli Walker Dry Goods Company, Wean & Booghen Dry Goods Company, Wean & Co., Louisville, Ky., Myman, Partridge & Co., Minneanolis, Lindekes, Warner & Schirmer, and Finch, Van Slick & Co., St. Paul; Havins, Geddes & Co., Irra Haute: A.
