Allegheny Syndicate, Who Have BOUGHT NORTH AVENUE PROPERTY.

Theo Ihrig, the collector of Linden Lodge, is convalescing after several weeks' illness. Large Sums of Home Money Being Invested Lincoln lodge, of the Southside, was officially visited by the State Commander on last Monin Chicago and Boston Realty.

The most important transaction in real state that was made public yesterday was the sale of the Smith property on North avenue, near Federal street, Allegheny, lot about 130 feet front, with several buildings thereon, for \$65,000, or at the rate of \$500 a foot front.

The purchasers are a syndicate of Allegheny men who propose to erect a large flat, or apartment house, on the property as an experiment, plans for which are being prepared. The work of demolishing the old nouses will begin in a short time.

Another transaction of more than usual significance was consummated by Samuel W. Black & Co., who sold for George K. Stevenson, a lot 100 by 224 feet on the east side of Craft avenue, Fourteenth ward, with a 12-room brick dwelling thereon, to Mr. DeRoy, the Smithfield street jeweler, for \$19,000. The purchaser will occupy the property at an early

Pittsburg Capital Abroad. Quite a number of citizens departed from the

city yesterday afternoon for other parts, near or remote, and on business or pleasure intent, Among the travelers was a small party of Pittsburg capitalists, whose destination was Chicago, where they will examine the inducements for investing in realty.

One of the members of the party, Mr. John

Walker, formerly of Carnegie, Phipps & Co., is said to have invested in the last few months over \$500,000 in Windy City real estate. Another member is connected with a Pittsburg syndicate which recently made over \$100,000 by one turn in Chicago property. They hold options on several valuable pieces there, and will probably engage in some large deals. It may be mentioned in this connection that one of Pittsburg's iron kings took a fancy to Boston a short time ago, and invested \$600,000 in business property there.

Going away from Pittsburg to invest in real estate looks akin to the performance of carrying coals to Newcastle; and some may think it a severe drain on the supply of home money. Of course these large investments if made here would be a great stimulus to business. There ance in our favor. Capitalists from Omaha, Chicago, Cincinnati, Philadelphia and Richmond, Va., have and are making bandsome in vestments in Pittsburg realty, which keeps up the equilibrium and something more. This is shown in the rapid growth of the city in popushown in the lation and business.

It is un-derstood that Mr. Carnegie is considering a plan to supply the urgent demand for small and medium-sized tenement houses.

Speaking of backward localities in various parts of the city, a gentleman said that the dis-trict on and west of Shingiss street—Hard-scrabble and Old avenue—would soon cease to In regard to real estate values, a prominent broker said the highest price ever paid for property on North Highland avenue was \$127.50 a foot front lot, 80 by 323. The best price yet realized for Boquet street property is \$110 a foot front. The broker quoted above, referring to the recent deals in the Squirrel Hill district, said the complete story had not been told, but it would be as soon as a little tter connected with them could be closed

up. It will be interesting. Movements in Real Estate.

There was a good, quiet movement in real estate during the week, and a fair amount of business was closed up. The outlook is excellent. Inquiry was largely for suburban building lots, Large properties were reported a little slow. In addition to the sales noted above the following were reported:

wright to Henry Fenner a frame house of eight rooms, with lot 20x70.63, on Boquet street, for a price approximating \$3,700,

THE WEEK IN OIL.

A Buige in the Market in the Pace of Pending Wells.

Oil continued its upward movement yester day, and made considerable progress toward the dollar line. The market opened strong at 87% in the face of pending wells, and went right up until it reached 88 in the last half hour, where it hung until near the close, when it was boomed to 89. It then weakened a fraction, and finished at 58% bid.

Oil City and Bradford were the principal buy-

ers, although considerable stuff was handled on the local board. New York came in on the bull side just before the close, when most of the trading was done. Nearly all the brokers spoken to expressed the opinion that the rise was legitimate and had come to stay, as the field outlook was becoming more bullish every day. The range of prices for the day and week is shown by the annexed table:

THE BOOM STILL ON.

Speculation in Wall Street Assuming the Dimensions of a Craze-Big Railroad Earnings at the Bottom of the Bulge.

NEW YORK, May 17.-The stock market, even aithough to-day was a half holiday, man-aged to maintain the large volume of business of the past week, and while the movements of of the past week, and while the movements of prices were somewhat irregular, there was a strong undertone which before the close swept everything before it, and further advances resulted, while many stocks reached their highest prices for the week. The foundation of the buil movement, the railroad earnings, continue to show the same material increase over those of last year. The buils also continue to fight shy of the stocks of the warring roads that are cutting rates in the West.

The market to-day was unusually plentifully supplied with rumors for a short session, and among them may be noted a story that a deal favorable to the Villard stocks is to be consummated next week, which served as the basis for a most marked advance in the Northern Pacifics and Oregon Transcontinental, which became the features of the market after ll o'clock. Reading was the most active stock, its transactions exceeding those of any full day of the week on rumors relating to a movement or agreement with other powerful companies, and there was a material gain in its price.

up 2%. Oregon Transcontinental 2, Northern Pacific common 1%, Reading 1% and Mexican Central 1 per cent.

The transactions in railread bonds were also large and fully up to the average of the week, aggregating \$1,574,000, out of which Reading 48 had \$302,000, the third incomes \$170,000, Atlantic and Pacific incomes \$180,000 and the Atchison incomes \$107,000. The market was firm with few marked changes in quotations. Ohio Southern firsts rose 2% to 113%. The sales of bonds for the week aggregated \$16,513,000.

The Post says: The advance in prices was continuous up to Wednesday, after which there was considerable realization of profits, with a concurrent dectine in prices, but the net result for the week was an advance of ½ to 6½ per cent over the closing prices of last Saturday. The reports from the West have been to believe that there has been considerable exaggeration, and that affairs there are much less worse than daily reports indicate. The gross and net earnings now coming to hand show a very prosperous condition of general trade, and if raices at the West were being cut as reported the results would have been less favorable. London has been a heavy buyer in this market during the past week, and the strength of the market was due largely to such burchases. The general feeling continues buillish, and while reactions are expected, a higher range of values is regarded as inevitable.

WALL STREET GOSSIP.

A Number of Influences Combine to Maintain a Bull Market.

NEW YORK, May 17 .- The stock market continues on its bullish course, and it meets with no objections. It promises to have the usual irregularities of movement to a shifting of speculative interests, but its direction is obviously in a bull line. The prices of many stocks look pretty high to a contemplative mind, but impulse is back of this market, and that is not conservative or reflective.

The idea that we shall have silver legislation and that an increase in the currency will in-crease prices, has taken a firm hold on the pub-lic mind. The higher prices for farm products put the producers in a better temper, and the prospects of a settlement of the tariff question will enable manufacturers to count on fixed will enable manufacturers to count on fixed conditions as to the extent of protection.

Money has been in good demand at firm rates, but the summer season generally witnesses the flow of money from the interior to this center, so that the smallness of the bank reserves does not excite apprehension as to prolonged stringency.

The bank statement to-day was favorable, for it showed a gain of \$500,000 in reserves, and a reduction of \$1,500,000 in loans. The market closed firm, and with every promise of better prices next week.

MARKETS BY WIRE. Active Trading in Wheat and Prices Open

Higher on Report of Snow in Dakota, but the Pull advance Not Sustained. CHICAGO-Trading in wheat was again large o-day, especially during the early part of the day, and prices were higher. July opened 2c higher, but the advance brought out tree offerhigher, but the advance brought out tree offerings, under which prices declined irregularly 1%c, then improved %c, eased off %c, and the closing was %c higher than yesterday. May closed %c lower.

The dry weather scare again had its influence on the market and caused an excited opening, but advices later in the session reported rains and snow in the Northwest and had the effect of creating a weaker feeling. Snow was reported in Cass, Ranson and Barnes counties, Dakota, which it is claimed makes the Northwest all right for the present.

Core was fairly active and a little unsettled early, but became more quiet and easier later. Operations were mainly local, as also were the influences that affected values. The market opened higher and irregular with wheat and the cold weather, but later sold off under free offerings. The market opened 1/20%c better than the closing yesterday, but soon sold off 1/20%c, ruled steady and closed 1/2 lower than yesterday.

A good volume of business transpired in oats.

but there was some selling of Beading and the Grangers apparently for foreign account, and Chicago Gas and Sugar were weak, and retarded the further improvement until the strength in Reading had been fully developed. The Villards afterward joined in the upward movement, and later the advancing tendency widened to all portions of the list, and even the trusts felt the stimulus.

The bank statement, which had promised to be unfavorable, showed a small increase in the surplus reserve and helped to give the market a buoyant tone toward the close, which was active and strong, in most cases at the best prices of the day. The final changes are generally small advances, the dectines being few in number, while Northern Pacific preferred is up 2%. Oregon Transcontinental 2 Northern Pacific common 1% Reading 1% and Mexican Central 1 per cent.

The trusts celt the stimulus.

Engaged in the milk business with his father, John Pyle, who owns the Hulton dairy, and for years a resident of Hulton station, 12 miles north of Pittaburg, on the Allegheny Valley road, Mr. Jacob Pyle is well known to all the suburban dwellers in that section, as well as to most of the older residents of Pittsburg and Allegheny. In an interview with the writer he told the following story:

"I had got into a condition in which life seemed to be a burden to me. I would feel tired and worn out all the time. In the morning I would wake up feeling more tired and miserable than when I went to bed the night before. The least exertion seemed to use me all up, and I feit unfit

do anything.
"The trouble seemed to date back eight or nine years, and to have commenced with my head. My nostrils would be stopped up, first one, then the other. At times there would be a profuse watery discharge times I would blow dry secretions

Mr. Jacob Pyle, Hulton Station, Sometimes there would be a dull aching pain in my forehead just over the eyes. And sometimes the pain would be sharp, like neuralgla. "I was continually coughing and raising. The mucus would drop back into my throat. Much of the time I had to be hawking and hemming and raising to clear it, but at other times there would be a dry, parched uncom-fortable feeling there that I can hardly de-

times there would be a dry, parched uncomfortable feeling there that I can hardly describe.

"My hearing became impaired. The stuffed up feeling in my head had continued until I had strange sounds in my ears, like buzzing or ringing or roaring. These sounds kept up night and day, and sometimes, together with the fact that I was growing deaf, they would almost drive me frantle.

"The cutarrh extended to my chest and stomach. I would have sharp shooting pains runoing through my lungs. I lost rapidly in flesh and strength. At last night sweats came on and after that I seemed to grow weaker very fast. I could eat little or nothing. When I would sit down to the table I would feel hungry, but a few mouthfuls would take my appetite away.

"I would have spells of dizziness and vertigo, Dark spots would swim before my eyes. Sometimes there would be a creeping, chilly sensation extending all ever me. My limbs became twollen and would feel heavy like lead.

"I had tried nearly everything and everybody when I went to Drs. Copeiand & Blair, but without getting any help. I found the charges of these physicians so much more reasonable than I expected that I placed myself under their care. I improved rapidly from the start, My hearing was restored. My head and throat became clear. The pains in my chest disappeared. I gained in flesh and strength. I feel strong and well now, able to work day in and day out and not become exhausted. I am more than grateful to Drs. Copeland & Blair, for the amount of money I paid them was triffing compared with the great good they have done me." fling compared with the great good they have done me,"
