about the Fourth of July, and our main stay is in the good prices generally obtained from the first fruits. We usually get from \$5 to \$5 per basket for early tomatoes, but, I fear from present outlook that we will not have much to offer by July 4. Our greatest profit is in early stuff. But the weather all last winter and this spring has been against us.

Work Much Retarded.

"There has, in fact, been scarcely any time this season when we could plow our grounds. Field work has been rendered almost impossible by continuous rains. I usually have my sugar corn planted,by the last of April. The last of May is here without having half my usual quantity planted. Cabbage is one of the garden crops that calls for cool, wet weather.

Learning to Dance. The country between Chartiers creek and Montour run was on the qui vive yesterday awaiting results of the opening of three wells. Ex-Sheriff Hunter, one of the company put-ting down a hole at McKee's Rocks, stated that the well had made two small flows, and en-

couraged her owners to believe that she would The Gillespie well, on the Schuler farm, at Forest Grove, had filled up with oil. Some thought it would be large, while others thought it would be but a moderate producer. Some said the latter view was founded on the preduction of Wizard Harper, that the well would not be large. The McKown well, at Forest Grave, was also pretty well filled with grease, but neither had been opened.

A new well is expected to come to the center in Cornopolis at almost any time, and it was in Cornopolis at almost any time, and it was stated that H. W. Burns was so much clated over the prospect that he was learning to dance.

MARKETS BY WIRE.

An Early Decline in Whent Followed by Raily - Operators Afraid to Go Short - Corn and Onte Stronger-Pork Dull.

CHICAGO-Wheat-Trade was rather light to-day, and after a lower opening the market ruled strong and prices steadily advanced. A feature was the apparently small quantity of wheat on sale. The opening was about 1/20 lower, but the offerings were readily absorbed, and prices advanced 25/20 for July above the early inside figures, and the closing was firm

and 1% higher than yesterday.

The advance was gradual and there was no excitoment to speak of until prices had reached the higher figures, when operators began to show some uncasiness. The early decline was due paritally to the weakness in foreign markets, the increasing quantity on ocean passage and the warm weather here. But a prominent trader had buyers taking what wheat there was

The season, so far, has not been at all favorable to market gardening. Steady rains and cool weather have had the effect of delaying early vegetables from two to three weeks, in comparison with the average season. Our nearby gardeners complain that they have not been able to get more than a couple of days in the week for the month past in which profitable work can be done in the fields.

A native of Neville Island, whose memory goes back to war times, in an interview to-day, said: "I cannot remember a season so backward as this. Nothing in garden truck lines is coming on as it ought to do. In ordinary seasons our tomatoes are set out by the 5th of May, but the gardeners on the island have not set out one-half their usual quantity at this time.

"Of late years tomatoes are our biggest crop. I raise from 700 to 800 bushels in the average season and some of my neighbors raise three times as much as I da. Neville Island is no doubt, the best soil in the country for tomatoes, and I think I speak within bounds when I say that 20,000 bushels are ordinarily raised on the island in one season. The prospect for an average crop this year are by no means bright. inst of May is here without having half my usual quantity planted. Cabbage is one of the garden crops that calls for cool, wet weather, but even for cabbage we have had too much of a good thing this season. In my opinion Neville I-land will not turn out half its average crop of garden stuff this season. There is, however, a silver liming to our dark cloud. I have found that when crops are light there is more "oney and less work to the producer. When stuff is plenty we get little for it, and have plenty of work.

"Year before last was one of our prolific years. Everythur in fruit and vegetable lines was abundant. My boat bill for conveying stuff to market ran up to \$35 a week, and stuff was so plenty that much of it was hard to give away.

"That was a good year to the consumer, but not a prosperous year to the gardener. Last year fruit and vegetables were not so plenty, and we made more money.

"This year promises still lighter crops than last, and the law of compensation will come in to offset the shortage by better prices for what the earth yields."

Hides and Leather.

The advance in hides and calf skins noted in this column a week ago, while not followed by a reaction as yet, is largely sustained. From Boston, which is the head center of the light leather industry, comes the advice to one of our leading dealers. "Markets here are hardly as strong as they were when the advance was made, but we see no signs of a drop. The strong feeling of last week is partially lost, but we think the advance will be maintained."

One favorable feature of the hide trade is that the quality of those offered is steadily improving. The per centage of grub hides is on the decline.

Another Markets bere are hardly improving. The per centage of grub hides is on the decline.

EVOLUTION IN THE SUBURBS. Petroleum Comes Within Three Cents of

Reaching the Dollar Line. THE NEWS AND GOSSIP OF THE CITY

Convenience of residence has become or the recognized features of Pittsburg. Before the era of electric and cable cars only wealthy people could afford to live in the suburbs, and there was scarcely any market for outlying property. All this has been changed within a few years, and millionaires no longer enjoy a monopoly of auburban comforts. The demand for rural property has grown so large as to be hard to supply,

and values have risen in proportion. The country is full of workingmen's homes.

The transformation of unsightly vacant spaces, which abounded on all sides of the city a few years ago, into handsome lawns and gar dens, and covered with neat and comfortable houses, is evolution which the most vehemout opponent of the Darwinian theory must admit to be in the right direction. It also shows that Pittaburg is enjoying a larger measure of pros-perity than usually falls to the lot of "mortals ere below," and that this prosperity is largely shown by people who earn their bread by the sweat of their brow.

Although Pittsburg is fast becoming a city of

homes, many of her most valuable citizens have not quite reached the degree of affluence to enable them to become proprietors, and they must, therefore, remain renters for a season. To provide them with comfortable houses to live in at a moderate cost, should be the willing work of our capitalists. It would not only pay them as an investment but would greatly assist the growth of the city, which, instead of being at the rate of 25,000 a year, should be 50,000, half as much as Chicago, and would be if there were houses enough to accom-modate all who want to come here.

Business News and Gossip. C. L. Davis, "Alvin Joslyn," through his agents, Straub & Morris, yesterday made another payment on the property recently pur-chased by him as a site for a theater.

John P. Ober is making arrangements to build eight brick buildings on his property, Negley avenue and St. Clair street, at a cost of \$50,000 Several houses on Grant street, between Sixth and Seventh, are being repaired. These are the only signs of progress in that neglected

quarter. A mortgage specialist remarked yesterday "Business has been quiet since the speculative fever broke out. There is considerable 4½ per cent money in the city for investment in class business property, but 5 per cent and tax

is the rule." In Philadelphia hereafter all bay windows, or parts standing out from the main structure, must be composed of iron or brick, as a preven tive against fire. This is a step in the right di rection.

Presbyterians of Latrobe are preparing to put

up a church edifice that will cost \$25,000. The largest of 24 mortgages recorded yester-day was for \$2,500. The smallest was for \$100. Six were for purchase money.

cret cutting by its competitors.

Among local stocks to be listed soon are those of the Pennsylvania Water Company and of the Second avenue electric road.

Movements in Real Estate.

There was more underground than surface work in real estate circles yesterday. One agent was wrestling with a \$100,000 deal, and drove off in a buggy through the rain to hurry it up. The inquiry for small properties was good, and a respectable number of sales were finished up. The following were reported: Hamnett & Meredith sold lot on Maple street, Edgewood, 100x300, for W. S. Clow to S. Hooper for \$2,000. 46 in the plan of Valley View place for \$325. It was sold on the easy payment plan, the purchaser being Fred Dillemuth.

Oil Comes Within Three Cents of Touch. ing the Dollar Line. Oil made another effort to reach the dollar line yesterday, and came within 3 cents of it, but on account of heavy realizing was unable to hold the fort and fell back to prepare for a

fresh start.
The market opened with a buoyant feeling at 95 and at once went up to 95%. Realizing at this point pulled it down to 93%. Between 1 and 2 o'clock the bears went in to cover and

and 2 o'clock the bears went in to cover and the price rose to 97, broke to 96%, with heavy buying by Sproul & Lawrence and J. H. Gross. New York, Oil City and Bradford then turned sellers, and the price sagged to 95%, with Stevenson a good buyer.

Late in the afternoon there was another drop to 94%, but on good buying and covering here there was a quick raily to 185% followed by a break in the last five minutes to 94%, where the market stood at the close. The range was: Opening, 95; highest, 97; lowest, 93%; closing, 94%. Monday's clearances were 222,000 barrels. Trading was active and considerable stuff was handled. Feeling was rather mixed, at the finish owing to differences between this and other markets, making it difficult to determine what to-day will bring forth. A bullish sentiment, however, was uppermost.

The net result of the day's operations, was to leave the market ½ lower than the opening, but % better than the final figures of the previous day. Fluctuations covered a range of 3% cents. There being no field news to move the market either way, the spirit can be attributed to nothing else than the covering of shorts and filling of a few orders, backed by a better consumptive demand at home and

Some Strong Points-Sugar Comes to the Front - Money Tighter-

London Joins the Bears. NEW YORK, May 20.-The stock market was quite irregular to-day in its movements, and until the last hour was much less active than any day for a few weeks, and while the general tone of the list was drooping, there were a few specially strong spots which served to give a character to the dealings which otherwise would have shown some weakness. The London market became materially lower this morn-ing, and there was free selling of London favorites at the opening, Louisville and Nash-ville being especially weak, but, in the light of subsequent events, suspicion that the London market had been rigged for effect gained ground. The bears aided their selling operaan influential financial institution in difficulties, but when the name of the bank came to

ties, but when the name of the bank came to be known it met with instant denial and the talk of it ceased.

The favorable factors of the day were the bullish utterances of Mr. Armour, with the special developments in a few of the leading stocks. From the start the bears went gunning for stop-overs, and did succeed in uncovering a few, but the losses sustained in all but a limited number of stocks were insignificant. Atchison was a strong feature all the way out. The prospects of the acquisition of the complete control of the San Francisco, together with the late handsome earnings reported by the road, created a demand which kept the stock moving slowly but steadily in the upward direction, even when the rest of the list were sagging. The Vanderbilts again came to the front, and Cleveland, Cincinnati, Chicago and St. Louis showed special buoyancy the occasion of which was found in the rumors of a 3½ per cent dividend upon the stock at the of a 3½ per cent dividend upon the stock at the next period and talk of rights on new acqui-

the occasion of which was found in the rumors of a 3½ per cent dividend upon the stock at the next period and talk of rights on new acquisitions of the road.

Sugar was strong all the way out also, and buil points were as freely distributed upon it as at any time since the present manipulation began. It scored a rise of nearly 4 per cent, almost all of which was retained at the close. Richmond and West Point was taken in hand in the last hour, and on very large trading it advanced about 1½ per cent, on the calling of the meeting to-morrow to consider the solidification of the system. Oregon Transcontinental was the weak point in the general list, but its final loss was only fractional. Among the low-priced shares, Oho Southern became prominent late in the day by a sharp rise, but the movements in that cluss of stocks as a rule were without special improvement.

The money market raled fairly easy throughout the day until delivery hour, when rates were put up sharply, but although 10 per cent was reached it seemed to have no influence upon the upward movement in progress at the time, and the close was active and strong at about the best figures in most of the list. The final changes are insignificant as a rule, though few stocks recovered their opening declines, and a majority of the list is lower to-night, but while Delaware and Hudson with a loss of 2 per cent is the only stocks to show a material loss, Sugar is 5%. Ohio Southern 2% Richmond and West Point, hooth common and preferred, 15%. Atchison 15% and Cleyeland, Cincinnati, Chicago and 8t. Louis 1 per cent.

OFFICE OF PITTSBURG DISPATCH, }
TURBDAY, May 20, 1890. Country Produce-Jobbing Prices. Eigin creamery butter is weak and cash customers find holders disposed to make concessions on prices quoted. Supply of new choice cheese is not up to demand. Eggs are very scarce and nearby stock is firm at lic per dozen. In general produce lines trade is quiet. Wet weather is the adverse element of trade. Stuff is coming to markets in poor shape. While there is a fair supply of everything in fruit and vogetable lines from the South, the quality of supplies is generally low. The stock of inferior potatocs with which markets have been over-

supplied for a few weeks past is now well cleaned up, and choice stock is firmly held. New potatoes from the South are coming in freely, and the day is near when the old will be displaced. Choice tropical fruits are in good demand, especially oranges.

ALONG THE WHARVES. The Rivers Rising Again-No Coal Ready to

to Go Out. Variable as women and weather are the waters of the twin rivers, which meet in the broad Ohio. After their steady fall, just when the operators were beginning to put in a large stock of sackcloth and some tons of accomstock of sackcloth and some tons of accompanying ashes, down comes the rain and sets them rising again. And rising with a vengeance, too! From 8 feet they went up to 10 feet at about 5 P. M. yesterday. They had risen to 10 feet 6 inches before 7:30 P. M., and are expected to go up to 16 or 17 feet to-day. There is not a tow of coal ready, nor is there any likelihood of one being ready for some days yet. Brown & Co. hope to have the first tow ready, and on Friday several tows will be prepared to go out if the water keeps up. It is a curious fact that the very same weather which is now abroad prevailed during May last year, and immediately preceded the terrible Johnstown flood.
