Pretty girls look prettier and plain girls ainer walle sporting in the water. One blossed with a goodly amount of beauty, fresh mplexion, bright eyes and pearly teeth, complemented with a plump, pretty figure, is ren-tiered more attractive and fascinating when Jessing as a water nymph attired in a "fetching" athing suit. Her less favored sister, however, is not so fortunate, and her every defect is accentuated; but pretty or plain, from present Indications they are all going to learn to swim now that the new Natatorium is open.

Said one young lady to me Friday between the spinshes that she made in her frantic en-deavors to "take the stroke": "Yes, indeed, I am going to learn to swim. 1 am tired of hav ing the young men as the seashore take me upon the beach and say in such a patronizing tone of value: "Now you sit here and watch me swim,' with such emphasis on the me," and the little beauty renewed her offorts in learning the art with such vin and determination that ere the first lesson was over she was able to swim across the pool.

Another young lady seemed very much in earnest, and made rapid progress in her first lesson. She was a decidedly pretty girl, with long wavy auburn hair, and an alabaster complexion that her dark blue bathing suit con-trasted very effectively with. These young la-dies seemed more determined upon learning to swim than upon having sport, although the two are almost inseparable, and made the most remarkable advancement in the art (and neces-sarily in the water) of any who donned the

A same body and a same mind go together, summore has remarked, and if the samity of the mind depends largely upon the sanity of the body, and we know it does, how the swimming, rowing, 'cycling girl is strengthening her mind! She may not have that object in view; indeed I do not think very many of them have; it is

I do not think very many of them have; it is simply the fad and the fashion, and they must heep up with the times, but whatever the ob-ject of the fair one the result is inevitable. One thing should be guarded against, how-ever, and that is carrying the desire to do and be like four or Dick to the dangerous point, as one young lady does in this city who persists, in defiance of all remonstrances from horse car conductors, in jumping on their cars. She, ker-self, is authority for the statement that she thuroughly enjoys looking perfectly indifferent as the car approaches so that the driver will not stop and the conductor's look of sur-rive and wonder as she steps lightly or umbrells completely overshadowing or umbrells completely overshadowing bor, as it has many times during the past week. She has the jumping on down to a science, and will tell you to watch a usa as he steps out and will tell you to watch a man as he steps out and takes hold of the car railing, and see how the motion of the car pulls him right on with-out the least bit of danger; but the conductors do not look favorably upon the innovation; at heast some of them do not, who say, "Miss, don't you ever do that on my car again." And she does, just the same. Thoux BRANCH.
