Week's Run of Cattle at East Liberty Large, but Quality

FAILED TO COME UP TO STANDARD.

Markets Were Slow at a Decline From Prices of Last Week.

SWINE STEADY AND SHEEP HIGHER

WEDNESDAY, June 18, 1890. The receipts of cattle for the local trade this week were 85 loads, about half of which were from Chicago. There were 4 loads from Louisville and 7 from Indianapolis. The balance were country cattle, in the main from Ohio. A large proportion of the country beeves offered were what are termed by the trade early grass cuttle, and are not considered good for butchering purposes. In fact, the quality of this week's run was far below standard, and not nearly as good as the late average. Even the Chiongo eattle were below the average in quality, and the average of late has been by no means high. Market started out Monmeans high. Market started out Monday morning week at a decline of 10c to 15c per cwt from prices of previous Monday, and prices here declined as much more since Monday. A good many cattle were sold on Tuesday at prices 25@30c below what they would have brought at the beginning of last week. The features of the market were much the same this week as last. On Monday morning of last week there was a decline of 10@15c from former prices and the decline gathered impetus until the stock was closed out. There were about two carloads unsold this morning.

The highest prices obtained were not for the heaviest beeves. A few loads of 1.550 m cattle, which were course, did not bring as good prices

which were course, did not bring as good prices s some weighing 1 1:0 to 1,200 fbs, which were in finer quality and better adapted to our local trade. Heavy coarse beeves are in little de-mand in this market. Light tidy butcher stock has saidem of late been in supply up to de-mand. The latter suffered least from this week's drop on account of their scarcity. Good Prices for Good Stock.

Said a leading commission man: "I had no couble getting \$4.65 to \$4.80 for smooth butcher cattle weigning 1,100 to 1,200 pounds, but for a load of beeves weighing about 1,4:0 pounds, a little coarse, all I could get was \$4.50. pounds, a little coarse, all I could get was \$4.50. The general run of the receipts this week were common to medium grades. If there was any profit to shippers it was very small. Pricewere almost the same at Chicago this week as last, and as there was little or no profit hast week, it looks as though cattle dealers must have been playing a losing game this week." Said a prominent cattle dealer: "I cannot see how Chicago bought cattle could furnish any profit to the buyer this week. In fact, it is my my opinion that the shippers lost money."

The run of sheep and lambs has been light this week, and for this reason only markets were firm at a shade better prices than last week. That this was the reason is evident from the fact that markets were slow at live stock centers both East and West. At Herr's Island yards the run was the largest of the season, and markets there were slow and weak. This morning there were a few bunches of very chaice week! season, and markets there were slow and weak. This morning there were a few bunches of very choice yearlings unsold at the Island. But at East Liberty pens were cleared up promptly, owing to light receipts. Hogs have been steady all the week, with Philadelphias selling at \$4.05. Top price in Chicago this morning was \$5.50, according to advices received by one of our pork packers from his agent there.

## RIVER INTELLIGENCE

A Slight Rise Chronicled-Business a Little

More Brisk. Business was a little brisker on the wharves yesterday in consequence of the rise of the rivers. The up-stream business boom appears to be continuing, as the wharf in front of the Brownsville bont was loaded with goods. No coal was shipped, although there is plenty on hand. A few mixed tows went our, and several loats got in with suppass. At about 7 P. M. the Ohio stood 6 feet 5 mehes.

Harrison, 3r., got in yesterday morning; and the W. F. Jenkins, Aurora, City of Nashville and Gus A. Williams departed. THE Pittsburg and Cincinnati packet Hudson,

Captain J. F. Ellison in command, left at 9 r. m. with a good passenger list. THE C. W. Batchelor, with Captain George O'Neal in charge, got in on good time after a pleasans trip from Cincinnati. She brought a big cargo and many passengers.

THE roustabouts are kicking over Chief Brown's

order about stopping river swimming. The right of a river man to sport in the Monongahela has hitherto been regarded as indisputable.

Mr. John McGraw thinks it strange that so little note is made of the oil business around Pample station, on the Pittsburg and Western

Railway. The Bryant well, he states, is especially an object of interest, covering Pine creek with oil before the caps could be gotten into position. He says eight or nine wells will likely be doing big work, or some of them at least, ere long. A Cornopolis Producer.

Oil holes in Coraopolis have so far been rather few compared with the number of derricks erected, but vesterday it was decided that the well in John W. Arras' lot was good for at least ten barrels. File Kendall No. 2 is about due, and is expected to be a producer.

Wilkinsburg Wants Pavements. A majority of the residents of Wood street. Wilkinsburg, have signed a petition to Councils that that thoroughfare be paved with vitrified orick from Penn avenue to the railroad track. Councils are expected to take action at their next meeting on Monday.

## MARKETS BY WIRE.

An Early Advance in Wheat Succeeded by Brenk-Cora Falls Back-Oats Stendy-Pork Quiet and

was quite active, but the market quieted down later, but near the close it livened up some. The feeling early was stronger, though outside prices were not sustained. Influences were rather more favorable to the interest of holders. Some foreign buying orders for futures were received, and New York was reported a buyer and the Northwest covered some shorts. The market opened firm and prices were 1/6 %c higher and ruled firm, and further advanced

and there seemed to be no support to the market.

Corn was moderately active, though at times it was rather active. The feeling early was somewhat stronger and prices advanced from the opening sales, influenced mainly by the purchases of a prominent local trader. A reaction occurred later when the operator above mentioned withdrew from the market, and offerings became more free, due to some extent to the larger estimates for to-morrow, and on executing selling orders for outside account, and final quotations, compared with yesterday, show a net decline of \$46%c.

Outs were active but unsettled. There was a good volume of business in the new crop months, but only moderate trading in the old crop futures. The opening was strong and \$40 %c higher with a good demand. There was interpressure to sell and prices were up \$46%c. There was a decided increase in offerings on the advance. Buyers were not so numerous as they had previously been, a weak feeling developing and prices receded \$60%c. and the market closed steady at about haide figures, but at a slight gain over the last sales of yesterday.

A quiet and firm feeling prevalled in pork

but at a slight gain over the last sales of yester-day.

A quiet and firm feeling prevalled in pork and trading was limited to a few small lots. The few sales reported indicated little change in price, July advancing slightly and the longer deliveries ruling slightly lower.

A fair trade was reported in lard and prices exhibited only slight changes.

Trading in short ribs was moderate, and there were no new features developed.

Beset the Pathway of Real Estate Brokers, Testing Their Patience.

MANY INSTANCES OF BAD FAITH.

Speculative Interests Still in a Hole, With Nothing Cheering in View.

There is more friction between property owners, buyers and agents than is commonly supposed. In discussing this subject yeserday one of the latter said: "We have a hard road to travel. Many people think that about all we have to do is to sit in our offices and receive money. There never was a greater mistake. We do more hustling than any other class of business men, and in many cases without anything to show for it. . We spend considerable of our time in chasing wild geese. I have just returned from such a round. For two or three days I have been trying to sell a house for a man in the Fourth ward. He agreed in writing to accept a certain figure. After nearly running my legs off I found a customer this morning who agreed to take the property at the price named and telephoned the owner to that effect. He replied that he had changed his mind and wanted \$500 more. That killed the deal. I could sue him and recover something, but such a course would cost more in time and trouble than what I would gain would be worth.
"All brokers have experiences of this kind

almost every day, and it requires a great deal of forbearance to keep them out of the courts. Sometimes the owner backs out; sometimes the buyer. It is the hardest thing in the world to bring both parties to the scratch at the same time. That is the reason so many deals are hanging fire. Women are the hardest customers to deal with. They change their minds with their dresses. What they agree to do one day they ignore or forget the next. I sold a property for a lady above Grant street a few days ago, and sent to her for the deed. She sent me a note saying she had concluded not to selt. I spent several days on the job, and will get nothing for it—not even the money I paid out for advertising. We bind our customers as closely as possible by getting written agreements, but still they fly the track and leave us

in the lurch. "There is an exception to the general rule in this respect, which I think will interest the public. I sold a nice property for a lady in one of the upper wards a short time back. When I sent the deed to her to sign she refused. I wrote her a brief and courteous note to the effect that I had been at considerable trouble and expense in the matter, and that if she perand justice. She signed the deed at once and sent it to me, accompanied by a note, saying that she could not endure to repay such honorable treatment with anything resembling a breach of faith, and therefore transferred the title as desired. This leads me to say that even

A GOOD RECORD. Marvelous Financial Growth of Pittsburg

in a Quarter of a Century. Local bankers repeated the familiar story yesterpay—plenty of money, a fair discount busi-ness and rates steady at 667 per cent, the in-side figure being the rule. Checking and depositing were heavier than on any previous day of the week, showing that general trade is losing nothing. Exchanges were \$2,660,420 72 and balances \$493, 483 78.

balances \$403, 483 78.

Manager Chaplin, of the Clearing House, yesterday prepared a statement showing the exchanges delivered by the associated banks of the city of Pittsburg for the month of May, 1856, the first year of the Clearing House, and the same month of the present year: covering a period of 2i years. Nothing could illustrate more effectively the rapid atrides that Pittsburg has taken in business between the two dates. The figures show a growth of nearly 800 per cent. The omission of the Diamond National from the list is due to the fact that its admission to the association was subsequent

National from the list is due to the fact that its admission to the association was subsequent to the year first named.

Figures such as these, which are official and reliable, should open the eyes of the people of the country to the fact that Pittsburg is no longer a provincial town, but a great business and financial center, ranking Baltimore, Cincinnati and New Orleans, and pressing San Francisco very closely. The fact is, Pittsburg is one of the biggest, richest and busiest cities on this side the big water, and it is well enough to let it be known for the benefit of all concerned. The statement is and

Jennings & Co. struck oil at their well, about three-quarters of a mile northeast of Wildwood, inst week, but still had 15 feet of sand to drill, which they started to penetrate yesterday. The well is now making 16 barrels an hour, and is likely to improve. There is no other well within less than three miles. This is, therefore, practically new territory.

SILVER LEGISLATION.

Has Less Effect Upon Wall Street Than Rate Cutting In the West-Some of the Specialties Snowed Under -Gold Exported.

NEW YORK, June 18 .- The action of the na tional Senate upon the matter of silver legisla-tion yesterday was a factor in the stock market this morning for a short time only, and its influence after the first new sales recorded was dissipated entirely. The talk of the day was almost all about the rate cutting and disturbances in the West, and considerable pressure was brought to bear upon the market to ac-company the rumors and stories circulated. The Granger stocks by no means felt the full brunt of the pressure, however, as Reading, Oregon Transcontinental, Sugar Refineries and some of the specialties were forced off mate The local disturbing factor, however, which

The local disturbing factor, however, which undoubtedly had a marked influence in creating distrust was the further engagement of about \$750,000 gold for shipment to Europe, and it was not until this fact was announced that the larger operators began to sell the market short. Other influences also came in to intensify the bearish feeling prevalent among the traders, and chief among them were the continuation of the strike at Cleveland, he apathy of the public and other labor troubles. The feeling over the passage of a silver bill also underwent considerable discouragement as the day wore along, and operators were encouraged to throw their holdings over to a larger extent, which in many cases uncovered stop orders, especially in the last hour. The favorable items of news made seemingly no impression at all, and the fact that the Freight Committee of the trunk lines will hold a meeting to-morrow with a view to settling differences met with no response. Despite the fall in values, however, the returns of railroad-earnings continue to be extremely favorable, as shown in the reports for the second week in June received to-day. Some of the most notable are Canadian Pacific, increased 13 per cent; Milwaukee and Northern, 24 per cent, and Western New York and Pennsylvania, 14 per cent, Milwaukee and Northern, 24 per cent, and Western New York and Pennsylvania, 14 per cent, Milwaukee and Northern, 25 per cent over last evening's figures. The buoyancy, however, disappeared immediately, and prices were quickly brought below these of the opening though the only marked declines at first were in Oregon Transcontinental and Sugar. Later the bears got to work on the whole list and all the active stocks yielded readily, and in the last hour the downward movement was not only general, but rapid, and the losses ranged up to nearly 5 per cent. The close was active and weak at the lowest points. The final changes are all declines, and Sugar is down 2½; Oregon Transcontinental and Sugar. He final changes are all declines, and Sugar undoubtedly had a marked influence in creat-

expense of values, and most of the issues traded in to-day are slightly lower this evening. The sales reached \$1,123,000.

Government bonds were dull and steady.

State bonds dull and steady.

The Post says: The announcement after 1 o'clock that \$500,000 gold had been engaged for export caused a further fractional decline in the stock market, the lowest prices of the day having been made near 2 o'clock. But money was easier in London, bankers' balance being down to 1@1½ per cent, and with the exception of the reported selling of Pennsylvania and Reading, London was a moderate buyer of stocks, which helped to strengthen the market a little in the last hour. The room traders here, however, were bearish, partly on the possibilities of trouble among the trunk lines, and partly on the theory that the Senate voting on the silver bill had gone to such an extreme as would compel the President to veto the bill, even if the House passed it. Just before the close also \$255,000 more gold was taken for export, making \$265,000 for the day and \$2,254,000 since last Thursday. This weakened the market still more, and some of the large operators immediately began to sell Oregon Transcontinental, Atchison and Reading short and all these declined 1 to 1½ per cent in the last hour. The close was steady.

The following table shows the prices of active stocks on the New York Stock Exchange yester-

Country Produce-Jobbing Prices.

Country Produce—Jobbing Prices.

New potatoes are moving freely at quotations. Supply of strawberries was large today, but all good stock was promptly taken at a range of 5 to 10c per quart. Raspberries are slow. The first blackberries of the season put in their appearance from Baltimore to-day, and sold at 15c per quart. Guaranteed eggs are firm at outside quotations. Country butter is dead stock, but choice Eigin creamery is firm, and an advance of 1c per pound will be due on dead stock, but choice Eigin creamery is firm, and an advance of 1c per pound will be due on Friday. Quality of cheese coming to market of 1ate has very much improved, and for this reason prices are steady. Eastern and Western markets are a shade firmer. Grass cheese is beginning to show up and is in good demand. An advance of 1/3c per pound is reported from the West on account of improved quality, Supply of Swiss cheese is not up to demand and markets are very firm. Prices of domestic and markets are very firm. Frices of domestic Sweitzer are usually 3 to 4c per pound below present rates at this time of the year. The season is fully three weeks behind the average time on account of backward spring. Lemons are active and firm and prices tend upward. Oranges are steady and bananas easy. BUTTER — Creamery.
