by planters, and the results have been in

belief that an enormous industry could soon

The product from the cultivated caucho,

being clean, is of much greater value than

that of the tree in its wild state. It has

been pointed out that the whole secret of

successful rubber gathering is accessibility.

White men in the Congo region are not a

success. Black men in that region are not

hard workers, and will always be shiftless

and unreliable. On the other hand, were these forests in Central America, along the

line of railroads, help could be obtained easily, and with proper care the laborers could be kept tolerably healthy. One of the most important matters in connection with the Amazonian rubber trade, as it is also one of the most important problems in

also one of the most important problems in South America, is the linking of Manaos

with the outer world by telegraph, Manaos

is at the head of navigation on the Amazon for regular ocean-going ships. It is the natural center for the trade of eight great

Brazilian rivers, as well as for the immense

region of Eastern Peru, and these eight rivers drain the best rubber districts. There

is a splendid field here for Americans, who should hasten by establishing lines of com-

munication to make the enterprise their

own, for there is little doubt if it is not done

by America it will at no very distant date

The operations in the woods connected with the gathering of rubber are very crude. First the tree is tapped, and the exuding milk is collected. The inclsion is no deeper

than the bark, and the receiving cups, of about half a pint capacity, are fastened just below the wound. The milk is taken at once to the camp, where it is smoked ever a

fire of palm nuts. The fire is built on the open ground, or within a little crib of green sticks, and the milk is poured upon a round stick or paddle blade, and passed through

the pungent smoke. This operation requires

great care, otherwise the rubber, instead of becoming a homogeneous gum, will be coagulated in part, which reduces the prod-

coagulated in part, which reduces the product to an inferior grade. The reputation which certain rivers possess for sending good rubber to the market depends almost entirely upon the ability of those who do

The Panama Hat.

The leaves of many palms are largely em-

ployed for making hats. The Panama hat,

which is the best known, and which is so

called from being shipped from that port, is

made from the finely plaited fiber of the

leaves of the South American screw pine.

These hats are much prized for wear in the

tropics, being light and flexible and easily washed and bleached. Beyond this they possess a very important recommendation in a climate where sunstroke has to be guarded

against. In the better qualities the plaiting is so close that the sun cannot strike through

Samuel Briggs, of Cleveland, O. The subscribing Nobles of Syria Temple, of this city, are getting everything in readiness to give the visiting Nobles such a welcome as only Pittsburgers can give. That the meeting will be of unusual interest is of that order as it attested by the numerous temples from all over the country which will be represented. | initiated is that / Kismet acree, of Brooklyn, N. Y., is of a politico-remaking elaborate arrangements for the trip, ligious society. It The members of that Temple leave Brooklyn this morning on a special train. to be known as the Kismet and there are hid-Temple Limited, which will consist of a den meanings in

combination baggage and smoking dining car, three parlor cars observation Car. The idea is to

make the run from Brooklyn to Pittsburg in daylight, leaving Jersey City at 8:45 A. M. and arriving here at 7:30 P.M. They have engaged quarters at the Monongahela House, and will

be met at the de- Thomas J. Hudson, pot by the Reception Committee of Syria It is the present arrangement of Kismet Temple to return to their homes, leaving here Tuesday morning and taking dinner at Cresson, where they will remain for three hours. This temple will be under the charge of Illustrious Potentate Wayland Trask, who will respond to a toast at the dinner tendered the Imperial Council to-morrow night at the Monongahela.

Information received from Washington, Baltimore, Philadelphia, Cleveland, Cincinnati, Richmond and other cities indicate similar programmes on the part of the differ ent Temples, so that it is fully expected this will be one of the largest bodies of Shriners that ever

came together at a special meeting. The arrangements for the entertainment of the visiting nobles are about complete, a reception to the officers and deleontes to the Imperial Conneil, commencing at 7 P. M. in the spacious parlors of the Monongahela House to-morrow evening. cers of the Imperial Council who are expected to

participate in the reception are as follows: Samuel Bricgs, Imperial Potentate, Cleve-land, O.; Henry E. Hosley, Imperial Deputy Potentate, Boston, Mass.; William R. Melish, Imperial Cnief Rabban, Cin-cinnati, O.; Colonel Thomas J. Hud-

cinnati, O.; Colonel Thomas J. Hudson; Imperial Assistant Eabban, Pittsburg; John G. Brush, Imperial High Priest and
Prophet, Indianapolis, Ind.; Bruce Goodfellow,
Imperial Oriental Guide, Detroit, Mich.;
Joseph S. Wright, Imperial Treasurer, Philadelphia, Pa.; Frank M. Luce, Imperial Recorder,
Chicago, Iil.; William H. Mayo, Imperial F. C.
M., St. Louis; Wayland Trask, Imperial S. C.
M., Brooklyn; Cyrus W. Eaton, Imperial Marshal, Cedar Rapids, Ia.; Edward Cuip, Imperial C. of the G., Saina, Kan.; Charles L. Field,
Imperial O. G., San Francisco; Cal. and Theodore Elmendarf, Imperial Assistant Guard,
Cleveland, O.

Other temples are expected, but have not yet sent word of their coming.

After the reception the Imperial Council, with the representatives to that body, will

be tendered a complimentary dinner, which most elaborate dinners given at the Mononganela for years. Covers will be inid for · 3 · 6 about 250. The menu sud menu cards are works of art. No expense has been spared to make //. this dinner engant in every particular. The floral decorations 1 be responded to by eloquent gen-

serent parts of the Country.
On Tuesday the Imperial Council, the Temple, with their ladies, will be tendered an excursion up the Monongahela river. An elegant lunch will be pro-vided by the Monongahela House, and flowers and music will lend an additional charm. The business sessions of the Imperial Conneil will be held in the banquet room of the Monongahela House, and will likely be in business session only one day.

The entire expenses of the entertainment are borne by the contributing members of Syria Temple. Each contribution entitles a member to a sent at the dinner. The con-tribution is put at \$25. The seats for the dinner are about all gone.

The order of the Nobles of the Mystic

Shrine was instituted by the Mohammedan, Kalif Alee (whose name be praised), the cousin german and son-in-law of the Prophet Mohammed (God favor and preserve him!), in the year of the Hezira 25 (A. D. 656), at Mekkah, in Arabia, as an inquisition, or vigilance committee, to dispense tice and execute punishment tice and execute punishment upon criminals who escape their just deserts through the tardiness of the courts, and also to promote religious toleration among cultured men of all nations. The original intention was to form a band of men of sterling worth, who would, without fear or favor, upon a valid accusation, try, judge and execute, if need be, within the hour, having taken precaution as to secrecy and security. The "Nobles" perfected their break lasonry in the United States, was organization and did suchprempt and primarily adopted by the Imperial Grand

John T. Brush Allah (whose name be exalted!). The secret and real purpose can only be made known to those who have encircled the mystic thrine according to the instructions in "The Book of the Statutes and Regu-lations of the Imperial Grand Council." Its membership in all countries includes men of all taith and men in high positions of learning and of power. One of the most noted patrons of the order is the Khedive of Egypt, whose inclination toward Christians is well known. The Nobles of the Mystic

Shrine are sometimes mistaken for certain orders of the dervishes, such as those known ing the coming as the Hanaseeyb, Rifaceyeh, Sadireeyeh and others, either howling, whirling, dancing or barking; but this is an error. The only connection the order ever had with any Mystic Shrine sect of dervishes was with that called the into the easis Bektash white hats. This warlike sect unmay be looked dertook to favor and protect the Nobles in a counted among its most honored patrons.

The Nobles of the Mystic Shrine are emicasion being a nent for their broad and catholic toleration.

The finite cannot define the infinite, although it may be conscious of its existence.

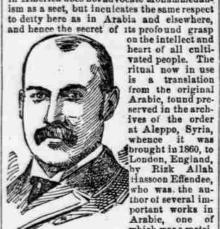

appears to the unis really more than such a society could be; its simplest sym-bols that take hold

Bruce Goodfellow. on the profoundest depths of the heart. For example there are rays of light about the sphinx and pyramid. Each ray is numbered and has its appropriate signification. In general, light is the symbol of intelligence. Through intelligence the world is governed, and the spread of knowledge renders crime and meanness unprofitable, and, through the scheme of the order, impossible for the crim-inal to escape a just punishment. Among the traditions of the order occurs this very significant record: "In no single

instance has the government of any country ventured openly to oppose the silent, secret workings of the 'Nobles,' although the secret agents of the Government are always present and exercise a careful surveillance in every 'Mystic Temple.'

The leading spirits of the order are found in every circle of the higher classes, even including the functionaries of Government, and exert an influence in proportion to their position, dangerous to the vicious, beneficial to the virtuous. The order of Nobles of the Mystic Shrine

in America does not advocate Mohammedanism as a sect, but inculcates the same respect to detty here as in Arabia and elsewhere, and hence the secret of its profound grasp on the intellect and heart of all cultivated people. The ritual now in use

from the original Arabic, tound preserved in the archives of the order ppo, Syria, brought in 1860, to London, England, assoon Effendee thor of several important works in Arabic, one of which was a metrical version of the book of Job. His

Frank M. Luce. book of Job. His "History of Islam" offended the Turkish Government because of its humanitarian principles, and he was forced to leave his native country. He was a ripe scholar in Arabic poetry and the general literature of the age, and his improvements in the diction of certain parts of the ritual of the Shrine temple are of great beauty and value.

The constitutional authority for promulgating the principles and practice of the order was confided to Dr. Walter M. Fleming, 33d degree, and his associates, A. L. Rawson, 32d degree (Arabic translator). William J. Florence, 32d degree, Edward Eddy, 33d degree, Daniel Sickels, 33d degree, Charles T. McClenschan, 33d degree, John

W. Simons, 33d degree, Albert P. Moriarty, 33d depres, Aaron L. Northrop, 33d degree, Sherwood C. Campbell, 32d degree, Oswald Merle d' Au-bigne, 32d degree, James S. Chapbigne, oz.

they excited alarm and even consternation in the hearts of the evil-doers in all countries. The order is yet one

Pianist. Following are Cyrus W. Eator biographies in brief of some of the more im-portant officials who will be the guests of the

portant officials who will be the guests of the city for the week:

Samuel Briggs, \$3d degree, of Cleveland, now Imperial Grand Potentate of the Imperial Council, has been a Mason for 25 years. He was advanced to the grade of Inspector General of the \$3d in 1885. He established Al Korau Tample of the Shrine in Cleveland in October, 1876; this body being the first in the United States to confer the degree in accordance with the original translation of the Arabic ritual. He has been Grand Potentate of the temple from its inception to the present time.

William B. Melish, Grand chief Rabban of the Imperial Council, has been a member of the Bissonic fraternity since 1878. In the Hanselmann Commander, Past Eminent Commander, Past Master of Council of Royal and Select Masters, and at present Senior Warden of Lafayette Lodge No. 81, F. and A. M. He received the thirty-third degree in the Ancient Accepted Scottish Rite in 1885 and is the city for the week: and more profitable than the whole of the Congo region. Orchards of considerable size of the Caucho a tree of rapid growth, have already been planted and cultivated every way so satisfactory as to induce the

ple at New York, and the world-wide popularity of the order and the spread of its influence is largely due to his personal energy and determination. The interests of the shrine in America have largely occupied his working hours for the past 15 years, and he has now the satisfaction of seeing, as the results of his labors, tempites established in the 13 States and the dozen members of the order in 1871 increased to over 5,000 in the present year.

Henry E. Hosley, Imperial Deputy Potentate, of Boston, until the present year has been the Potentate of Aleppo Temple of that city. He is an active officer of the Imperial Council, a 22d-degree Mason and prominent in Templar and Masonic bodies in Boston.

Thomas J. Hudson, Imperial Assistant Rabban, is a resident of this city, a 32d degree Mason and knight Templar; has been potentate of Syria Temple during the past seven years. He has been an active member and officer of the Imperial Council also for seven years. He has been Chief of Artillery of the National Guard of this State, on the Governor's staff, since 1883, and until recently was assistant postmaster. During his leadership Syria Temple has increased from a membership of 80 in 1883, when he was elected as its chief officer, to the present membership of about 650.

John T. Brush, Imperial High Prophet and Priest, of Indianapolis, is Potentate of Murat Temple of that city and a 22d degree Mason and prominent in other Masonic bodies in Indiana, He is a leading merchant in Indiana, Sean of

sive wholesale clothing establishment and prominent in Masonic circles.

New Method of Covering Pulleys An important improvement has been made in the covering of pulleys, by which, it is claimed, 50 per cent more power can be A. J. PENTROOST,
Austioneer, 618 Grant st. an imperceptible factor. This system con-

sists in the employment of a specially pre-pared leather covering for the pulley, which is extremely soft and elastic and never glazes by the rubbing action of the belt, as is the case when ordinary leather is em-ployed for this purpose. It is applied to the pulley and held firmly to it for all time by means of a special cement, which is soft and never hardens, like ordinary cement or glue. No rivets of any kind are employed, but the leather covering is firmly attached to the The World Must Look to the Americas in Spite of Stanley's Find. USE OF ELECTRICITY IN TANNING. leather covering is firmly attached to the iron of the pulley by the cement alone.

Automatic Closing of Elevator Doors. A simple and inexpensive construction has been devised for automatically operating the sliding doors guarding the exposed landings of passenger elevators, and by means are held positively closed, except the door at the particular landing where the car is stopped. The car can thus be moved from a remote landing and brought of which all the doors in the elevator shaft a remote landing and brought to any other, above or below, closing the door of the landing it leaves, without requiring the services of an attendant on the car. The apparatus may be readily applied to all elevators, old or new, where the doors slide on rollers, and can be easily manufactured and put in place by any good mechanic.

Horse-Tall Protectors.

A recent patent enables a horse's tail to be kept at all times as trim and neat as a fine lady's coiffure. This patent is entitled the horse-tail protector, and consists of a short bar with two heads or buttons on the ends, to which is attached a rubber cord, having at each end elastic sockets corre-sponding with the buttons. The idea is to allow of the horse's tail being twisted round into a knot, which is firmly held by the pro but saves an immense amount of combing and brushing, which is so destructive to the

New Oil Shell. The recent invention of an Austrian engineer is an improved shell for containing oil to be fired by ships in bad weather, in order to calm the waves around or ahead of them. It consists of a wooden cylinder, lined with shellac to keep the oil from penetrating the wood. The shell also carries a phosphide of calcium light. When fired from a mortar, provided for the purpose, the light discovers its position and the oil, displaced by the water, sheds itself over the surface of the sea.

Height of Luminous Clouds. A series of investigations and experiments have been conducted in Germany during the past year with the object of determining the height of luminous clouds, and a large number of photographic im pressions have been secured. From t ese a valuable fund of information on cloud phe-nomena has been gained. The result of comparing the various results obtained at different observatories goes to show that these clouds have the extraordinary altitude of 5134 miles above the sea level.

The American Paper Trade. country has been making tremendous strides during the last few years. The industry has been brought to such a high state of development and the production reduced so much in cost by improved machinery and the successful use of wood pulp under a special process that a large export trade has been established, particularly with England. A market has also been found in Australia and elsewhere.

A Chance for Inventors. What is badly needed at the present time is a satisfactory method of measuring the exact amount of energy delivered by the electric stations to the electric railway companies. An instrument which will measure and register on "watt hours"

Gas Lighter for Railway Carriages. the carriages. It is a tube running along the top, open at each end and filled with gas from the holder. A flame is applied at the and kindles all the roof lights.

will be an interesting work, both to city authorities and electrical engineers throughout the country. It will be an overhead storage car railway. The columns are 18 feet apart, and the roadbed will be 22 feet above the street. On top of this will be laid the rails on which the electric storage cars are to be run. Hose Mender.

An acceptable accompaniment to the garden hose, which is apt to break or leak at such inopportune times, is a simple hosemender, which consists of a metal tube to put inside the hose, bands to bind the bose to the menders and pliers with which to

UNDERWRITERS' SALE!

BOOTS AND SHOES!

SLIGHTLY SOILED BY WATER.

On the night of June 14 fire played havee in our block. The store adjoining was destroyed, and our place was inundated. The heroic efforts of the fire department saved us from entire destruction and our goods were disfigured, but their wearing qualities remain unimpaired.

ity, if the stock had been injured by direct contact with fire. The stock offered for sale includes all manner of goods for men, women and children. The the present when the "brand is plucked from the burning," and shoes which can be utilized at

These goods won't last long with the rush we always have; therefore come early and secure

The stores are cleared for action and extra help secured, so on TUESDAY, JUNE 24, be gins the greatest sale of the season.

REMEMBER THESE BOOTS, SHOES AND SLIPPERS are all choice goods, rendered mewhat unsalable by damage from water. Their wearing qualities are as good as ever.

LAIRD'S NEW RETAIL SHOE STORE. NO. 433 WOOD STREET.

Stores, Nos. 406, 408 and 410, we are obliged to throw this new stock of Sample Shoes, which was bought for both stores, into one store. Therefore on Wood street the public will find us full ;

These Shoes include everything that Ladies, Gentlemen, Boys and Children need. They are new goods, right from the manufacturers' hands this season, and only show the marks of having been handled. Remember the factories only select the best kind for samples, and among them

are found the cream of the market. We have had Sample Sales before, and the public knows what advantage it gained through them; but this scale is on a larger scale; fuller and richer pargains than ever shown before. expect them to be picked up quickly. We know how quickly, by the way people appreciated

IT POSITIVELY CLOSES ON JULY 5.

On account of our semi-annual inventory beginning on that day. Former experience, however, leads us to believe that we will put none of this stock on our books at stock taking.

summer and fall supplies may be lost.

W. M. LAIRD

Mrs. Josephine Myers, wife of Mr. Jacob Myers, a well-known citizen of Allegheay county, and who has lived for the past 20 years at Glenfield, has experienced such suffering as few persons have and live. She had an almost endless number of conditions, among which were a dropping of catarrhal mucus into her throat, where it became very tenacious and hard to raise, and in the night on awaking it would so suffocate her that she could scarcely get her breath. She had much soreness in the side of her neck and threat. She had pain side of her neck and throat. She had pain

NOTHING LIKE SUCCESS

to Succeed.

The hundreds of patients who have testified

n this paper to cures made by the physicians

of the Catarrh and Dyspepsia Institute at 223 Penn avenue, were those who had suffered

from catarrh in its most aggravated, chroni-

form, and which in some cases had developed into consumption. The testimonials published

have always been followed with the name AS SIGNED BY THE PATIENT, so as to post-tively prove their genuineness even to the most skeptical. What better evidence can be given

skeptical. What better evidence can be given than to refer you to hundreds of patients who have been cured of diseases like your own? The Catarrh and Dyspepsia Institute, established two years ago, is the only institution in Pittsburg for the exclusive treatment of Catarrh, Dyspepsia and Diseases peculiar to Women. Its patronage is rapidly increasing, and from early in the day until late at night the parlors are filled with patients.

Thought She Could Not Live.

Mrs. Josephine Myers.

over her eyes, and her eyes became very weak. She often felt dizzy and had noises in her ears that sounded to her as if she had a steamboat in her bead. As the disease finally extended to her lungs, she coughed, her broath became short and she felt a tightness in her chest and aching pain between her shoulders. Her appetite failed, and her stomach became so weak that food or even water would cause a heaviness and burning in her stomach followed by nausea. She had pains across the small of her back and kidneys. She became bloated and took on a dropsical appearance. Nightsweats weakened her very fast. She could not sleep and would arise in the morning more tired than on going to bed.

THE FOLLOWING ARE HER OWN

THE FOLLOWING ARE HER OWN WORDS:

"Although I had doctored a good deal I got no better. Some doctors said they could do nothing for me. I became discouraged and thought I never could be curred and that I would not live over a year. One day I happened to see in the paper an account of the suffering of Mrs. Bratt, of Verner station, which seemed something similar to my suffering, and how she became curred by the physicians of the Catarrh and Dyspepsia Institute. This gave me some hope, and I therefore took a course of treatment from these doctors and have been entirely cursed of all my aliments.

"MRS. JOSEPHINE MYERS."

From the Troy, Kan., Chief. 1 mode. The saving of time is not the only advantage gained; it is no longer necessary We have occasion to use but little of the numerous medicines advertised in our pa-per; but we have found one to fill the bill of what is claimed for it, and take pleasure in saying so. That is Chamberlain's Colic, to take into account the interest on the cost of the goods lying idle in the pits, while the quicker turn over of capital offers already a Cholera and Diarrhosa Remedy. Some years ago we were very much subject to severe pells of cholera morbus; and now when we feel any of the symptoms that usually precede that ailment, such as sickness at the stomach, diarrhea, etc., we become scary. We have found Chamberlain's Remedy the very thing to straighten one out in such cuses, and always keep it about. It is some-what similar to the usual cholera cures, but seems to contain ingredients that render it more pleasant to take, and that do their work more quickly. Sheriff Devereux tells us that he is subject to cholera morbus, and recently felt a spell coming on, when he ob-tained a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy, and two doses made him all right. We are not writ-

Cleaning Files by Electricity. The file manufacturers are not disposed to regard with much complacency the recent application of electricity to the cleaning of files, by which process the tools are made virtually as good as new. After being cleaned and wetted the files are dipped between two carbons into acidified water, and the circuit of an electric current is established by means of a piece of metal upon which the file rests. The water is decomposed by the

the Himalayas have appeared distinct and clear 224 miles off.

file rests. The water is decomposed by the current, the oxygen acting upon the cuttings of the file, while the hydrogen bubbles settle in the teeth and protect them against the action of the acidulated water. The file is then brushed to remove the oxide of iron, and immersed in an alkaline bath to remove all trace of the acid, and the process is com-

So effectually does that incomparable medicinal defense fortify the system against the combined influence of a malarious atmosphere and miasma-tainted water, that protected by it the pioneer, the miner or the tourist provided with it, may safely encounter the danger. quality of the leather tanned by this process, it is stated that all the requisites of solidity. fineness and suppleness, which are the neces-sary qualities of the best leather are re-tained.

Range of Sight. A discussion has been going on of late concerning the distance at which large objects on the earth's surface are visible. Emile Metzger mentions that he once saw Keizerspickt, in Sumatra, when separated from it by a distance of 110 English miles; he also states that on very favorable occasions he has seen Guy Merapi, in Java, 180 miles away. Mont Blunc has been seen at various times at distances of 120 and 180 various times at distances of 120 and 180 miles. Whymper, the explorer, when in Greenland saw plainly a mountain peak from which he was separated by 150 miles. The whole range of the Swiss Alps have been looked upon by Hippisly at a distance of 200 miles, and Sir W. Jones affirms that
