On the Hitherto Wild and Unexplored Reservation of the Navajo Indians.

The Government Will Force the Prospectors From Their Newly-Found Field of Operations.

A REMARKABLE DISCOVERY OF SALT.

No Decrease in the Product Throughout the Entir Mineral Belt.

PEPECIAL TELEGRAM TO THE DISPATOR. New York, June 22 .- The following re ports have been received from the various

mining centers:

DEADWOOD-A number of English investors in the Harney Peak Tin Mining Company are now at Hill City looking over the property and closing up the deals on various mines on which the company has bonds. Accompanying the party is Mr. Wilson, an originator of the company, and also Prof. Riatte, of New York. They travel from point to point in a seated conveyance, and are apparently taking a great deal of pleasure along with their business. The company have an air compressor in one of their mines called the Cresar, six miles this side of Custer. The ore in this mine was first found at the top of the mountain; the drills were then put to work about half way down and a tunnel run in about 400 feet, when the same ore body was found. Machinery was then placed at the base of the mountain, where another tunnel is being driven. The ore is this claim is said to be the richest yet found in the district, and from present openings it is said to be a true fissure, the width of which is yet to be determined. Work on the company's properties at Hill City con-tinues unabated. Considerable ore is being taken out of several claims, which is put in bins for future treatment. Several new buildings are in course of construction in the town, and business men seem to be pros-Of all the camps in the northhills, the Galena seems to be most flourishing. Parties visit-there say the town is lively, that a considerable amount of work is being done by the mine owners. The Corris developing a magnificent mine. A carload of high grade ore was shipped to Omaha a few days ago, and two carloads to the Deadwood smelter for treatment. The Cora promises to be one of the best paying mines in the Black Hills before long. The Mer-ritt continues in successful operation with the jigging process. Every day shows new activity at the Big Missouri. The day and night shifts are kept constantly at work, and the present force will be increased as fast as the demand requires. Twenty stamps of the Plums mill began dropping on ore from this mine. Seven four-horse teams are kept busy hauling ore. The first clean-up was so satinfactory that it was determined to reduce the ore as fast as possible. The Burlington and Missouri Railroad and the Elkhorn road are both rapidly nearing Deadwood. Probably 2,000 men are at work on these two lines in the Black Hills,

Need of Rain in New Mexico. SILVER CITY-Only one of the seven mills at Pines Altes is now running on full time. The others are not doing as much altogether as one mill could do running steadily, and the water supply is continually de- | sults will be of great value. creasing. The need of rain was never felt more in this part of New Mexico than it is now. A water supply sufficient to run most of the mills at Pinos Altos through such a season as this could be obtained, but the companies, with one exception, have not seen fit to incur the expense of getting such a supply. Not more than 200 men are t work in the camp, and this state of inactivity will continue until there shall have ever before. The report of the prospecting party which succeeded in remaining on the Navajo reservation for about three weeks. and locating a number of claims before they were driven off by the military, has excited prospectors to such a degree that Colonel Carr, commanding officer at Fort Wingate. has caused a warning to be published for the benefit of such persons. The Colonel says: "I hear constant rumors of an intention of a party to again invade the Navajo reservation. My orders are to remove the prospectors and keep them off. Citizens have no shadow of right to intrude, and I hope to be spared the troublesome, as well as painful and disagreeable duty of removing them. I would greeable duty of removing them. I would much rather protect white against Indian than Indian against white, and this is the first time I have been required to do so in my 40 years' service. All honest and sensi-ble citizens must realize that I am obliged to obey my orders and perform my duty." Although prospectors who have been on the reservation have told wonderful stories about the richness of the ore discovered there, it is quite probable that no party will undertake openly to invade the reservation under the present circumstances.

An Interesting Discovery of Salt.

VIRGINIA CITY-Some interesting discoveries have been made in the salt mountains on the banks of the Rio Virgin, an affluent of the Colorado, in Lincoln county. These mountains cover an area of 25 miles, extending to within seven miles of the junction of the two rivers, and the salt they contain is pure white and clearer than ordinary glass. It is said that a slab eight inches thick is so clear that a newspaper can be read through it. The salt lies in great drifts under a layer of sandstone varying from two feet to eight feet in thick-ness. The depth of the deposit is not known, but a single blast of giant pow-der will blow out tons of salt. Under the cap rock have been found charred wood, matting, and other camp signs, per ectly preserved by the salt, evidently relics of prehistoric man. A company has been formed in the East to work the bed of the Carson river for sulphurets and quicksilver that have run through the mills. The dirt will be taken out with a scoop dredge and sluiced for the metals, and as it assays from \$2 to \$5 a ton, the work can be made profitable if done on a large scale. A good ledge has been struck in the Monarch Chief tun-nel, Sweetwater district. The ore assays from \$24 to \$150 in gold. The Monte Cristo tunnel is being run to cut the same vein.

A Large Increase of Shipments.

DENVEB-It had been supposed that there would be a small falling off in ore shipments last week from Aspen, but, on the contrary, there was a large increase. The increase of more than 1,000 tons for the week is partly accounted for by the fact that a number of partly filled cars which had been held over were sent out during the week. The heavier producers did not make much of a showing, but a large number of small properties are becoming regular shippers, their combined product footing up to a large figure. Senator Bowen has just re-ceived from E. Burlingame a check for \$800 in payment for one sack of 84 pounds of Galconda ore from Summitville district. This is at the rate of \$19,000 per ton. Senator Bowen says the Galconda never looked hetter than at present. The strike recently made in the Richmond is rapidly proving to be one of the best ever made in the Rico district. White the pay streak at present is not so large as those in other veins opened on Newman Hill, the richness of the ore makes the property equally as valuable. The leasers estimate that the first shipment will average over \$300 per ton, although numerous assays run all the way from 250 to 2,000 and 4,000 ounces silver per ton.

A Great Revival to Arizona. Tucson-The mining industry of Ari-

zona has certainly revived greatly during the last year, and still continues to go ahead with energy. The latest deal is the sale of with energy. The latest deal is the sale of the famous Harqua Halfa mines, in Yuma county. The deal has been conducted very quietly, and it was not until this week that the sale had actually been confirmed, money paid and all papers signed. As is well known to most of the mining men of Arizona, the group of mines has been owned by C. H. Gray, Frank Kirkland and Thomas Corcoran, of Phosnix, and A. G. Hubbard, of Redlands, Cal. These gentlemen, all of whom are practical miners, have been at work for the last year doing development work and putting the mines in such shape that anyone could see what they contained, that anyone could see what they contained, and have so well done their work that the purchasers can now see what they have in sight. The apparent purchaser is J. C. Peacock, of Phonix, but it is generally un-derstood that he was the agent of capitalists

of California, who will at once begin opera-tions in good shape. The price pald was all Pennsylvania newspapers, briefly setting out the scheme and asking their co-operation.

Millions Walting for the Right Man. IDAHO CITY-Owners of mines in Sheep Mountain and Seafoam districts are preparing to carry on operations on an extensive scale this year. Several of them passed through here a few days ago on their way to those districts. They own good mines that are well developed, and will resume ore shipments as soon as the wagon road from Salmon river to Ketchum is passable. Mill-ions of wealth are in the beds of Mose and Elk creeks, and, from present indications, will continue there for many years. Several companies have been organized to work the beds of those creeks by means of bed rock flumes, each making a great talk of what it was about to do, but doing nothing. We are anxious for some solid company to get hold of the enterprise, one that is not afraid to put up a little money and push work to completion. When this is done millions

A Period of Expensive Idleness. SAN FRANCISCO-Work has been resumed on the Banner mine, Butte county, after a period of expensive idleness. The mine had filled with water, and just as the men were getting it clear the New York owners sent peremptory orders to shut down the mine. The suspension of work allowed the mine to fill again, and it will cost more to pump it out now than it would to have kept it clear. The Oroville Mercury says, with some asperity: "If Butte County mine owners who live in San Francisco, New York and Europe, would leave the management of mines more in the hands of their agents here, and give fewer such orders, the mines would pan out better."

A Counte of Good Mines. COLVILLE-The old Dominion mine has 2,300 tons of \$90 rock on the dump, and several hundred tons of \$150 ore on hand. The Bonanza is delivering 20 tons of ore per day at the smelter. A vein of pure white silver has been discovered near here, but the extent of the deposit is not yet known. Dr. Crook and Bull have found a free milling quartz lode on the Crane creek that produces 3% cents to the ounce of rock. An iron mine yielding 60 per cent of metal has been found on Umptannum creek, near Ellensburg.

Valuable Ores in Connecticut. NEW HAVEN, June 22 .- Some excitement is manifested in Woodbury, in the western part of Connecticut, over the discovery of traces of valuable ores. Lead has been found on the farm of William Allen in quantities yielding an average of 1,500 ounces to the ton. Interspersed with this is silver which assays nearly 25 ounces to the ton, while there are also indications of gold. The land where the discovery has been made is being dug over and it is believed the re-

THE TIN TARIFF SHOULD STAND.

So Says Mr. C. R. Andrews, the Mahoning Valley Coal and Iron Ploneer.

PERCIAL TELEGRAM TO THE DISPATORLY Youngstown, June 22 .- C. H. Andrews, the pioneer of the coal and iron business in the Mahoning Valley, was asked tobeen a good rain. Most of the mines in the Pinos Altos district are looking better than velopment of the ore business, and said: "The coal and ore trade is growing very rapidly. The shipments of ore have increased until last year it jumped to 7,000,000 tons and it will be but a few years until from 10,000,000 to 15,000,000 tons will be landed at lake ports. The demand is in-creasing by reason of the erection of furnaces, and more will be erected through the Mahoning and Shenango Valleys. The coal trade is increasing and large shipments are being made to the Northwest and

> The sooner we build a steel plant here the better. We can make steel as cheaply as anywhere and the rolling mills would take the entire product. The duty placed on tin by the McKinley bill should stand, as it would greatly benefit the country, causing the erection of rolling mills and employing thousands of men."

The Growth of Kenyon Military Academy. The number of boarding pupils at this school for boys at Gambier, Ohio, has increased more than 300 per cent in four years. Its excellencies are becoming widely known.

PENNSYLVANIA'S SONS TO FORM A PERMANENT ORGANIZATION

IN CHICAGO. Society Already Numbering Over 400

Former Residents of the Keystone State -Its Alm and Objects-A Scheme to Further Promote Its Usefulness. PRECIAL TELEGRAM TO THE DISPATCE.1

CHICAGO, June 22 .- There is a scheme on foot to make the Chicago Society of Sons of Pennsylvania a permanent organization, with a regular clubhouse, to serve as a headquarters for all present or former residents of Pennsylvania residing in Chicago or occasionally visiting the city. The plan has not yet fully matured and has never been broached at any of the regular meetings, but it has gone so far that circulars have been printed, to be mailed to the editors of

It is proposed that any person who now resides in Pennsylvania, or once lived there, may become a member of the society upon paying in his initiation fee of \$1 and an annual fee of the same amount. In return for this, the society will extend its hospitality to all non-resident members when visiting the city, will furnish them with accurate and full information as to the cost of board and lodging, and furnish an attendant to see that they are properly cared for. The theory is that very many people will visit Chicago with whom money is an object, and by telling them at once upon their arrival the cost and location of private boarding houses in the various sections of the city the correlation. boarding houses in the various sections of the city, the organization will save them very much more than it will cost. By gathering together Pennsylvanians from all over the West, it would be invaluable as a means of extending the acquaintance of the visitor. He would "stand in" with a large number of people whom it would be very desirable to know. The matter has been informally laid before a number of well-known Pennsylvanians who have been well-known Pennsylvanians who have been in Chicago within the past few weeks and has met with the unqualified approval of most of them. It is believed that an aggregate of 100,000 members might be obtained, including non-residents of course, and the organization might be made a very effective means of promoting the great interests of Pennsylvanians in the West. At present it has a membership of over 400, all residents of Chicago, and it meets on the second Thursday of each mouth in one of the club rooms of the Palmer House.

Catarrhal Dangers.

To be freed from the dangers of suffocation while lying down; to breathe freely, sleep soundly and undisturbed; to rise refreshed, head clear, brain active and free from pain or ache: to know that no poisonous, putrid matter defiles the breath and rots away the delicate machinery of smell, taste and hearing; to feel that the system does not, through its veins and arteries, suck up the poison that is sure to un-dermine and destroy, is indeed a blessing beyond all other human enjoyments. To purchase im-munity from such a fate should be the object of all afflicted. But those who have tried many remedies and physicians despair of re-SANFORD'S RADICAL CURE meets every

NEW ADVERTISEMENTS QUEEN VICTORIA

NOTHING LIKE SUCCESS cian Recommended It. The London World has been making an in to Succeed. vestigation of what the Queen drinks, and has ascertained definitely that, upon the advice of The hundreds of patients who have testified in this paper to cures made by the physicians of the Catarrh and Dyspepsia Institute at 323 Penn avenue, were those who had suffered from catarrh in its most aggravated, chronic form, and which in some cases had developed into consumption. The testimonials published Sir William Jenner, she drinks whiskey diluted in water. This is for the purpose of retaining her vigor, renewing her strength and prolong-ing her life. The whiskey which she drinks is obtained from the distillery on her own Bal-moral estate, and of course is perfectly pure. Thus the World offers a valuable suggestion in this fact: England's sovereign drinks whiskey under the recommendation of the court physi-cian and on account of its medicinal properties, and she drinks it absolutely pure, having it distilled upon her own estate. These facts prove two things: First, that all modern medical scitwo things: First, that all modern medical sci-ence demonstrates the superior value of whiskey for sustaining the health and prolong-ing the life; and, second, that it must be abso-lately pure. The leading American physicians and chemists have indorsed these views con-stantly and emphasized the necessity of having whiskey that is absolutely pure. The best medical and chemical talent in America has Thought She Could Not Live Mrs. Josephine Myers, wife of Mr. Jacob Myers, a well-known citizen of Allegheny county, and who has lived for the past 29 years at Glenfield, has experienced such suffering as few persons have and live. She had an almost endless number of conditions, among which were a dropping of catarrhal mucus into her throat, where it became very tenacious and hard to raise, and in the night on awaking it would so suffocate her that she could scarcely get her breath. She had much soreness in the side of her neck and throat. She had pain shown conclusively that no whiskey known in shown conclusively that no whiskey known in the market is so pure as Duffy's Malt. It is wholly free from fusel oit, it is unlike all other so-called whiskier, and it is doing great things for the health of the community. So true is this that, while many temperance people de-nounce whiskies and liquors in general, they acknowledge the superior merit of Duffy's Malt, and use it medicinally continually. Great care should be exercised, however, to secure no other, no matter how hard a dealer may seek to

over her eyes, and her eyes became very weak. She often felt dizzy and had noises in her ears that sounded to her as if she had a steamboat in her head. As the disease finally extended to her lungs, she coughed, her breath became short and she felt a tightness in her chest and aching pain between her shoulders. Her appetite failed, and her stomach became so weak that food or even water would cause a heaviness and burning in her stomach followed by nauea. She had pains across the small of her back and kidneys. She became bloated and took on a dropsical appearance. Nightsweats weakened her very fast, She could not sleep and would arise in the morning more tired than on going to bed.
