Enights of Pythins.

The encampment of Fythian Knights in Mil-wankee next month promises to be one of the proatest secret society demonstrations ever seen in this country. The organization is based on established military principles and governed by rigid military discipline and the most apby rigid military discipline and the most ap-proved military tactics. It will, therefore, be a monster military pareant. The estimated ex-pense for camping accommodations and enter-tainment has been placed at §5,00. Of this sum §6,500 will be distributed in prizes among the competing divisions of the Uniform rank. The struggle for these prizes will be an exciting feature of the occasion. Eight prizes are offered for preficiency in drill: one for the best Division Commander; one for the division traveling the longest distance from its home, by the shortest railroad route to Milwaukee; one for the best exemplification of the ritual-istic work of the Uniform rank; one for a battalion drill composed of four or more divi-sions, and three band prizes are offered that will be sure to attract considerable attention in manical tercles. be sure to attract con isiderable attention in

THE NEWS AND GOSSIP OF THE CITY

Business in real estate is holding un beyond precedent. Like the Norse-leech's daughter, buyers are continually crying for more. Summer sales so far are the largest on record, and are at least 50 per cent better than those for the same time a

year ago. Values are steady. A few owners of choice properties are holding out for an advance, but the majority are satisfied

with present figures. The movement last week, while it presented no sensational features, was admira-

It is a gratifying fact that but few of the

buyers are professional speculators. They are bankers, manufacturers, merchants and arti-sans, who have faith in the future of the city and are willing to risk their money in land, which is the basis of all prosperity. This gives tone and character to the marker, lifts it above

mere merchandise, and furnishes a guarantee against a reaction, or even a halt.

In regard to price changes, they are too small to possess much significance, and are more ap-parent than real. Gains and losses during the week were confined to fractions, with the former in the majority. The closing as com-pared with that of the previous week, showed a decline of ½ in Philadelphia Gas and ½ in Orner 1 Traction. Citizeus was ½ better and Pleasant Valley unchanged. Luster improved ½ Yankee Girl mining stock was strength-ened by a report that the mine will soon pass into the hands of an English syndicate. As interest in the purely speculative stocks subsides, investment shares find more favor. There were bidders yesterday for nearly all the banks, the majority of which showed steady appreciation, and there was an active outside indury for bonds. This shows that money is says, and that investors want to put their share of it where it will do the most good—not forgetting real estate.

Cream of tartar and bicarbonate of soda, in their proper proportions, have been recognized for more than fifty years as the standard for leavening purposes, and now these ingredients, with a small quantity of flour or starch added to preserve the mixture, in the form of a pure cream of tartar baking powder have almost wholly superseded yeast and the old methods of producing pastry, hot biscuit, cake, etc.

The manufacturers of Cleveland's Superior Baking Powder have for a score of years adhered to the use of the above ingredients, and these only, and have thus made it the recognized standard for a pure cream of tartar powder. The recent report of the United States Government

> Chemist shows CLEVELAND'S SUPERIOR BAKING POWDER RICHEST IN CREAM OF TARTAR AND SODA and HIGHEST IN LEAVENING POWER of all the pure* cream of tartar baking powders examined. See Bulletin No. 13, Department of Agriculture, Washington, D.C. The baking powder nearest to Cleveland's in strength was found to contain .98 of ammonia.

The Canadian Government Report of 1889, as well as the Reports of the Food Commissions of Ohio, 1887, and New Jersey, 1889, confirm the fact that Cleveland's Superior Baking Powder is the richest in cream of tartar and richest in leavening power, and, therefore, absolutely the best of all the cream of tartar baking powders.

* Norz .- A pure cream of tartar yowder contains only the ingredients above named. When alum is used it is classed as an "alum powder"; when ammonia, an "ammonia powder." All ammonia and alum powders, no matter how high their strength, are to be avoided as dangerous.
