WHO IS RESPONSIBLE?

The Weary and Despairing Workers Keep Bravely at Their Task-Dangers to the Rescuing Party-Only Smoke From the Form Hill Mine.

ISPECIAL TELEGRAM TO THE DISPATOR 1 DUNBAR, June 29.-The miners are still digging in the coal. The second entry for which they are driving may be struck at any time, for the party are where the map of the Farm Hill mine says it should be. No one says openly that the map of that mine is entirely wrong, but nearly everyone believes it. The rescuing party has now driven nearly forty-five feet from where the first entry should have been struck, and as yet no signs of the place have been found. A consultation of the mine inspectors was held some time during the night or day. It was informal, but none the less suggestive when relieved by the day operator at that. The topic discussed was the dead faint changing of the course. Inspector Keighley has been urged to change the course of the line he is driving. Some of the inspectors

He said to-night; "I think it best to go straight shead. The Hill Farm mine map has misled us. There is no doubt about we may not. We are liable to strike through at any time if the room is there." "Whose fault is it, Mr. Keighley, that the mine map was not correct?

time this evening, because it was thought they were nearly through, but about half an hour later they all went in. The carpenters were busy building up the casing around the fan, and the heavy doors made to shut off the air were all taken in the mine. Everything is ready for the break through, should it come.

The flames have quit coming out of the Hill Farm mine. A little smoke is oozing out. This is plain evidence that the slope has caved in. Unless the smoke and gases generated by the fire seek the level of the higher Ferguson mine, the rescuing party will have great difficulty in getting through. The chances are that the Hill Farm mine will fill up with smoke after the Ferguson has been choked up. The great danger the men who are working now is that of being cut off by the smoke.

These were the great points of danger during the exciting times of Friday night, when it was thought the break had been made. This was the mistake of the driller.

Everybody is growing very weary. Men are still found to fill each shift, but they are not as plenty as they were one week ago. The inspectors are keeping up by sheer will power, and not one of them has had over two hours' sleep a day since the work began.

The interest in the surrounding country still continues, and the two excursion trains which passed through here to-day left hundreds of visitors. The number of vehicles present at the mine was nearly as large as on last Sunday, and the crowd present was estimated at from 3,000 to 5,000 people.

At this time all confidence has been lost in the maps of the Farm Hill mine. Yet the miners know that they are now near the main slope. The whereabouts of the branch-ing rooms is no longer taken and account. The workers know that they must strike something within six hours. PEPECTAL TELEGRAN TO THE DISPATOR.

ERIE, PA., June 29 .- Miss Ida Wakely, he handsome night telegraph operator at Swarville station, on the Nickle Plate road, is the heroine of a terrible thrilling encounter Saturday night. When Miss Wakely took her position at the little out-of-the-way station she realized the danger to which she would be exposed from hordes of tramps which follow the road from east to west, and had not only armed herself but practiced with the revolver until she became quite an expert. Shortly after midnight, and at an hour when there were but tew trains, the young lady heard some one at the door, and nd later a villainous face appeared at

The fellow demanded admittance and The fellow demanded admittance and was refused, whereupon he came back with a large lump of coal and threw it against the window, crashing the lights, and then made a break for the opening. Just then Miss Wakley flourished her revolver and ordered the villain to retreat. He stopped to parley, saying, "You would not shoot," and just then the brave young woman took deliberate aim. The burglar hid his face and withdrew his head from the opening in the window, but did not leave, while the handsome young woman held at bay the handsome young woman held at bay the desperado, who drew a knife. She used her other hand to call the next station, where a train was side-tracked, and to her joy she caught the operator, whom she informed of her situation. The engine was detached, and with the crew aboard, ran to the young woman's rescue. While the crew was coming to the young woman's relief, the burglar tried to induce her to hand out the contents of the safe, and made blood curdling threats, but when the engine with the crew turned a short curve, the burglar ran away in time to escape lynching. The night was too much for Miss Wakely and

CARLISLE, June 29 .- John Kampfer and his wife resided in Milltown, in what is known as Renn township, where crime runs high among the desperadoes of that wild country. Kampfer is an employe of that. We may strike the second entry and the Harrisburg and Potomac Railroad, and for some time has been on intimate terms with Bertie Stringfellow, and from that intimacy he now lays in the Cumberland County Jail charged with the high crime of murdering his wife by administering some unknown deadly drug. On Thursday morning last the murderer's wife complained of not being well and in ormed him of he illness. He administered to her at 6 o'clock a dose of laudanum and a patent medicine and remarked that she would be better in a few minutes, and in a half hour afterward sions and twitching of the muscles. Abou half an hour before she died she remarked: 'I believe John has carried out his threat and poisoned me."

Mrs. Williams, a neighbor, and who was at the Kampiers' residence on Thursday morning, remarked to her brother, W. A. McCoy, of this city, that he had threatened her on several occasions. That he would put her out of the way, and has treated her in a brutal manner for years. The start-ling facts were made known to her brother, who made an information before Justice Allen, of this city, charging him with murdering his wife. Officers Humer and James, of this city, went to the scene of the murder and brought Kampfer and placed him in jail. To-morrow her remains will be disinterred and a postmortem examination be held.

The political organization of both parties have open doors, and nothing is being left undone to make the stranger feel at home.

As yet but very few of the delegates have arrived, but the several candidates have opened their headquarters, which are being looked after by their friends. William E. The Pattison forces unhesitively dealers that they applied the William tatingly declare that their candidate will be nominated on the second ballot, while the Wallace forces, with an air of confidence, say that Pattison cannot come within 50 votes of winning the nomination.

A new feature of the contest for the nomi-nation brought to light this afternoon is the belief among a number of those already on the ground that neither Wallace nor Patti-sen will secure the nomination, and that a new man will have to be nominated in order to have the party present an undivided front at the fall elections. PRPECIAL TELEGRAM TO THE DISPATCE.1 MCKERSPORT, June 29.-This afternoon about 12:30, Frank Ralston was probably fatally shot at the boarding house of Mrs. Fay, at the foot of Center street, by Patrick Byerly, a son-in-law of Mrs. Fay, and a fellow boarder at the house. Ralston was wounded in the stomach and right shoul-

ver, and the attending physicians believe the wound is fatal. After committing the deed Byerly left the house, ran down the river shore a few hundred wards, and rowed to the opposite shore of the Monongahela, from which he made good his escape. The police were close after him, but on reaching the river could obtain no skiff, and were unable to continue the pursuit until Byerly was lost in the woods.

Officers are still in pursuit, and as telegrams have been sent to various points it is hought impossible for him to escape. The iouse, besides being used for hotel purposes, is a speak-easy, and a row occurred there last evening, in which Ralston and Byerly had ome warm words, but did not come to blows. The trouble was renewed to-day at the dinner table and half a dozen of the boarders took part in the fray. MILLIONS OF MATCHES

Destroyed in a Sunday Fire in One of the [SPECIAL TELEGRAM TO THE DISPATCH.] BERGEN POINT, N. J., June 29 .- For nore than three hours this forenoon the Bayonne fire department and the fire department of the Standard Oil Company's establishment at Constable Hook fought fire in the Diamond Match Company's factory at the Hook. Several of the com-panies reached the fire after runs of from two to four miles. Heavy clouds of gray smoke and sulphurous flames had enveloped the factory by the time they arrived. It was a two-story brick structure 40 by 60 feet. The firemen prevented the blaze from spreading to the adjacent buildings, and

with the assistance of the brick flooring confined it to the second story, which they The firemen hurled tray after tray of blazing matches into the water with their bare ands. First ward tenants of the Schenley estate are alarmed over the interview with Mrs. Schenley, in which that lady talks of tearing down the houses they have built, to erect on their sites more valuable buildings. They protest against being made to move unless they are recompensed, and many refuse to leave the ward at all. Chief Bigelow hints of another surprise from Mrs. Schen-

The publication yesterday of the cabled interview with Mrs. Schenley, by ta staff correspondent of THE DISPATCH, in regard to the Schenley property at the Point, caused considerable surprise among the residents of the First ward, who are tenants of the estate. Mrs. Schenley told the correspondent who journeyed to see her that she would pull down the old rookeries at the Point, and in their stead would erect large warehouses for business purposes, Her statements back up what her son hinted at while in this city, some months ago, but Mrs. Schenley could not have reckoned that she would have trouble getting the residents

out of what she terms the "old rookeries." The interview with Mrs. Schenley was the topic of conversation in nearly every house-hold in what is known as "the Point." strictly speaking. In the afternoon a DIS-PATCH reporter visited the First ward to ascertain the views of the residents. Everyone met was talking of it, and any number of opinions advanced as to whether Mrs. Schenley will evict them or not after April

1 next. GETTING QUITE NERVOUS.

Down on Water street, below Penn avenue where the second stories of the houses bend over, kiss and shake hands with the sidewalks, the residents were gradually being worked into a state of nervousness over the prospect of losing their homes. In the row reside Messrs. Welsh, Stix, Flaherty, Sullivan and Walters, Mr. Stix has rosided in his present place of abode for more than 50 years, and the idea of losing the old homestead is not a comforting one. The people interviewed said they had been liying there all their lives, and as they owned the dwellings, they would not vacate without being properly recompensed pense they had gone to in putting the buildngs on the ground. If any attempt was made to evict them. they said, the results of this practice in Ireland would not be a

marker to what would take place in Pitts burg, as soon as it is tried. Alderman P. J. Donahoe, of the First ward, lives on Penn avenue, within the Schenley lines, and was encountered talking to a number of residents who had sought his counsel. When the matter was broached by the reporter, and the latter saked what

FEARS THERE WILL BE TROUBLE. "If any attempt is made to evict the people I honestly believe there will be trouble. I do not know what Mrs. Schenley intends to do about recompensing the people, but unless some provision of that kind is made I fear many unpleasant things will happen.

The old people down here will ary about it, and with heavy hearts go out to seek a shelter where they can find it. With the younger people it will be different. They will fight the matter and resist every effort to get them out of the houses. There are about 50 old men here who I could also name about 25 widows in the ward who have nothing but the little houses years of careful saving, and it would be inhuman to turn the people out because tenants at the Point, and the houses they own could be easily bought for \$125,000. If she wants the people to get out, I think she will see the justice of paying the tenants what their houses are worth, and to get at the valuation I would suggest that appraisers be appointed for that purpose. I would favor the scheme of having Mrs. Schemley

select a man, the tenants another, and the

two select a third. They should take each house in ture, and it would not take them

long to go over the entire list.

NEW YORK, June 29 .- At the service o-day in the First German Presbyterian Church, a choir composed of Sunday school teachers took the place of the Neander choir. A representative of the paster said 'We did not expect the old choir, nor do we want it. We can well do withou it." At a meeting of the members of the Neander choir, held at Deacon August Tiernann's house, the trouble between the pastor and the choir was discussed, and his statement that the choir was in the habit of collecting money on Sundays in the choir loft of the church, and going with it to a place in Ewen street, where a keg of beer would be purchased and drank, was denied. "The whole trouble," Deacon Tiernann said, "arrises from Pastor Hebr's jealousy. He would like to be as well liked as the old pastor, the Rev. Mr. Neander. He says that Mr. Dietrich shook his fist in his face. Mr. Dietrich denies this, and we believe him. We love the Church, and as it is the

She could do nothing with the houses, but they are above all value to the people living in them. The tenants have made the improvements, and with every improvement there came an in-crease in the ground rent. The people also pay the taxes and water rent, and Mrs. Schenley pays nothing. The majority of the buildings are nest and comfortable and have been erected out of the hard-sarned savings of poor washerwomen.
