Oliver, the boat builder and capitalist, seemed to take his part in the affair rather Seriously, but McCaffrey and McAuliffe bore the ready smiles of old-timers, and were not to be dis-turbed by such proceedings. These things are the natural incidents attendant upon a fistic cureer. Both were gorgeonsly dressed. Mc-Auliffe's get-up would have done credit to Berry Wall, but the glory of his wonderful trouzers was offset by the rather faded appear-ance of his little pink boutonniere. He said he was a broker (that means a bookmaker), while McCaffrey said he was "in the show business" at present. Justice Patterson had them all ined up before him and each one pointed out. "Which is the 'knocked out' and which is the 'knocker out?" he asked, and Murphy and kelly were again pointed out. SPECIAL TELEGEAM TO THE DISPATCH.

CLEVELAND June 29 -It is learned to-night that a great effort has been made to transfer the Brotherhood ball games for the morning and afternoon of the Fourth of July to Philadelphia. The National League club will be in this city on that day, and it has been urged that both associations cannot play to good crowds. and Chicago, Cleveland, however, will not make the change. It is generally understood here that after the Fourth of July games the price of admission to all National League games will be reduced to 25 cents. To-day at Recreation Park the New Yorks will appear for the first time this season. Mr. Day has a great aggregation of talent with him. Pitcher Rusie is a host in himself, and although the Cincinnatis knocked him out of the box Saturday that won't often happen this season. While the local men will not break his heart, they are just as liable to thump him

pretty hard as not. To-day the team will put forth the great and only "Smiling Mickey" Welch, and the Pittsburge will have Kirtly Baker in the box. The chances for first-class sport are very prom-ising. Hurd, Hecker, Gombert and Bowman will probably pitch in their turn this week.

This vaccine, however modest may be the part that it will take in future vaccinating, cannot fail to play an important role in the prophylaxis and extinction of the smallpox curse, on account of the complete safety that can be relied on its use. From the facts and reflections that are con-tained in M. Hervieux's paper we can make the following deductions: First-If a goat is inoculated with vaccine, coming from the calf, or with human vaccine, the effect of this inoculation is just the same as that of calf vaccine. Second-Vaccination from the goat to a per-son's arm succeeds perfectly on condition that the inoculation be made as soon as the vaccine all the characters of classical vaccine. Third-The inoculation of goat vaccine that has been kept succeeds just as well as calf vac-cine when it is made of lymph.
