MEXICANS SMELTING THEIR OWN ORE

Or Sending It to be Worked in Europe Eather than the United States.

IMPECIAL TELEGRAM TO THE DISPATCE. NEW YORK, June 29 .- The following reports have been received from the leading

DENVER-Reports from Leadville are encouraging. There is considerable activity at the Whiteeap ground. The shaft is being retimbered, preparatory to resuming sinking. In the Miama property work is being done on the levels only. The best mineral comes from the first level, which is down 800 feet, and a nice vein of good mineral has been opened up. Large quantities of mantaken out of the Catalpa and Crescent properties. The Cherman Lode on Mount Eibert is being steadily developed by an incline of 75 feet and then a tunnel, which is run in about 125 feet along the vels. This is a fissure in the granite, and it carries gold, silver and lead in considerable quantities. The Sunset, James G. are looking particularly bright, and prom-ise that further development will bring these prospect iedes to the front as good producing claims. Lembertine is enjoying producing claims. Lembertine is enjoying a healthy boom, free from great excitement, and is destined to become one of the most productive districts in this State. The ore is silver of a high grade, and found in large streaks in fissure veins of unusual width. The Lamartine mine was the first paoducer, and has turned out about \$1,000,000 in the past 18 months. It was until recently worked by lesses, but the owner is now opening new ground. There is more and better ore in sight than ever before. Work better ore in sight than ever before. Work is progressing smoothly on all of the Ute creek properties. The water which occaweeks ago has all disappeared. Ore was encountered in the Union on Wednesday, and there is every indication that the streak vill improve as sinking continues. The Union is an extension of the Financier, which lode extends into the side line of the Lamartine claim. Hinsdale county is showing more signs of life than it has since 1882. There are 57 producing mines in this country, and 30 or them are being worked country, and 30 of them are being worked with success to-day. In time past when they were worked they produced more high-grade ore in proportion than any other mining district in the State. Still it is asserted that this is a low-grade ore camp. This is largely true when we develop and take out the immense hodies of lead-bearing silver ores. These low-grade mines have been lying dormant for years on account of the expensive transportation to market, and the high-grade ores were shipped from 300 to 400 miles to market by wagons over the

serted that the purchase money for the group of mines owned by Fish-Lacy and others in the southern part of the county has in real ity been paid, and the money deposited in bank in New York City. A large number of men have been sent to the Ray mine in Pinal county and there are good prospects of the sale of that extensive property to the West-inghouse Company, of Pittsburg. Charles Marsden has struck it rich at Harshaw on silver and lead, and it is said he is making \$100 a day clear. The Tucson smelter has made a contract for 1,000 tons of ore per keep it running all the time, the first week's run proving so successful. It is shut down this week, owing to the non-arrival of coke from Texas. The San Navier ore from Texas. The Ban Xavier ore, which has proved so rebellious here-tofore, is now being worked successfully by Mr. Gooding. The slag which used to freeze on them comes out as free as the matt does. The return from the last car of ore from the Wedge, the property of Eills & Co., of Olive Camp, gave a result of \$1,570. Some fine specimens of silver, copper and gold ores were shown in this city this week from the ranch of Hiram Stevens, about thirty miles South of Tucson, which sell not at the smelter at Pueblo for \$278 per ton. This is clear of the expense of mining, shipping and smelting. The ore assays from 350 to 500 cunces to

Smelting Their Ores at Home. BILVER CITY-During the two weeks ending June 21 the importations of silver coin and bullion from Mexico through El Paso amounted to \$314,383, while for the same period the importation of silver ore amounted to but \$23.095. Importations of lead amounted to \$10,274. These figures show that the Mexicans, instead of shipping their ores to the United States for treatment, are shipping builion and either treating their ores at home or sending them to Europe for reduction. The high price of copper is causing considerable attention to be is causing considerable attention to be paid to copper properties in Southern New Mexico. Operations are being vigorously pushed at Hanover in the Anson B mine, where a smelter of 30 tons capacity has recently been put up. It has just been blown in. The Bierra Verde Company, which owns about 20 copper cisims in the Burro Mountains, 15 miles from this place, has done nothing but assessment work since 1883. This company did a large amount of work and has a good plant. Their claims cover a considerable portion of the copper district in the Burro Mountains, though there are several other good claims in there are several other good claims in that vicinity. The mines at Pinos Altos are being put in good shape so that the mills can be started up on full time as soon as the rainy season sets in and a supply of water can be obtained sufficient to keep them running. Such a scarcity of water as as now has never before been known in Pinos Altos. The losses on the Golden Grant and Esperanza mines, both on the Golden Giant lead at Pinos Altos, are getting good ore, and the outlook is very encouraging for that part of the camp. There are several other claims on the same lead, but none of them has been developed so extensively as the Golden Giant.

Incrensing the Field in Idaho. IDAHO CITY-This week I paid a visit to the Washington mine and mill, in Gambrinus' district, ten miles north of this place. . The main shaft, which is sinking in the middle of the gulch, so as to open more stopping ground, is down 145 feet. When 200 feet are attained another drift will out the vein, opening the mine at the dapth of 100 feet below the lowest present workings. On the 100-foot level a body of very rich gold ore was discovered a few days ago. It is eight feet wide, with the precious metal plainly visible all through the rock. The mill, which runs only in the day time cleaned up \$4,000 last evening from a five days' run. This makes a yield of \$18,000 for 22 days' run with a ten-stamp mill, which is an exceedingly good yield. Next year an old Market st., Pittsburg. Brice children.

addition for treating silver ores will be put in, when the clean-ups will be very large, as the argentiferous are much the richest, with thousands of tons in sight. The Washington, during the past two years, has devel-oped into one of the great mines of Idaho. Taking the silver ores into consideration there is enough in sight to keep a large mill running for years to come. The owners expect to pay up all expenses incurred in developing the mine and building the mill before the close of the year, and have a few shekels left for themselves.

Yield of the Comstock Mines. VIRGINIA CITY-The bullion yield of the Comstock mines for the last week is reported as follows: Consolidated California and Virginia, \$47,326; Savage, \$11,448; Hale and Norcross, \$14,951; Chollar, \$8,727; Yellow Jacket,\$10,200; Crown Point,\$16,896; Yellow Jacket, \$10,200; Crown Point, \$16,896; Overman, \$5,460; Alta, \$6,209; Justice, \$4,400; total, \$125,618. One pound of gold was extracted from 37 pounds of ore re-ceived from Silver Glance district, Esmeralds county. The Ely district, White Pine county, is attracting a great deal of attention and promises to become one of the big mining camps of Nevada. The Joanna mine, which has been but little more than prospected, has produced over \$20,000, as high as \$15 being washed sometimes from one pan of dirt. The Rob Roy yields from 50 cents to \$2 per pan, and the owners of the 50 cents to \$2 per pan, and the owners of the mine are now putting up a Huntington mill that will work 20 tons per day. All the ore in this canyon is a decomposed quarts and is very easily mined.

Handleapped by Deep Snow. SAN FRANCISCO-The Iowa Hill mines, in Placer county, were handicapped by the deep snow last winter, but most of them deep anow last winter, but most of them managed to pay expenses, and some did even better. The Drummond mine is producing ore to the full capacity of the mill without working a night shift, and the whole body of ore yields \$5 a ton. The Pioneer, Red Point and May Flower are doing well. An unfavorable report of the I X L claim, in Nevada county has induced the company that bonded it to quit work, after having paid \$6,000 of the purchase money, built an eight-stamp mill, constructed rods, etc. The owners of the claim, to whom it reverts, will continue the work, and experienced miners say their

work, and experienced miners say their chances for success are good.

Valuable Ladges in Lower California. BAN DIEGO-Reports from Camp Alamo, Lower California, show that the ledges are holding out and that most of the mines are more than paying expenses. During the past year nearly \$1,000,000 have been taken from the mines, and 1,500 men are now at work in the neighborhood of the camp. A work in the neighborhood of the camp. A specimen of quartz from a recently discovered pocket is full of free gold. At least one-fourth of the specimen is gold, and it is worth \$50. Another rich crevice was discovered a few days ago by a man named Albright, about ten feet from the road, and in ground that has been tramped over by everybody in camp. One piece of rock, weighing about a pound, taken out by Albright, contained a half ounce of pure gold.

A SHIP LOAD OF SLAVES.

low the Negroes Lived on their Trip Freu the Land of Their Birth. Dr. George Howe writes in July Scribner n an article entitled "The Last Slave Ship,"

s follows: During the embarkation I was enraged separating those negroes who did not appear robust, or who had received some trifling injury in getting on deck, and sending them to an improvised hospital made by bulkheading a space in the rear of the by bulkheading a space in the rear of the forecastle. The negroes, as they arrived, were stored away by the Spanish mate; so that when all were aboard there was just room for each to lie upon one side. As no one knew what proportion the men were, all were herded together. The next morning the separation took place; the women and girls were all sent on deck, and numbered about 400. Then a close bulkhead was been considered a drawback. It is now asserted that the purchase money for the group

lence of any kind was necessar The negroes were now sent on deck in groups of eight and squatted around a large wooden platter, heaping full of cooked rice, beans, and pork cut into small cubes. The of flour or other barrels, leaving about four inches of the staves. Each negro was given a wooden spoon, which all on board had amused themselves in making during our 40-day trip. There not being room on deck for the entire cargo to feed at one time,

ONE OF NATURE'S WEAVERS. The Wanderful Nest Built by the Baltimore Orlole is the Trees. beribner's.

The skillful nests of the vircos have yet their matchless pattern in the work of that prince of weavers, the "hang-bird," or Baltie more oriole, whose swinging, pendulous nest is a masterpiece, not only of textile art, but equally of constructive skill, whether from an engineering or architectural point of view. What sagacious perception of means and intelligent discrimination in their employment are here disclosed! The trite maxim that "the strength of a chain is only that of its weakest link" would seem, on a superficial glance at the nest, to be en-tirely ignored by the oriole, the attachment of the nest often seeming to exhibit a daring dearth of material and in singular coutrast to the elaborate density of the weaving be-

A closer examination, however, shows a most sagacious compensation in the economy of this apparently weak portion, for here it will be found in almost every in-stance the toughest fibre in the entire nest stance the toughest fibre in the entire nest has been concentrated, in most cases that have come under my observation; and in three specimens now before me, consisting of remnants of strings, fishline, strips of cloth securely twisted and looped around the forked or drooping twigs, the loose endabelow being intricately interwoven among the gray hempen fibers of which the body of the nest is composed, the whole structure being literally sewed through and through with long horsehairs.

The Mexican Government Never Consent to

CITY OF MEXICO, June 29.—The reports to the effect that President Dias had vetoed a bill for the establishment of a lottery at Tia Juana, Lower California, are incorrect. The Mexican Government never consented to hear of the subject, notwithstanding the efforts of the influential persons connected

Rubber Planting a Success

CITY OF MEXICO, June 29 .- The experimental rubber planting in Chiapas is giving fine results. A representative of an English company at Merida is preparing to buy lands in Yucatan for henequen culture on a large scale.

The Absent-Minded Great Man. The professor, drawing a letter out of his pocket: "It is very strange. I'm sure I put this letter in the letter box, but," searching further, "goodness graciousl where's my handkerchief?"

NEGROES SOLD AT AUCTION.

Story of Wrong. RALEIGH, N. C., June 28 .- William Hill and party of negro "exodusters," who left New Hanover county for Arkansas, have just returned. They make affidavit as to their treatment there and their story is to their treatment there and their story is a horrible one. There were 600 of their party and all had been promised good wages. They were virtually sold to a labor contractor, who, when he was notified by the poor negroes that they could not work for 50 cents a day, said that was all he would give. He seized all their personal effects. Some families were put in horse stables and others in old outhouses, while some had to remain on the banks of the river without shelter. All were guarded like criminals, and revolvers were drawn on

like criminals, and revolvers were drawn on them to force them to terms.

They were within twelve miles of Louisi-ana, and were unable to get on the steamer ans, and were unable to get on the steamer without a pass. They got away and went to another point, where they were halted by men armed and mounted, who demanded where they were going and by whose authority. The last sale of these people was made in Louisiana by a man named Williams, who sold 600 of them for \$5,000.

DIED FROM DRINKING WHISKY.

Boy le Given an Overdose to Satiste His

BIRMINGHAM, ALA., June 29 .- Howard Russell, 7 years old, living at Forest City, near here, had often taken whisky in medical prescriptions and, thus acquired a taste for the liquor. His stepmother, learto break off the desire for whisky by giving him a surfeit.

She furnished him a pint or more and told him to drink it all, 'He did so, and his death followed in about 24 hours in splits of the efforts of the doctor.

KANSAS VS. ORIGINAL PACKAGES, Attorney General Reitogg Asked to Repre-

sent the State, TOPERA, KAN., June 20 .- In respons to a letter from Prosecuting Attorney R. B. Weish, of Shawnee county, Governo Humphrey has directed a letter to Attorney General Kellogg, instructing him to appear before the Circuit Court of the United States and represent the State of Kansas in the original package cases.

NEW ADVERTISEMENTS.

Doctors Had Failed. Doctors Had Failed.

Of the hundreds of patients who have testified in this paper to cures made by the Catarrh Specialists, perhaps none have been more remarkable than that of Mrs. Josephine Myers, of Glenfield, Allegheny county. She had an almost endiess number of conditions, among which were a dropping of catarrhal mucus into her throat, where it became very tenacious and hard to raise, and in the night on awaking it would so suffocate her that she could scarcely get her breath. She had much soreness in the side of her neck and throat. She had pain while traveling during the war. This practice has further developed into the universal American habit of drinking ice water on all available occasions. So universal has this become that it may be called our national habit,

available occasions. So universal has this become that it may be called our national habit, and it has begotten a craving for ice water that is quite appalling. The introduction of the water-cooler in offices is bad. Most water is filled with the germs of disease, and its cold action on the stomach checks digestion, lowers the tone of the stomach and brings about dyspepsia, with all its attendant ills. This evil, which is the cause of more summer sickness and kidney disease than any other known cause, can readily be avoided by mixing a little pure whiskey with the drinking water. Thus the stomach can be stimulated into healthy action and its tone retained. Not only this, but pure whiskey mixed with the water kills the germs of any disease that may be lurking in the water, and thus avoids malaria and the thousand ills which come during the heated term. But, while whiskey is a great benefit, it must be pure whiskey, and unfortunately there is little pure whiskey, and unfortunately there is little pure whiskey in the market. There can be not the slightest doubt, however, as to the absolute purity of Duffy's Pure Mait. It has stood the test of time. It is used by the leading men and women of the land. It is so pure in its nature that it cannot harm even a child, and is doing more than any one thing to check summer dangers. Be sure to secure the genuine. Insist on having no other.

Mrs. Josephine Myers.

over her eyes, and her eyes became very weak. She often felt diszy and had noises to her ears that sounded to her as if she had a steamboat in high head. As the disease finally extended to her langs, she coughed, her breath became short and she felt a tightness in her shess and aching pain between her shoulders. Her appetite falled, and her stomach became so weak that food or even water would cause a heaviness and hurning in her stomach followed by fausen. She had pains across the small of her back and hidneys. She became bloated and took on a dropsical appearance. Nightsweats weakened her very fast. She could not sleep and would arise in the morning more tired than on going to bed.

THE FOLLOWING ARE HER OWN THE FOLLOWING ARE HER OWN

THE FOLLOWING ARE HER OWN WORDS:

"Although I had doctored a good deal I got no better. Some doctors said they could do nothing for me. I became discouraged and thought I never could be cured and that I would not live over a year. One day I happened to see in the paper as account of the suffering of Mrs. itratt, of Verner station, which seemed comething similar to my auffering, and how she became cured by the physicians of the Catarrh and Dyspepus Institute. This gave me some hope, and I therefore took a course of treatment from these doctors and have been entirely cured of all my alments.

"Signed with my own hand.

"MRS. JOSEPHINE MYERM."
