STATE OF TRADE ACROSS THE WATER

SPECIAL TELEGRAN TO THE DISPATOR 1

NEW YORK, July 3 .- The Iron Age of this date quotes the following: American Pig-The market has been very quiet during the week, the only feature being the lessening influence of Southern iron which have been sold heavily during the past month or six weeks in the West, and are pressing less in this quarter. The miners strike, which affects all the free labor in the coal mines of the Birmingham field, will cut down production very sharply, the only company not affected being the Tennesee Coal, Iron and Railway company, se far as the production of pig iron in Birmingham is concerned. For some time past some of the Northern irons have led the market in this vicinity. Forge iron, of standard quality, has sold this week at \$15, detivered, while No. 2 has sold at \$16 and No. 1 at \$17 50@17 75. We quote No. 1 Northern iron, \$17 50@18 50; No. 2 \$16@17, and Southern iron No. 1, \$17@17 50; No. 1 soft, \$16 50@16 75,

A somewhat significant transaction is the resale abroad of a lot of 1,000 tons of German spiegel at figures better than any which could be realized in this market. Noninally quotations here are \$30.50@31 00. In ferro a moderate amount of business is being done at \$72.50@76 00 for 80 per cent, according to time of delivery. to time of delivery.

Billets—Western makers report that they are in receipt of quite a number of inquiries from Eastern points which they interpret as meaning that Eastern mills are closely sold up. There can be no question that the majority of Eastern mills are holding at figures equal to parity of Western prices, and in some cases about that. Still 82 can be done easily, and it about that. Still \$52 can be done easily, and it is reported that \$11 50 might be accepted. Wire Rods—The strength of the Western mills is reflected by higher asking prices on the part of Eastern works who quote \$45 60245 50 at seller's mill. With a decline in Germany, and the advance here, the markets are approaching me another and at least so far as the scaboard is concerned we are approaching the danger line. In Germany basic rous can now be purchased at 1 15 marks per 1,000 keg for fives. This would make the cost of foreign about \$46 600046 50, ex-ship.

Steel Rails—The only sale of any magnitude is a lot of 10,000 tons to the Manitoba road by an Eastern mill at private terms. The Eastern mills, and, so far as can be learned, those in the West are so well booked for July and Angust that it is practically impossible to place orders for the former month, and very difficult for the latter month. For these two months the mar-ket is decidedly strong. Little fall work has been placed thus far outside of the contracts taken sometime since for deliveries beginning on the summer running along through the fall.

IMPROVEMENT IN ENGLAND.

The Speculative Demand for Pig Iron Has Been Decidedly Improved. SPECIAL TELEGRAM TO THE DISPATCH.

NEW YORK, July 3 .- The Iron Age of this date quotes the following report on the British metal markets from London:
Seetch warrants have advanced to 46, under the influence of increased purchases, due in part to larger demand from the Continent for makers' brands, and more inquiry from Amer ica. Cash warrants appear to be momentarily scarce, as late buyers are reluctant to sell. This causes some uneasiness among the "bears," some of whom have covered their recent short sales. Cleveland warrants are also better, having been sold up to £43 3s, and makers' iron is moving more freely. Homattes remain at about £51 % however, in the absence of improvement in the demand for consequence. the absence of improvement in the Jemand for consumption. Ironstone miners' wages have been reduced by per cent, which coupled with a drop in coke, reduces the cost of manufacture of the iron considerably. Dealers report an interestment in the demand for old material, ralls more particularly, and the market is showing a hardening tendency. There is improvement in the demand for steel ralls, and the market is firmer at £4 17s 64@£5 for standard sections. However, the cost of production in some districts is above present selling prices and makers are discouraged. The Forest Works at Pontypridd are about closing, owing to lowness of prices. Copper speculation has been flat and prices for merchant bars have receded to £57 15s. The change is attributed chiefly to the uncertain position of continental holders. Demand for home consumption continues good, as also that from India, and statistics continue favorable. Visible supplies have decreased 9,500 tons during the mouth. Sales of furnace material the past fortnight include 200 tons anaconda argentiferous matter on private

anaconda argentiferous marke on private terms.

Tin prices have been erratic and varied as much as 4% during the week, sales having been made Tuesday at as low as £92 l5s. Heavier supplies are partly the cause of the drop, this fact having caused operators to tire of their holdings and realize. There has also been apparent forced sales with a view to depressing the market in order to buy cheaper later on. Makers are firm on prices for tin plate, but business has been moderate and orders are scarce. Makers refuse to negotiate on other than short date contracts. The American demand has lessened, but improvement is expected on the settlement of the tariff question.

THE MARKET QUIET.

General Feeling of Confidence Prevalls i the Scottdnie District-Work Interfered With Somewhat by the Hill Farm Disnater.

PRPECIAL TELEGRAM TO THE DISPATCH. SCOTTDALE, July 3.—There is no materia change in the condition of the coke market for the past week as compared with the previous week. The same goodfeeling that a symmer depression will not disturb seems to exist. The

week. The same goodfeeling that a summer depression will not disturb seems to exist. The demand is about the same. Shipments has week decreased slightly, but it was adduced by no scarcity of orders but a defect in the forces of workmen at the various plants. The Hill Farm calamity caused unparalieled excitement and many of the cokers rushed to the rescue and volunteered their assistance, thereby lessening the working forces. The numerous works in the immediate vicinity of the disaster have been totally unable to, work in full since its occurrence. In this way the output was retarded and shipment suffered consequently. The works are running to a better advantage this week and an improved showing is expected. The intervention of a holiday may interfere slightly with the week's showing.

Last month was a good one for coke trade. Shipments increased over 45,000 tous. The improvement was general and was the first to give operators encouragement since the big month of January. Almost every week found the shipments increasing. Transportation was good throughout, the car supply being especially good. Several plants that had closed down for three months resumed. Coke prices, at 215, 245 and £265 were well sustained. There was little shading, if any, on circular prices. The condition of the furnaces are about the same. They are all taking coke.

Shipments last week averaged 1,016 cars per day as against 1,074 cars of the week previous. There was a decrease of 100 cars in Western in Pittsburg and Eastern shipments respectively. The shipments were consigned to the various points of consumption, as follows: To points west of Pittsburg, 2,500 cars; to Pittsburg and river points, 1,600 cars, to points east of Pittsburg, 1,200 cars; total, 6,40 cars. For the preceding week the record is as follows: To points west of Pittsburg, 2,600 cars; to pints east of Pittsburg, 1,200 cars; total, 6,40 cars. The

Wilkinsburg, Braddock, Sharpsburg, Greensburg and a number of our other neighboring cities have been sending in orders of late. Last season 21 miles of this pavement was laid in Philadelphia, and supplies were all sent from Pittsburg. This season an equal demand is expected from that city. The fire-brick trade was never better than it is now. The demand from mills and furnaces for high grade brick is unusually active. But no other movement worthy of comment owe planed during the entire session. The attitude in the street is a waiting one on both sides and while the bulls are inclined to feel confident that the July disbursements will oil the wheels of speculation, and a more active and higher market is predicted after the holidays, the bears are watching the railroad situation with more interest and will undoubtedly seek to make capital out of any failure to come to a street wheels of speculation, and a more active and higher market is predicted after the holidays, the bears are watching the railroad situation with more interest and will undoubtedly seek to make capital out of any failure to come to to make capital out of any failure to come to an agreement. The Central Traffic Association having failed to settle the dressed beef ques-tion and referred it again back to the trunk line presidents, a case is expected to result from that action which will afford them an opfrom that action which will afford them an opportunity to point to the demoralization of railroad rates, and by pressure of short sales get the market down again. The sliver legislation now plays no part in the course of prices and the rise which was caused by the first prospect of it has about been lost. The buying of New England extended to Lackawanna, Archison and some others in the last hour, and Imparted some life to the market which had been practically dead during the rest of the day, and the close, while duil, was firm at about the best prices which, however, were generally insignificant fractions from those of the opening. The opening was rather weaker, and early sales 1/61/1c lower than yesterday's closing, then advanced sharply 1/201c, eased off and then held steady for some time within %c range, and closed firm and %c higher than yesterday's closing. The market is being governed mainly by weather conditions here and in Europe.

Corn—There was a very good speciative trade

witnessed in this market. First trading was at a slight advance over the closing prices of yesterday, was firm, very little being offered, and under a good local demand advanced 188 %c, July showing the most strength, ruled steady and closed 42%c better than yesterday. Oats—Were moderately active but unsettled.

There was free liquidation in July by some of the large holders. This produced a weak feeling, and prices after an advance of Werke at the opening receded %c, and the market closed easy.

Very Good Year for Dairy Business Prices Lower. One of our foremost dealers in dairy products spent the greater part of last week in Trum-bull and Ashtabula counties, Ohio, looking up the cheese question. In an interview yester-day he said: "I found a variety of views as to the yield for this season, but have little doubt from what 1 saw and heard that the cheese SXXXX bakers', \$4 25@4 50.
