In Entertaining the Numerous Residents of the Summer Resort.

[SPECIAL TELEGRAM TO THE DISPATCH.] POINT CHAUTAUQUA, July 10 .- Another season is here, and the lake is gayer and brighter than ever. The great assembly, with its daily rounds of lectures, entertainments, school and varied pleasures, is now fairly running, and the hotels at the different points are fast filling with guests. The sun has shone brightly all day, a pleasant relief from the chilly air of yesterday. It has been typical lake weather and all have enjoyed an outing.

The programme of the day was opened with an organ recital by Prot. I. V. Fiagler in the amphitheater at II A. M. Prof. Flagler is one of the pioneer entertainers here, and each recital makes him more popular. This morning he rendered with power and feeling some difficult secections from Mendelssohn

A HISTORICAL LECTURE.

In the afternoon at 2:30 Dr. H. B. Adams, the well-known historian of Johns Hopkins University, speke in the Hall of Philosophy on the "Revival of Geography and the Discovery of America." He reviewed the history of events that led to the discovery of the New World. The idea or the earth's otundity was an old one, and was suggested by Pythogorus as early as 600 B. C.

Columbus discovered America without knowing it and even at the time of his death was not aware of the importance of his discovery. Many thought that the eredit of finding it was not due to Colum-bus, but to Liet Erickson, who touched the shores of New England as early as the year 1000. Mr. Adams took no stock in this, for it was from Columbus that we date progressive history. If we are to look to the original discovery the credit must be given to the wandering fishermen who tound the new land long before the days of Erickson.

COLUMBUS A BIGOTED SAILOR. The speaker was heartily glad that the country was called America instead of "Columbia." It was named after a scholarly geographer rather than the bigoted sailor, who wished to make it subject to Spain and a "feeder" for the slave markets of the Old World. The name America comes from the German and means "Rich in Industry," which is indeed an appropriate

At 4 o'clock Prof. W. H. Sherwood, the famous niquist, gave a recital in the temple. It brought every person of musical inclinations on the grounds and Mr. Sherwood again proved his genius as a great musician. When Chancellor and Bishop John H. Vincent speaks all Chautanqua listens. Upon the announcement that he would leeture this evening a great crowd gathered in the amphitheater. His subject was "To-morrow; a study of the church life of the and he treated it with that profound good sense, that keen practical discharacterizes all of his utterances. His speech was not that of the ressimist. He looked forward to a great future for the erimination, that magnetic force which

"I am sorry," said he, "that I can not live far into the tweotieth century. I almost envy the young men o to-day who shall live to unlock the portals of this City Railroad collided; four men were killed brilliant future." He referred to the great and 20 injured. advances in science, education and inventtions, the luxuries of to-day. This was sufficient proof that we were living in a better The church of the future will be more liberal than that of to-day. Its followers will put aside many of the binding creeds and forms of church life and learn to worship unfettered the life and Jeeds of the life of Christ, bigottem and factionalism will be things of the past and all Christians will be united in one boly catholic Church. The good teeling that prevails to-day will be widened into a universal brotherhood to juriber the interests of morality and Christianity. The Chancellor was repeatedly interrupted with bursts of appliance, Chaptauquens have only one complaint to make with Bishop Vincent, and that is an old one. He does not appear upon the platform as a speaker often enough.

PONT OF SPAIN, July 10 .- Further particulars regarding the fire in Pont de France, in the Island of Martinique, are to the effect that it extended over an area of 90 acres, and that all the principal buildings, including the Palais de Justice and Cathedral, were destroyed. At the last moment, when it was too late, dynamite was employed to arrest the progress of the fire. Terrific explosions were heard, and whole blocks of buildings were seen to fall, killing

some and wounding many persons.
