The last "hot wave" proves to have been just the thing for which landlords at the seaside resorts were all so ardently sighing. It has set things "booming" and "kiting" all along the shore from Cape Cod to Cape May. The rush of guests and visitors to the various resorts on and Island and along the Jersey shore during the past two or three days is almost unprecedented, and if the rush continues, flitters will have to be satisfied with cramped quarters at the popular resorts. The mountain and lake spots are attracting pleasure seekers who prefer rural quiet to ocean hustle, and a long and pleasant season northward is assured.

## A SURFEIT OF EXCURSIONISTS.

Ashury Park Overwhelmed with Single Day Visitors-Educational Matters. SEPECIAL TELEGRAM TO THE DISPATCELS

ASBURY PARK, July

19.-This has been a

great week for excur-

sions; and the festive

and, after partaking of a hearty lunch from his pasteboard box, has departed, leaving trails of peanut shells, paper bags, boxes and fragats of his chicken sandwiches to mark his entrance and exit. Every day this week has been marked by the sudden advent of from \$,000 to 6,000 visitors for a day's pleasure.

As soon as they arrive, wholly disdaining the stages and electric cars, they make a bee line down Cookman avenue to the beach where down Cookman avenue to the beach where their mirth and jollity are unrestrained. Though it would seem that every one, within a day's ride, has at some time, in its 20 years' history, been at Asbury Park, yet many of the excur-sion througs from the cities are distunzed and confused when they alight from their trains and notice the solid blocks of brick business houses around Railroad Square. Then ensues a game of follow-your-leader with, often, sur-prising results. All desire to get to the beachby the shortest route and all spurn other means the abortest route and all spurn other means opreaching it than by walking. So, it has hap-pened, that crowds of these festive pilgrims have inquired for the beach after walking a in camp. mile through the hot sun, back in West Asbur mile through the hot snn, back in West Asbury Park. Like a caravan in the desert, they have been turned about toward the briny casis which they sought. Still others follow an ignorant but haughty leader, who will ask favors of no one, around through the Southern part of Ocean Grove or North Asbury. After a weari-some parade of an hour or so, they at last bring up at some point on the beach, and for all that day the self-assumed leader is the hero of the occasion.

THE DANCING FROLICEING VISITORS. Nearly every excursion contains large parties who want to dance, and after buffeting with the sporting waves and fighting each other with handfuls of sugar-brown sand, they wander off in search of terpsichorean pleasures. The hotel men do not relish the presence of the great multitudes of temporary sojourners and great multitudes of temporary sojourners and will not allow them the use of the hotel orchestras or parlors or ballrooms. Yet there are numerous halls about the place which are let at very low prices, and in these the happy excursionist and his imamorata dance merrily until time to board their train for home. The excursion, growing more and more numerous every senson, appear now as if they might soon cause serious consideration on the part of the authorities as to whether their presence is desirable or not. This question is already decided negatively by leading hotel means and the wealthy costage population. The excursions are largest and most numerous during the height of the senson, when the place is most crowded. The little money spent by these day visitors is garnered by the tail-reade batter blich corrected by the tail-

in front of the main hotel, at the 100t of the mountain. The directions for drinking these health-restoring waters as advised by the resi-dent M. D.'s are as follows: Two glasses about one hour before meals, with a half-hour's jaunt up the mountain between each glass. Each morning about 6:30 the tide sets in to-ward the spring and from that on a continual stream of pretty girls, accompanied by a mother, a father, a sister or brother, in the ma-jority of cases some other girl's brother, keeps up until about 9 o'clock. Three times during the day this routine is gone through with. From information received from "Joe," who has presided over this spring for the past five years as water dipper, he says he sorves on an average of 1,900 glasses per day. Hesides this there are a great many guests who have the water sent to their rooms. The sulphur water, as a general rule, is indulged in after supper. The scarcity of young men at the Springs is becoming alarming. In three sets of lancers the other evening there was only one man. The hotel management will soon have to take some action. ONE of the proverbially uncomfortable things about summer hotels is the small size of the rooms. As Judge Thompson, of New York, was commenting on this feature of hotel life the other day he said: "The small rooms re-mind me of what Lorenz Salls once said of a turkey. He was a great eater and told a friend that the turkey was a bird he didn't like, be-cause it was too big for one person to eat and not big enough for two."

The Holdzkom House having come under the man-Holdshon House having come under the man-agement of old Pittsburgers, Frazier & Jami-son, their friends are flocking to this resort, and the place once so dearly cherished by a good many Pittsburg "fishermen" as a haven of refuge from the gentler sex has been invaded by the enemy, and the ancient beachside hosticric wherein these lone fishermen were wont to sit of an evening to mend their nets, listen to the pleas-ant gurgle in the neck of their bat box and concoct those wonderful "fish" stories given to the world later in the season, has given place to modern and comfortable improvement. The glories of the "Buck" bath have departed and in the stead of this "splendid disentagle" from the meshes of the balt box mentioned, the more sober and sedate bathing suit is seen. It has been two years since any military organizations were here. To-night a grand ball took place at the Stock-ton and another one at Congress Hall. They were well attended, and among the throng of participants and attendants were many of the argo number of Pittaburg people here. There are more Pittaburg people here than there have been in former sensons, mainly because there are more people here from everywhere. Among the several new attractions which have been recently added to the already un-equaled' list is a first-cluss amateur baseball club, which will play games frequently during the season with clubs from the vicinity, and fine inclosed grounds at the inlist have been se-cured. The team promises to be a feature in the sports of the shore during the summer. Another amusement now at its height is the mooilight excursion out to sea, and parties are made up from the hotels quite frequently to indulge in them. Lawn tennis is also more in vogue now than usual; and the sport is be-coming quite common, courts having been laid out in a number of the faws of the principal hotels. Bicycle riding is also a leading pas-time, the safeties of course being the favorites. THE FITTSBURG GROCEERS.

If more were expended in Pennsylvania, and more in Pittsburg, the in-crease from that section would be quickly noticed. Cape May will never become an excursion re-sort to the extent of some other towns, because it will never cater for this distinction. Its pa-tronage will always consist mainly of the better classes of society, and its preparations for business will always have this in view. It has now one of the finest hotels on the coast, and within the next ten years it is expected that great changes will take place, and that business will be largely increased. Its resident popula-tion has increased 34 per cent in five years by the present census. In this matter Cape May is essentially different from all other resorts. It is the most conservative and has a summer cottage population which includes some of the very best people in the country, many of whom have been regular visitors to the Cape from childbood.
