Roe, of the United Miners, and it was unanimonity decided to hold out for the advance. It was decided also to make the men who had returned to work as good an offer as they had received from the compant. Out of 3,000 men formerly employed in the region, there were only 200 to attend the meet-ing, the remainder having sought work clas-where. It was reported that agents were even now there hirling all the men who wished to work, for the river and Blake district, and pay-ing their transportation.

DRUNK ON ELECTRICITY.

KILLED IN THE HOUSE.

A large white spitz dog, owned by Mr. Probst, 71 Magee street, was poisoned Mon-day afternoon while chained to the stairway in the hall of the house. Mr. Probst was in Cleveland at the time. Before going away he had hired a little boy to keep the dog

tied in the hallway in order to save him from the fatal "button." The little boy had taken the dog out for a run in the afternoon and then tied him up in the hallway, after which he went downtown. When he returned the dog was dead. The dog wore a muzzle.

Another instance is where the poisoner passed the button through the open window of a house which held a pretty canine pet. The dog took the deadly dose and carried it to her litter, in another part of the premises. When the owner afterward looked at the shaggy-coated family the mother and two puppies were dead and those alive were

whining piteously. In another case buttons were given to two pet dogs sitting in a doorway. The button fiend watched his opportunity, and during the temporary absence of the mistress of the house placed his poison on the premises. WILL GO TO COURT.

George Heaps, the Fitth avenue grocer, owns some fine for hounds. He has sent them to the country, but retained a fine stable dog, which he muzzled. This dog he valued highly, as it always remained with his horses, and when anything happened in the stable always gave the alarm. The dog is now a corpse. He died with his muzzle on in the stable. Some of the residents of the hill district will test the right of the poisoners to invade their premises if the respassers are caught in the act. Reports of such cases as these are heard

in all parts of the city, and much indignation has been expressed, both by owners and non-owners of dogs. They do not come under the provisions of the law against dogs, which Mayor Gourley said yesterday applied only to dogs "running at large." The Mayor said also that he was convinced that the law does not justify the present in-discriminate and wholesale slaughter of dogs, and that it contemplates that the dog shall be caught and then taken to some cer-

tain place and killed.

HE KNEW AN OFFICER. The dog's instinct, however, has more than once balked the policeman's astuteness. One day last week a lady was going down Fifth avenue, followed by a little brown pug. A policeman in citizen's clothes caught sight of the animal, and he ciothes caught sight of the anima, and he started to railroad the canine into the brute paradise, "Come, doggie," "good doggie," "doggie," "doggic; here, doggie," sang the officer, following the lady down the avenue. and throwing a luscious-looking "button" after her pet. The pug turned around, smelled the "button" and then looked at the officer and ran on. The officer continued to follow, and a couple of blocks away he made another attempt. "Doggie, doggie," war-bled the officer, as before, dropping the but-ton again on the sidewalk. But "doggie" evidently was of high degree, for he trotted on and balked the officer for the second

time. The latter then gave the job up. George Kramer, the saloon keeper at 364 Fiith avenue, has a dog which he would not part with, he says, for a mint of money.

One day last week an officer dressed as a citizen, a friend of Kramer's, was drinking at the bar in the saloon with several com-

Posted conspicuously in the Union depot is a special bulletin issued by the signal service bureau of the War Department giving the weather forecast for the next 24 hours after the weather forecast for the best anours after the time of the issuance of the bulletin. This would seem like a good thing for the Government to give travelers warning of the probabilities of the weather for 24 hours in ad-vance, but an inspection of this bulletin shows it to bear date of April 18.

WHAT PEOPLE ARE DOING.

Some Who Travel, Some Who Do Not, and Others Who Talk.

-A party of Wellsburg, W. Va., gentlemen are in the city on business, and stopping at the Seventh Avenue. Incidentally, of course, they are taking in the Homewood races. The party consists of D. McCielland, James M. Stonecipher, M. L. Wells and W. J. Bell.

-J. M. Atkinson and J. A. Moffett, of Chicago, who are representatives of the West-inghouse interests in that city, are at the Hotel Duquesne.

-C. A. O'Brien, Esq., of the law firm of Yeager & O'Brien, arrived in Queenstown, on his way to England, yesterday morning. "Blees you, there are charming little married women now who come to me and thank me for letters written to their fathers in schooldays,

I rather enjoy giving him his walking orders, he always looks so sheepish." "Your long experience enables you to detect readily the style of person you have to deal with, does it not?" "Oh, yes, indeed; but appearances are often deceitful, and I have to be continually on the firaud we have; women who come here and tell us the most woful tales and excite the sym-anty of the officials until they ret them passes, only to find out afterward perhaps that they were professional beggars. How provoked it does make the men to be taken in that way. Sometimes when their pitcous tales don't work they march up to the officials until they considerable money in the transaction." Really it is surprising how many women carry wines and brandy with them, not particularly the traveling class, for whom there would be an excuse, but the suburban ladies who come in shopping. "And the school cirls-dear, Oh dear-they don't imbibe, too, do they?" "Oh, no, but they keep one busy looking after them. Mr. Butler can tell you about their tricks, though, better than I can." force, as she did. A man never would be guilty of such a thing, although some of them are in-clined to be cranky. This room, as you know, is only for ladies, and when gentlemen accom-pany ladles in here I have to inform them that they can't remain, and often-times the inter-view is amusing. Sometimes they think they can't stay because they are not dressed in fashionable clothing, and proceed to give me an inventory of the store clothes they have in their trunks and disclose the contents of their pocketbooks for my inspection. Again, when they are married men, they take it greatly to heart that they must be separated from their families, and really act as if they were never to see them again, but the severest test to my authority is the country groom who can't endure the thought of leaving his newly made bride for an instant." pelled to pass an examination as well as novitates." "The enactment of a license law would be a good thing," said Joseph Stillberg, the Fifth avenue architect. "The matter should be laid before the Architects' Association of this city and some action taken in it. All large cites are now in a period of cestly building and arch-itectural thoroughness is required. There can be no doubt that the examination of architects would do a great deal to elevate the profession and give it a higher and stricter code of ethics. Now any person who desires to do so may enter the profession. The result in this city and State has been bad designs." Micense law would be an excellent thing for Pittsburg. This city is far behind in archi-tectural beauty. Incompetent men have re-duced the standard till the profession in Pitts-burg is down to the level of a "scab" business. Put the practitioners through an examination and three-fourths of them will fail. No more effective means of promoting true progress in the art could be devised than the establishment of a State Board of Architects to examine all applicants and issue licenses to those who are qualified to practice the profession of archi-tecture."

use on the Pleasant Valley Railway wear out much sooner than those on the Second avenue railway. Ex-Alderman Reilly was asked con-cerning the matter, and he stated that such appeared to be the case. The electric motor as applied to all street railways is a rather complicated affair, and in the best there is considerable power lost that would be obviated could the application of power be made more direct. There is a wide field for ingenuity in this respect, and a large fortune awaiting the man who succeeds in simplifying construction. In open meeting, they indorsed the action of Sun-day's meeting, whereat it was resolved not to allow any of its members to work on material for W. H. Brown & Sons. The firm declined to sign the scale in common with the other em-ployers for the reason that it had decided not to continue boller making, but to have its work done by other shops. The men seem to regard this as an excuse, and de-clared last night that none of the union men would put a hand on bollers for W. H. Brown & Sons. A well-known employer, who was invited to explain the position of the firm, told the meeting that W. H.
