

Placed Under Arrest. are going to have geological survey of the county made, and go about the work of looking for mineral in a scientific way. It is said that another big reduction in freight rates on ore shipped from this place over the Atchison, Topeka and Santa Fe Railroad is to be made soon. Since the last reduction chimests have increased could NEW YORK, July 27 .- Captain Morgan, of the steamer Chicago, reports that the returning cattlemen, of whom there are 28, on board broke into the forehold and stole a part of the ship's cargo of beer, etc., during the voyage from London to this port. They also broke down the after-bulkhead reduction shipments have increased consid-

erably, and another reduction will make still larger shipments possible.

ADDRENN POTENT YOUR Horse. Horsest of ing be-ing and operation the ing and operation th

has been opened below Dead Man's Flat, near Downieville, on a claim that has been located and held many times since 1851. The numerous locators of the claim failed to make it pay; because the bed rock is lower than the river, and they could not handle the water. The present holders of the claim put in a force pump and controlled the water till they reached the bed rock, where they took out a quantity of coarse gold by shovelling under the water. There is a long stretch of ground on the flat that never has been worked, but with the force nump all can be mined. The hydraulic mines of Siskiyou county are producing well this season. About \$30,000 was shipped from Yreka to this city last week from the Salmon river district, and the Kismath river miners are

Mouroe Anise, of Amador, while out hunting stock in the vicinity of Quartz Mountain, found a ledge that promises to give a boom to mining in that section. The ledge is four feet wide in top, with slate foot wall and almost vertical hauging wall, has been traced 1,700 yards and shows free gold and sulphurets in paying quantities.

Effect of the New Silver Law.

TUSCON-The silver bill will have in wonderful effect on the prosperity of this Territory. The low price of silver for the last three years had the effect of closing down many of the mines. But now the small miner can work his properties, and, with facilities near at home for the treatment of these ores, he can do well. Already we hear of the contemplated occupation of smelters in various parts of the country, and this is what will bring this country out and make it the silver-producing territory of the Union. The great mines of Tombstone that have been shut down for the last two years, will no doubt now be pumped out and operated. Mr. O. W. Stunt, just in from Hassayampa district, says they have just found an old mine that they have named Aztec. The ore mills from \$20 to \$25 cold; concentrates carry \$10 more in gold, \$40 in silver and about 5 per cent lead to the ton. They have cleared a part of the old tunnel and found some sione hammers and other tools, and also charcoal. The cut they think is quite long. The mine is only 12 miles from Prescott, and many miners are going out to see how the miners of pre-historic times worked mines.

A New Enterprise in Idaho.

IDAHO CITY-A new enterprise has been commenced by the Elmira Company, of Banner. It is the construction of a tunnel from 400 yards above the mill to the Banner mine. Work was started yesterday. This tunnel will prospect and develop at good depth the Panamint, Star of the West, and two other mines before the objective point is reached. The Banner will be tapped 583 feet below the surface, according to the survey. As this tunnel will be when completed 3,500 feet in length, and run across some of the richest mineral belts in Southern Idaho, it will undoubtedly discover some blind ledges. The tunnel will hasten the thorough development of the great Banner, Archie Mountain and Eldorado districts. several miles apart, but on the same belt. The veins run in a northeasterly and south-westerly course and the Banner district, from which the Elmira mill has yielded such large returns during the past 12 years, is the center district. A few tons of ore from the surface of one of the Eldorado mines crushed, in the Elmira mill last year paid a handsome profit, which is saying considerable for a silver mine, as that class of mines seldom yield ore in paying quanti-ties until considerable depth is attained.
