LAND SECURITY FOR CIRCULATION. From a special article in this issue, it will be learned that Mr. W. K. Freid, whose advocacy of the use of agricultural land security has been heretofore referred to in these columns, has carried his project to the extent of issuing a pamphlet and commencing the sale of a convention for the organization of a party on that basis.

THE DISPATCH has previously recognized that the conservative and carefully regulated use of real estate securities as a basis for national banks has much about it that is worthy of consideration.

A COMMON ERROR. In an article on the cost of the labor in a ton of pig iron, the esteemed Baltimore Sun bases a free trade argument on an error which is very common but none the less vital.

foreign competition, because the duties on refined give them a margin over the duties on raw sugars of a cent and a half.

It is true that the change made in the House of Representatives Committee was one that ought not to have been made.

It is a little puzzling to decide whether Senator Quay's amendment to the sugar schedule proposed last week, was for the purpose of giving some foundation for the misrepresentations referred to, or to show that the Sugar Trust is not satisfied with the Senate bill.

It should be laid down as a principle that nothing must interfere with the public duty of a radical reduction in the tariff schedule which places an excessive cost on this article of universal consumption.

OSCAR WILDE declares that he is tired to death, he is advertised. The public will enthusiastically welcome that gleam of common sense on Oscar's part.

THE demise of the Omaha Republican is announced from their inability to pay their debts and keep running. The party flopped around on both sides of most lines, but maintained a consistent record as an advocate of the Union Pacific Railway, it is a natural conclusion that in this case the wages of sin have been death.

MR. GLADSTONE frequently marks catalogues of second-hand books, and writes a note at the top requesting that the volumes indicated be sent to him. One bookholder, proud to possess such a catalogue, has written in his own handwriting: "I have a copy of the book you want, but I am sorry to say it is not for sale."

FROM Chester to London, from London to Antwerp, the train goes the night.

There is nobody on board but can read that emphatic prohibition in some one of its expressions. But not one of the four languages could well be omitted here.
