

An English Syndicate Has Secured Extensive Mines in That State, and It Proposes to

MANUFACTURE THE PLATE THERE

If That Feature of the Tariff Bill Succoeds in Getting Through Congress as It Now Stands,

ALL COMPETITION CAN BE DEFIED.

According to the Estimates of Those Interested in the Scheme.

(SPRCIAL TELEGRAM TO THE DISPATCE.) NEW YORK, August 3 .- The following reports have been received from the leading nining centers of the West:

SAN FRANCISCO-The Iron Mountain mine in Shasta county was abandoned some years ago by a company that went broke trying to develop it. Recently it was reopened and last month's clean up amounted to \$24,000. Improved methods of mining and milling have made the difference between profit and loss. With some further improvement in processes, 3,000,000 tons of surlferous iron pyrites in the Meadow Lake district will be worth working. The Dromedary quartz mine on Wolf creek, Nevada county, is another of the old claims abandoned years ago. In 1867 it produced some rich ore, but it has not been worked for a long time New owners are reopening the mine on a business basis. The Silverado mine on Mount Saint Helens, the home of the "Silverado Squatter," has been idle for some years, but is now being worked again at a profit. The Palisade mine, on the same mountain, is running a 20-stamp mill and making money. A gold nugget worth \$312 was recently taken from a pocket claim in Shasta that has yielded over \$3,000.

An English syndicate called the San Jacinto Estate, limited, has bought the old San Jacinto tin mine and 50,000 acres of land in San Bernardino county, and it is asserted that the company will put up a plant at a cost of \$250,000, open up the mines, build dams and establish a mining town on a big scale. There are over 50 tintown on a big scale. There are over 30 in-bearing veins on the property, and the ore is said to contain 10 per cent of tin, which is wonderfully rich, the best ores of Cornwall running only 2 4-10 per cent. The prop-erty was in litigation for 25 years, and the title was not settled until 1988 I at the dimension of the medication erty was in litigation for 25 years, and the title was not settled until 1888. In the directorate of the syndicate appears the names of Lieutenant General Sir John Stokes, J. R. Frances, of Swan-ses, and N. J. West, of Cornwall. The purchase price of the property was \$400,000, and the capital of the company is fixed at \$2,525,000. There are 500,000 shares of stock, which is unloaded on the general public at \$5 a share. Debentures will be issued at 8 per cent to the amount of \$625,-000, payable in five years. If the duty on tin plates should be doubled as the iron men are praces should be doubled as the from men are urging in Congress, the syndicate would go into the manufacture of plates, which can be made here at two shillings per box less than the cost of imported plates, and have a margin of \$2 40 a box in freight and duty. All these figures of prospective profits are based upon the asymptotic that the mines All these figures of prospective profits are based upon the assumption that the mines are as represented, concerning which there is some doubt. For the last 15 years the owners have been trying to unload the property on somebody. At one time a bounty was offered by the Government for the dis-covery of tin ore, and the San Jacinto people tried to get it but the Government exmerts sent to examine the mine reported experts sent to examine the mine reported dversely which seems somewhat singular if the ore carries 10 per cent tin. A vein of goldbearing quartz, discovered seven years

who will soon put a large force of men at work and start up the smelter. Gold Amid the Silver.

TUCSON-The Thesen 'smelter is now running along nicely and seems to be a perfect success. The first consignment Facts of Interest Regarding Petroleum Production Taken From of copper ore in carlots arrived at the smelter yesterday morning. This was the first shipment from the Silver Bell district. THE DISPATCH SCOUT'S NOTEBOOK. Review of Extensive Operations in the Mount Morris Field.

THE BEGINNING OF & NEW TOWN-

AMONG THE OIL RIGS.

first shipment from the Silver Bell district. A big strike is reported in the Duquesne Mining Company's mine in the Harshaw district. They got through the zine ore and struck a very rich copper smelling ore. Mr. J. C. Waterman, from the Baboquivari mining district, reports that the Octopus mine is now receiving the most attention in that district, and it is now running ten stamps day and night and five more will be started in about ten days. The Octopus has 20 stamps in position, but has not the power to run them all. The ore from the mine is about half gold and half silver and about 1,500 pounds of concentrates a day are being worked. Its future prospects are very good. Considerable excitement was occa-sioned in Nogales the other day whea the report got abroad that Roy and Whitcomb had just completed an assay of ore from the St. Patrick mine and found that it run S37 50 in gold. The ore was from the 130 fobt level, and there is an abundance in sight. The St. Patrick is a silver mine and this is the first gold assay that has been made. INFECTAL VELEGRAN TO THE DISPATC MOUNT MORRIS, August 3.-The Mount Morris oil field embraces a larger area of productive territory than is generally suposed. It lies chiefly in Monongalis county, W. Va., and extends south into Marion county, the north end reaching into Greene county, Pa. E. M. Hukill's block of property is supposed to extend the entire length of the field, being about 15 miles in length, and in round numbers containing about 20,-000 acres. In this block of property there is a distinct gas field lying par-allel with and on the eastern side of the oil belt, which is thought by those conversant with the subject to be one of the best gas fields extant, and which should pos-

seas the best staying qualities, for the rea-

son that the sand is very thick and the ca-loric fluid is found near the middle of the

strata. The other operators beside Mr. Hukill in this field, who are working inter-

vening territory, are the Chartiers Oil Com-pany, the Seuth Penn Oil Company, the

Forest, the Mountain State Oll Company, the Jennings Oil Company, J. M. Patter-son, Fall & Shay, the McCalmont Oil Com-pany and the Hardly Able Oil Company.

None of these people, however, hold proper-ty to any considerable extent in this field, the most of it having been covered by the pioneer Hukill before the others got there.

WORKING UNDER DISADVANTAGES.

WORKING UNDER DISADVANTAGES. This field is somewhat at a disadvantage, being 10 miles from a railroad, which re-tards work for lack of facilities in getting supplies, but operations are active notwith-standing. Mr. Hukill is running 17 strings of tools, while the other companies mean-tioned are also working actively in propor-tion of their holdings. The production of the entire field is, nominally, 2,000 bar-rels per day, and at the present rate of drill-ing this amount will most likely be in-creased.

NEW WELLS UNDER WAY.

miles west of present developments, which is a wildcat pure and simple. Park Brothers will start drilling a well

the beginning of the week on the Major Hancock farm, about 1,000 feet south of

Launcelot station. On the Galloway lease Mrs. Davis' farm, unknown parties are

building a rig. Wildwood is beginning to assume the characteristics of a typical oil

field, and in a tew days a new oil town

called Semple, will be running in full blast. It is located at Launcelot station,

where most of the supplies for the field are shipped. At present there are two tank

shops, a hardware store and lumber yard, A

general merchandise institution, an im-promptu restaurant and a barber abop. There are three or four boarding houses, six or eight dwellings, a feedstore and billiard room being erected, while a machine shop will soon be added to the industrial interest.

Good Well at Jack's Run.

which naturally increased its production. This venture is a fac simile of the old Straw

JACK'S RUN-The Stone Quarr well on

Some Strikes of Lond Ore.

DENVER-Mining in and around Leadville is as active as ever. Some good ore is being shipped from the north drift of the Tip Top, while the iron ore in the Elk property is improving daily. A report is in circulation of a fine strike of lead carbuncle circulation of a fine strike of lead carbuncle ore in Tennessee Gulch and a fine streak of lead carbuncle lies uncovered in the Olive B. Returns from a small mill run give over 50 per cent, lead and 30 ounces silver per ton. On Saturday last ore was met with in the shaft of the Cleveland that brings re-turns without development of 26 ounces silver, 52 per cent lead, and 6-10 of an ounce in gold. The new shaft of the St. Kevin has reached a depth of 360 lect. as reached a depth of 360 lect.

Some of the Yellow in Michigan.

ISHPEMING-A very rich strike of goldbearing quartz was made yesterday afternoon at the Peninsula mine, seven miles southwest of here. The quartz carried nug-gets of free gold, some of which are as large as a pea. The Michigan gold mine has also struck a pocket of very rich rock within the past few days.

AN IMMENSE TURTLE CROP.

Large Numbers Captured Daily by Sportsmen at Kittanning. INFECTAL TELEGRAM TO THE DISPATCE.

creased. The largest well ever struck in the Mount Morris field at the start produced over 700 barrels per day, while the average well makes from 400 down to 50 barrels. This, it must be remembered, is at the start off. The well on the E. W. Core farm, owned by Hukill, and completed this week, proves to be too far west and was a failure. The rig, however, will be moved farther east and another well drilled immediately. The same party has two wells about ready to enter the pay, one on the C. Johnson farm and the other, 104, on the A. Sutton farm. The Chartiers Oil Company com-KITTANNING, August 3.-The turtle crop here is an unbounded success, in direct opposition to the grain crop in many parts of the county. The streams in which this attractive game is captured have, for the past month, been besieged almost daily by sportsmen from this vicinity, and in every case with the most gratifying re-sults. From half dozen to two or three dozen of the snappers have been brought in by these parties, the weight of the luscious mud fruit generally averaging from two to ten pounds, though some have turned the scale at 15, and even 25 pounds. The method of capture is usually with hooks, but the gun is used sometimes, and a favorite and effective process, where the surroundings will admit, is to dig a trench through a dam, drain the water and delve in the mud. Though most of these reptiles are said to be exceedingly vicious and expable of giving dangerous wounds, yet fearless catchers have been known to wade with bared legs all through these turtle-infested mud beds, and every now and then bringing a huge snapper to the surface by simply grasping one of his front paws with the unprotected hand, and yet they have rarely been known to receive a bite. past month, been besieged almost daily by farm and the other, 10%, on the A. Sutton farm. The Chartiers Oil Company com-pleted a well on the J. C. Morris farm re-cently good for 25 barrels. The South Penn Oil Company are drilling on the Var-ner farm in the southern part of the field. This well is in advance of developments and the southern with some interset. the outcome is awaited with some interest. NEW WELLS UNDER WAY. The Mountain State Oil Company are drilling two wells on the Wildman farm, and when THE DISPATCH representative was paying his respects to the company they had a serious fishing in one of them. The two most advanced wells in this district, on the South End, are in Marion county, one on the Frank Arnett farm and owned by E. M. Hukill, and the other, owned by the Hundred Foot Oil Company, on the Pritoh-ard farm, south of the Arnett. The latter well, at last accounts, was laboring with a bad fishing job.

hand, and yet they have rarely been known to receive a bite. Of the different places for catching the wary turtle, in this neighborhood, Buffalo creek about six miles from here has long enjoyed a flattering reputation, but this year it has exceeded all former records, and it remained for a gentleman living in the neighborhood of that stream to distance all neighborhood of that stream to distance all etitors in the size of his single capture. rter had the pleasure of meeting a veteran competitors in the size of his single capture. It is stated by a reliable evewitness, that the gentleman alluded to, shot and wounded a turtle a couple of days ago, which he afterward succeeded in capturing, after a hard fight, that weighed exactly 68 pounds. operator and scout, and after discussing oil operator and scout, and after discussing oil matters in general, the conversation was directed to the Mannington field, which is Mt. Morris' nearest neighbor. When the scout remarked, by way of comparison of the two fields, that while Mannington might prove of greater area, Mt. Morris seemed to produce the largest wells. There was no accommodating date engraved on his back, nor the initials of George Washington, or other lamented patriots, to indicate the age of the huge reptile, or his aristocratic connections, or rather acquaint-suces, but he is regarded as the patriarch, and ancestor of all the turtles in this neigh-In the Wildwood Region. borhood. As ages go, he must have been old enough to enlist, when the first call came for troops to repel the British who objected to the Boston ten party.

THE PITTSBURG DISPATCH, MONDAY, AUGUST

McCalmont Oil Company, on the Swinck

farm, completed a good well recently, of which but little is known. The first five

days, according to the pipe line runs, the well produced over 200 barrels and is now making 125 barrels a day. This well seems to widen the belt in this locality. Two

more rigs are building on the same farm.

Brennen & Co. on the farm, adjoining the

The Situation in New Mexico.

SILVER CITY .- The strike in the Good Luck at Lone Mountain is not only better than the owners had dared to expect, but is the best strike recently made in this county. A few weeks ago some very rich ore was found on the surface of this claim, and the discoverer thinking that it would not be likely to hold out, sold it for a small amount. The purchasers went to work and besides taking out several thousand dollars worth of ore, have in so doing exposed a large amount of rich ore. The ore body bears every indication of being permanent, and if it should prove to be so, Lone Mountain may yet rival Georgetown, which is the largest producer in New Mexico. The two camps are about 15 miles apart and it is believed that there is a rich mineral district between them which has, as yet, been undeveloped. It has been shown that large bodies of copper, sinc and iron lie between these two camps in the Hanover and Santa Rita districts which have been developed to a considerable extent, but greater results are expected from the section in which camp Vellins is situated. Lone Mountain has not been figuring prominently. Last year the production of the camp was not quite \$7,000. The production of the Good Luck for a month past has been more than the entire camp produced last year and other mines are promising large returns. The mineral is there and night have remained for years to come if a cropping, which bappened to be in just the right place, had not been discovered. So it is with camp Vellus. The mineral is there, as is undisputably shown by the surface indications, but the right place to get at it has not yet been found. John M Wright has purchased the Boise City and Seattle mines in the Silver Creek district for the Last Chance Mining Com-pany, which purchased the Last Chance ming a few weeks ago. Property on Silver creek is in demand, more sales having been made in that district this summer than in any other district in Southwestern New Mexico. A contract has been let to mine 1,000 tons of ore in McKnight's Homestead mine at Gold Hill. The mine is being worked under lease and bond by W. C. Tonkin & Co., and the ore will be milled in the Gold Hill Custom mill, which was re-cently completed and has been running only two weeks.

Developing New Territory.

IDAHO CITY-Henry Whitney, superintendent of a group of mines at the Head of Muddy, near Pioneer, is expecting the machinery for a 20-stamp mill from Boston. Near these mines William Sweet is developing four other very promising properties that are under bond to a Boston properties that are under bond to a Boston company. If he succeeds in closing the sale, and indications are that he will, another mill of large capacity will be ordered right away. At present there is not a mill in the district although there are several good mines. Another ex-tensive body of gold ore has been discovered in the Washington, so the mill will resume crushing again in a few days with a pros-pect of being able to run steadily the re-mainder of the summer, if not through next mainder of the summer, if not through next winter. H. T. Wright has taken a working bond on the Chickamon mine, five miles east of here and will commence work on it next week. It yields the richest surface rock of any silver nine in Idaho, and it is expected it will develop into a good and large mine and be sold before the close of the year. The ore will be sent to Denver for reduction. The big copper mine at Houston, on Lost river, has been sold to Eastern capitalists and is ander the superintendency of Frank Brown,

NEW CRUISER'S TRIAL TRIP.

The San Francisco Steams for Five Hours and Behaves Admirably. SAN FRANCISCO, August 3.-The new

cruiser San Francisco made her first preliminary trial trip on the bay this afternoon. She steamed for five hours at an easy rate of speed, and according to the statements of her builders the trip was thoroughly successful. No attempt was made to force her, the only object being to give the new machinery a preliminary test. Her speed under halt pressure with the engines making a maximum of 66 revolutions per minute was ten knots per hour.

The trial will be continued on the bay during the coming week, and the cruiser will probably not start to the Santa Barbara hannel for her official trial trip before August 11.

Irmay be true what some men say. Ir maun be true what a men say." **PUBLIC OPINION** endorses Sapolio.- * It is a solid cake of scouting soap...

For many years SAPOLIO has stood as the finest and best article of this kind in the world. It knows no equal, and, although it costs a trifle more its durability makes it outlast two cakes of cheap makes. It is therefore the cheapest in the end. Any grocer will supply it at a reasonable price.

entanglement, we say-We are not asking your confidence on \$2.00 cheap prices for unreliable goods, but just prices for de-GENTLENE pendable clothing. We manufacture it, and by

perience has made apparent, we seek to inform you just what you are buying-by slips in the pockets, by opportunity for return of the goods, and by a guarantee of the quality. Nothing but superior clothing will stand such fair dealing. 2,000 styles of goods for to-

measure work.
